There were two opera seasons at Covent Garden. That in the spring opened May 3rd with a brilliant performance of "Tristan," in which the principal parts were sustained by Marie Wittich and Anton Burger, with Kirkby Lunn as Brangäne. Then came two cycles of "Der Ring des Nibelungen," conducted by Hans Richter. In "Rheingold" Friedrich Braun was heard as Wotan, Josefina Reinl was the Fricka, Desider Zador the Alberich, Wilhelm Raboth the Fafner, and Paul Knüpfer the Fasolt. The presentations of "Die Walküre" were notable for the reappearance of Milka Ternina as Brunnhilde and of Clarence Whitehill as Wotan. In "Siegfried" one saw Georg Anthes in the title rôle, Marie Wittich, and at the second performance Johanna Gadsdy, as Brunnhilde, and Anton van Rooy as the Wanderer. Ternina and Anna von Mildenburg distinguished themselves as Elisabeth in the performances of "Tannhäuser," in which Anthes sustained the title rôle; and in "Die Meistersinger" Gadsdy was the Eva, Anthes the Walther, and van Rooy the Hans Sachs. The revival of "Der Fliegende Holländer" met with public approval, especially with Emmy Destinn as Senta and van Rooy as the Dutchman. Gluck's "Armide," which, though composed in 1777, was first given in England on July 6th, was the artistic feature of the season, with Lucienne Bréal as the heroine. Three other works were added to the Covent Garden repertoire. Poldini's "Der Vagabund und die Prinzessin," in which Percy Pitt made his début as an operatic conductor, and Cornelius's "Barbier von Bagdad" were produced May 11th, and later came Jules Massenet's semi-sacred "Le Jongleur de Notre Dame." Ballet was also revived, André Messager's Parisian success "Les Deux Pigeons" being given June 21st. Tchaikowsky's "Eugene Onegin" was revived, with Destinn as Tatiana, Kirkby Lunn as Olga, Ivan Alchevsky (who made a very successful début in "Faust" on May 10th) as Lenski, and Mattia Battistini in the title rôle. "Don Giovanni" was another attractive revival, with Destinn as Anna, Agnes Nicholls as Elvira, Pauline Donalda as Zerlina, Marcel Journet as Leporello, Battistini as the Don, and Enrico Caruso as Ottavio. The works performed during the season, which closed July 26th, were "Madama Butterfly" (9 times), "La Bohème" (9), "Faust" (6), "Armide" (4), "Rigoletto" (4), "Tristan" (4), "Eugene Onegin" (3), "Fliegende Holländer" (3), "Le Jongleur" (3), "Pagliacci" (3), "Tannhäuser" (3), "La Tosca" (3), "Die Walküre" (3), "Les Deux Pigeons" (3), "Aida" (2), "Carmen" (2) with Kirkby Lunn in the title rôle, "Don Giovanni" (2), "Meistersinger" (2), "Traviata" (2), "Rheingold" (2), "Siegfried" (2), "Götterdämmerung" (2), "Barbier von Bagdad" (1), "Der Vagabund" (1), "Romeo et Juliette" (1).

The conductors were André Messager, Hans Richter, Cleofonte Campanini, and Percy Pitt.

The autumn season of eight weeks started Oct. 5th with "Rigoletto," directed by Leopoldo Mugnone, in which Melba appeared as Gilda and Mario Sammarco was the hunchback. Fernando Carpi made his début as the Duke in the second performance of this work, Oct. 11th, "Adriana Lecouvreur" was revived Oct. 23rd, with Rina Giachetti, Eleanore de Cisneros, Sammarco, and Giovanni Zenatello in the principal parts. Umberto Giordano's "Fedora," which was produced in Milan in '98, was well received by English opera-goers on Nov. 5th. Giachetti and Zenatello successfully embodied the leading characters. Among the other operas given during the season were "Faust," "Madama Butterfly," "Carmen," "La Tosca," "Traviata," and "Aida."

At the Lyric from July 21st to Aug. 25th the Moody-Manners Co. had a successful English season, during which there were performances of "Faust" (8 times), "Pagliacci" (7), "Cavalleria Rusticana" (7), "Tannhäuser" (7), "Lohengrin" (6), "Trovatore" (3), "Eugene Onegin" (2), "Bohemian Girl" (2), "The Huguenots" (2), "Lucia di Lammermoor" (2), and "The Marriage of Figaro" (1). Richard Eckhold was the conductor. This company produced at Sheffield on March 1st, and introduced to London musicians at the Crystal Palace May 24th, a new one-act opera by Nicholas Gatty, "Greysteel."

### Prominent London Societies.

Seven concerts were provided by the Philharmonic Society at Queen's Hall during its 94th season, under Frederic Cowen's direction. At the first, Feb. 27th, Teresa Carreno played Rubinstein's concerto in D minor. Emil Sauer, Mischa Elman, Ernst von Dohnanyi, and Raoul Pugno were distinguished soloists at the other concerts. Edwin York-Bowen's piano concerto in D was first performed, with the composer as the soloist, on May 31st; and another orchestral novelty, Coleridge-Taylor's variations on the negro air "I'm troubled in mind," was brought out at the last concert, June 14th.

Some fine performances were given by the Royal Choral Society at the Royal Albert Hall, and by the London Choral Society at Queen's Hall. The Handel Society on May 23rd interpreted Samuel Coleridge-Taylor's setting of Samuel Taylor Coleridge's "Kubla Khan." In April the Bach Choir gave two concerts at Queen's Hall under the direction of Walford Davies, the Mass in B minor being rendered at the second. Nine concerts were held at the Portman Rooms under the auspices of the Mozart Society, that on Jan. 20th being in commemoration of the 150th anniversary of Mozart's birth.

The Royal Amateur Orchestral Society opened its thirty-fifth season at Queen's Hall, Nov. 14th, under the direction of Ernest Ford. The soloists were Lady Hallé, Florence Schmidt, and Charles Santley.

### Foreign Visits and Visitors.

The London Symphony Orchestra gave concerts in Paris, Jan. 10th and 12th, conducted by Charles Stanford and Edouard Colonne. Accompanying this organisation were 300 picked voices from the Leeds Festival chorus.

A Yorkshire Chorus, consisting of 142 singers from Leeds and 149 from Sheffield, visited

Dusseldorf, Cologne and Frankfurt in September, and won warm praise for their artistic interpretation of familiar works. Henry Coward was the conductor.

The Garde Republicaine band started on Feb 17th a series of Promenade Concerts at Covent Garden, directed by Gabriel Parés.

In March, Giuseppe Creatore directed in vigorous fashion his Italian band at a series of concerts at Queen's Hall.

Edward Grieg came for two concerts of his own works at Queen's Hall, on May 17th and 24th.

The Vienna Male Choral Society, conducted by Edouard Kremser and Richard Heuberger, gave interesting concerts at Queen's Hall on May 25th and 28th, and on the 29th sang at Buckingham Palace by command of the King.

The Vienna Philharmonic Society came to London the following month, playing at Queen's Hall on June 26th, and at the Royal Albert Hall on June 30th, the latter concert being given at the King's request.

Camille Saint-Saëns appeared at Joseph Hollman's recital at Bechstein Hall, July 12th, and assisted in the first performance of his 'cello sonata in F.

The Joachim Quartet played at several concerts at Queen's and Bechstein Halls; and among the other notable foreign musicians who appeared during the year were Lady Hallé, Elena Gerhardt (début Bechstein Hall, June 13th), Hélène Stagemann (début Æolian Hall, June 19th), Irma Sänger-Sethe, Clothilde Kleeberg, Johanne Stockmarr, Ester de Munsterhjelm, Mary Münchhoff, Pepito Arriolo (aged 10—début Royal Albert Hall, Oct. 14th), the Cherniavsky brothers (début Æolian Hall, Oct. 20th), Miecio Horszowski (aged 12), Leon Delafosse, Jan Mulder, Maurice Dambois, Herman Sandby, Achille Rivarde, Viggo Kihl, Louis Abbiate, Ferencz Hegedus, Ludwig Wullner, Pablo Sarasate, Ferruccio Busoni, Reynaldo Hahn, Emil Sauer, Richard Buhlig, Vladimir de Pachmann, Jean Gerardy, Fritz Kriesler, Michel de Sicard, Franjo Naval, Aldo Antonietti, Joska Szigetti, Wilhelm Backhaus, Leopold Auer, and Arthur de Greef—a formidable list of celebrities.

#### Other Noteworthy Concerts.

The London Symphony Orchestra started another series of symphony concerts at Queen's Hall, that on Jan. 18th being conducted by Charles Stanford, who introduced his sixth symphony, composed "in honour of the life-work of a great artist," G. F. Watts, and inspired by his pictures "Love and Life" and "Love and Death," and by the sculpture "Physical Energy," now a memorial to Cecil Rhodes on the Matoppo Hills. On Nov. 5th a third series of symphony concerts was commenced under the sole direction of Hans Richter.

The symphony concerts of the Queen's Hall Orchestra, conducted by Henry Wood, given between Jan. 1st and May 10th, were very popular. Another series was commenced on Nov. 3rd, when Sarasate was the soloist.

A Bach concert was organised by Campbell McInnes on Feb. 23rd, at Æolian Hall, when

the programme included "The Peasants' Cantata," and in the same building on May 1st an entertainment was held in aid of the fund for the purchase of Bach's house at Eisenach.

Katie Parker, a talented young violinist, made her début at an orchestral concert at Queen's Hall on Feb. 20th; and on May 25th Lionel Ounden, a twelve-year old violinist, pianist and composer, gave his first recital at Bechstein Hall.

The National Union of School Orchestras gave a concert at the Royal Albert Hall on May 26th, when 800 young violinists played simultaneously under the direction of Walter Hedgecock.

A shorter form of string quartet was introduced at the Phantasy concert at Bechstein Hall on June 22nd, as the result of a competition organised by William Cobbett. Of the 67 MSS. submitted, that by William Hurlstone won first prize; the composer unhappily died three weeks before the concert.

Boris Hambourg gave five 'cello recitals at Æolian Hall, illustrating the development of 'cello music from the time of Domenico Gabrieli's "Picercara," written in 1689.

The King attended the British-Canadian festival at Queen's Hall, June 27th, when works by Alexander Mackenzie, Edward Elgar, Charles Stanford, Hubert Parry and Frederic Cowen were performed under the composers' direction.

Irene Ainsley, a soprano from New Zealand, made her professional début at Bechstein Hall, July 10th, when some of her songs were accompanied by Melba.

The Promenade Concerts at Queen's Hall were started on Aug. 18th, and ran until Oct. 26th, under the direction of Henry Wood. Twenty-eight new works were brought forward. Seven were by British composers, these being "A Norfolk Rhapsody," by R. Vaughan Williams; an overture, "In Springtime," by Norman O'Neill; a prelude, "Sappho," by Granville Bantock; a suite for flute and piano by Edwin York Bowen; an overture, "In Memoriam," by George Halford; a music-poem, "Epithalamium," by G. H. Foulds; and a symphony, "Les Hommages," by Joseph Holbrooke.

The Brass Band festival at the Crystal Palace, Sept. 29th, aroused great interest; the principal prize was won by the Wingate Temperance Band, W. Rimmer, conductor.

Musicians, Incorporated Society of, 19, Berners Street, W. Gen. Sec., Edward Chadfield.

Musurus Pasha, Stephen, Ottoman Ambassador to the Court of St. James's, was b. in 1841, and is the son of the late Musurus Pasha, who represented Turkey in London from '51-85. He entered the diplomatic service in '61 and came to England, serving successively as Second Secretary, First Secretary, Councillor, and *Chargé d'Affaires*. In '81 he became Ambassador at Rome; from '96-1900 he was Governor-Prince of Samos; he then became member of the Political Section of the Council of State, Vizier, and Ambassador to London. He married a daughter of the late Sir John Antoniadis.

## N

**Napoleon, Victor**, son of the late Prince Napoleon and Princess Clotilde, was b. 1862. When his father, after the death of the Prince Imperial in '79, took the position of head of the house of Bonaparte, the claim was disputed by M. Paul de Cassagnac and several other Imperialists, who put forward the young Prince Victor as his father's rival, a position he definitely assumed even before his father's death in '91. By the Expulsion Bill of '86 the Prince was exiled from France, and took up his residence at Brussels. His younger brother, **Prince Louis Napoleon**, for personal reasons is preferred before Prince Victor by many Bonapartists as a candidate for the French throne. He was a Russian officer, and acted as military Governor-General of the province of Erivan for a few months in 1905. In 1906 it was reported that he would settle in Italy.

**National Academy of Sciences, U.S.A.** Incorporated 1863. Investigates and reports upon any subject of science or art when required to do so by, and at the expense of, the U.S.A. Congress. Holds annual sessions at Washington in April and at other places in the autumn. President, Alexander Agassiz, Cambridge, Mass.; Sec., Arnold Hague, Washington, U.S.A.

**National Canine Defence League.** Sec., John Hughes; Chairman and Hon. Treasurer, F. E. Pirkes, Esq., R.N. Office, 27, Regent Street, S.W.

**National Cyclists' Union.** The Union devotes itself to the interests of all classes of cyclists, and its organisation covers the whole country. It has fought considerably over 1000 cases in the interests of cyclists, secured the erection of warning boards on dangerous hills, made the roads safer, and obtained concessions from the railway and steamship companies. Touring members can take their cycles into foreign countries free of Customs' duties. General Secretary, S. R. Noble, J.P., 27, Chancery Lane, W.C.

**National Gallery.** (For earlier history see ed. '88 and later editions.) The Gallery is open to the public on Mondays, Tuesdays, Wednesdays, and Saturdays, and on payment of a fee of 6d. on the students' days, Thursdays and Fridays. The Gallery is also open free on Sunday afternoons from April to October inclusive. Much information, compiled independently of the National Gallery authorities, may be found in Mr. E. T. Cook's "Guide to the National Gallery," while official details appear in an *Annual Report* issued by the Director. Director, Sir Charles Holroyd; Keeper and Secretary, Mr. Hawes Turner; Chief Clerk, Mr. George E. Ambrose.

**National Gallery of British Art, The**, Grosvenor Road, S.W., was presented to the nation by Sir Henry Tate, Bart., and opened July 21st, 1897. The Government has undertaken the maintenance through the Trustees of the National Gallery. It is closed on Christmas Eve, Christmas Day, and Good Friday. The Keeper is Mr. D. S. MacColl.

**National Health Society**, 53, Berners Street, W. Sec., Miss Lankester.

**National Home-Reading Union.** This Society was founded 1889. President, H.R.H. the Princess Louise, Duchess of Argyll. Chairman of Council, Rt. Rev. the Lord Bishop of Hereford; Chairman of Executive Committee, Dr. Hill, Master of Downing College, Cambridge; Hon. Sec., Rev. Dr. Paton, of Nottingham. Office, Surrey House, Victoria Embankment, London, W.C.

**National Portrait Gallery**, St. Martin's Place. Founded in 1856, "for the exhibition of portraits of eminent British historical characters." The collection now comprises over 1400 portraits. The gallery is open to the public free, from 10 a.m. to 4, 5, or 6 p.m., on Monday, Tuesday, Wednesday, and Saturday; on Thursday and Friday (students' days), when an entrance fee of 6d. is charged, from 10 a.m. to 4 or 5 p.m.; and on Sundays free, from 2.30 to 5.30 p.m. (April to October). Director, Keeper, and Secretary, Mr. Lionel Cust, M.V.O., F.S.A.

**National Refuges for Homeless and Destitute Children.** Founded 1843; incorporated 1904; supported by voluntary contributions. In the two training-ships *Arethusa* and *Chichester*, lying off Greenhithe, Kent, boys, of good character only, are trained for the Navy, Merchant Service, or Army Marines; it also wholly maintains eight Homes on shore for boys and girls. In these Homes and ships there is accommodation for 1000 children. Applicants for admission are seen every morning, except Sunday, at 11 o'clock, at the London Home and Offices. The age for admission to the Homes is from 10 to 12, but boys for the ships must be between 14 and 16, and physically fit. As many as 15,003 boys and 2798 girls have been received and sent out into the world since the establishment of the Society. From the *Arethusa* and *Chichester* training-ships 5600 boys have joined merchant ships, 1200 the Royal Navy, and 1100 Army and Marines or other Service. An Emigration Agency and two Working Boys' Homes form an important part of the work. Receipts in 1905 amounted to £24,300. Joint Secretaries, H. Bristow Wallen and Henry G. Copeland. Head Offices, 164, Shaftesbury Avenue, W.C.

## NATIONAL RIFLE ASSOCIATION.

This Association was founded in 1860 (incorporated by Royal Charter '90) to give permanence to Volunteer Corps and to encourage rifle shooting throughout the King's dominions. The Secretary is Lieut.-Col. C. R. Crosse. The offices of the Association are at the Bisleys Camp Ground. It should be noted that Rifle Clubs consisting of not less than twenty members can be formed in affiliation with this Association. Rifles and ammunition are issued to such affiliated clubs at special rates. Application should be made for full information to the Secretary N.R.A.

The following are the chief results of the 1906 meeting at Bisley:—

**Humphry Cup** (15 shots at 800, 900, and 1000 yards): Cambridge University, 763; Oxford, 750.

**Ashburton Shield** (7 shots at 200 and 500 yards): Dover College, 467.

**Spencer Cup** (7 shots at 500 yards): Pte. O. Featherstone, Uppingham, 34.

**Chancellor's Challenge Plate** (7 shots at 200, 500, and 600 yards): Oxford University, 691; Cambridge University, 664.

**Mackinnon Challenge Cup** (10 shots at 800, 900, and 1000 yards): Scotland, 1445; England, 1420; Canada, 1376.

**Kolapore Cup** (7 shots at 200, 500, and 600 yards): Canada, 729; Mother Country, 720; India, 705.

**Elcho Shield** (15 shots at 800, 900, and 1000 yards): England, 1658; Ireland, 1602; Scotland, 1585.

**National Challenge Trophy (Volunteers)** (7 shots at 200, 500, and 600 yards): Scotland, 1860; England, 1851; Ireland, 1789.

**King's Prize:** 1st stage (7 shots at 200, 500, and 600 yards), Sergt. D. Reid, 1st Lanark V.R.C., 100—bronze medal; 2nd stage (20 shots at 600 yards), Sergt. H. Ommunsden, Queen's Edinburgh, 191—silver medal; 3rd stage (10 shots at 800, 900, and 1000 yards), Capt. R. ff. Davies, 1st Middlesex V.R.C., 324—gold badge and £250; Grooper W. Craster, Rhodesia, 323—N.R.A. badge and £60; Sergt. W. Tatlow, 2nd V.B. Gloucester, 320—N.R.A. badge and £40.

**St. George's Challenge Vase** (7 shots at 500 and 600 yards and 15 at 900 yards), Lieut.-Col. G. A. Wilson, 2nd V.B. Liverpool, 136.

**Prince of Wales** (10 shots at 200 and 600 yards): Col.-Sergt.-Major H. G. Burr, 1st Hants Engineers, 95.

**Alexandra** (7 shots at 200 and 600 yards): Sergt. W. Procter, late Cameron Highlanders, 67.

**Donegal Challenge Cup** (10 shots at 200 and 600 yards): Col.-Sergt.-Major H. G. Burr, 1st Hants Engineers, 95.

**Albert** (10 shots at 800 and 900 yards and 15 at 1000 yards), Mr. M. Blood, I.R.A., 162.

**Bass** (10 shots at 900 and 1000 yards), Mr. M. Blood, I.R.A., 96.

**Edge** (10 shots at 1000 and 1100 yards), Capt. T. Ranken, 6th V.B. R. Scots, 92.

**Halford Memorial** (15 shots at 900 and 1000 yards), Col. W. J. Perkins, 2nd V.B. R.W. Surrey, 137.

**Waldegrave** (10 shots at 800 and 900 yards), Mr. H. R. Sykes, N.R.A., 100.

**Hopton Aggregate:** Capt. T. Ranken, 645.

**Grand Aggregate:** Pte. E. Skilton, 1st London V.R.C., 325.

**National Service League.** The object of the League is to promote the legislative adoption of compulsory naval and military training for National Defence. It is independent of party politics. **President**, Lord Roberts, V.C., K.G.; **Secretary**, George F. Shee, M.A. **Offices**, 72, Victoria Street, S.W.

**National Society for the Prevention of Cruelty to Children.** The (Incorporated by Royal Charter), has for its object that no child in the United Kingdom shall live an unen-

durable life. This object is sought by (1) warnings; (2) enforcement of laws; (3) promotion of any new law that may be necessary. **Patrons**, The King and Queen. **Director**, Robert J. Parr. **Organ**, *The Child's Guardian*. The League of Pity is the Children's Section of the Society. Its object is to interest happy children in the welfare of the unhappy. **Central Office**, Leicester Square, London.

**National Trust** (for Places of Historic Interest or Natural Beauty). **Secretary**, Mr. Nigel Bond, B.A. **Office**, 25, Victoria Street, S.W.

**National Vigilance Association**, for the suppression of the "white slave traffic" and for the repression of criminal vice and public immorality. At the instance of the Association national committees have been formed in every country in Europe, in the Argentine, Egypt, and South Africa, to co-operate in dealing with the evil in question. **Secretary**, W. A. Coote. **Office**, 319, High Holborn, W.C.

**Naturalisation Laws.** Naturalisation by certificate of the Secretary of State was introduced by the Act of 1844 (7 & 8 Vict. c. 66) and amended by the 1870 Act, by which residence for five years in the United Kingdom, or service under the Crown for that period, is required as a condition of naturalisation, with intention so to continue to reside or serve. The certificate costs £5, and careful inquiries are made as to the character of the applicant before the certificate is granted. Application should be made to the Home Office. The naturalisation of aliens in the Colonies is now effected under authority of the Naturalisation Acts of 1870, which empower the Legislature of every colony to confer on aliens by law all or any of the privileges of Naturalisation within such colony. See ed. 1902 for the report of an Inter-Departmental Committee upon the amendments found to be desirable in the Naturalisation Laws of the Empire. The numbers of persons whose oaths of allegiance taken on the grant of certificates of naturalisation in the United Kingdom have been registered from '94-1904 are as follows:—'94-5, 910; '96, 736; '97, 606; '98, 634; '99, 608; 1900, 581; 1901, 542; 1902, 788; 1903, 890; 1904, 974; 1905, 684.

**Naval Architects, Institution of**, 5, Adelphi Terrace, W.C. **Sec.**, R. W. Dana, M.A.

**Naval Fund, Royal.** Established 1893. For the relief of widows, orphans, etc., of seamen and marines dying in the service of the Crown since Jan. 1st, 1893. **Sec.**, J. F. Phillips, c/o Royal United Service Institution, Whitehall, S.W.

**Navy League, The**, was founded in 1895, and is a strictly non-party organisation formed to urge upon Government and the electorate the paramount importance of an adequate navy as the best guarantee of peace. The League, which has branches throughout the world, carries on its work by the distribution of literature, public meetings, the delivery of lectures, and by educational propaganda in public and other schools. *The Navy League Journal*, the official organ of the League, is published monthly. **President**, R. A. Yerburgh, Esq.; **Secretary**, Commander W. C. Crutchley, R.N.R. **Offices**, 13, Victoria Street, Westminster.

**Navy Records Society.** **Sec.**, Prof. J. K. Laughton, King's College, London.

1906 l. .	31,869,500	—	13,001,677	10,841,599	12,401,115	2,209,586	24,980,110

\* Includes one-fifth of a sum of £11,500,000 which was a special grant sanctioned in 1897 for new construction to be spread over a period of five years. The details of this expenditure have not been published.

† These figures include sums provided under the Naval Defence Act of 1889 and the Naval Works Acts, 1895-1903 inclusive.

‡ War expenditure.

§ The figures for France, Russia, Germany, Japan, and America are taken from the estimates of the respective countries, information as to actual expenditure not being available. The estimated expenditure for Great Britain is therefore given, to enable a comparison to be made.

## II. BRITISH NAVY.

1. ADMINISTRATION. (a) Admiralty Departments. (b) Naval. (c) Marines.
2. FINANCE.
3. PERSONNEL.
4. MATÉRIEL.
5. DOCKYARDS.
6. DISTRIBUTION AND MOBILISATION OF THE FLEET.
7. PROGRESS. Under this head are given changes in *personnel* of High Commands—Launches of the year—Principal incidents and events.

## 1. Administration.

## (a) The Admiralty Departments.

First Lord, Lord Tweedmouth.  
 First Naval Lord, Admiral of the Fleet, Sir John Fisher.  
 Second Naval Lord, Vice-Admiral Sir Charles Drury.  
 Third Naval Lord and Comptroller, Rear-Admiral Sir H. B. Jackson, K.C.V.O.  
 Junior Naval Lord, Rear-Admiral F. S. Inglefield.  
 Civil Lord, George Lambert, Esq., M.P.  
 Parliamentary Secretary, E. Robertson, Esq., M.P.  
 Permanent Secretary, Sir Evan Macgregor, G.C.B.  
 Hydrographer, Rear-Admiral A. M. Field.  
 Director of Naval Intelligence, Capt. C. L. Ottley, R.N., M.V.O.  
 Director of Naval Construction, Sir Philip Watts, K.C.B.  
 Engineer-in-Chief of the Navy, Eng. Vice-Admiral Sir A. J. Durston.  
 Director of Dockyards, J. B. Marshall, Esq.  
 Director of Stores, J. Forsey, Esq.  
 Director of Naval Ordnance and Torpedoes, Capt. J. Rushworth Jellicoe, C.B.  
 Accountant-General of the Navy, Alfred Eyles, Esq.  
 Director of Victualling, O. A. R. Murray, Esq.  
 Director of Transports, Rear-Admiral G. T. Boyes.  
 Director-General Medical Department, Inspector-General H. M. Ellis.  
 Director of Works, Colonel E. Raban, R.E.  
 Civil Engineer-in-Chief, Major Sir Henry Pilkington.  
 Director of Contracts, F. W. Black, Esq.  
 Chaplain of the Fleet, The Ven. Archdeacon Hugh S. Wood.  
 Director of Naval Education, Prof. J. A. Ewing, LL.D., F.R.S.  
 Admiral Commanding Coastguard and Reserves, Vice-Admiral R. F. H. Henderson.  
 Deputy Adjutant-General of Marines, Lieut.-Gen. Sir William Wright.

## (b) Naval.

Unlike the other great departments of the Government, the Navy is not presided over by a Secretary of State. This is due to the circumstance that the constitutional ruler of the Navy is a Lord High Admiral, but the office has been continuously in commission since 1708, except during the period when it was filled by the Duke of Clarence, afterwards William IV. The Commissioners are generally styled "the Lords of the Admiralty" or "the Board." The First Lord is the Minister immediately responsible for the general efficiency of the Navy. Under the First Lord

the direction of affairs rests in the hands of four Naval Lords, a Civil Parliamentary Lord, and the Financial or Parliamentary Secretary. The Senior Naval Lord, who is always an Admiral of high rank and general experience, practically fills the position of Commander-in-Chief of the Navy. He is the chief naval adviser of the First Lord, and is especially responsible for the organisation and distribution of the Fleet for war. The Second Naval Lord is responsible for matters appertaining to the *personnel* of the Fleet.

The Controller of the Navy is the Naval Lord charged with the supervision of the whole of the *matériel* of the Navy, including the construction, repair, armament, general equipment and upkeep of every ship in the service. He is also responsible for the administration of the dockyards, and for the construction of ships and machinery by contractors. The Junior Naval Lord deals with transport, coaling, matters relating to pay, pensions and medals, naval prisons, and collisions. More detailed information on this subject will be found in a Parliamentary paper published in March 1905.

Under the Naval Lords and other members of the Board the several branches of administration are conducted by permanent officers, who, under the title of *Directors*, deal with naval construction, engineering, ordnance, hydrography, dockyards, stores, victualling works, hygiene, and contracts. Formerly the Navy was dependent upon the War Department for armaments and ammunition, but the responsibility for this provision has now been transferred to the Admiralty.

The Director of Transports, on the other hand, is an Admiralty officer, but the responsibility for the expenditure rests with the War Office.

The Works Department of the Admiralty is presided over by officers of the Royal Engineers, its supervision resting with the Civil Lord.

The Department of Naval Intelligence is a recent addition to the establishment of the Admiralty, but one of the most important. The Department of the Inspector of Target Practice was added in 1905, Rear-Admiral Percy Scott being the first officer appointed to the direction of the Department.

The headquarters of the Marine forces are at the Admiralty, where its affairs are administered by the Deputy Adjutant-General.

The secretariat of the Admiralty is divided into two sections, the executive and the financial. The first-named section is under the direction of the Permanent Secretary of the Admiralty, who acts as mouthpiece of the Board. The Financial Secretary, being a Minister of the Crown, vacates office with the Administration of which he is a member. The Accountant-General of the Navy, who is a permanent financial officer of the Admiralty, fills the position of Assistant Financial Secretary. At one time the departments of the Admiralty were scattered in many buildings. The new Admiralty, at Whitehall, has now afforded accommodation for many of the outlying departments, and when the other wing is completed, all will be concentrated under one roof.

## (c) Marines.

This corps is a military body especially organised and trained for service in the fleet as well as on shore. It constitutes an important part of the naval forces of the country, and is supported by funds taken in naval Votes. Whenever an emergency arises and

there is an opportunity for active service, the Marines are the first force drawn upon; and in all the naval and military operations in which this country has been recently engaged they have taken a prominent part. Their motto, "Per mare, per terram," aptly describes the nature of their duties. The Royal Marines are divided into two corps—the Royal Marine Artillery (Blue Marines) and the Royal Marine Light Infantry (Red Marines). The former have their headquarters at Eastney, near Portsmouth; the latter at Chatham, Forton (near Gosport), and Plymouth. There is also at Walmer, near Deal, a recruit depot, where all newly raised men for both branches are sent to receive preliminary instruction. The Royal Marines are recruited under the long-service system, and there is never any lack of applicants to this *corps d'élite*. The accepted candidates, whether officers or privates, are picked men, far above the average standard of the Army. The recruiting office for London is at 22, Spring Gardens; but men are also entered at Bristol, Birmingham, Cambridge, Derby, Edinburgh, Exeter, Gloucester, Hull, Greenock, Wakefield, Liverpool, Reading, Salisbury, and Taunton. As a rule, one-half of the force is embarked for duty in His Majesty's ships, the remainder being at headquarters, revising drills, recruits, etc. Recently, however, the increased number of ships in commission has obliged a larger proportion to serve afloat, and a difficulty has even been experienced in finding proper relief. It is from the men in the depôts that battalions of Marines have been formed for co-operating with land forces abroad.

### 2. Finance.

The Naval Estimates for 1906-7 totalled £31,869,500, being a decrease of £1,520,000 on the previous year's total. This is the sum actually estimated as the cost of the Navy, including the non-effective services, but excluding other charges which fall under the Civil Service Estimates. The liability for new construction was £9,235,000, but by the alterations announced by Mr. Robertson in the ship-building programme (July 27th) this amount of liability was reduced to £6,800,000.

### The Estimates.

The following is an abstract showing the provision made under each separate vote:—

Votes.	1906-7
<b>I. Numbers.</b>	<b>Total Numbers.</b>
A total number of Officers, Seamen, Boys, Coastguard, and Royal Marines . . . . .	129,000
<b>II. Effective Services.</b>	£
1. Wages, etc., of Officers, Seamen, Boys, Coastguard, and Royal Marines . . . . .	6,810,700
2. Victualling and Clothing for the Navy . . . . .	2,053,200
3. Medical Establishments and Services . . . . .	275,500
4. Martial Law . . . . .	14,700
5. Educational Services . . . . .	165,600
6. Scientific Services . . . . .	65,100
7. Royal Naval Reserves . . . . .	426,600

Votes.	1906-7
58. Shipbuilding, Repairs, Maintenance, etc.:—	
Sect. I.— <i>Personnel</i> . . . . .	2,407,600
Sect. II.— <i>Matériel</i> . . . . .	2,827,200
Sect. III.—Contract Work . . . . .	8,583,400
9. Naval Armaments . . . . .	2,986,000
10. Works, Buildings, and Repairs at home and abroad . . . . .	1,954,500
11. Miscellaneous Effective Services . . . . .	482,200
12. Admiralty Office . . . . .	351,500
<b>Total Effective Services . . . . .</b>	<b>£29,408,800</b>
<b>III. Non-Effective Services.</b>	
13. Half-Pay, Reserved and Retired Pay . . . . .	820,700
14. Naval and Marine Pensions, Gratuities, and Compassionate Allowances . . . . .	1,256,300
15. Civil Pensions and Gratuities . . . . .	383,700
<b>Total Non-Effective Services . . . . .</b>	<b>£2,460,700</b>
<b>Grand Total . . . . .</b>	<b>£31,869,500</b>

### 3. Personnel.

The number of officers, seamen, boys, and marines provided for sea and other services for the year 1906-7 amounts to 129,000, being the number as in the previous year. The strength of the Royal Marines on Jan. 1st, 1906, was 19,235. The total of the Royal Naval Reserve has been fixed by the Admiralty at 25,500, a reduction of 4000 on that of last year.

The passing of the Naval Forces Act during the year 1903 served to strengthen the Naval Reserve by increasing its numbers, the total being now 58,046. Further, by authorising a short-service system, on condition that those accepting such employment shall complete a term of seven years in the Reserve, the Royal Fleet Reserve has been raised to a total of 19,500. The Royal Naval Volunteers authorised by the Act of 1902 have been actively recruiting and drilling throughout the year, and detachments of them have been sent to sea in vessels of the Reserve Divisions of Portsmouth, Devonport, and Chatham. The Naval Volunteers are subject to all regulations made with regard to them by the authority of the Admiralty. Whenever the Admiralty call out the Naval Volunteers, or any of them, for actual service they will be liable to serve either ashore or afloat, as may be directed by the Admiralty, and anywhere the Admiralty may have need of their services, with the understanding that those services shall, as much as practicable, be confined to Home Waters and the Mediterranean. The strength of the force is about 3800.

### 4. Matériel.

The number of vessels of the British Navy completing, on the stocks or projected on Nov. 30th, were:—

	Under Trial.	Completing.	On the stocks.	Projected.
Battleships . . . . .	4	2	—	3
Armoured cruisers . . . . .	—	6	4	—
Destroyers . . . . .	—	7	13	14
Submarines . . . . .	—	—	15	8

The battleships undergoing their trials were the *Dreadnought*, *Britannia*, *Hibernia*, and *Africa*. The *Britannia*, which was launched in December 1904, was practically complete, and the *Hibernia* and *Africa*, launched in June 1905 and May 1905 respectively, should be in active service before the end of 1906, the *Dreadnought*, launched in February 1906, not being so far advanced. The ships completing were the *Lord Nelson*, launched on Sept. 4th, 1906, and the *Agamemnon*, launched on June 23rd, 1906, the former at Jarrow and the latter at Dalmuir. The three battleships projected are of the *Dreadnought* class.

Of the armoured cruisers, the six vessels completing were the *Shannon*, *Minotaur*, *Achilles*, *Cochrane*, *Natal*, and *Warrior*, the last four being in a very forward state. The *Shannon*, launched in Sept. 1906, and the *Minotaur*, launched in June of the same year, were still in a completing stage. The four vessels on the stocks were the *Invincible*, *Indomitable*, *Inflexible*, and *Defence*.

The destroyers completing numbered seven, five being coastal destroyers—viz., the *Cricketer*, *Gadfly*, *Firefly*, *Glowworm*, and *Dragonfly*; the remaining two being the *Velox*, a turbine fitted destroyer, and the *Yarrow* motor-boat. Those on the stocks were the coastal destroyers, *Gnat*, *Grasshopper*, *Greenfly*, *Mayfly*, *Sandfly*, *Spider*, and *Moth*; the ocean-going destroyers *Afridi*, *Cossack*, *Gurkha*, *Mohawk*, and *Tartar*, with the special ocean-going destroyer *Swift*, building at Birkenhead. The destroyers projected were fourteen, two ocean-going and twelve coastal. The 1906-7 programme made provision for five ocean-going destroyers, but three were afterwards struck out. It was reported that the remaining two were to be of *Swift* class, of 36 knots speed.

The shipbuilding programme for 1906-7 was: 4 armoured ships, 5 ocean-going destroyers, 12 coastal destroyers, 12 submarines; but a revised programme, consisting of 3 armoured ships, 2 ocean-going destroyers, 12 coastal destroyers, 8 submarines, was substituted in July, and gave rise to much discussion and controversy.

### 5. Dockyards.

The public dockyards in Great Britain are situated as follows:—

**Portsmouth.**—Six docks take large ships; one takes armoured cruisers, 10,000 tons and smaller; one slip for building battleships up to 750 ft. in length; three large basins; ten small docks.

**Devonport.**—One dock takes battleships of 425 ft. in length; five smaller; two large slips.

**Keyham.**—Three large docks take large battleships; three smaller.

**Chatham.**—One large dock takes battleships 800 ft. in length; four smaller.

**Sheerness.**—Five small docks.

**Pembroke.**—One dock takes small battleships.

**Haulbowline.**—Two docks take any ship.

There are five public and ten private docks which can take *Dreadnoughts* or *Invincibles*.

### 6. Distribution and Mobilisation of the Fleet.

On Dec. 6th, 1904, Lord Selborne issued a memorandum and circular letter dealing with the

distribution and mobilisation of the fleet. By this, existing arrangements were cancelled, and the effective War Fleet was divided into two categories—the Fleet in commission at Sea and the Fleet in commission in Reserve.

The Fleet in commission at Sea was divided between two strategical centres, the European and the Eastern, with a connecting link in the Cape of Good Hope Squadron. The old Home Fleet was now known as the Channel Fleet, the force which formerly bore that name becoming the Atlantic Fleet. These two, with the Mediterranean Fleet and four Cruiser Squadrons, made up the European strategical centre, the Eastern being composed of the China, East Indies, and Australasian Squadrons.

The vessels of the Fleet in commission in Reserve include all the effective fighting ships which were not at sea, and they were available either for reliefs or for reinforcement. They were supplied with nucleus crews, consisting of the captain, the second in command, and a proportion of other officers, including engineer, gunnery, navigating and torpedo officers, and two-fifths of the remainder of the complement, including all the more expert ratings. A rear-admiral was appointed to each port to command the ships in reserve there. Each division in reserve was to go to sea periodically for exercises, the engine-room staffs being augmented for the occasion. These are the salient features of a reform which is complementary to, and a natural outcome of the training and education scheme of 1902.

On Nov. 30th, 1905, Lord Cawdor issued a "Statement of Admiralty Policy" on account of the progress made in carrying out and developing the series of reforms that had been undertaken during the past three years and having their foundation in the reorganisation of the personnel, and in the redistribution of the fleet described in the Statements summarised in the 1905 and 1906 ANNUALS. This Statement dealt with the development of the new system of entry and training of officers, engine-room watch keeping, Royal Naval Reserve, non-continuous service, the pay of the men of the fleet, the reorganisation of the reserve of ships, the distribution of ships among the fleets, manœuvres, shipbuilding policy, dockyard reform, and naval expenditure, and was published as a Blue Book (Cd. 2791). Exceptional interest attaches to certain points in this important document, seeing that it was issued just before a General Election placed a new Ministry in power. In speaking of the distribution of ships among the fleets Lord Cawdor said: "The periods of European rest as well as the stable grouping of International interests during the latter part of the last century had assigned certain degrees of relative importance to our various squadrons, and the scale of their strength has been reflected in the rank and capabilities of the Admiral selected to command them. So much has this been the case that to-day people are apt to look on a definite number of ships on any given station as a fixed quantity rather than a strategic exigency. This idea must be entirely dispelled. Squadrons of varying strength are strategically required in certain waters, but the kaleidoscopic nature of international relations, as well as variations or new developments in sea power, not only forbid any permanent allocation of numbers, but in fact

point to the necessity for periodic redistribution of ships between our fleets to meet the political requirements of the moment." Again, under shipbuilding policy Lord Cawdor pointed out that "However formidable foreign shipbuilding programmes may appear on paper, we can always overtake them in consequence of our resources and our power of rapid construction. . . . At the present time strategic requirements necessitate an output of four large armoured ships annually, and unless unforeseen contingencies arise this number will not be exceeded. The period of building is to be two years, and therefore four ships will be laid down each year, and there will be eight ships in course of construction in any one year, either in the dockyards or by contract. The Board have come to the conclusion that the right policy is to make out their programme of shipbuilding for the next year only; and while they anticipate at present that the output of four large armoured ships a year should suffice to meet our requirements, there would be no difficulty whatever in increasing this output to whatever extent may be necessary in consequence of any increase of naval power abroad."

With regard to the policy thus outlined, Lord Tweedmouth, the First Lord of the Admiralty of the new Government, announced that his attitude would be one of waiting and watching; and it was not until July 27th that Mr. E. Robertson, the Secretary to the Admiralty, made a statement in the House of Commons on the shipbuilding vote, explaining that the Government intended to reduce the estimates arranged for in the previous November by the outgoing Ministers. One armoured ship was dropped, 3 ocean-going destroyers, and 4 submarines, thus reducing the liability incurred by £2,500,000 sterling.

Furthermore, on Oct. 23rd, in accordance with the policy outlined by Lord Cawdor, and quoted above, the Admiralty announced that early in 1907 alterations would be made in the distribution of naval strength. (1) A distinct fleet will be constituted from the ships in commission in reserve, called the Home fleet, and placed under the supreme command of a flag officer with his headquarters at Sheerness. The *Dreadnought* with a full complement will be the first flagship. This fleet will be organised as a fighting force, making frequent cruises, and carrying out battle practice and other fleet exercises. (2) A sliding scale will be adopted in the strength of the nucleus crews, and all ships in reserve will have an adequate complement of officers and men; the nature of the sliding scale will be determined by the Admiralty from time to time. (3) The distribution of ships between the present Channel, Mediterranean, Atlantic, and Reserve fleets will be altered to permit of the nucleus crews being strengthened and a Home fleet organised; but no ships will be paid off, no men will be sent to barracks or to instructional schools, and no alteration will be made in the proportion of officers and men serving afloat. (4) Arrangements are also to be made for the interchange of vessels between the fleets for the purposes of refit. (5) The Board, in conclusion, stated that they were satisfied that these alterations would increase the immediate striking strength of the Navy, but the changes were to be gradually carried out in such a way as to obviate any dislocation of the various fleets and squadrons.

## 7. Progress.

### Changes in Commands.

Among commands the following changes took place in 1906:—

**Sheerness-Chatham Reserve Division.** Rear-Admiral C. H. Adair succeeded Rear-Admiral W. H. B. Graham in command on Jan. 3rd.

**Portsmouth.** Commodore Hon. W. G. Stopford succeeded Rear-Admiral S. H. M. Login in command of the Royal Naval Barracks on Feb. 1st.

**Devonport Reserve Division.** Rear-Admiral E. H. Gamble succeeded Rear-Admiral C. G. Robinson in command on Jan. 3rd.

**Devonport Dockyard.** Rear-Admiral C. J. Barlow succeeded Rear-Admiral W. H. Henderson in command March 31st.

**Queenstown (Ireland).** Rear-Admiral G. F. King-Hall succeeded Vice-Admiral A. MacLeod as Senior Officer on the coast of Ireland on March 1st.

**Atlantic Fleet.** Rear-Admiral G. Le Clerc Egerton succeeded Rear-Admiral Sir A. Berkeley Milne as second in command on Aug. 25th.

**Gibraltar Dockyard.** Rear-Admiral J. E. C. Goodrich succeeded the late Rear-Admiral Sir E. Chichester as Admiral-Superintendent.

**Mediterranean Fleet.** Rear-Admiral F. C. B. Bridgeman succeeded the late Vice-Admiral Sir H. Grenfell as second in command. Rear-Admiral Sir H. D. Barry succeeded Rear-Admiral Hon. Sir H. Lambton as Rear-Admiral of the Fleet.

**Sheerness Dockyard.** Capt. J. Startin succeeded the late Capt. F. L. Campbell as Superintendent on Jan. 31st.

**Portsmouth Reserve Division.** Rear-Admiral Spencer H. M. Login succeeded Rear-Admiral C. H. Cross in command of the Reserve Division, Portsmouth, on Nov. 15th.

**The Nore.** Admiral Sir G. H. U. Noel succeeded Sir H. L. Pearson

**Portsmouth Dockyard.** Rear-Admiral C. G. Robinson succeeded Rear-Admiral Sir H. D. Barry.

**Channel Fleet.** Rear-Admiral G. A. Callaghan succeeded Rear-Admiral R. L. Groome as Rear-Admiral of the Fleet.

**Torpedo Flotilla.** Rear-Admiral R. A. J. Montgomerie succeeded Rear-Admiral A. L. Winsloe.

The following prospective changes were also announced to take place early in 1907:—

**Portsmouth.** Admiral Sir D. H. Bosanquet to succeed Admiral Sir A. L. Douglas as Commander-in-Chief.

**Channel Fleet.** Admiral Lord Charles Beresford to succeed Admiral Sir A. K. Wilson as Commander-in-Chief. Vice-Admiral Sir R. Custance to succeed Vice-Admiral Sir A. G. Curzon-Howe as second in command.

**Mediterranean Fleet.** Vice-Admiral Sir C. C. Drury to succeed Lord Charles Beresford as Commander-in-Chief. Rear-Admiral Prince Louis of Battenberg to succeed Rear-Admiral F. C. Bridgeman as second in command.

**Atlantic Fleet.** Vice-Admiral Sir A. G. Curzon-Howe to succeed Sir W. H. May as Commander-in-Chief.

**Home Fleet.** Rear-Admiral F. C. B. Bridgeman as Commander-in-Chief.

**Second Cruiser Squadron.** Rear-Admiral C. H. Adair to succeed Rear-Admiral Prince Louis of Battenberg.

**Fourth Cruiser Squadron.** Rear-Admiral F. S. Inglefield to succeed Admiral Sir D. H. Bosanquet.

**Second Sea Lord of the Admiralty.** Vice-Admiral Sir W. H. May to succeed Vice-Admiral Sir Charles Drury.

**Fourth Sea Lord of the Admiralty.** Rear-Admiral A. L. Winsloe to succeed Rear-Admiral F. S. Inglefield.

**Malta Dockyard.** Rear-Admiral F. W. Fisher to succeed Vice-Admiral A. C. B. Bromley as Admiral-Superintendent.

#### Launches.

The following were the principal launches of British war-ships during 1906:

**Battleships.** *Dreadnought*, at Portsmouth, on Feb. 10th; *Agamemnon*, at Dalmuir, on June 23rd; *Lord Nelson*, at Jarrow-on-Tyne, on Sept. 4th.

**Armoured Cruisers.** *Minotaur*, at Devonport, on June 6th; *Shannon*, at Chatham, on Sept. 20th.

The following new ships were completed and put into commission, either for service at sea or in the Reserve, during the year:—

**Battleships.** *Dreadnought*, at Portsmouth, on Sept. 1st; *Briannia*, at Portsmouth, at the end of September; *Africa*, at Chatham, on Nov. 6th; *Hibernia*, completed her trials and is to relieve the flagship *Victorious* in the Atlantic Fleet on Jan. 1st, 1907.

#### Principal Events, 1906.

In January the new lighthouse at Portland Bill was opened. The L.C.C. School of Marine Engineering was opened at Poplar. A silver bell, shield, bowl, and cigarette-box was presented to the cruiser "Suffolk," by the county of that name. The "Nettle," late submarine mining vessel, was leaving Portsmouth Harbour when she was carried by the tide with great force against the *Mercury*, and then against the King's yacht *Osborne*. The *Osborne* had to be placed in one of the dockyard basins for repair. The "St. Vincent" (boys' training ship) paid off on the 12th, after 40 years' service. It was decided by the Admiralty that the building of warships should as far as possible be carried out on the Thames; the Poplar Guardians having protested against the continual sending of orders for warships to be built on the Tyne and the Clyde.

On Feb. 13th submarine A 9 was struck by the cargo steamer *Coath*, of Penzance, in Plymouth Sound. The periscope of the submarine was damaged, and her conning tower was bulged in but not fractured. On the 17th the combined fleets assembled off the coast of Portugal, carrying out exercises, etc., under the command of Admiral Sir A. K. Wilson. On the 24th Mr. Robertson, Parliamentary Secretary, announced that the Admiralty had decided to suspend corporal punishment in the Navy.

In March it was decided to instal in battleships and cruisers searchlights of much greater power, and of 36-inch-diameter mirrors, controlled entirely by electric motors, both as regards the lamp and projector, instead of by hand power, as formerly, and a commencement was made with the *Hibernia* and the *Minotaur*. On March 1st the Naval Estimates were discussed in the House of Commons, Mr. E. Robertson making the usual annual statement with regard to the Navy. A change was made by the Admiralty in the dress of petty officers

and seamen. It was decided to remove all serge frocks, cloth trousers, and drill frocks, and to add instead one pair of serge trousers and one serge jumper, to be known as the No. 1 dress, the jumper having cuffs fitted to the sleeves and carrying gold badges. On the 24th 614 Japanese officers and men arrived in England, to man the newest vessels of the Japanese Navy, which were built at Barrow and on the Tyne. The sailors spent a brief holiday in London before going to the North. The Admiralty gave instructions for the battleships and cruisers of the Reserve divisions to be fitted with wireless telegraphy.

On April 17th, during operations off Malta, torpedo-boat 84 was run into by the *Ardent* and sunk. On the 24th the cruiser "Argyll" was presented with a handsome silver challenge shield, subscribed by the girls of Argyllshire. On the 17th an explosion occurred on H.M.S. *Prince of Wales* during a series of full-speed trials. Three stokers were killed, and four men injured. A new coaling craft known as C 80 was taken to Devonport, and underwent some important trials successfully.

On May 17th torpedo-boat No. 56 capsized when off Damietta, one first-class petty officer and three stokers being drowned. A reorganization of the whole of the torpedo-boat destroyers in home waters was made. The destroyers are now divided into three flotillas of 41 each, with headquarters at the Nore, Portsmouth, and Devonport. On the 30th the battleship "Montagu" stranded in a dense fog, when off Lundy Island. Unsuccessful attempts were made to save the vessel, but the guns, machinery, and stores were saved. On the 5th the National Nautical School at Portishead was opened by Princess Christian.

On June 27th a fatal explosion occurred on board H.M.S. "Essex," resulting in the death of an able seaman, and injuring a lieutenant and three seamen. The new Admiralty Instructions were published. It was decided by the Admiralty to abolish the class of Naval Instructors, to take effect from May 1907. The Naval Manœuvres of 1906 commenced on the 14th, and ended on July 2nd. About 325 warships took part, and they were divided into two fleets, the "Red" (British) fleet under Admiral Sir A. K. Wilson, and the "Blue" (Enemy) fleet under Vice-Admiral Sir W. H. May.

On July 27th Mr. E. Robertson made his statement on the new Naval Policy of the Government. The ships of the Channel fleet paid a visit to Scarborough, arriving there on the 26th. On the 30th, at Queensferry, the county of Berwick and the borough of Berwick-on-Tweed presented H.M.S. "Berwick," of the second cruiser squadron, with a shield.

In August it was decided by the Admiralty that the principal signal stations at the home ports should be manned by pensioners borne as civilians, instead of by pensioners on active ratings borne on ships' books, as was the practice previously in the case of certain stations. A presentation was made by the people of Canada to the battleship of that country, the "Dominion." The total amount subscribed for the presentation was \$4012, and was contributed by over 19,000 persons. The citizens of London presented H.M.S. "London" with a silver shield, to be competed for by the guns' crews periodically, a silk ensign, a bell, modelled from one of the famous Bow bells,

with a silver bracket, and some plate for the officers mess, including a centrepiece representing the Tower of London, and some fruit dishes, with the City's "griffin" in the handles. Towards the end of August a portion of the Mediterranean Fleet, under Lord Charles Beresford, visited Venice, Trieste, Fiume, and other foreign ports in the Mediterranean. On the 2nd the Atlantic Fleet left Portland for a cruise on the Irish coast. The court-martial on Capt. T. B. S. Adair and Lieut. J. H. Dathan for the loss of the battleship *Montagu* on Lundy Island on May 30th ended on the 20th. Capt. Thomas B. S. Adair was severely reprimanded and dismissed from *H.M.S. Montagu*, and Lieut. James H. Dathan was severely reprimanded and dismissed from *H.M.S. Montagu*, and ordered to forfeit two years' seniority.

In September the Atlantic fleet visited Kingstown and Queenstown and other Irish towns. A squadron of United States men-of-war, consisting of four armoured cruisers, visited Gibraltar on its way to the Asiatic station. The 12-in. guns of the *Montagu* were salvaged. A committee was appointed to inquire into the victualling and canteen arrangements of the Navy.

In October the *Dreadnought* was commissioned for trials. In a circular letter the Admiralty stated that the cost of hospitality to foreign ships and squadrons would be defrayed from the public funds. A new pattern white helmet was adopted for the fleet.

On Nov. 4th and 5th disturbances occurred among the men in the Naval Barracks at Portsmouth, and after a preliminary inquiry the Admiralty ordered a court-martial on 11 men who were principally implicated; also a court of inquiry to be appointed to investigate an allegation against one of the lieutenants that he had given an improper order. Sir William White, who from '85-1902 held office as Director of Naval Construction and Assistant Controller of the Navy, writing to the *Times* on the subject of British and Foreign Warship Building Capability, expressed his opinion that, "Taking things as they stand at present, it is probably near the truth to say that, whereas we could provide each year from existing resources armour, guns, and gun-mountings for 10 or 12 first-class battleships, Germany would not be able to provide for more than 4 or 5 similar ships."

## NETHERLANDS, THE.

### Ruler.

Wilhelmina, Queen of the Netherlands, was b. Aug. 31st, '80. She is the daughter of William III., of the Netherlands, by his second wife, the Princess Emma, sister of H.R.H. the Duchess of Albany, and daughter of Prince George Victor of Waldeck-Pyrmont. Queen Wilhelmina succeeded to the throne on the decease of her father, on Nov. 23rd, '90, but her mother acted as Queen-Regent till the young Queen came of age (Aug. 31st, '98). Her marriage to Duke Henry of Mecklenburg-Schwerin took place on Feb. 7th, 1901. Duke Henry is a son of the late Duke Frederick Francis II., who held a high military command in the Franco-German war, and was born in '76. The succession to the throne is in the direct male line, or failing males, females. If there is no legal heir, Sovereign and Parliament (or if the Sovereign is dead, Parliament alone), with its numbers

doubled for the occasion, designate a successor. In April 1902 the Queen was attacked by typhoid fever; while she was recovering she was prematurely confined, and for a time her condition was critical.

### Government.

The Constitution of 1848, revised in '87, vests the executive in the sovereign, and the legislative authority in the Sovereign and the States-General, the latter sitting in two chambers: the First, consisting of 50 members, elected for nine years (one-third retiring every three years) by the provincial States from among the most highly assessed inhabitants and from among a number of specified officials; the Second, of 100 members, elected for 4 years by all male citizens of 25 years or more who pay a direct tax to the State, or are householders or own boats of not less than 24 tons, or receive a minimum wage or salary of about £23, or give other evidence of their ability to support themselves and their families. The Government and the Second Chamber alone possess the initiative in legislation; the upper house having the right of approval or rejection, but not of amendment. Alterations in constitution are made by a two-thirds vote of both houses, followed by a general election, and confirmation by a similar vote of the new States-General. Members of the Second Chamber are paid £166 per annum and travelling expenses.

### Army and Navy.

The principle of obligatory military service has been adopted; but, owing to financial reasons, a great many are excused from service, and the contingent to be embodied is fixed yearly. In the cavalry and artillery of the standing army the service is of 18 months, and in the infantry much less.

The Landwehr, which has replaced the old Schütterij, received its first contingent recently, and the country has been divided into 48 Landwehr districts. The corresponding battalions cannot however be formed before 1909. The Landwehr and Landsturm to which men are to be transferred will have a peace strength of about 20,000, and a volunteer establishment in time of war, the Militia to be increased to 12,300, to be permanently embodied, with 5200 more to be called up for short periods; and the reorganisation is being proceeded with. The total armed strength is estimated at 69,000, and the war strength at 108,000.

The Army of the Dutch East Indies numbers about 40,000 officers and men, recruited voluntarily, of whom about 1400 officers and 16,000 men are Europeans. The feudatory chiefs are under obligations to supply auxiliary troops, and there is a territorial militia of small value. A plan of mobilisation for war has recently been adopted.

The constitutional head of the Navy is the Sovereign, but the administrative duties are intrusted to a Minister of Marine, who is assisted by chiefs of the various departments.

### Minister of Marine, H. G. Kruijs.

The Naval Budget for 1904 amounted to £1,350,500. The total of officers and men enlisted for the Navy reaches 11,000, but this figure includes the marine infantry. The executive officers are divided as follows: 1 vice-admiral, 3 rear-admirals, 25 captains, 40 commanders, 400 lieutenants and sub-lieutenants, and 200 midshipmen.

The strength in ships built, building, and projected on Nov. 30th, 1906, was:—

	Built.	Building.	Projected.
Battleships, 3rd class	8	1	—
Unprotected cruisers	8	—	—
Torpedo boats	29	5	2

The coast-defence vessel *Heemskerck* has been launched, and will carry two 9 in., six 6 in., and six 12-pounder guns.

The principal dockyards are situated as follows:—**Helder**: two docks take cruisers. **Hellevoetsluis**: one dock, takes small battleships. **Amsterdam**: two floating docks take cruisers. **Rotterdam**: three floating docks take small cruisers.

#### Local Government, Education, etc.

For local government the country is divided into 11 provinces and 1123 communes, each province having its own representative body, which has the power of making ordinances subject to the approval of the Sovereign; and each commune having its council elected for 6 years, with a mayor and aldermen. Entire liberty and social equality granted to all religions. The majority belong to the Dutch Reformed Church, but there are over 1,800,000 Roman Catholics, and the State pays certain fixed allowances to the different Churches. Education is compulsory for children from 6 to 13 years of age, and is well organised, and practically free as to the primary schools. Great importance is attached to the teaching of modern languages and to technical and scientific education. The judicial system includes 106 cantonal courts, 23 district tribunals, 5 Courts of Appeal, and the High Court. Trial by jury does not exist. Length of railways 1817 miles. Length of canals about 2000 miles, and of other navigable waterways about 3000 miles. The chief newspapers are the *Liberal Algemeen Handelsblad*, the *Nieuwe Rotterdamse Courant*, and the *Standaard*.

The chief imports are cereals and flour, iron and steel, textiles, and raw materials and food products generally. The chief exports are food products, drugs, iron, steel, textiles, sugar, etc. The few duties that are levied are not for purposes of protection. Practically free trade prevails. The chief towns are Amsterdam (pop. 551,415), Rotterdam (370,390), and The Hague (234,459). At the last-named city the Permanent Court of Arbitration, which was the outcome of the Peace Conference of '09, is established (see INTERNATIONAL ARBITRATION).

#### Statistics and Diplomatic.

Area, 12,648 sq. m.; pop. 5,509,659. Revenue, 1903, £13,843,391; 1904, £14,213,064; expenditure, 1903, £13,652,644; 1904, £14,586,480; debt, 1906, £95,396,454. Imports, 1904, £201,627,078; 1905, £215,293,588; exports, 1904, £165,465,556; 1905, £166,147,032.

**Ministry.** *Premier and Minister of Finance*, M. Th. H. de Meester.—*Interior*, M. P. Rink.—*Foreign Affairs*, Jonkheer van Tets van Goudriaan.—*Justice*, M. van Raalte.—*Marine*, M. Cohen Stuart.—*War*, General Staal.—*Public Works*, M. J. Kraus.—*Colonies*, M. Fock.—*Agriculture, Industry, and Commerce*, M. J. D. Veegens.

**Minister in London**, Baron Gericke van Herwijnen, 8, Grosvenor Gardens, S.W.—*Secretary of Legation*, M. van Royen.—*Consul-General*, H. S. J. Maas, K.N.L., 12, Bloomfield Street, E.C.

**British Minister at The Hague**, Sir Henry Howard, K.C.M.G., C.B.

**British Consuls.** *Rotterdam*, H. Turing; *Amsterdam*, W. A. Churchill.

#### Political Parties.

Parties are divided into Liberals and Anti-Liberals, the latter being composed chiefly of such opposite elements as Catholics and Orthodox Protestants, who are also called *Conservatives*. The only bond apparently between these two bodies is the conviction that the supremacy of religious authority must be recognised in the government of the nation, whereas the Liberals urge that religious questions should be kept separate from the administration of the State. In 1901 a split took place through the advanced section of the Liberals demanding universal suffrage on the "one man one vote" basis. This broke up the powerful organisation of the Liberal Union, and the general election of June 12th, 1901, resulted in the return of 32 Protestant Anti-Revolutionists, 25 Catholics, and one Christian Democrat, forming the Right, 58 strong; and of 26 Liberals, 9 Radicals and 7 Socialists, forming the Left, 42 strong. Dr. Kuyper, the leader of the Anti-Revolutionists, then formed a Cabinet, in which three seats were given to the Catholics. The Second Chamber, after the general election in June 1905, consisted of 48 Ministerialists supporting Dr. Kuyper, and forming the Right (24 Catholics, 16 Orthodox Protestants, and 8 "Historic Christians"), and 52 anti-Ministerialists forming the Left (24 Liberals of the Left, 10 Liberals of the Right, 11 Liberal Democrats, and 7 Socialists). Dr. Kuyper accordingly resigned, and a new Ministry was formed with M. de Meester as President. It was avowedly a Free Trade Cabinet. In the First Chamber there was in 1905 a Clerical majority.

#### NETHERLANDS, COLONIES OF.

##### Dutch East Indies.

The Dutch possessions in the Asiatic Archipelago include (1) Java, with Madura, and (2) what are called the Outposts, viz., Sumatra, part of Borneo, Celebes, the Moluccas, part of New Guinea, and the Sunda and other islands, which have an estimated area of about 680,000 sq. m., and an estimated population of about 9,000,000, and are administered by Governors, Residents, etc., according to their status. The administrative and executive authority for the whole of Dutch East India is in the hands of a Governor-General, assisted by a Council, with partly legislative and partly advisory functions, consisting of five members. Under him the administration is carried on by Residents and subordinate officers. The army, which is purely colonial, numbers about 14,500 Europeans and 23,000 natives. The cost of the navy is borne partly by the colony and partly by the Government of the Netherlands. There is complete religious liberty, and education is well looked after. There are 1500 miles of railroad opened for traffic. The chief exports are sugar, coffee, tea, indigo, and tobacco. The total area is estimated at 736,500 sq. m.; and the pop. at about 36,000,000. The number of Europeans is about 76,000, the bulk of whom are Dutch. There are about 550,000 Chinese, and a number of Arabs, etc. Revenue, 1904, £12,572,013; expenditure,

£13,865,465; average imports, £15,000,000; average exports, £17,000,000.

**Governor-General**, Lieut.-General J. B. van Heutsz (appointed 1905).

**Java** is the chief seat of Dutch power in the East Indies. Capital, **Batavia**, 149,006. Other chief towns, **Samarang** (pop. 89,286) and **Sourabaya** (pop. 146,944). **Exports**: coffee, sugar, tea, rice, indigo, pepper, tobacco, cinchona bark, etc. **Imports**: cotton and woollen goods, yarns, provisions and manures. Divided, with the adjacent island of **Madura**, into 17 Residencies, each administered by a Resident and his subordinates under the Governor-General of the Dutch East Indies. Land is Government property, except in the west, and is let on hereditary lease to individuals, or to villages in the case of communal holdings. Most of the coffee plantations are directly under Government management, the natives cultivating coffee instead of paying taxes. The authorities take the whole of the produce at the fixed price of 15 florins (£1 5s.) for every picul (133½ lb.). This system still obtains in part, but a poll tax of one florin was in '82 substituted for the performance of enforced services. A railway connects **Kalisaat**, **Sourabaya** and **Banjoewanjie**. **Area** of Java and **Madura** 50,554 sq. m.; pop. about 29,000,000, of whom about 63,000 are Europeans.

**British Consul** at **Batavia**, D. G. Rose.

**Borneo**. Of the estimated total area of 300,000 sq. m., estimated pop. 1,846,000, **Holland** claims as a possession 212,000 sq. m. of territory on the south, east, and west of the island, with a population of about 1,250,000. In reality this immense tract is parcelled out into various native states. Those on the coast are more or less under Dutch influence. Of the interior little is even known. The principal Dutch settlements are at **Sambas**, **Pontiana**, **Banjarassin**, and **Koti**.

**Celebes** has an area of 72,000 sq. m.; pop. about 2,000,000. Besides the towns of **Menado**, **Port Rotterdam**, and **Vlaardingen** or **Macassar**, there are a number of native states, which, however, recognise the authority of the Dutch.

**Dutch New Guinea**, lying to the west of the British possessions in New Guinea, covers an area of 151,790 sq. m., and has a population of about 200,000. It is administered by a Resident at **Ternate**, **Molucca Islands**.

#### *Dutch West Indies.*

**Curaçao**, an island in the Caribbean Sea, off the coast of **Venezuela**, is the chief of **Holland's** West Indian possessions. The colony of **Curaçao** includes the islands of **Curaçao**, **Buen Ayre** or **Bonaire**, **Aruba**, **St. Eustache**, and **Saba**, with part of the island of **St. Martin**. The total area is 403 sq. m., and the population (1904) 53,486. The colony is administered by a Governor with a Council of 4 members all nominated by the sovereign, and a Colonial Council of 13 nominated members. Cattle, sheep, goats, etc., are bred for exportation. Imports 1904, £226,620; exports, £61,254.

**British Consul** at **Curaçao**, J. Jesurun.

**Surinam**, or Dutch Guiana, is a colony on the north coast of South America, bounded on the east by French Guiana, on the west by British Guiana, and on the south by the mountains which separate it from Brazil. It is governed by a governor and council of four members, all appointed by the sovereign.

There is a representative body called the **Colonial States**, elected for six years by the inhabitants. The capital is **Paramaribo**, pop. 33,821. The chief products are sugar, cocoa, fruits, coffee, rice, etc. Some gold mining is carried on also. The **Lawa Railway** is being built, and the first section of 50 miles was opened in 1905. **Area** 46,060 sq. miles; pop. 74,715. Imports, 1904, £616,625; 1905, £546,413; exports, 1904, £307,688; 1905, £369,131.

**British Consul** at **Paramaribo**, J. R. W. Pigott.

**New Guinea, or Papua**. An island lying directly N. of Australia, and after Australia the largest island in the world. It is about 1490 miles from E. to W., with a breadth at centre of 430 miles. The area is now computed to be 234,768 sq. m. The British territory comprises the south-eastern part of the island and neighbouring island groups. See **BRITISH EMPIRE**, p. 82. The German territory is known as **Kaiser Wilhelm's Land**, and lies to the north of the British territory. See **GERMANY (Colonies)**, p. 192.—**Dutch New Guinea** lies to the west of the British territory. See **Colonies, supra**.

**New Hebrides**. A long chain of volcanic islands in western Polynesia, lying W. of Fiji and N.E. of New Caledonia. **Area** about 3000 sq. m.; pop. about 100,000. The larger number of the natives are still cannibals. Under the **Anglo-French Convention** of Nov. 16th, '87, and the **Agreement** of June 26th, '88, they were, for the protection of life and property, placed under a joint commission of French and English naval officers on Pacific stations. There are many British and French settlers in the islands, and both Protestant and Roman Catholic missions. The French settlers were accused by the British, on the spot and in Australasia, of endeavouring to establish French predominance by purchasing land from the natives, and paying for it in arms and spirits, the British being prohibited by their own laws from importing either arms or alcohol. The Joint Commission have no power, under the Convention and Agreement, to deal with such importations, or with the acquisition of land. Australia and the British settlers therefore demanded the establishment of a Land Court, to deal with all disputes about land and to keep a record of titles; the appointment of a British Resident, and the equalisation of the trading conditions as to the importation of arms, alcohol, etc. By the **Anglo-French Agreement** of April 8th, 1904, the two Governments agreed to draw up in concert an arrangement to put an end to these difficulties. On Oct. 20th, 1906, Sir E. Grey and M. Cambon signed a Convention confirming a Protocol previously signed on Feb. 27th, 1906. The Protocol declared that the New Hebrides, including the Banks and Torres Islands, forms a region of joint influence, in which the subjects of the two Powers enjoy equal rights of residence, personal protection, and trade, each Power retaining jurisdiction over its subjects or citizens, and neither exercising a separate control over the group. As to citizens of other Powers, they must choose within six months between the legal systems of the two Powers, failing which the two High Commissioners decide under which system they should be placed. The two Powers undertake not to erect fortifications or establish penal settlements in the group. The two High Commissioners are to be appointed by the British and French Governments, and each is to be assisted by a Resident

Commissioner to whom they can delegate their powers. A police force sufficient to protect life and property is to be provided in two divisions of equal strength, each under one of the two Resident Commissioners. *Vila*, in the island of Efate, is made the seat of government. Various public services, the posts and telegraphs, public works, public health, ports and harbours, are to be undertaken in common, a joint Court is to be established, and regulations are made as to land suits, land grants and sales, the recruitment of native labourers, etc. The sale of arms, ammunition, and intoxicating liquors to natives is forbidden. Considerable dissatisfaction with the Convention was expressed in Australia and New Zealand. See p. 83 for High Commissioner for the Western Pacific.

**Newspaper Press Fund.** Sec., J. P. C. Coast. Office, 11, Garrick Street, W.C.

## NEWSPAPERS.

According to *The Newspaper Press Directory* for 1906 there are now published in the United Kingdom 2440 newspapers, distributed as follows:—England: London, 430, Provinces, 1438; Wales, 113; Scotland, 253; Ireland, 189; Isles, 17. Of these there are—162 daily papers published in England, 8 in Wales, 17 in Scotland, 18 in Ireland, and 4 in the Isles. In 1846 there were published in the United Kingdom 551 Journals; of these 14 were issued daily—viz., 12 in England and 2 in Ireland.

### NICARAGUA.

Nicaragua is a Central American republic, bounded on the N. by Honduras, S. by Costa Rica, W. by the Pacific, and E. by the Caribbean Sea. The Constitution of '94, as amended in Dec. '96, vests the executive in a President elected for four years, and the legislative in a Congress of one House, containing 40 members elected by universal suffrage for two years. There is religious liberty, and primary instruction is free and compulsory. Army about 2000, with a reserve of 10,000 and militia of 5000. The culture of the land is improving, coffee, bananas, and rubber plantations showing good returns. German capital is largely invested in coffee estates. The most important

industry is cattle-raising. Some mining is also done by British and American companies. There are 171 miles of railways, and a line is being built from San Miguelito, on the coast of the Lake of Nicaragua, to Monkey Point Bay, on the Atlantic Coast. Imports: cotton and woollen goods, flour, wines and spirits, drugs, hardware, provisions, etc. Exports: coffee, bananas, gold, rubber, hides, and cattle.

A treaty of friendship, commerce, and navigation with Great Britain was signed in July 1905, and ratified on August 24th, 1906.

Area, 49,500 sq. m.; pop. 500,000, consisting mainly of Indians and mixed races, with very few Europeans. The capital is Managua (pop. 30,000). Leon has a population of 45,000, and Granada of 25,000. Revenue, 1903, £293,600; expenditure £418,233; imports, 1903, £492,184; exports, £730,458. Foreign debt, 1905, £253,600; and a foreign loan of \$1,000,000 effected in the United States in 1904. Internal debt, 1904, \$13,622,436 (£454,081).

President, Señor Don José Santos Yelaz. British Minister (at Guatemala), Lionel Carden.

British Consuls: at Greytown, Herbert F. Bingham; at Managua, C. E. Nicol.

Minister to Great Britain, Señor Don Crisanto Medina, 3, Rue Boccador, Paris.

Nicoll, W. Robertson, LL.D., was b. Oct. 10th, 1851, at the Free Church manse, Auchindoir, Aberdeenshire, ed. at Aberdeen Univ. (M.A. '70, LL.D. '90) and the Free Church College, Aberdeen. Ordained minister of the Free Church, Dufftown, '74, Free Church, Kelso, '77. Editor of the *Expositor* '84. In Nov. '86 he started the *British Weekly*, which he has made such a great success, and he has successively launched the *Bookman* ('91), the *Woman at Home* ('93), and the *British Monthly* (1900). Dr. Nicoll is the author of a "Life of James Macdonell, of the *Times*" ('89), a "Memoir of Professor Elmslie" ('90); projected and edited "The Expositor's Greek Testament," "The Expositor's Bible," "The Theological Educator," "The Clerical Library," "The Household Library of Exposition," etc.; was joint editor of "Literary Anecdotes of the Nineteenth Century" ('95), joint author of the "Bookman Illustrated History of English Literature" (1905), and edited an edition of Charlotte Brontë's works (1902). Married, in '97, Miss Catherine Pollard. Address: Bay Tree Lodge, Hampstead.

Niegosh, Voivod Shako Perof Petrovich, First President of the first Montenegrin Skupstina. Served with great credit in the War of Independence, 1876, and was awarded the Obilish Medal, the highest military distinction in the country. After the war he resumed his duties as aide-de-camp to Prince Nicholas, and successively became Governor of Antivari, Governor of the Nikshish District (a post he occupied 9 years), and member of the Council of State. When Montenegro was given a legislative assembly, in 1905, the Voivod was elected member for Cetinje by a great majority, and was then chosen by his colleagues to preside over the new Parliament.

### NOBEL PRIZES.

The Nobel Foundation is based upon the will of Dr. Alfred Bernhard Nobel, the Swedish engineer and chemist, and inventor of dynamite, who died in 1896, and left part of his great fortune to constitute a fund, the interest of

which he directed to be awarded annually in prizes to those persons who shall have conferred the greatest benefit on mankind during the preceding year. There are five prizes, each worth about £8000, to be awarded for the most important discoveries or improvements in (1) Physics, (2) Chemistry, and (3) Physiology or Medicine; for (4) the most distinguished work of an idealistic tendency in the field of literature, and (5) for the best effort towards the fraternity of nations and the promotion of peace. No consideration is paid to the nationality of the candidates, but it is essential that every candidate shall be proposed in writing by some qualified representative of science, literature, etc., in the chief countries of the civilised world, such proposals to reach the Committee before the 1st of February in each year, the awards being made on the following 10th of December. The Nobel Foundation is administered by a Board of Control at Stockholm, consisting of five members with a president appointed by the King of Sweden. To carry out scientific investigations as to the value of the discoveries and improvements, and to promote the other objects of the Foundation, Nobel Institutes are established for Physical Chemistry and for the departments of Literature and Peace.

The prizes have been awarded thus :—

#### Peace—

- 1901. M.M. Dunant and Passy.
- 1902. M.M. Ducommun and Gobat (Switzerland).
- 1903. Mr. W. R. Cremer, M.P.
- 1904. The Institute of International Law (q.v.).
- 1905. Baroness Bertha von Suttner.

#### Medicine—

- 1901. Dr. Behring, of Marburg.
- 1902. Major Ronald Ross, of Liverpool.
- 1903. Prof. Finsen, of Copenhagen.
- 1904. M. Pavloff, of St. Petersburg.
- 1905. Dr. Robert Koch.

#### Chemistry—

- 1901. Prof. J. H. van 't Hoff, Berlin.
- 1902. Prof. Emil Fischer, Berlin.
- 1903. Prof. Arrhenius, Stockholm.
- 1904. Sir William Ramsay, London.
- 1905. Prof. Adolf von Bayer, Munich.

#### Physics—

- 1901. Prof. Röntgen.
- 1902. Profs. Lorentz and Zeeman, Holland.
- 1903. Prof. Becquerel and Prof. and Mme. Curie.
- 1904. Lord Rayleigh.
- 1905. Prof. Philipp Lenard, Kiel Univ.

#### Literature—

- 1901. M. Sully Prudhomme.
- 1902. Prof. Mommsen.
- 1903. M. Björnson.
- 1904. M. Mistral and Don José Echegaray.
- 1905. Henryk Sienkiewicz.

All information can be obtained from Nobel-stiftelsen, Stockholm.

**Nonconformist Choir Union.** The objects of the Union are the "developing and improving the music of Nonconformist Church Services," and the "mutual co-operation of Nonconformist Church Choirs." President: Mr. E. Minshall. Secretary: Mr. Arthur Berridge, 79, Wightman Road, Harringay, N.

**Nordau, Max Simon** was b. July 29th, '49, at Buda-Pesth, but is a Prussian subject and a citizen of the German Empire. He received his university education at Buda-Pesth, Berlin, and Paris, obtained the degree of 'M.D.', travelled all over Europe, and has been settled in Paris since '80. He was co-founder and for

many years Vice-President of the Association Littéraire et Artistique Internationale, Paris; a member of the Hellenic National Academy, Athens; and first vice-president of the Zionist (see JEWS) Congresses at Bale, '97, '98, '99, 1901, 1903, and London 1900. His first book on Paris appeared in '78; and has been followed by a great many others, among which more especially two in English translation, "Conventional Lies of the Children of Culture," '83, and "Degeneration," '93, were much criticised and led to considerable discussions. They were followed by "The Drones must die," '99. He has also published in Italian and French. His newest work is "Zeitgenössische Franzosen" (French contemporaries).

## NORWAY.

### Sovereign.

**Haakon VII.**, King of Norway, was b. Aug. 3rd, 1872, and is the second son of King Frederik of Denmark, and therefore a nephew of Queen Alexandra. His baptismal name was Charles, but he assumed the above title on becoming King in Nov. 1905, on the separation of Norway and Sweden. King Haakon and Queen Maud made their formal entry into Christiania Nov. 25th, 1905, and the King took the oath before the Storting on the 27th, and was crowned at Trondhjem on June 22nd, 1906. The King and Queen visited King Edward and Queen Alexandra at Windsor in Nov. 1906. The King married Princess Maud Alexandra, daughter of King Edward VII., on July 22nd, 1896. His son and heir-apparent is Prince Alexander, b. July 2nd, 1903, and renamed Prince Olaf on his father's accession to the throne. The King's Civil List is settled at 700,000 kroner (£38,888). He is a K.G. (Nov. 9th, 1906), G.C.B., G.C.V.O., and Hon. Admiral in the British Fleet.

### Government.

The negotiations between the Swedish and Norwegian Governments with regard to the Consulate question reached a deadlock in Feb. 1905, and the dissolution of the Union was pronounced on June 7th, by the unanimous adoption by the Storting of the following resolution: "Whereas all the members of the Ministry have resigned their offices; whereas His Majesty the King has declared himself unable to procure for the country a new Government; and whereas the constitutional Royal power has thus ceased to be in function, the Storting authorises the members of the Ministry resigning to-day, for the present, in the capacity of a Norwegian Government, to exercise the authority vested in the King in accordance with the fundamental law of the kingdom of Norway and the laws in force, with such modifications as are necessitated by the fact that the union with Sweden under one King has been dissolved in consequence of the King's having ceased to act as Norwegian King." Negotiations between Norway and Sweden followed, and the Karlsbad Convention was signed on Sept. 24th, 1905. It provided for the settlement of all differences, except those affecting independence, integrity or vital interests, between the two countries (not settled by direct diplomatic negotiations) by The Hague Court of Arbitration; for the establishment of a neutral zone on either side of the frontier, and the destruction of various Norwegian forts within this zone; for the

continuance to nomadic Laplanders of their right to graze their reindeer alternately in each country; for the prevention of impediments (in the shape of special taxation) to the transport of goods from one country to the other; and for the regulation of waterways.

King Oscar then declined the offer of the Throne of Norway to a Prince of his House, and the Government's proposal that Prince Charles of Denmark should be asked to accept election as King of Norway was submitted to a referendum, which resulted in 259,563 votes in favour of the proposal, and 69,264 against it, the opponents being principally advocates of the formation of a Republic. The Storting then unanimously adopted a motion that Prince Charles of Denmark should be elected King of Norway. The Prince accepted, and took the name of **Haakon VII.**

The Norse Constitution of 1814, several times modified since, vests the legislative power in the **Storting**, which has 123 members (41 from urban and 82 from rural districts), who are elected for 3 years. Every male citizen of 25 who has resided in the country for 5 years is qualified as an elector, except for legal disabilities. For business purposes it is divided into the **Odelsting**, composed of three-fourths of the members, and the **Lagthing**, consisting of the remainder; all new bills originate in the former. If the two divisions do not agree, the combined house deliberates, and the measure must be passed by a two-thirds majority. The King has the right of vetoing the laws passed by the Storting, but if the same bill pass three Storthings separately and subsequently elected, his veto is overridden. The executive power is in the hands of the King with a Council of State composed of one Minister and at least 7 Councillors.

### Army and Navy.

The army is established on a skeleton or cadre basis, with about 1700 officers, 2700 non-commissioned officers, and a permanent staff of 18,000 men. The numbers are completed by volunteers and men who serve compulsorily for periods varying between 126 days yearly for the artillery and 72 days for the infantry. The military force available for service beyond the frontier, with officers and men, is estimated at 25,000, and the total armed strength at 70,000 on mobilisation. There is, however, the defect that there is no reserve of the line to fill up the gaps which might arise during a war, without taking men from the Militia (Landvaern). This force was to be available in case the troops of the line were taken over by Sweden, but the severance of the two kingdoms makes them now independent of one another in army matters.

The Navy numbers about 2000, of whom 1000 are permanent, and the remainder yearly conscripts. The executive officers are divided as follows: 1 rear-admiral, 4 captains, 14 commanders, 28 lieutenant-commanders, 37 lieu-

tenants, 30 sub-lieutenants. The strength in ships built, building, and projected on Nov. 30th was:—

	Built.	Build- ing.	Pro- jected.
Coast defence vessels.	4	—	—
Torpedo vessels . . .	3	—	—
Torpedo boats . . .	21	—	3

The principal dockyards of Norway are situated as follows: **Horten**—one dry dock takes small battleships. **Christiansand**—one dry dock takes small battleships.

### Statistics and Diplomatic.

For local government the country is divided into the towns of Christiania and Bergen and 18 counties, and these again into urban and rural communes, all with representative government. The State Religion is Lutheran, but all others are tolerated, except Jesuits. Education is compulsory for children from 6½ (in towns) and 7 (in the country) to 14, the local authorities chiefly providing the cost, with subsidies from the State. Of the total area, 26,330 sq. miles are under forest, and only 3 per cent. is cultivated. There are about 1320 miles of State railways and 210 miles worked by companies. There are important and growing industries in the country, including dairying, the timber and pulp trade, canned fish, etc. Timber, wood pulp, cellulose, animal produce, skins, and tallow are the chief exports, which go mainly to Great Britain, Germany, and Sweden. Grain, metal goods, textiles, groceries, coal and coke are the chief imports, sent mainly by Great Britain, Germany, Sweden, and Russia.

**Area**, 124,495 sq. m.; **pop.** in 1900, 2,239,880. The pop. of Christiania was 223,373 (Dec. 31st, 1904), and of Bergen 72,251. **Revenue**, 1904, £5,426,367; 1905, £5,149,670; **expenditure**, 1904, £5,490,375; 1905, £5,326,977; **debt**, 1905, £16,940,170; **imports**, 1902, £15,963,750; 1903, £16,105,941; 1904, £16,230,411; 1905, £16,061,122; **exports**, 1902, £9,377,010; 1903, £9,550,275; 1904, £9,695,689; 1905, £10,273,350.

**Ministry:** *Premier and Minister of Public Accounts*, M. Michelsen. — *Foreign Affairs*, M. Løvland. — *Commerce and Industry*, M. Arctander. — *Finance*, M. Berge. — *Religion*, M. Jensen. — *Agriculture*, M. Aarrestad. — *Defence*, General Olsenn. — *Public Works*, M. Lehmkuhl.

**Minister in London**, M. Fridtjof Nansen, hon. G.C.V.O., 36, Victoria Street, S.W. — *Secretary*, M. Johannes Irgens, C.V.O. — *Consul-General*, M. Ottesen, 22, Great St. Helen's, E.C.

**British Minister at Christiania**, Sir Arthur Herbert, K.C.V.O.

**Nurses, Royal British Association of**, is a professional organisation of trained nurses, with a membership of nearly 3000. Its objects are to improve the status of the nursing profession, to establish a Register of Trained Nurses, and to carry out benevolent schemes for the advantage of members. **Secretary**, Annie J. Hobbs. **Club Rooms, Library, and Offices**: 10, Orchard Street, London, W.

### OBITUARY, 1906.

The following classified list of notable persons deceased during the year will explain itself, though it may be mentioned that, wherever it

has been possible to obtain them, the date of decease has been given in parentheses at the end of each paragraph, and the age in italic figures.

## ROYALTY AND RULERS.

- Albrecht of Prussia, Prince, Regent of Brunswick since '85 (Sept. 13), 69  
 Christian IX., King of Denmark, father of Queen Alexandra, of the dowager Empress of Russia, and the King of Greece; K.G., G.C.B., and a general of the British Army (Jan. 20), 87  
 Henry VII., of Reuss (Younger Line), Prince, former German Ambassador in Vienna (May 2), 80  
 Otto, The Archduke, nephew of the Emperor of Austria-Hungary (Nov. 1), 40  
 Saxe Coburg and Gotha, Princess Mathilda of (Aug.), 28  
 Schaumburg Lippe, Prince William of (April 4), 72  
 Schaumburg Lippe, Princess Louise of, eldest daughter of King Frederick of Denmark (April 4)  
 Tunis, Sidi Mahomed El Hadj, Bey of (May 11), 50

## PEERS.

- Arundell of Wardour, John Francis, 12th Lord (Oct. 26), 74  
 Ashbrook, Viscount (Nov. 26), 76  
 Bessborough, Rev. Walter W. Brabazon Ponsonby, 7th Earl of (Feb. 24), 84  
 Congleton, Major-Gen. Henry Parnell, C.B., 4th Baron (Nov. 12), 67  
 Cranbrook, Gathorne, Gathorne-Hardy, 1st Earl of, P.C., G.C.S.I., former Home Sec., Sec. for War, Sec. for India, and Pres. of the Council (Oct. 30), 92  
 Currie, Philip Henry Wodehouse, 1st Lord, Permanent Under Foreign Sec. '89-'93, Ambassador at Constantinople '93-8, Rome '98-1902 (May 12), 72  
 Curzon of Kedleston, Mary, Lady (July 18)  
 Foley, H. T., 5th Baron (Dec. 17, '05) 55  
 Glasnik, Joseph Russell Bailey, 1st Baron and a Bart., M.P. Herefordshire '65-'85, Hereford '86-'92 (Jan. 6), 66  
 Hampton, Sir Herbert P. M. Pakington, 3rd Baron (March 17), 57  
 Ilchester, Henry E. Fox Strangways, 5th Earl of, P.C. (Dec. 6, '05), 58  
 Leven and Melville, 11th Earl of, Lord High Commissioner Church of Scotland '98-1905; S.T.P., Keeper Privy Seal of Scotland, P.C., K.T. (Aug. 21), 71  
 Lovelace, Ralph G. N. Milbanke, 2nd Earl of and Baron Wentworth (Aug. 28), 67  
 Mansfield, William David Murray, 5th Earl of (April 29), 46  
 Masham, Lord (Feb. 2), 91  
 Molesworth, Rev. Samuel, 8th Viscount (June 6), 76  
 Newlands, W. Wallace Hozier, 1st Baron (Jan. 30), 80  
 Rutland, John, 7th Duke of, better known as Lord John Manners (Aug. 4), 87  
 Templemore, Henry Spencer Chichester, 2nd Baron, "father" of the House of Lords (June 10), 84

## BARONETS.

- Austin, Sir John, 1st Bart., Liberal M.P. Osgoldcross D., W. Riding Yorks '86-1905 (March 30), 82  
 Boughey, Sir T. F., 4th Bart. (Aug. 30), 70  
 Brown, Sir William R., 2nd Bart. (May 10), 65  
 Bruce, Sir W. Cuningham, 9th Earl of Stenhouse (May 29), 80

- Buckworth-Herne-Soame, Sir Chas., 9th Bart. (March 25), 76  
 Eehlin, Sir Thomas (Nov. 17), 62  
 Fitz-Herbert, Rev. Sir Richard (Jan. 4), 60  
 Gordon, Lt.-Col. Sir W., 6th Bart. of Earlstoun (May 12)  
 Gunning, Sir F. D., 6th Bart. (July 21), 53  
 Henniker, Sir Brydges P., 4th Bart. (July 12), 71  
 Mackenzie, Sir Allan R., 2nd Bart. (Aug. 20), 56  
 Mainwaring, Sir P. T., 4th Bart. (Feb. 21), 67  
 Makins, Sir W. T., 1st Bart., M.P. for S., S.E. and Walthamstow Divs. of Essex '74-'92 (Feb. 2), 65  
 Murray, Sir Digby, 11th Bart. (Jan. 5), 76  
 Palmer, Sir A. R., 4th Bart. (July 26), 67  
 Pryse, Sir Pryse, 1st Bart. (April 21), 68  
 Rouse-Boughton, Sir C. H., 11th Bart. (Feb. 20), 81  
 Savory, Rev. Sir Borradaile, 2nd Bart. (Sept. 12), 50  
 Shiffner, Rev. Sir George C., 4th Bart. (Jan. 23), 86  
 Scott, Sir Francis, 4th Bart. (Aug. 11), 55  
 Syngé Hutchinson, Sir Edward, 4th and last Bart. (Nov. 3), 76  
 Tennant, Sir Charles, Bart., M.P. Glasgow '79-'80; Peebles and Selkirk '80-'86; head of the chemical business at St. Rollox, Glasgow; founder of the Tharsis Copper Co.; ex-Chairman Mysore Gold Co., etc. (June 4), 82  
 Wells, Sir A. Spencer, 2nd Bart. (April 1), 39

## M.P.s AND EX-M.P.s.

- Ainsworth, David, M.P. West or Egremont Div. Cumberland '80-5, '92-5 (Feb. 21), 63  
 Jeffreys, A. F., M.P. Basingstoke Div. Hants since '87, Deputy Chairman of Committees till 1905 and then Parly. Sec. Local Government Board; P.C. (Feb. 14), 57  
 Annand, James, M.P. East Aberdeenshire, Editor *Newcastle Chronicle* '74-8 and founder *Newcastle Leader* (Feb. 9), 62  
 Bayley, Thomas, M.P. Chesterfield D. '92-1905 (March 11), 60

**Witt**, John G., K.C. (Feb. 7), 69

**Woods**, T. Hoade, senior partner Christie, Manson & Woods (March 26), 76

**Oku, General Baron**, was born in 1847, and has seen 35 years' service with the Japanese Army. In '77, when he had attained the rank of Major, he greatly distinguished himself at the siege of Kumamoto Castle by the Satsuma insurgents, cutting his way out and opening communication with the relieving army. When the war broke out with China in '94, he was given the command of a division in the Manchurian campaign, and received his title of nobility in recognition of his great services. His knowledge of the ground, and his capacity, marked him out for service in the war with Russia, and he commanded the Second Army, which landed on the east coast of the Liao-tung Peninsula in May 1904, won the brilliant victory at Kinchau, and did such splendid service in the subsequent fighting in Manchuria.

**Old Age Pensions.** In the 1902 edition of the ANNUAL and previous editions, articles have appeared on this subject giving an account

of what has been done in the way of inquiry by Royal Commission and otherwise in this country, and by legislation abroad. During 1906 Ministers were interviewed on the subject, but did not give any definite promises to legislate. The Prime Minister (Nov. 20th), however, said he admitted the necessity of dealing with the subject at the earliest possible moment, and both he and Mr. Asquith declared themselves in favour of a universal scheme.

**Oman** is an independent state in South-Eastern Arabia, whose bounds have been considerably reduced during the last hundred years. It is ruled by a Sultan, Seyyid Faysal bin Turki, Hon. G.C.I.E., whose capital is Muscat (pop. 40,000). He succeeded in '88, and is recognised by the British Government, which has an agent at Muscat. Over 74 per cent. of the trade is with India and the United Kingdom, and over 90 per cent. of the shipping trade is British. Area, 82,000 sq. m. Pop. about 1,500,000.

British Consul and Political Agent at Muscat, Captain W. G. Grey.

**Ommanney, Sir Montagu F.** G.C.M.G., K.C.B., I.S.O., Permanent Under-Secretary of State for the Colonies, and Secretary of the Order of St. Michael and St. George, is the son of Mr. Francis Ommanney, and was b. 1842. He was ed. at Cheltenham and Woolwich, and entered the Royal Engineers in Jan. '64. He was employed on special duty under the War Office and Admiralty and at the Royal Military Academy '67-74, and acted as private secretary to the Earl of Carnarvon, Secretary of State for the Colonies, '74-7. In the latter year he was appointed a Crown Agent for the Colonies. He was a Commissioner of the Colonial Exhibition in '87, a member of the Royal Commission for the Paris Exhibition 1900, and of the Uganda Railway Commission '95-1900. In May 1900 he was appointed to succeed Sir Edward Wingfield at the Colonial Office. In '67 he married Charlotte Helen, daughter of Mr. O. Ommanney, of Bloxham, Oxfordshire.

**Opium Trade, Society for Suppression of the**, 181, Queen Victoria Street, E.C. Hon. Sec., Joseph G. Alexander, LL.B.; Sec., Rev. George A. Wilson.

**Ordnance Survey The**, is a department under the Board of Agriculture and Fisheries for the preparation of maps and plans of the United Kingdom, which are issued on various scales. The Survey was transferred from Army Funds to Civil Votes by the Survey Act 1870. The survey has always been organised upon a military basis, and carried out under military superintendence by officers selected from the Royal Engineers. Survey sections are always held in readiness to carry out such surveys as may be needed on active service. Maps of the whole of Great Britain have been published on the scales of 25 in. to the mile for cultivated districts, 6 in. to the mile, and 1 in. to the mile, and of Ireland on the 6 in. and 1 in. scales. The revision of the survey of Great Britain and the re-survey of Ireland on the 25 in. scale are in progress. There are also maps on the scales of 2 miles, 4 miles, and 10 miles to the inch. Maps can be purchased from accredited agents in the chief towns of the United Kingdom, and can be obtained through many of the post offices in smaller towns, and through any bookseller. The offices of the Director-General of the Ordnance Survey are at Southampton, and there are

several divisional offices at Edinburgh, Dublin, etc.

**Organists, Guild of (Incorporated),** 11, Queen Victoria Street, E.C. Warden, P. Rideout, Mus.D.

**Orléans, Duc d'.** Prince Louis Philippe Robert, the head of the house of Orléans, and probably the chief claimant to the throne of France, is the eldest son of the late Comte de Paris, and was b. Feb. 6th, '69. In '90 he entered Paris, notwithstanding the Expulsion Act of '86, and claimed his right, as a Frenchman, to undertake military service for his country. He was arrested, but shortly afterwards liberated. After the death of his father he received his supporters in London, and then removed to Brussels, as being nearer France. In 1905 he organised and led a North Polar exploring expedition. His sister, Princess Hélène d'Orléans, was married to the Duc d'Aosta in June '95. His marriage with the Archduchess Maria Dorothea of Austria was celebrated at Vienna, Nov. 5th, '96.

**Orphan Working School and Alexandra Orphanage,** Maitland Park, Haverstock Hill, N.W. Founded in 1758. Entirely maintains and educates 500 boys and girls. A Convalescent Home at Harold Road, Margate, contains provision for 25 children. The object of the institution is to keep and educate children of respectable parentage left fatherless and in need. The institution is dependent upon voluntary contributions. **Secretary,** Alexander Grant; **Office,** 73, Cheapside, E.C.

**Oxford and Cambridge Schools Examination Board.** Secs., E. J. Gross, M.A. Caius College, Cambridge; P. E. Matheson, M.A., 74, High Street, Oxford.

**Oyama, Field-Marshal Marquis,** was b. at Kagoshima in 1844. Entered the Japanese army, was appointed colonel in '71, promoted major-general in the same year, lieutenant-general in '77, general '91, and in '98 was raised to the rank of Field-Marshal. Having served as military attaché on the French side during the Franco-Prussian War, upon his return to Japan he entered the Ministry of War, and assisted in the work of reorganising the army. In the Satsuma rebellion ('77) he took command of a brigade, and played a conspicuous part in subduing the revolt. Afterwards he was appointed Under-Secretary, and subsequently Minister of War. When war broke out between Japan and China he was Minister of War, but he took the field as commander of the second army, and captured Kinchow, Talienswan, Port Arthur, and Wei-hai-wei. In 1904 Oyama was Chief of the General Staff, and when war broke out with Russia he was appointed Commander-in-Chief in Manchuria, defeating the Russians at the three great battles of Liau-Yang, the Shaho, and Mukden. He received the Order of Merit Feb. 21st, 1906, and resigned his post as Chief of the General Staff in April. Unlike most Japanese, Marshal Oyama is tall and stout. His wife was educated in America, and took a degree.

## P

**Pacific Cable, The British,** was completed on Oct. 31st, and was opened for traffic on Dec. 8th, 1902. The rate per word for cable messages between England and Australasia is 3s. The cable is "all-British," and runs from Vancouver, on the west coast of Canada, to Fanning Island, Fiji, and Norfolk Island in the Pacific, and thence by means of two cables to New Zealand and Queensland respectively. Its total length is 7838 nautical miles. It was constructed by the Telegraph Construction and Maintenance Company, whose tender was for the sum of £1,795,000, at the cost of the Governments of the United Kingdom, Canada and the Australasian Colonies, whose proportional interests in the undertaking are: the United Kingdom five-eightieths, Canada five-eightieths, the Australian Commonwealth one-third, and New Zealand one-ninth each. **Revenue, 1903-4, £80,118; 1904-5, £87,446; 1905-6, £91,952. Expenditure (including £35,000 reserve), 1903-4, £90,324; 1904-5, £87,751; 1905-6, £86,963.** To the above annual expenditure has to be added a sum of £77,545 for repayment of capital with interest. There is a Board of Control representing the Imperial Government, the Dominion of Canada, the Commonwealth of Australia, and New Zealand. **General Manager,** Mr. C. H. Reynolds; **Secretary,** Mr. Hugh Latham. **Office,** Queen Anne's Chambers, Tothill Street, Westminster, S.W.

**Paderewski, Ignace Jan,** the famous pianist and composer, was b. on Nov. 6th, 1860, in Padolia, a province of Russian Poland. He began to play the piano at the age of three, and, when seven years old, was placed under

Pierre Sovinski, a local tutor. In '72 he went to Warsaw, learning harmony and counterpoint from Roguski, and subsequently from Frederick Kiel. He toured through Russia, Siberia, and Roumania, playing only his own compositions. In '78 he became Professor of Music in Warsaw Conservatoire, and for a while in '84 he was a professor at Strasburg Conservatoire, but then definitely decided to try his fortune as a virtuoso. After three years' study with Leschetizky, in Vienna, he made his *début* in '87 with instant success. He toured through Germany, appeared in Paris ('89), in London ('90), and in America ('91). He has composed a concerto in A minor for piano and orchestra, a suite for orchestra in G, many pieces for the piano, and an opera "Manru." Married, '99, the Baroness de Rosen.

**Palestine Exploration Fund, The,** was founded June 22nd, 1865, for the purpose of conducting systematic and scientific research in the Holy Land. Its work is conducted on strictly scientific principles, and necessarily possesses unusual interest for Bible students of all denominations, since it aims at the accurate and systematic investigation of the archaeology, topography, geology, physical geography, and the manners and customs of the Holy Land. The Society's organ is the *Quarterly Statement*, and it has a long list of valuable publications. The city of Gezer is now being excavated, under the superintendence of Mr. Macalister. President, The Archbishop of Canterbury; Hon. Secretary, J. D. Crace, Esq.; Acting Secretary, Mr. George Armstrong; **Office,** 38, Conduit Street, W.

**Pali Text Society.** Sec., Prof. T. W. Rhys-Davids, Ph.D., LL.D., Harboro Grange, Ashton-on-Mersey.

### PANAMA.

The Republic of Panama was constituted on Nov. 3rd, 1903. Till that date the republic was one of the nine departments making up the Republic of Colombia. The inhabitants of the Isthmus of Panama were strongly in favour of the acquisition of the Panama Canal Concession by the United States and the construction by them of the Canal. When, after the Treaty between the United States and Colombia had been signed, the Colombian Congress refused to ratify it, the independence of the Isthmus was declared on Nov. 3rd, 1903. The United States Government at once recognised the new Republic, and concluded with it a treaty on Nov. 18th, 1903, guaranteeing and agreeing to maintain the independence of the Republic of Panama. Panama then ratified the Treaty. Great Britain, together with most of the European Powers, have formally recognised the Republic. See **ENGINEERING**, p. 143, for Panama Canal scheme.

The Republic is divided into 7 provinces, each under a governor, with other subordinate officials. The Atlantic ports are Colon, Bocas del Toro, and Puerto Bello; and the chief Pacific ports Panama and Pedregal; but the British Consul in Panama reported in 1904 that the agreement with the United States delimiting the zone for the canal had left both Panama and Colon practically without a port, and had made the Americans masters of the situation so far as foreign trade was concerned, since it would be practically impossible to enforce any Customs regulations of their own which were not in harmony with those prevailing across the border. The Taft Agreement of Nov. 1903, however, provides that all imports, except supplies for canal construction, which pay no duty, shall be taxed at 10% *ad valorem*. The railway runs from Colon to Panama across the isthmus, a distance of 47 miles, and is worked by the Panama Railway Co., whose chief offices are at New York.

**Area**, 31,580 sq. miles; **pop.** 360,542, including a great mixture of races. **Capital**, Panama; **pop.** 35,148. **Imports**, 1903, £171,590; 1904, £190,600; 1905, £2,500,000 (including canal supplies, etc.); **exports**, 1903, £174,643; 1904, £193,000; 1905, £220,000.

**President**, Dr. Manuel Amador Guerrero.  
**U.S. Minister**, Mr. Herbert Squiers.  
**Governor of Canal Zone** (vacant by appointment of Mr. C. E. Magoon to Cuba, Oct. 13th, 1906).  
**Executive Sec. (acting)**, Mr. Harry D. Reid.  
**Chief Engineer Canal Works**, Mr. J. F. Stevens.  
**British Consul at Panama**, C. C. Mallet, C.M.G.  
**Consul-General to Great Britain**, Mr. C. R. Zachrisson, 35, Chapel Walks, South Castle Street, Liverpool.

### PAN-AMERICAN CONFERENCE, 1906.

The third Pan-American Conference was held at Rio de Janeiro in August 1906. Additional importance was given to it by the fact that Mr. Elihu Root, United States Secretary of State, travelling officially on board a warship, attended some of its sittings, made several weighty speeches, and continued his journey by visiting several other republics. The work of the conference was chiefly done in committee. The committee appointed to deal with the question of the Drago Doctrine drew up a

resolution recommending that each American nation, at its discretion, should request the tribunal at The Hague to study questions of forcible collections of public debts and pecuniary claims of all kinds. Some disagreement was manifested during the discussion of this resolution, Uruguay and Colombia desiring the elimination of the subject from the programme of the conference; whilst Brazil, the United States, and Mexico desired that the question should be referred to the tribunal at The Hague without comment. Eventually the delegates signed a resolution requesting the next conference at The Hague to pronounce upon the merits of the Drago Doctrine.

The **Drago Doctrine** is a proposition which the South American Republics seek to establish as a part of international law. It is to the effect that no monetary claim due to the subject of a foreign Power shall be collected by force employed by that Power. The doctrine was formulated in the Argentine Republic by Señor Carlos Calvo, a well-known jurist, and enunciated by Dr. Luis Drago, Minister for Foreign Affairs, at the time when Great Britain, Italy and Germany, with the concurrence of the United States Government, were blockading a Venezuelan port for the purpose of collecting certain debts.

The other decisions arrived at were:

(i) Re-organisation of the Council of the International Bureau of American Republics.

(ii) The construction of an American inter-continental railway, the actual work being left to each country through which it is to pass.

(iii) Instruction to the Pan-American delegates to the next conference at The Hague to support any general arbitration convention which may be proposed.

It was also decided to hold the next conference at Buenos Ayres in 1910.

The various speeches delivered by Mr. Root in Brazil, the Argentine Republic, Uruguay, Peru, and Chile came as commentaries on the work of the Pan-American Conference. At Rio de Janeiro he delivered an address described by the North American press as "defining the policy of the United States as being inspired by a desire to effect Pan-American solidarity as part of the still greater movement for the establishment of peace throughout the world." In Uruguay Mr. Root said: "The great declaration Monroe made in the infancy of Latin-American liberty was an assertion to all the world of the competency of Latin-Americans to govern themselves. That assertion my country has always maintained." In Chile he declared: "While the nineteenth century was the century of the United States, the twentieth century will be the century of South America, and no part of the world has better prospects."

As a set-off to these speeches some of the delegates to the conference at Rio de Janeiro did not conceal their opinion that the peril to South America may just as well come from the United States as from Europe. One member, who was supposed to express the views of the President of Mexico, proposed as an amendment to the Monroe Doctrine, "that American Republics should be prevented from adding to their American territory." The Bolivian delegate opposed the appointment of the United States Secretary of State as president of the International Bureau of the Republics. Both propositions were overruled.

**Paraguay** See p. 436.

## PARLIAMENT OF GREAT BRITAIN AND IRELAND.

- I. THE MINISTRY, with tables showing appointments from 1894 to 1906.
- II. THE HOUSE OF LORDS, with Biographies of all Peers and Bishops.
- III. THE HOUSE OF COMMONS, with

- (i) Biographies of all M.P.s;
- (ii) Pollings in all Constituencies at and since Jan. 1906;
- (iii) An account of Political Parties since 1868;
- (iv) The General Election, 1906.

Under the Constitution the supreme political authority in the United Kingdom is vested in the King (see EDWARD VII., p. 130) and Parliament. The Executive authority in practice is vested in the Cabinet (which is a Committee of Ministers, nominated by the Crown but responsible to Parliament), whose power rests upon the possession of a majority in the House of Commons. The Legislative authority resides in Parliament. This article deals first with the Ministry and then with Parliament. A record of the 1906 Parliamentary Session will be found in the article SESSION.

### I. THE MINISTRY.

From an early period the kings of England were advised on public affairs by a **Privy Council**, matters of State being discussed in the Sovereign's presence, and the result determined by vote subject to his pleasure. The selection by the Sovereign of a few of the whole number was no doubt the origin of the Cabinet Council. It was not until the Restoration, says **Macaulay**, that the interior council began to attract general notice. The sovereign cannot now constitutionally preside at a Cabinet Council.

The Chief of the Cabinet and of the Ministry is called the **Prime Minister** or **Premier**. It is he who at the summons of the sovereign forms an administration, of which he is the head. Although each member of the Cabinet administers his own department independently of his colleagues, all important departmental matters are submitted to him, the most important being brought before the whole Cabinet, and no appointment of moment is made or recommended to the Crown without his knowledge and concurrence. His own **patronage** is very extensive. In forming an administration, he selects all those who are to fill the various offices, though the appointments are subject to the sovereign's approval. It is upon his advice that as vacancies occur the archbishops, bishops and deans and the highest judges are appointed, and over one hundred **Crown livings** are filled; and upon his recommendation that peerages, baronetcies, and the Garter are conferred, and such high appointments as the Lord-Lieutenancy of Ireland, the Viceroyalty of India, the principal ambassadorships and colonial governorships, and the lord-lieutenancies of counties, are made by the Crown. He is the leader of the House of Parliament of which he is a member. By Royal Warrant dated Dec. 2nd, 1905, the precedence of the Prime Minister was definitely settled, and he was given "place and precedence next after the Archbishop of York." Only Princes of the Blood Royal, the Lord High Chancellor, and the two Archbishops, therefore, rank above him. When a **Ministry resigns** it is the function of the sovereign to call upon some statesman to form

another administration. There is no restriction upon the Royal choice, but the statesman usually selected is the leader of the opposing party in one of the two Houses.

The offices which invariably give the holder **Cabinet rank** are those of First Lord of the Treasury, Lord Chancellor, Lord President of the Council, the Secretaries of State for the Home Department, Foreign Affairs, the Colonies, for War, and for India, Chancellor of the Exchequer, and First Lord of the Admiralty.

The offices the holders of which may or may not be included in the Cabinet include those of Lord Privy Seal, Chancellor of the Duchy, First Commissioner of Works, Postmaster-General, Lord-Lieutenant of Ireland, Lord Chancellor of Ireland, Chief Secretary for Ireland, Secretary for Scotland, President of the Board of Trade, President of the Board of Agriculture, President of the Local Government Board. Appointments to all these offices, and to many others, a full list of which appears on pp. 330-3, are made by, or on the recommendation of, the new Prime Minister, and each person so appointed may hold office as long as he does. Members of the Cabinet are necessarily **Privy Councillors**, and their deliberations are confidential. Ministers holding office direct from the Crown, on going from one such office to another, do not vacate their seats. There is, in effect, no limit to the duration of a Ministry but the confidence of the Commons; it will not now resign upon the adverse vote of the House of Lords, nor if it be defeated upon a trifling matter in the Commons, but only when it is placed in a minority there upon some question of importance. In such a case the **Prime Minister** either places his resignation in the hands of His Majesty, or asks leave to appeal to the country, and should the latter course be decided upon a general election follows.

### Three Estates of the Realm.

Parliament is composed of the Sovereign and the Three Estates of the Realm, which are the Lords Spiritual, the Lords Temporal, and the Commons; the Lords Spiritual and Temporal sitting together and forming the House of Lords. The Sovereign alone has the power of summoning or proroguing or dissolving Parliament, and gives the Royal Assent to measures which have passed both Houses. Unless it be dissolved by the Crown, Parliament exists seven years from the date on which it was first to meet. The demise of the Crown does not dissolve Parliament, but, on the contrary, renders an immediate assembling of the two Houses necessary; and if there be no Parliament in existence, the old Parliament must reassemble, and may sit again for six months, if it be not within that time dissolved by the new Sovereign.

## MINISTRIES

OFFICE.	Ld. Rosebery's Administration (March '94—June '95).	Ld. Salisbury's 3rd Administration (formed June 29th, '95).	Reconstructed Nov. 1900.

(2) Died 1904. Marquis of Bath appointed Jan. 20th, 1905.

(3) Succeeded by Mr. E. T. Salvesen, Jan. 1905, and he by Mr. J. A. Clyde, K.C., Oct. 1905.

It is in the House of Peers that the Sovereign meets Parliament, the formal ceremonies connected with the opening or proroguing of the Legislature are gone through, and the Royal Assent is given to bills. On these occasions the "faithful Commons" merely attend in their lordships' House. The French language is still employed in giving the Royal Assent. When a public bill is approved, the Clerk of the Parliaments says, "*Le roy (or, la reine) le veult.*" If the measure be a private one, he says, "*Soit fait comme il est désiré.*" Should the bill have subsidies for its object, the official says, "*Le roy (or, la reine) remercie ses bons sujets, accepte leur b n volence, et ainsi le veult.*" If the Sovereign thinks fit to refuse approval to a measure, the clerk then says, "*Le roy (or, la reine) s'avisera.*" This power of rejection, it may be noted, was last exercised by Queen Anne, in the year 1707. It is in the Lower Chamber exclusively that the national estimates are voted, and the majority of important legislative proposals are initiated.

### Clerk of the Parliaments.

The Clerk of the Parliaments is the chief officer of the House of Lords, by whom, in conjunction with the Clerk Assistant and the Reading Clerk, are performed such duties as making minutes of the proceedings, swearing peers and witnesses, and signifying the royal assent to bills which have passed both Houses. The office of Clerk of the Parliaments is held by Sir Henry J. L. Graham, K.C.B.

## II. THE HOUSE OF LORDS.

Peers are created by the Sovereign, and, with an exception to be noticed presently, the titles are hereditary, though they may be lost by attainder for high treason. Before the union of the three kingdoms, England, Scotland, and Ireland had each a peerage of its own. The Act of Union with Scotland, in 1707 provided that the Scotch peers should be represented in the House of Lords by a portion of their number only; and as it made no provision for the creation of any new Scotch peers, the peerage of North Britain consists exclusively of those whose titles date from before the year 1707. The Act of Union with Ireland provided that Ireland should be represented in the House of Lords by a portion of her peers only. It was further enacted that one new Irish peerage might be created on the extinction of three existing Irish peerages, and that when the number should be reduced to one hundred, if one peerage became extinct one other might be created.

The peerage collectively may thus be classified as consisting of peers of England, of Scotland, of Great Britain, of Ireland, and of the United Kingdom, but of the Scotch and Irish peers only a portion are peers of Parliament. Irish peers who have not been elected to represent their order in the House of Lords may be returned and may sit for any borough or county constituency in Great Britain. The petition of every claimant to a title of nobility is referred to the Committee for Privileges of the House of Lords, a body which is composed of the Lord Chancellor, the ex-Lord Chancellors, and the

Lords of Appeal, or some of them, the President being the Chairman of Committees. Counsel and witnesses may be heard, and the case is decided by the majority of the members of the committee present.

### The Lords Spiritual.

The House of Lords is composed of two of the estates of the realm, the lords spiritual and temporal. The first consists of the Archbishops of Canterbury and York, and twenty-four bishops of the Church of England, the number not having been increased with the successive creation of new bishoprics. The Archbishops and the Bishops of London, Durham, and Winchester are always entitled to sit; the other bishops only receive a writ of summons when the voidance of a see decreases the total number of lords spiritual to less than twenty-six, and then in order of seniority of appointment. The Bishop of Sodor and Man is not included in this rotation, and has no vote in Parliament. A bishop ceases to be a lord of Parliament on resigning his see.

### The Lords Temporal.

The temporal lords may be divided into peers whose right to sit and vote in the House is hereditary, representative peers of Scotland and Ireland, and lords of appeal in ordinary. By the Act of Union between England and Scotland the Scottish peers send sixteen representatives to the House of Lords, who are elected immediately after every general election, and sit until Parliament is dissolved. The Irish peers elect twenty-eight representatives for life.

The Lords of Appeal, of whom there may not be more than four appointed, enjoy the dignity of a baron for life. By the Act of '76 they were to lose the right to sit and vote on resigning office; but by the Appellate Jurisdiction Act of '87 any retired lord of appeal may sit and vote as a member of the House of Lords during his life. And it was directed, '98, that the children of legal life peers and of legal life peers deceased should in future have the courtesy title of "Honourable," together with the rank and precedence next to and immediately after the younger children of all hereditary barons now created or hereafter to be created, and immediately before all baronets.

The lords temporal are divided into dukes, marquises, earls, viscounts, and barons, these titles taking precedence in the order given. But it should be borne in mind that a peer may hold a superior Scotch or Irish title (and by which he may be generally known) to that under which he sits as a peer of the United Kingdom. Thus the Duke of Buccleuch sits as Earl of Doncaster. The lords spiritual and temporal have each an equal vote in the house, whatever may be their rank. A newly created peer, or one elevated to a higher title, is introduced by two other peers of his own degree, who are accompanied by the Earl Marshal the Lord Great Chamberlain, all in their parliamentary robes, attended by Garter King of Arms, or his deputy, and Black Rod. Peers are robed on these occasions, and at the opening of Parliament by His Majesty, but wear their

ordinary dress when the House is sitting for business. A bishop is introduced by two other bishops, but without many of the formalities described above; Scotch representative peers are sworn like peers succeeding to a title; writs are issued to Irish representative peers who present them before being sworn.

The peers place themselves somewhat differently to the Commons. There are in this House, as in that, rows of benches running down each side from the throne to the bar; but in the Lords there are, near the bar, a few seats known as the cross benches, the occupants of which face the woolsack. In this quarter of the House sit the Royal dukes, who take no side in politics, and a few noble lords who give a rigid adhesion to neither great party. The lords spiritual sit on the upper benches to the right of the throne, and retain these places no matter which party may be in power. The other lords range themselves as the Commons do,—the supporters of the Ministry on the right of the woolsack, and the Opposition on the left.

The House of Lords has both legislative and judicial powers. It is the highest appellate court of the United Kingdom: it may in certain cases try members of its own body; it tries any person who may be impeached by the House of Commons, and it also decides claims to the peerage. The Appellate Court is constituted of the Lord Chancellor and of other legal lords of high standing, such as ex-lord chancellors, and the lords of appeal in ordinary. It may sit during a parliamentary recess, and its hours of business are from 10.30 a.m. to 4 p.m. See p. 251.

The following is the present composition of the House of Lords: Peers of the Blood Royal, 3; Archbishops, 2; Dukes, 22; Marquises, 23; Earls, 124; Viscounts, 40; Bishops, 24; Barons, 331; Scotch Representative Peers, 16; Irish Representative Peers, 28; total, 613.

### Lord High Chancellor.

The Lord High Chancellor, who is appointed by mere delivery of the Great Seal to him by the sovereign, is principal legal adviser of the Crown, is by prescription Speaker of the House of Lords, and may act in that capacity even though he be not a peer; he is by virtue of his office a privy councillor, and as the first existing great officer of State he takes precedence of all but royal dukes and the Archbishop of Canterbury. He presides, if present, when the House of Lords is sitting as an appellate court. He is president of the Chancery Division of the High Court and of the Court of Appeal, and is one of the Judicial Committee of the Privy Council. In the absence of the sovereign he reads the King's Speech at the opening and prorogation of Parliament, and he is always one of the Commission for giving the royal assent to bills. He is visitor of all hospitals of royal foundation, the general guardian of all infants, idiots, and lunatics, and has the general supervision of all charitable trusts. His patronage is very extensive. He nominates the puisne judges and county court judges; and, except for Lancashire, he appoints the county magistrates, generally accepting the nominations of the lords-lieutenant and the borough justices. He is the patron of twelve canonries and a large number of livings. On retiring from office he receives a pension of

£5000 a year, but in such case he commonly assists the Lord Chancellor and the Lords of Appeal in Ordinary in the transaction of the judicial business of the House of Lords. Any one who has filled the office of Lord Chancellor may also, at the request of the Lord Chancellor, sit in the Court of Appeal, but he shall not be required to sit and act in the Court unless upon request he consents so to do. The holder of the office may not be a Roman Catholic. The present Lord Chancellor is Lord Halsbury.

The Chairman of Committees in the House of Lords is appointed at the commencement of every session. The holders of the office have been the late Lord Redesdale, '51-86; the late Duke of Buckingham and Chandos, '86-9; the Earl of Morley '89-1905; and the Earl of Onslow since March 1905. The Chairman of Committees and several other peers are authorised by commission to act as deputy Speaker in the absence of the Lord Chancellor; and should none of these be present any lord may be chosen to act.

The Serjeant-at-Arms of the House of Lords attends the Lord Chancellor with the mace; but the duty of maintaining order in certain parts of the chamber is one of the functions of Black Rod. The Gentleman Usher of the Black Rod is an officer of the House of Lords appointed by the Crown who assists at the introduction of Peers.

### Principal Officers of House of Lords.

*Clerk of the Parliaments*, Sir Henry J. L. Graham, K.C.B.

*Clerk Assistant*, Hon. E. P. Thesiger, C.B.

*Reading Clerk and Clerk of Outdoor Committees*, E. H. Alderson, Esq.

*Deputy Serjeant*, S. Hand, Esq.

*Resident Superintendent*, Mr. Williams.

# Alphabetical and Biographical List of Peers and Bishops.

(Revised to Nov. 30th, 1906.)

The following list contains in alphabetical order the names of all peers of whatever classification, whether they be English, Scotch, Irish, of Great Britain, or of the United Kingdom, those who are not entitled to a seat in the House of Lords having an \* prefixed.

It also includes the bishops, whether they be lords of Parliament or not, the distinction between these being indicated in the same manner.

The initials S.P. and I.P. and S.R.P. and I.R.P. are used to signify that the lord is a Scotch or Irish peer, or a Scotch or Irish representative peer.

The abbreviations *n.*, *s.*, *bro.*, *un.*, *h.b.*, and *g.s.* will be readily understood to mean nephew, son, brother, uncle, half-brother, and grandson. P.C. is used where the peer is a Privy Councillor, and L.L. stands for Lord Lieutenant.

**Abercorn**, James, 2nd D. of (cr. 1868). Sits as M. of Abercorn (1790). Surname Hamilton. B. 1838, s. 1885. P.C.; K.G.; C.B.; L.L. Co. Donegal; M.P. Co. Donegal '60-80; Groom of the Stole to H.M. the King; Chm. Brit. S. Africa Co. *Heir*, M. of Hamilton, M.P., s. C. *Baronscourt, Newtown Stewart, Ireland*; 61, *Green Street, W. Carlton*.

**Abercromby**, George Ralph, 4th L. (cr. 1801). Surname Abercromby. B. 1838, s. 1852. *Heir*, Hon. J. Abercromby, bro. *Turf*.

**Aberdare**, Henry Campbell, 2nd B. (cr. 1873). Surname Bruce. B. 1851, s. 1895. *Heir*, Hon. Henry Lyndhurst Bruce, s. L. *Duffryn, Mountain Ash, Glamorganshire*; *Longwood, Winchester*; 83, *Ealon Square, S.W. Brooks's*.

**Aberdeen**, John Campbell, 7th E. of (cr. 1682). Sits as Visc. Gordon (1814). Surname Gordon. B. 1847, s. 1870. K.T.; P.C.; G.C.M.G.; L.L. Aberdeenshire; Viceroy Ireland Feb. to July '86, and again appointed Dec. 1905; Gov.-Gen. of Canada '93-8; Hon. D.C.L. (Oxon); L.L.D. Toronto. *Heir*, Lord Haddo, s. L. 58, *Grosvenor Street, W.*; *Haddo House, Aberdeen*; *Coldstream Ranch, Vernon, B.C.*

**Abergavenny**, William, 1st. M. of (cr. 1876). Surname Nevill. B. 1826, s. 1868 (as 5th E.), K.G. *Heir*, E. of Lewes, s. C. *Eridge Castle, Tunbridge Wells, Carlton*.

**Abingdon**, Montagu Arthur, 7th E. of (cr. 1682). Surname Bertie. B. 1836, s. 1884. *Heir*, Ld. Norreys, s. C. *Wytham Abbey, Oxford Travellers*.

**Abinger**, Shelley Leopold L., 5th L. (cr. 1835). Surname Scarlett. B. 1872, s. 1903. J.P. Hants. C. *Boscombe Manor, Bournemouth*.

**Acton**, Richard Maximilian, 2nd L. (cr. 1869). Surname Dalberg-Acton. Lord-in-Waiting Dec. 1905. B. 1870, s. 1902. *Aldenham Park, Bridgnorth*.

**Addington**, Egerton, 2nd L. (cr. 1887). Surname Hubbard. B. 1842, s. 1889. J.P. Bucks and Buckingham; partner John Hubbard & Co. and Egerton Hubbard & Co., Russia merchants; M.P. Buckingham '74-80, North Bucks '86-9. *Heir*, Hon. J. G. Hubbard, s. C. *Addington Manor, Winslow, Bucks*; 24, *Prince's Gate, London, S.W.*

**Ailesbury**, Henry Augustus, 5th M. of (cr. 1821). Surname Brudenell-Bruce. B. 1842,

s. 1894. M.P. N. Wilts '86-92. Director Capital and Counties Bank, Ltd. *Heir*, George W. J. Chandos, s. (E. of Cardigan). *Savernake Forest, Marlborough, Carlton, Army and Navy*.

**Ailsa**, Archibald, 3rd M. of (cr. 1831). Surname Kennedy. B. 1847, s. 1870. Is also Lord Kennedy (cr. 1452), and Earl of Cassillis (cr. 1509); Lieut. R.N. Reserve. *Heir*, E. of Cassillis, s. C. *Cutzean Castle, Ayr, N.B.*; 65, *LANCASTER GATE, W. Travellers, Guards*.

\***Airlie**, David Lyulph Gore Wolseley, 11th E. of (cr. 1639). Surname Ogilvy. B. 1893, s. 1900. A minor. S.P. *Heir*, The Hon. Bruce Arthur Ashley Ogilvy, bro. *Corlachie Castle, Airlie Castle, and Auchterhouse, Forfarshire*.

**Albany**, H.R.H. Leopold Charles Edward George Albert, and D. of (cr. 1881). B. 1884, s. 1884. Succeeded as reigning Duke of Saxe-Coburg and Gotha, etc., July 30th, 1900. (See p. 190.) *Claremont Park, Esher, Surrey*.

**Albemarle**, Arnold Allan Cecil, 8th E. (cr. 1666). Surname Keppel. B. 1858, s. 1894.

Was Lieut.-Col. Comdg. Inf. Batt. C.I.V. in Transvaal War; Brigadier Comdg. Norfolk Vol. Brig.; M.P. Birkenhead '92-4; J.P. and D.L. Norfolk; C.B. (military) and A.D.C. to the King; M.V.O., V.D. *Heir*, V. Bury, s. C. *Quidenham Park, Thelford, Norfolk*.

Fellow of New Coll.; called to the Bar, Inner Temp., '81, and for some time was on the staff of the *Pall Mall Gazette*. In '85 he fought the Harrow D.; private sec. to Mr. Goschen, then Chan. of the Exchequer, '87-9; Under-Sec. for Finance in Egypt '89-92; author of "England in Egypt"; Chairman of the Board of Inland Revenue '92-7; succeeded Lord Rosmead as Governor of Cape Colony and High Commr. for S. Africa '97. He met Mr. Kruger in conference at Bloemfontein, in June '99, to try and arrive at a settlement of the Uitlanders' grievances and other difficulties between the Transvaal and British Government, but the conference failed, and war afterwards broke out. Appointed Governor Transvaal and Orange River Colonies 1900. In 1901 he was, on visiting England, elevated to the peerage, and in further recognition of his public services, especially in connection with the peace settlement, he was, in 1902, made a viscount. In 1903 he visited England and Europe on vacation, and in September received an invitation to join the Cabinet, but declined. Resigned his offices and returned home in 1905. His action in S. Africa was made the subject of debate in the House of Commons in the 1906 Session (*q.v.*), and the Peers voted their high appreciation of his services. A dinner was given in his honour at the Hotel Cecil on May 24th, presided over by Mr. Chamberlain, while a public address was presented in August expressing high appreciation of the services rendered by him to the Crown and Empire in Africa. The address was signed by more than 370,000 people. Other addresses from Cape Colony and Natal were also presented to him. Hon. D.C.L. (Oxon) 1906. *Sturly Court, near Canterbury; 47, Duke Street, St. James's, S.W. Brooks's, Athenæum, and New University.*

- [**Ritchie**, Charles Thomson, 1st L. (cr. 1905). Surname Ritchie. Died 1906. See OBITUARY.]
- Robartes** (see Clifden).
- Roberts of Kandahar and Pretoria**, Frederick Sleigh, 1st E. (cr. 1901). Surname Roberts. He is the son of Sir Abraham Roberts, G.C.B. B. 1832. E. at Eton and Addiscombe. Lieut. in the Bengal Artillery '51; Capt. and Brevet-Major '60; served in the Indian Mutiny, and gained the Victoria Cross; in the Abyssinian war ('68) as Assistant Quartermaster-General and brevet Lieut.-Colonel; in the Loosha Expeditionary Force; C.B. '72; Quartermaster-General in India '75; in the Afghan war of '78 commanded the column sent to operate through the Kuram Valley, and gained a brilliant victory at Charasiab and entered Cabul. On the investiture of Candahar by Ayoub Khan, after the disaster at Maiwand, he marched from Cabul to Candahar, one of the most brilliant military feats of modern times, and defeated the Pretender. He was created a baronet '81, and given the G.C.B. and C.I.E. In '81 he took command of the forces against the Boers in South Africa, but was recalled in consequence of peace being made. He succeeded Sir Donald Stewart in the command of the Indian Army '85; was created a Peer Jan. '92; in April '93 resigned his command. Field-Marshal and Com.-in-Chief in Ireland '95; appointed to command the forces in S. Africa at the end of '99, and achieved a series of brilliant successes, amongst them being the relief of Kimberley, the capture of

Cronje, and the annexation of the two Republics. His only son won his V.C., and met his death at the battle of Colenso. In recognition of his services his lordship was in 1901 created an Earl, and voted a grant of £100,000; received the order of the Garter, and the Order of the Black Eagle, the highest decoration in the German Army. He was appointed Commr.-in-Chief in succession to Lord Wolseley, but retired on abolition of the office, Feb. 1904. Visi ed S. Africa 1904. In 1905 issued a stirring appeal for a system of national military training as the only alternative to conscription. Hon. LL.D. Dublin '80; Hon. D.C.L. Oxon. '81. Cambridge University made him an hon. LL.D. in June, and he was made a G.C.S.I. in May '93; D.L. Edin. '93; D.Lit. Dublin (hon.) 1901; LL.D. Durham 1903; P.C. '95; K.P. '97; K.G. 1901; O.M. 1902. *Heiress-pres.*, Lady Aileen Mary, d. *Athenæum*, *Marlborough, United Service*.

**Rosebery**, Archibald Philip, 5th E. of (cr. 1703). P.C., K.G., K.T. Sits as Ld. Rosebery (1828). Surname Primrose. B. 1847, s. 1868. E. at Eton and Christ Ch., Oxford; m. '78, Hannah (died '90), d. of the late Baron Mayer de Rothschild, M.P. Appointed a commissioner to inquire into endowments in Scotland '72; Under-Sec. Home Office, '81-3; Lord Rector Univ. Edinburgh '80 and Glasgow '99; Lord Privy Seal, and First Commr. of Works '85; Foreign Sec. '86; cast in his fortunes fully with Mr. Gladstone,

entirely agreeing with his Home Rule policy. Elected L.C.C. Jan. 17th, '89, and Chairman '89-'91 and '92; Foreign Sec. '92, and K.G. Succeeded Mr. Gladstone in March '94 as Prime Minister, and carried on the government till its defeat in '95. During '96 his attitude upon the Armenian Question differed from that of Mr. Gladstone, and finally he decided upon resigning the leadership of the party in order to leave himself an absolutely free hand upon this question. In '98, from his place in the House of Peers, he paid a noble and eloquent tribute to the life and public services of Mr. Gladstone, and later on supported the attitude taken up by Lord Salisbury on the Fashoda situation. He urged the country to support the Government in its prosecution of the Transvaal war during '99, but in a letter to Capt. Lambton, Liberal candidate for Newcastle, in Sept. 1900, he condemned the general conduct of affairs by the Govt., and in speeches in the House of Lords during the Session he urged the necessity of army reform. In Nov. 1901 he consented to address a meeting of Derbyshire Liberals, declaring that he felt that, at a crisis in the fortunes of the country which he was persuaded was grave and daily increasing in gravity, he should put his views into the common stock. In Dec. 1901 he delivered the historic Chesterfield speech, in which he declared that the Liberal party were free from the Irish alliance. In Oct. 1902 his lordship unveiled a statue of Mr. Gladstone at Glasgow, and in 1903-4-5 he was the most conspicuous opponent of Mr. Chamberlain's Fiscal proposals and of the Government, while he drew appreciably nearer the official Liberal party. Just before the Jan. 1906 General Election he made a strong pronouncement against Home Rule, and took no part in the formation of the Liberal Government which followed the election. He is a Captain of the Royal Co. of Archers (the King's Bodyguard for Scotland). L.L. Linlithgow and Midlothian. Author of "William Pitt the Younger," '91, "Sir Robert Peel," '99, "The Last Phase," 1900, and "Lord Randolph Churchill," 1906. Lord Rosebery won the Derby in '94, '95, and 1905. High Steward of Kingston-on-Thames 1901; Chancellor of Lond. Univ. 1902. *Heir*, Lord Dalmeny, M.P., s., who came of age Jan. 1903. L. *Mentmore, Leighton Buzzard; Dalmeny Park, Edinburgh; The Durdans, Epsom*; 38, *Berkeley Square, W. Brooks's*.

- Winchester**, Herbert Edward, 87th Bp. of. (See founded 636.) Surname Ryle. B. 1856; s. of Rt. Rev. J. C. Ryle, Bp. of Liverpool. m. '83, d. of the late Major-Gen. Adams. E. Eton, Newcastle Scholar; Cambridge, Scholar of King's; B.A. '79, M.A. '82, D.D. '96; Principal of St. David's Coll., Lampeter, '86-8; Hulsean Prof. Divin., Camb., '87-1901; Pres. Queens' Coll., Camb., '96-1901; Chaplain in Ordinary to Queen Victoria '98-1901; Hon. Canon of Ripon '95-1901; Bp. of Exeter 1901-3; Bp. of Winchester and Prelate of the Most Noble Order of the Garter from 1903. *Farrham Castle, Surrey; Lollards' Tower, Lambeth, S.E.*
- Winchester**, Henry William Montagu, 16th M. of (cr. 1551). Surname Paulet. B. 1862, s. 1899. m. 1892, Charlotte Josephine, widow of Samuel Garnett, of Arch Hall, co. Meath. late Capt. Hants Carbiniers I.Y. Is premier Marquis of England. L.L. Hants; Chairman Hants C.C. *Heir-pres.*, Capt. Charles Standish Paulet, c. *Amport St. Mary's, Andover, Hampshire.*
- Winchelsea and Nottingham**, Henry Stormont, 13th E. of (cr. 1628). Surname Finch-Hatton. B. 1852, s. 1898. *Heir*, Visct. Maidstone, s. C. *White's, Carlton.*
- Winterstoke**, William Henry, 1st L. (cr. 1906). Surname Wills. B. 1830. Chairman Imperial Tobacco Co., Ltd.; Director G.W.R.; M.P. Coventry '80-86, East Bristol '95-1900; Bart. '92. *Bladon, Somerset; East Court, St. Lawrence-on-Sea, Thanet; 25, Hyde Park Gardens, W. Reform, Gresham, National Liberal, Eighty.*
- \*Winterton**, Edward, 5th E. of (cr. 1766). Surname Turnour. B. 1837, s. 1879. I.P. *Heir*, Visct. Turnour, M.P., s. *Carlton.*
- Winton** (*see Eglintoun*).
- Wolseley**, Garnet Joseph, 1st V. (cr. 1885). Surname Wolseley. B. 1833 at Golden Bridge House, Co. Dublin; s. late Major G. J. Wolseley. Served with the 80th Regt. in the second Burmese war; in the Crimea from Dec. '54 with the 90th Light Infantry; in India with the 90th, and on the staff in the campaigns of '57-9, and received a brevet majority; as Lieut.-Col. in the China War of '60; and as Colonel in Canada from '62-70; commanded the Red River Expedition; Major-Gen. commanding in the Ashantee War in '73-4; and as Lieut.-Gen. commanding in the South African War in '79. Commanded in the Egyptian War of '82, and was raised to the peerage after the victory of Tel-el-Kebir; also commanded in the Sudan campaigns of '84-5, and was made a Viscount and K.P. He received £25,000 for his services in Ashantee, and £20,000 for his Egyptian campaign. He has been High Commissioner to Natal and to Cyprus; Adjutant-General '82. Published his "Story of a Soldier's Life,"

1903; of his "Soldier's Pocket-book" several editions have appeared. Ranger of Greenwich Park '88; acted as Commander-in-Chief in Ireland '90, and Commander-in-Chief '95-1900; Field-Marshal '94, and published a biography of the Duke of Marlborough; K.P.; Order of Merit 1902. *Heiress* (to the Viscounty by special remainder), Hon. Frances G. Wolseley, *d. Farm House, Glynde, Sussex. United Service, Athenæum.*

**Wolverton, Frederic**, 4th L. (cr. 1869). Surname Glyn. B. 1864, s. 1888. Partner Glyn, Mills, Currie & Co.; Lord-in-Waiting '92-3; L.C.C. '98; Hon. Sec. League of Mercy; Press Censor in the S. African campaign; Vice-Chamberlain of the Household 1902-5. *Heir*, Hon. George E. D. Carr-Glyn, s. *Brooks's*.

\***Worcester, Huyshe Wolcott**, 105th Bp. of. (See founded 679). Surname Yeatman-Biggs. Appointed 1904. B. 1845, s. of Mr. H. F. Yeatman, J.P., of Stock House, Dorset. *E.* at Winchester, and Emmanuel Coll., Camb.; Curate of St. Edmund's, Salisbury; Vicar of Netherbury, Wilts, '77; and of St. Bartholomew's, Sydenham, '79; Select Preacher to the Universities of Oxford and Cambridge. Suffragan Bishop of Southwark '91; appointed to the see of Worcester 1904. *m.* Lady Barbara, *d.* 4th E. of Dartmouth. *Harlebury Castle, Kidderminster.*

**Worlingham** (see Gosford).

**Wrottesley, Arthur**, 3rd L. (cr. 1838). Surname Wrottesley. B. 1824, s. 1867. B.A. Oxford, 1846. A Lord-in-Waiting '69-74, '80-85. *Heir*, Hon. Victor Alexander Wrottesley, s. 3, *Herbert Crescent, Sloane Street. Brooks's, Travellers'.*

**Wynford, Philip George**, 6th L. (cr. 1829). Surname Best. B. 1871, s. 1904. Capt. R.H.A. C. *Heir*, Hon. Samuel J. Best, *bro. Wynford House, Maiden Newton, Dorset.*

**Yarborough, Charles Alfred Worsley**, 4th E. of (cr. 1837). Surname Anderson-Pelham. B. 1859, s. 1875. *m.* '86, Hon. Marcia Amelia Mary Lane-Fox (Baroness Fauconberg and Conyers in her own right—see Conyers and Fauconberg). P.C.; Vice-Adm. Co. Lincoln; Capt. Corps of Gent.-at-Arms '90-92. *Heir*, Lord Worsley, s. C. *Carlton, Brocklesby Park, Lincs.*

**York, Duke of.** See special biography under WALES.

**York, William Dalrymple**, 88th Archbp. of. Surname MacLagan. B. 1826. Primate of England, and Metropolitan, and member of the Privy Council. Prelate of the Order of St. John of Jerusalem. (The see dates from 625, and has an income of £10,000.) His Grace is the s. of Dr. David MacLagan, who served with distinction in the Peninsular War. *E.* Peterhouse, Camb.; graduated B.A., Junior Opt. '56; M.A. '60; D.D., *jure dig.*, '78; D.C.L., LL.D.; Hon. Fellow of Peterhouse '89. Deacon '56, priest '57; curacies at St. Saviour, Paddington, '56-8, and St. Stephen, Marylebone, '58-60; curate in charge of Enfield '65-9; rector of Newington '69-75; vicar of Kensington '75-8; Prebendary of St. Paul's Cathedral '78; Bishop of Lichfield '78; Archbishop of York '91. He gave up £500 of his endowments for six years (March '93) to assist the poorer clergy in his diocese. His lordship's hospitable invitation to 150 Nonconformist ministers to visit him at Lichfield Palace on Michaelmas Day '90 occasioned

much interest. In Aug. '95 similar hospitality was shown by the Archbishop to the Nonconformist ministers resident in the diocese of York. In '70 his lordship edited "The Church and the Age," and is the author of "Pastoral Letters and Synodal Charges"; "Parochial Papers"; "The Church and the People; an Inquiry into the Neglect of Public Worship" ('82), etc. Visited Russia in '97. *Bishophorpe, York. Athenæum.*

**Zetland, Lawrence**, 1st M. of (cr. 1892). Surname Dundas. B. 1844, s. as E. 1873. K.T.; P.C.; M.P. Richmond '72-3; a Lord-in-Waiting '80; Viceroy of Ireland '89-92. *Heir*, E. of Ronaldshay, s. C. *Turf.*

**Zouche of Haryngworth, Robert Nathaniel Cecil George**, 15th L. (cr. 1308). Surname Curzon. B. 1851, s. 1873. Capt. 2nd Vol. Batt. Roy. Sussex Regt.; served in S. Africa 1900-1. This barony was for many years in abeyance prior to 1829. *Heiress-presumptive*, Hon. Darea Curzon, sis. C. *Parham, Pulborough, Sussex. Carlton.*

### III. HOUSE OF COMMONS.

#### I. ALPHABETICAL AND BIOGRAPHICAL LIST OF MEMBERS.

#### II. ALPHABETICAL LIST OF CONSTITUENCIES, Registered Electors and Pollings, 1906.

#### III. POLITICAL PARTIES, 1868 to 1906.

#### IV. GENERAL ELECTION, 1906.

With certain exceptions any male of full age may be elected to represent a constituency in the House of Commons. English and Scotch peers are entirely disqualified, but Irish peers (with the exception of the 23 Representative Peers) may be returned for any constituency in Great Britain. All English, Scotch, and Irish judges; clergymen of the Established Church of either of the two kingdoms; Roman Catholic priests; the holders of various offices specially excluded by statute (including revenue officers); persons who have been convicted of certain offences; aliens (unless a certificate of naturalisation has been granted to them by the Secretary of State, and they have taken the oath of allegiance); imbeciles; Government contractors (except contractors for Government loans); and sheriffs and returning officers within the constituencies for which they act,—all these are disqualified. No candidate requires any property qualification, and no member receives any payment or allowance whatsoever.

The Speaker is the first to take the oath and subscribe the roll in a new House of Commons, and is followed by the other members, who are presented to him by the clerk. Members returned after a general election are introduced by two other members. The form of oath taken is as follows: "I, ———, do swear that I will be faithful and bear true allegiance to His Majesty King Edward, his heirs and successors, according to law. So help me God." Quakers, Moravians, Separatists, and others are permitted to make an affirmation to the same effect as the oath.

A seat in the House is vacated by death, or on acceptance of any office of profit under the Crown; and there are also certain disabilities attached to bankruptcy. All the principal members of the Government, on accepting office, vacate their seats, and are eligible for re-election; but the vacating rule does not apply to such offices as Secretary to the

Treasury or other similar appointments which are not held direct from the Crown. A change from one office held direct from the Crown to another does not involve going again to the constituency. No member of the House of Commons can, as a matter of fact, resign his seat, but this end is attained by his acceptance of the "Chiltern Hundreds." By obtaining "the stewardship of His Majesty's Chiltern Hundreds, the stewardship of the Manor of Poyning, of East Hendred and Northstead, or the Escheatorship of Munster," a member may rid himself of his duties.

When a seat becomes vacant during a session, a new writ is moved for at the commencement of an ordinary sitting, generally by one of the whips of the party to which the late member belonged. Provision is also made for the issue of writs during the recess without the intervention of the House, it being enacted that the Speaker may, on the production of a certificate signed by two members that a member has died, or accepted an office held direct from the Crown, or has been called to the House of Lords, or that the seat has become vacant by the bankruptcy of a member, order a writ to be issued for a fresh election to fill the vacancy thus caused. But a writ may not be issued during the recess on the acceptance of the Chiltern Hundreds or of the like offices. The Lunacy (Vacating of Seats) Act, 1886, provides a procedure by which the seat of any member who may have been received into a lunatic asylum shall be declared vacant.

The Act of Union with Ireland increased the number of members of the House of Commons to 658, and though it stood nominally at this figure until the end of the Parliament of '80-85, the disfranchisement of 4 constituencies returning 6 members, and the suspension of 12 writs in 7 cities and boroughs, had reduced the total of members to 640. The Redistribution Act did not alter the apportionment of members to Ireland or Wales, but increased the number returnable by Scotland from 60 to 72, and these 12 new seats being added to the nominal number of the House brought it up to 670.

### **Parliamentary Registration.**

The right to vote in the election of a member of Parliament is confined to those adult males whose names appear on the register of voters in force for some county or borough. No man can be registered who has within the twelve months preceding July 15th received parochial assistance other than medical relief, or who is an alien, unless naturalised.

In counties the qualifications are as follows: Freehold of inheritance or by purchase of the clear annual value of 40s. and upwards. Freehold for life must be of the clear annual value of £5, unless the same comes by descent, marriage, devise, or promotion to any benefits or office, in all which cases 40s. clear annual value is sufficient. Freeholders by purchase are required to be six months in possession previous to July 15th; by descent, etc., no length of possession is necessary. Copyhold of the clear annual value of £5 or upwards. Copyholders are subject to the same terms of possession as freeholders. Leasehold, if created originally for a term of not less than sixty years, of the clear annual value of £5 or upwards; if for a term of more than twenty, but less than sixty years, the clear annual value must be £30. Leaseholders by

purchase are required to be twelve months in possession previous to July 15th; by descent, etc., no length of possession is necessary. Persons qualified in respect of any of the foregoing qualifications must send in their claims to the overseers on or before the 20th of July.

**Counties and Boroughs:** Occupation as owner or tenant of any land or tenement of a clear yearly value of not less than £10. Occupation as owner or tenant of any dwelling-house. The term "dwelling-house" includes part of a house in which the landlord or superior tenant does not reside. When he does reside, his under-tenants are held to be lodgers. Occupation by virtue of any office, service or employment, of any dwelling-house which is not inhabited by a person under whom such office, service or employment is held. In the above three classes of occupiers the occupation need not be of the same premises, but may be of different premises, occupied in immediate and unbroken succession in the same constituency. Occupation as lodger of any lodgings of a clear yearly value, if let unfurnished, of £10. Successive occupation is also allowed in the case of lodgings, but it must be from one part to another part of the same house. In all cases of occupation, whether as owner or tenant, servant or lodger, twelve months' occupation is required up to the 15th day of July in any year. Occupiers need not send in claims unless they find that their names are omitted from the list published by the overseers on the 1st of August, or that in the entry on such list there be a misdescription of some essential particular or particulars, and in case of such omission or misdescription they must send in their names to the overseers on or before the 20th of August. Lodgers must claim every year, and when claiming for the first time must send in their claims to the overseers on or before the 20th of August. The revised register comes into operation on the 1st of January in each year.

Any person whose name appears on a list of electors may object to the name of any other person appearing therein. Written notice of such objection must be given both to the overseers and to the person objected to. On a given date the overseers publish a list of the names of all persons who have sent in claims or have been objected to. Copies of all the lists that have been published are then forwarded by the overseers to the clerk of the peace of the county, or (in the case of municipal boroughs) to the town clerk. He prepares an abstract of such lists of claims and objections, and transmits it to the revising barrister for his district. Revising barristers are appointed every year, for London and Middlesex by the Lord Chief Justice, and for other places by the senior judge of assize. The barrister so appointed makes a circuit and holds open court for the revision of the list in each borough and at or near every polling place in the county. The clerk of the peace, or town clerk, and the overseers, must attend. The revising barrister has power to examine witnesses on oath, to hear claims and objections, and to insert or omit names as he finds just. An appeal lies from his decision to the Queen's Bench Division of the High Court, but no further appeal is possible without its express sanction. The list of voters as settled and signed by the revising barrister is sent, in the case of a county to the clerk of the peace, who

must have it printed in a book and delivered to the sheriff; in the case of a borough to the town clerk, who must have it printed in a book and delivered to the returning officer. The clerk of the peace or town clerk must keep printed copies of the register for sale at a fixed price. The register is conclusive evidence that the persons therein named have the qualifications annexed to their respective names. (For further information on the subject see "Rogers on Registration.") In the case of any person not having his name on any list of voters, or in case of his receiving a notice of objection, he should apply to the registration agent for his district of the political party to which he belongs. Such agents are appointed and paid by the various party organisations in most constituencies, and make it their business to know the intricacies of the law on the subject.

### ***Election of a Member of Parliament.***

Under the provisions of the Ballot Act, the returning officer is required, in the case of a county election within two days after the day on which he receives the writ, and in the case of a borough election on the day on which he receives the writ or the following day, to give notice of election. The day of nomination is to be fixed as follows: in the case of an election for a county or district borough, not later than the ninth day after the day on which he receives the writ, with an interval of not less than three clear days between the day on which he gives the notice and the day of nomination; and in the case of an election for any borough other than a district borough, not later than the fourth day after the day on which he receives the writ, with an interval of not less than two clear days between the day on which he gives the notice and the day of nomination.

The candidate is nominated in writing, subscribed by two registered electors as proposer and seconder, and by eight other electors, who must also be registered in the same constituency. If at the expiration of one hour after the time appointed for the election not more candidates stand nominated than there are vacancies to be filled up, the returning officer is to forthwith declare the candidate nominated to be elected; but if at the end of one hour more candidates stand nominated than there are seats to be filled up, the returning officer is to adjourn the election and take a poll.

The poll is to take place on such day as the returning officer may appoint, not being, in the case of an election for a county or district borough, less than two or more than six clear days, and not being, in the case of an election for a borough other than a district borough, more than three clear days after the day fixed for the nomination. Sundays, Christmas Day, Good Friday, and any day set apart for a public fast or thanksgiving, are not counted. There is a special allowance of time in the case of the constituency of Orkney and Shetland.

Where an equality of votes is found to exist between any candidates at an election for a county or borough, and the addition of a vote would entitle any of such candidates to be declared elected, the returning officer, if a registered elector of such county or borough, may give such additional vote, but shall not in any other case be entitled to vote at an election for which he is returning officer. But the returning officer

may, if qualified, decline to give the casting vote; and if he be not qualified, or if he decline to act, the names of the two candidates are endorsed on the writ and a double return made. Neither candidate returned may vote until the right to the seat has been determined.

A petition may be presented by a person qualified to vote, a person claiming to have the right to be returned, and by a person alleging himself to have been the candidate; the petition may be presented on various grounds, and it may allege bribery and corruption. All election petitions are tried by two judges, who determine and report to the Speaker whether the member petitioned against, or what other person, if any, was duly elected, or whether the election was void; and when corrupt practices have been alleged, the judges report also whether any such practices have been committed, and, if so, whether it was with the knowledge or consent of any candidate, and the nature thereof; the names of the persons proved to have been guilty of such corrupt practices; and whether during the election there was an extensive prevalence of corrupt practices. When such a report as the latter is made to the House, it is usual to appoint a **Royal Commission**, on whose report, if it disclose a serious state of things, the writs for a fresh election may be suspended, so that the constituency remains temporarily unrepresented.

Any member returned for two or more places in any part of the United Kingdom is to make his selection for which of the places he will serve within one week after it shall appear that there is no question upon the return for that place.

### ***Parliamentary Procedure.***

The most striking feature in the procedure of the **House of Commons** is the great power vested in the **Speaker**. The Speaker must abstain from debating, unless in committee of the whole House; and even there he rarely takes advantage of his right. The member of the House who is elected to the office of Speaker usually acts quite independently of party considerations. He never votes, save when the numbers happen to be equal, in which case he gives the casting vote. The chief duty of the Speaker undoubtedly is the preservation of order. He holds office until a dissolution. He has a residence in the Palace of Westminster, and receives a salary of £5000 per annum; he ranks as first Commoner, and is usually awarded upon retirement a pension of £4000 and a peerage. The following have been Speakers since the meeting of the first reformed Parliament: Sir C. Manners-Sutton (first elected '17), '33-5; Mr. J. Abercromby, '35-9; Mr. C. Shaw-Lefevre (the late Viscount Eversley), '39-57; Mr. J. E. Denison (afterwards Viscount Ossington, and since deceased), '57-72; Sir H. Brand (the late Viscount Hampden), '72-84; Mr. A. W. Peel, now Viscount Peel, '84-95; Mr. W. C. Gully, now Viscount Selby, '95-1905; Mr. J. W. Lowther since June 8th, 1905.

### ***Chairman of Committee.***

The **Chairman of Committee of Ways and Means** is a member of the House of Commons who is elected when the House goes into Committee of Ways and Means, or Supply, for the first time in a new parliament, and holds office until the dissolution of that parlia-

ment. He is nominated by the Government, but is regarded as an officer of the House. The salary of the office is £2500 a year. The Chairman of Ways and Means usually presides when the House is in committee, whether on financial business or on a bill, but he may request one of several temporary or deputy chairmen nominated by the Speaker at the commencement of each session to act for him. His place is not in the chair of the Speaker, but at the table where the Clerk, who retires with the Speaker, has sat. When the House is informed of the unavoidable absence of the Speaker, the Chairman of Ways and Means exercises his authority as Deputy Speaker. He may also take the chair as Deputy Speaker, when requested to do so by the Speaker, without any formal communication to the House. The recent holders of the office include the late Mr. Raikes, '74-80; Sir Lyon (afterwards Lord) Playfair, '80-83; Sir A. Otway, '83-5; Mr. Leonard Courtney, '85-92; Mr. Mellor, '93-5; Mr. James William Lowther, '95-1905; Mr. Grant Lawson, June 21st to end of session 1905; and Mr. A. Emmott, elected Feb. 1906.

#### The Serjeant-at-Arms.

The Serjeant-at-Arms of the House of Commons carries the mace when the Speaker enters and leaves the House, places it on the table when the Speaker takes the chair, and under the table when the House goes into committee. He, by the messengers, notifies committees when the House is going to prayers. He or his deputy sits within the House, near to the door, and executes any directions of the Speaker for the maintenance of order. Certain of the galleries, corridors, etc., are under his charge. Mr. H. D. Erskine, C.V.O., is the present Serjeant-at-Arms.

#### The House in Committee.

The business of the House of Commons is transacted very largely "in committee." When the whole House is in committee the Speaker vacates the chair, the Mace is placed under the table, and the Chairman of Ways and Means or another member of the House presides. Proceedings relating to the expenditure of public money take place in Committee of Supply, while in Committee of Ways and Means resolutions having reference to the funds by which such expenditure is to be sustained, are passed. There are also grand committees, Select Committees chosen for specific purposes, and committees for the consideration of private bills.

#### Committee of Supply.

The sums necessary to defray the charge for the Army, Navy, Civil Services, Customs, Post Office, etc., are voted annually by the House of Commons in Committee of Supply. The sums required are granted for the financial year ending on March 31st. The Estimates, framed by the respective departments and approved by the Treasury, are laid upon the table soon after the commencement of each session, and any items which may be subsequently found insufficient, or any unforeseen charges, are provided by the Supplementary Estimates. Votes of credit for military and naval expenditure of an urgent character are also voted in Committee of Supply. On the

resolution embodying the vote for the number of men for the army is founded the **Army (Annual) Bill**, which provides, during twelve months and no more, for the discipline and regulation of that force. The system of granting supplies for only twelve months involves a meeting of Parliament every year, and provides at once a safeguard against the permanence of the military establishment and a means of continuing it periodically in such strength as the House itself may deem to be necessary.

#### Committee of Ways and Means.

This Committee (1) considers any proposals relative to old or new taxes and duties submitted to it by the Chancellor of the Exchequer, and (2) votes sums of money from the Consolidated Fund sufficient in amount to make good the supplies granted for the maintenance of the services of the year. Resolutions relative to taxation may be acted upon by the proper officers as soon as passed. At the end of the session a measure which on the one hand applies out of the Consolidated Fund the whole sum granted to His Majesty for the service of the financial year, and on the other hand appropriates the supplies in accordance with the votes already passed in Committee of Supply, is passed, and is known as the **Appropriation Bill**.

#### New Procedure Rules.

New Procedure Rules were proposed, and to some extent adopted, in the 1906 Session.

#### Sittings of the House.

The course of business is now as follows:—On Mondays, Tuesdays, Wednesdays, and Thursdays the House meets at 2.45 o'clock, and, after prayers, proceeds till 3 p.m. with petitions, motions for unopposed returns, and leave of absence to members, giving notice of motions, and unopposed private business. Questions are commenced at 3, and no question, unless of an urgent character, is taken after 3.45. Any member who desires an oral answer to his question may distinguish it by an asterisk, and if he do not so distinguish it the answer is printed and circulated with the votes. No motion for the adjournment of the House may be made until all the questions asked at the commencement of business (and questions may not be asked at any other time) have been disposed of, and if leave to make such motion be given, by forty members rising in their places to support it, the debate upon it takes place in due course. After questions bills may be brought in and committees nominated, and a member may now, after notice, present a bill without an order for its introduction, and when a bill is so presented its title is read by the Clerk, and the bill is then deemed to have been read a first time and is sent to be printed. Opposed business is suspended at 11 p.m. Government business has precedence at every sitting except the sittings on Tuesday and Wednesday, which are reserved for private members' motions, and the sitting on Friday; but after Easter Government business instead of that of unofficial members has precedence also on Tuesday, and after Whitsuntide until Michaelmas Government business has precedence at all sittings except the sittings on the third and fourth Fridays after Whit Sunday.

The other Fridays are reserved to the consideration of bills in charge of unofficial members, and on that day of the week the House meets at noon and opposed business is suspended at 5.

### Supply.

Thursday is now the weekly Supply day. Twenty days are allotted for the actual consideration of the votes, with a power of adding three more, apart from estimates supplementary to those of a previous session, or any vote of credit or supplementary or additional votes for war expenditure. Of the days so allotted not more than one is allotted to any vote on account, and not more than one sitting to the report of that vote. At 10 o'clock on the last day but one of the allotted days the outstanding votes are put in classes of the Civil Service Estimates, and in totals so far as the Estimates for the Navy, Army, and the Revenue Departments are concerned, and a similar procedure is observed on the last allotted day in regard to the reports of the outstanding votes.

### Deputy Chairman.

The House made provision in 1902 for the appointment of a deputy chairman, who, in the unavoidable absence of the Chairman of Ways and Means, is entitled to exercise all the powers vested in the Chairman of Ways and Means, including his powers as Deputy Speaker. The late Mr. Jeffreys, M.P. for North Hants, was (Feb. 14th, 1902) appointed to the position, and was succeeded in June 1905 by Mr. Lawrence Hardy, M.P.; and in Feb. 1906 he was succeeded by Mr. James Caldwell, M.P.

### Principal Officers of House of Commons.

*Clerk of the House*, Sir Courtenay Peregrine Ilbert, K.C.S.I., C.I.E.

*Clerk Assistant*, Arthur W. Nicholson, Esq.

*Second Ditto*, Thomas L. Webster, Esq.

*Principal Clerks*: W. Gibbons, Esq., C.B., *Public Bills and Fees*; F. St. George Tupper, Esq., *Committee Office*; W. H. Ley, Esq., *Clerk of the Journals*; J. H. W. Somerset, Esq., *Private Bill Office*.

*Senior Clerks*: H. C. Tower, C. V. Frere, L. T. Le Marchant, G. C. Giffard, Esqs.; Sir Everard H. Doyle, Bart.; S. L. Simeon and A. I. Dasent, Esqs.

*Assistant Clerks*: H. West, H. A. Ferguson-Davie, A. H. Ellis, Percy A. Bull, F. R. W. Wynn, W. E. Grey, F. C. Holland, J. W. G. Bond, H. C. Dawkins, R. P. Colomb, B. H. Fell, R. E. Childers, Esqs.

*Examiners of Petitions for Private Bills*, C. W. Campion, J. F. Symons-Jeune, Esqs.

*Taxing Master*, C. W. Campion, Esq.

*Clerk to Examiners and Taxing Master*, B. H. Fell, Esq.

*Librarian*, R. C. Walpole, Esq.

*Shorthand Writer*, W. H. G. Salter, Esq.

*Secretary to Speaker*, Hon. Edward Gully, C.B.

*Serjeant-at-Arms*, H. D. Erskine, Esq., C.V.O.

*Deputy Serjeant*, F. R. Gosset, Esq.

*Assistant Serjeant*, Walter Erskine, Esq.

*Chaplain*, The Ven. Archdeacon Wilberforce.

*Speaker's Counsel*, Hon. Sir E. Chandos Leigh, K.C.B., K.C.

## 1. ALPHABETICAL AND BIOGRAPHICAL LIST OF MEMBERS.

The following is a list of members of the new House, elected at the General Election in Jan. 1906, and at subsequent bye-elections up to Nov. 30th, 1906. A prefixed \* denotes that the member was in the last Parliament. The names of members returned at the General Election who have since died or ceased to be members are enclosed in brackets.

A list of the pollings in the various constituencies, together with the Nos. of registered electors in the constituencies and in the United Kingdom, will be found on pp. 416-26; and on p. 427 appears a review of the state of parties at successive periods from 1868 down to Nov. 30th, 1906. See also SESSION, PARLIAMENTARY, 1906.

\***Abraham, W. (N.)**, returned unopposed for Cork, North-East, Jan. 18th, 1906, and has sat for it since '93; represented co. Limerick, West, '85-'92; b. (B.A.); joint managing director Farnley Iron Co.; Chairman Brown Bayley's Steel Works, Ltd., Sheffield; Barrister Inner Temple; member of Leeds City Council; Lord Mayor of City of Leeds 1904-5. Farnley Hall, Leeds. *National Liberal, Leeds Club, Leeds Liberal.*

\***Arnold-Forster, Right Hon. H. O. (L.U.)**, elected for Croydon Jan. 15th, 1906, and sat for Belfast, West, '92-1905; 2nd s. of the late Mr. W. D. Arnold, Director of Public Instruction in the Punjab, and adopted son of the late Right Hon. W. E. Forster; *b.* '55; *E.* Rugby and Univ. Coll., Oxford (1st class in History); Lincoln's Inn '79; North-Eastern Circuit; was President of the Land Settlement Commission in South Africa; appointed Sec. to the Admiralty in Nov. 1900; Sec. of State for War 1903-5; author of "In a Conning Tower," "Our Home Army," "Army Letters," "The Army in 1906," etc. 2, The Abbey Garden, Westminster.

**Ashley, Wilfrid William (C.)**, elected for N. Lancs, Blackpool D., Jan. 18th, 1906; *b.* '67; *E.* Harrow and Magdalen Coll., Oxford; Grenadier Guards '89-98; *m.* 1901, Maud, only child of Sir E. Cassel, G.C.M.G. 32, Bruton Street, Berkeley Square, W. *Travellers', White's, Brooks's.*

\***Ashton, T. G. (L.)**, elected for Bedfordshire, S. or Luton D., Jan. 24th, 1906, and has sat for it since '95; and for Cheshire, Hyde D., '85-6; *b.* '55; *E.* Rugby and University College, Oxford (M.A. '82); J.P. Lancs., Cheshire, and Sussex. Hyde, Cheshire; Vinehall, Robertsbridge, Sussex; and 39, Prince's Gardens, S.W. *Brooks's, Reform, and New University.*

\***Asquith, Rt. Hon. H. H. (L.)**, elected for Fife, East, Jan. 26th 1906, and has sat for it since '86; *b.* '52; *E.* City of London School and Balliol College, Oxford (1st-class Classics, Craven University Scholar, and Fellow of Balliol); called to the Bar, Lincoln's Inn '76. Engaged with Sir C. Russell on behalf of Mr. Parnell at the Parnell Commission. Q.C., Home Secretary, and P.C. '92. In the course of the Home Rule debates, he rose rapidly to the first rank in the House. During the labour disputes of '93, his attitude commanded general approval. He was entrusted with the conduct of the Disestablishment of the Church of Wales Bill during the '94 session. Married Miss Margot Tennant, May 10th, '94. On the defeat of the Rosebery Ministry in June '95, he resumed practice at the bar. When the Boer War broke out, while heartily supporting at the Reform Club meeting of Liberals in 1901 the vote of confidence in Sir H. Campbell-Bannerman as Leader of the party, he claimed for himself and others full liberty on the South African question from time to time to express and to act upon their honestly entertained convictions without any imputa-

- tion of party disloyalty. He supported Lord Rosebery when the Liberal League was formed in 1902, and became a Vice-President. He was one of the most effective speakers on the Liberal side during 1903 on the Education question and the War Commission's report, and during 1903, 1904 and 1905 in opposition to Mr. Chamberlain's fiscal policy. Chancellor of the Exchequer Dec. 1905. Hon. D.C.L. Oxford 1904; Lord Rector Glasgow Univ. Nov. 1905. *Brooks's, Athenæum, and National Liberal.*
- Asbury**, John Meir (L.), elected for Lancs., Southport D., Jan. 24th, 1906; *E. Trin. Coll., Oxford (M.A., B.C.L.)*; called to Bar '84; K.C. '95. 16, Grenville Place, S.W. *Reform, Ranelagh.*
- \*Atherley-Jones**, L. (L.), elected for Durham, North-West, Jan. 19th, 1906, and has sat for it since '85; *b. '51; E. Manchester Grammar School and Brasenose Coll., Oxford (B.A. '74)*; called to the Bar, Inner Temple, '75; North-Eastern Circuit; K.C.; Recorder of Newcastle-upon-Tyne 1906. 25, Pembroke Road, Kensington, and 4, Paper Buildings, E.C. *Devonshire, Savage.*
- \*Aubrey-Fletcher**, Rt. Hon. Sir Henry Aubrey, Bart. (C.), elected for Sussex, Lewes D., Jan. 22nd, 1906, and has sat for it since '85; M.P. for Horsham '80-85; *b. '35; E. Eton; J.P. Surrey and Bucks; J.P. and D.L. Sussex; Groom-in-Waiting to the Queen '85-6; C.B., P.C. 1901. Ham Manor, Angmering, Sussex; Dorton House, near Thame; Wreay Hall, Cumberland; Llantrithyd, Glamorgan; 1, Upper Belgrave Street, S.W. Carlton and Constitutional.*
- \*Baker**, J. Allen (L.), elected for Finsbury, Eastern D., June 29th, 1905, and re-elected Jan. 16th, 1906; *b. in Canada; L.C.C. East Finsbury; member Society of Friends. "Donnington," Donnington Road, Harlesden, N.W.*
- Baker**, Sir John (L.), elected for Portsmouth Jan. 17th, 1906, and sat for it '92-1900; *b. '28; woollen manufacturer; twice Mayor of Portsmouth and long Chairman of School Board; knighted '95. North End House, Portsmouth. National Liberal.*
- \*Balcarras**, David Lindsay, Lord (C.), elected for the Chorley D. of Lancashire Jan. 19th, 1906, and has sat for it since June '95; *e. s. of Earl of Crawford; b. '71; E. Eton and Oxford; was President of the Oxford Union; Captain 1st Volunteer Battn. Manchester Regt.; Junior Lord of the Treasury, Oct. 1903-5; m. 1900, Constance, d. of the late Sir Henry Pelly, Bart., M.P. Haigh Hall, Wigan; Balcarras, Colinsburgh, Fife; and 74, Brook Street, W.*
- \*Baldwin**, A. (C.), elected for Worcestershire, Bewdley D., Jan. 19th, 1906, and has sat for it since '92; *s. of Mr. G. Baldwin, of Stourport; b. '41; Chairman Gt. Western Railway, Metropolitan Bank (of England and Wales), Ltd., and Baldwin's, Ltd.; D.L. Worcester, and J.P. Wilden House, Stourport; and Kensington Palace Mansions, W. Carlton and Athenæum.*
- \*Balfour**, Right Hon. A. J. (C.), elected for the City of London, Feb. 27th, 1906, defeated at Manchester, East, Jan. 13th, 1906; sat for it '85-1905, having previously represented Hertford '74-'85; *b. '48; e. s. of Mr. James Maitland Balfour, of Whittingehame (d. '56), and Lady Blanche Gascoigne Cecil, 2nd dau. of 2nd Marquis of Salisbury. E. Eton and Trinity College, Camb. (M.A. '73, Hon. Fellow 1902); was private sec. to Lord Salisbury '78-80, and went with him to Berlin '78; member of the so-called "Fourth Party"; President Local Govt. Board '85-6; Sec. for Scotland, with a seat in the Cabinet, and Vice-President Committee of Council on Education for Scotland, '86-7; Chief Sec. for Ireland '87-91, and carried the Crimes Act through Parliament; created the Congested Districts Board for Ireland '90; First Lord of the Treasury and Leader of the House on the death of Mr. W. H. Smith '91, and again '95-1905. On the retirement of Lord Salisbury in 1902, he became Prime Minister and Lord Privy Seal, retaining the office of First Lord of the Treasury. He introduced the Education Act, 1902, and was its most prominent supporter all through the prolonged discussions upon it. The Fiscal issue raised by Mr. Chamberlain led to a number of very interesting situations during 1903, 1904, and 1905. Mr. Balfour expressed agreement with Mr. Chamberlain's proposals, but, holding that the country was not ripe for the taxation of food, he committed himself and the Government only to a policy of Retaliation. In 1904 he displayed great skill in dealing with an admittedly delicate Parliamentary situation, and survived many debates on the Fiscal question. In the 1905 Session his Government was defeated on one occasion, but resignation did not follow. At the end of the year, however, a critical situation developed, and he and his Cabinet resigned. See *Political Parties*, p. 427, and *FISCAL QUESTION*, p. 165. Author of "A Defence of Philosophic Doubt" ('79), "Essays and Addresses" ('93), enlarged edition 1904, and "The Foundations of Belief, being Notes Introductory to the Study of Theology" ('95, cheap edition 1901). D.L. for East Lothian; late Captain East Lothian Yeomanry; P.C. '85; F.R.S. '88; Hon. LL.D. Edinburgh '81, St. Andrews University '85, Cambridge '88, Dublin and Glasgow '91; Hon. D.C.L. Oxford '91; Lord Rector of St. Andrews '86, Glasgow '90; became Chancellor of Edinburgh University '91; member of the Senate of London University '88; President British Association 1904; Captain Royal and Ancient Golf Club of St. Andrews '94-5; President National Cyclists' Union '96. Whittingehame, Prestonkirk, East Lothian. *Carlton, Travellers', Athenæum, New Club (Edinburgh), and many others.**

- \***Campbell-Bannerman, Rt. Hon. Sir Henry, G.C.B. (L.)**, returned unopposed for Stirling Burghs Jan. 15th, 1906, and has sat for the constituency since '68; *s.* of the late Sir J. Campbell, but in '72 assumed additional surname of Bannerman under the will of his maternal uncle, the late H. Bannerman; *b.* '36; *E.* Glasgow Univ. and Trin. Coll., Camb. (B.A. honours '58, M.A. '61); *P.C.*; Financial Sec. War Office '71-4 and '80-82; Sec. Admiralty '82-4; Chief Sec. Ireland '84-5; Sec. for War '86 and '92-5; chosen Leader of the Liberal Opposition in succession to Sir William Harcourt Feb. '99. Notwithstanding the differences between Liberal Imperialists and other Liberals over the Boer War, a unanimous vote of confidence in his leadership was carried at a meeting of the Liberal party held at the Reform Club, July 1901. In 1902 a passage of words took place between him and Lord Rosebery over the doctrine of the "clean slate" in regard to the Irish question and other public questions, and the Liberal League was formed. Sir Henry, however, again received the solid support of the Liberal party in the House in 1903, 1904 and 1905 in opposing the Education and Licensing Acts, Mr. Chamberlain's Fiscal policy, and the Government's action with regard to Licensing and to Chinese Labour in South Africa. On the resignation of the Balfour Administration in Dec. 1905, he was summoned by the King and formed a Liberal Cabinet, himself becoming First Lord of the Treasury and Prime Minister; the general election which followed gave him a tremendous majority. Lady Campbell-Bannermann, who was a daughter of the late Gen. Sir Charles Bruce, K.C.B., died at Marienbad, Aug. 30th, 1906. *J.P.* and *D.L.* Kent; *J.P.* Lanarkshire and Perthshire; Hon. *LL.D.* Glasgow University. Robert (C.)**, elected for Marylebone, East, Jan. 15th, 1906; 3rd s. late Lord Salisbury; *b.* '64; *E.* Eton and Oxford; called to Bar, Inner Temple, '87; *K.C.* '99; acted as private sec. to his father at Foreign Office for some years; practises at Parliamentary Bar. 20, Manchester Square, W.
- \***Chamberlain, Rt. Hon. Joseph (L.U.)**, elected for Birmingham, West, Jan. 17th, 1906, and

has sat for it since '85, and was M.P. for Birmingham '76-85; *b.* in London, July '36; *E.* private school and Univ. Coll., Lond.; joined the firm of Nettlefold, screw makers of Birmingham; was one of the leaders of the defeated unsectarian candidates for the School Board of Birmingham in '70, but in '73 he was elected chairman, and was also a member of the Town Council (Mayor '73). On the death of his father he retired from the firm, in order to devote all his energies to public life. To him was due the transfer of the gas and water works to the borough authorities, and he was the author of the improvement scheme which has entirely transformed the face of central Birmingham. In '76 he entered Parliament and took his seat below the gangway with the Radicals; Pres. Board of Trade, with Cabinet rank, '80-85, and passed a Patents Bill and a Bankruptcy Bill; Pres. Local Government Board '85 until his divergence of views on the Irish policy of Mr. Gladstone caused his resignation (March 27th, '86); Chief Commissioner to the Conference at Washington for the settlement of the dispute between the United States and Canada on the Fisheries Question. Married Miss Endicott Nov. 15th, '88. During the general election of '92 his influence in the Midlands was very marked. Throughout the Home Rule debates he led the assaults on the Bill, but took practically no part in the Disestablishment debate in '94. In the autumn he outlined a policy of social reform for the joint Unionist party, and stated that the gulf between him and the Liberal party could not now be bridged over, and in June '95 took office under Lord Salisbury as Colonial Secretary. The Workmen's Compensation Act, '97, was greatly indebted to his advocacy during its passage through the House. In '98 he made the famous "long spoon" speech in reference to foreign affairs, and declared himself strongly in favour of an alliance with the United States. The negotiations with the Transvaal, which ended in war, occupied him fully during '99, and his South African policy was one of the main controversial features of the General Election of 1900 and during 1901. He had charge in 1900 of the measure for the constitution of the Australian Commonwealth. On Feb. 14th, 1902, he was presented with an address by the City of London Corporation. He presided over the 1902 Colonial Conference. In November 1902 he visited South Africa, and on his return received an address from the Lord Mayor and Corporation of London (March 20th, 1903). In May 1903 he launched, at Birmingham, his scheme for the revision of the Fiscal Policy of the country and the adoption of a policy of Preferential Tariffs; and in September, believing that policy to be at that time unacceptable to the majority in the constituencies, he resigned, in order to be free to devote himself to explaining and popularising his proposals. He began his campaign for this purpose at Glasgow on Oct. 6th, 1903, and the Tariff Commission was afterwards set up on his initiative. He is President of the Central Liberal Unionist Council and of the Imperial Tariff Committee. His 70th birthday and completion of 30 years' service as M.P. for Birmingham were celebrated on July 7th, 1906. Lord Rector of Glasgow University '97-9; LL.D. Camb. '92;

D.C.L. Oxford '96; LL.D. Dublin '99; LL.D. Wales 1905; Chancellor of Birmingham University. Highbury, Moorgreen, Birmingham, and 40, Prince's Gardens, S.W. *Athenæum and Devonshire.*

'89-94; took silk '96; Bencher King's Inns, Dublin, 1906; P.C. Ireland 1905; appointed Attorney-General for Ireland Dec. 1905. 92, St. Stephen's Green, Dublin. *National Liberal, Liverpool Reform.*

\*Churchill, Winston Leonard Spencer (L.), elected for North-West Manchester Jan. 13th, 1906, Oldham 1900-5; *e. s.* of the late Lord Randolph Churchill; *b.* '74; *E.* Harrow and Sandhurst. Served with the Spanish forces in Cuba in '95, with the Malakand Field Force, the Tirah Expeditionary Force, the Nile Expeditionary Force, and the South African Light Horse, and was special war correspondent for the *Morning Post* during the South African campaign. "The River War," "London to Ladysmith via Pretoria," and "Ian Hamilton's March" record his impressions of the Egyptian and South African campaigns. Author of biography of Lord Randolph Churchill (Jan. 1906). He opposed the Sugar Convention Bill, criticised Mr. Brodrick's Army proposals, was one of the strongest opponents of Mr. Chamberlain's Fiscal proposals in 1903, 1904 and 1905, and joined the Liberal party. Parly. Under Sec. Colonial Office, Dec. 1905. Took a leading part on the Government side in the debate of the 1906 Session. 12, Bolton St., W.

- \*Clancy, J. J. (N.), returned unopposed for Dublin, North, Jan. 15th, 1906, and has sat for it since '85; *b.* '47; M.A. Royal University of Ireland, Scholar, Exhibitioner, and Prizeman of Queen's College, Galway; acting editor of the *Nation* '80-'85; called to the Irish Bar '87; K.C. 1906. 1, Breffni Terrace, Kingstown, Co. ## 2. REGISTERED ELECTORS AND POLLINGS, 1906.

The following table shows the total number of registered electors, with other details, in the United Kingdom in 1906:—

	England and Wales.	Scotland.	Ireland.	United Kingdom.
Population 1901 . . . .	32,527,843	4,472,103	4,458,775	41,458,721
Inhabited Houses 1901 . . . .	6,260,852	926,914	858,158	8,045,924
<b>County Electors:</b>				
Owners . . . . .	511,353	69,112	8,362	579,827
Occupiers . . . . .	2,772,173	346,937	560,476	3,679,586
Lodgers . . . . .	60,756	14,276	4,228	79,260
Total County . . . .	3,344,282	421,325	573,066	4,338,673
<b>Borough Electors:</b>				
Occupiers . . . . .	2,309,837	259,971	108,423	2,678,231
Lodgers . . . . .	127,929	16,819	2,183	146,931
Freemen, etc. . . . .	24,124	30,610	2,989	57,723
Total Borough . . . .	2,461,890	307,400	113,595	2,882,885
<b>University Electors . . . .</b>	18,712	21,676	4,762	45,150
<b>Grand Total 1906 . . . .</b>	5,824,884	750,401	691,423	7,266,708

The following is an alphabetical list of the Parliamentary constituencies of the United Kingdom, with the names of the member or members returned by each, and, where there was a contest, the figures declared to have been polled by the candidates at the General Election of 1906, and at all subsequent bye-elections up to Nov. 30th, 1906. The names of the county and borough divisions are given in parentheses after the name of the county or borough: thus, the Luton or South Division of Bedfordshire appears as Beds (S. or Luton). Therefore, in seeking for the figures with regard to any special division of a county or borough, the county or borough should be turned to in its proper alphabetical place, and the local division will be readily found. The few places which, like the City of London, Leicester, etc., are not broken up into single-member divisions, and still return two members, are distinguished in the alphabetical list of constituencies by a figure thus (2). The figures in brackets, e.g. [5280], show the number of electors on the register revised according to the 1906 returns.

## 3. POLITICAL PARTIES OF THE UNITED KINGDOM, 1868 TO 1906.

In the first years of the Parliament of 1868 only two parties were known to the House of Commons—(1) Conservatives, and (2) Liberals, the latter being subdivided into Whigs and Radicals. Irish members who were not Conservative were classed as Liberal, though they occasionally asserted their independence. The Home Rule movement was started in Dublin by the late Mr. Butt in '70, and soon gained considerable support. At the general election of '74, 56 Home Rulers were returned by Irish constituencies, and in '80 the number rose to 63. After the general election of '85 Mr. Parnell led a party numbering in all 86. In the spring of '86 Mr. Gladstone declared himself in favour of Irish Home Rule, and united his forces, or so many of them as he could carry with him in his new departure, with those of the Irish Nationalists led by Mr. Parnell. A considerable minority of Liberals, resenting Mr. Gladstone's action, declined to continue their support, and combined with the Conservatives to form that Unionist majority which succeeded in defeating the Home Rule Bill. An appeal to the country followed, and in Aug. '86 a new Parliament met, consisting of—

Conservatives . . . . .	316
Liberals . . . . .	192
Liberal Unionists . . . . .	77
Nationalists . . . . .	85

The Conservatives then carried on the government of the country for six years. The Liberal Unionists, although cordially working with and supporting the Conservative Government, retained their independence, and formed themselves, indeed, into a separate party, with a separate organisation, separate leaders, and separate whips. The only Unionist to take office was Mr. Goschen, who, at the greatest crisis in the history of Lord Salisbury's Government, accepted the post (which Lord R. Churchill had resigned) of Chancellor of the Exchequer. Attempts were made to compose the difference between the Gladstonians and Unionists, notably at the famous Round Table Conference, but all failed. In opposition the relations between Mr. Gladstone and the Nationalists were, after he had accepted Home Rule, most cordial. The even course of events was however, naturally disturbed by the decree made in the Divorce Court proceedings instituted against Mr. Parnell. The result of the memorable discussions in "No. 15" was that 54 Nationalists revolted against his leadership, and 30 remained faithful to him as the exponent of a Home Rule scheme more advanced or complete than, according to his declarations, Mr. Gladstone was prepared to propose. Mr. Parnell died in '91, and Mr. John Redmond became the exponent of his policy and the leader of his following.

## 1892 to 1895.

The General Election in '92 resulted in the return of—

Conservatives . . . . .	268
Liberals . . . . .	275
Liberal Unionists . . . . .	46
Nationalists and Parnellites . . . . .	81

From the point of view of party combination the Ministerialists found upon the whole little to complain of during the famous and protracted Home Rule Bill session of '93.

Contrary to the expectation of some members of the Opposition, the Liberal and Nationalist alliance held together wonderfully well. In '94 Mr. Gladstone resigned, and Lord Rosebery succeeded to the Premiership. Mr. Labouchere, however, and a number of Radicals acting with him, strongly objected to the appointment of a peer as Premier, and urged the claims of Sir William Harcourt to the position. The effect of their opposition, though not noticeable at the time, was seen later. On June 21st the Government were defeated on the ammunition question in committee on Army Estimates; and on the 22nd Lord Rosebery resigned, and Lord Salisbury formed an administration. His Cabinet, as ultimately constituted, consisted of no less than nineteen members, of whom fifteen were Conservative, including Mr. Goschen (who in '93 was announced to be a member of the Carlton) and four Unionists. The latter wing of the Coalition Party also received such a share of the minor appointments as caused no little heart-burning in many Conservative breasts. The dissolution of '95 which followed was notable for one thing, in that it marked the disappearance of Mr. Gladstone from Parliamentary life.

## 1895 to 1899.

The General Election of '95 resulted in giving the Unionist coalition a majority of 152, instead of a minority of 28. There were—

Conservatives . . . . .	340
Liberals . . . . .	177
Liberal Unionists . . . . .	71
Nationalists and Parnellites . . . . .	82

Lord Rosebery, the leader of the Liberal party, led the Opposition in the House of Lords, and Sir William Harcourt led the Liberal Opposition in the Commons with especial brilliancy and success in the debates on the Education Bill and the Agricultural Rates Act in '96. On Oct. 6th, '96, in the midst of the agitation arising out of the Armenian atrocities, Lord Rosebery resigned the leadership of the party. Political antagonism was allowed to fall into abeyance during the outburst of patriotic feeling evoked by the Diamond Jubilee in '97; and in '98 the criticism of the Government, which is supposed to be the prerogative, if not the duty, of the Opposition, was performed very largely by the Government's own supporters, notably in the press. The course of affairs, in China in particular, provoked the disapprobation of many Conservatives. Later in the year, however, the Government were somewhat rehabilitated by the firm stand which they made on the Fashoda question. In Dec. '98 Sir William Harcourt resigned the leadership of the Liberal party in the House of Commons, and Mr. Morley associated himself with him. Eventually Sir H. Campbell-Bannerman was chosen to succeed him, and led the party throughout the '99 session. Lord Kimberley led the Liberals in the House of Lords.

## The General Election of 1900.

The long-divided Irish Parliamentary Party was reunited at a meeting held in Committee Room No. 16, on Jan. 30th, 1900, when a resolution declaring at an end the divisions in the party, and constituting the members one united

party in accordance with the principles and under the constitution of the Irish Parliamentary Party from '85 to '90, was carried. Mr. John Redmond was afterwards elected Chairman, and in a manifesto to the Irish people declared that while Home Rule still stood first, the land question, the taxation of Ireland, and the University education question, pressed for settlement.

When the Boer War commenced in '90, the attitude of the main body of the Liberal Opposition was one of criticism of the method of the negotiations of the Government with the Transvaal, but of hearty support of the measures deemed necessary by the Government for an effective and rapid prosecution of the war. There was always a section of the party, however, conspicuous amongst which were Mr. Labouchere, Sir Wilfrid Lawson, and Mr. Lloyd-George, which denounced the war "as a crime and a blunder committed at the instigation of irresponsible capitalists," protested against a constantly increasing expenditure on armaments, which made political reform and social improvement impossible, and recognised the supreme importance of a policy of peace. The views of this section were represented by the League of Liberals against Aggression and Militarism. In March 1900 the Imperial Liberal Council was formed "as an association of Liberals who are desirous of promoting the large and efficient development of the British Commonwealth on Liberal lines, both within and outside these Islands, and who accordingly, while adhering to the traditional principles of their party, and being in full sympathy with an advanced policy of social reform on broad and generous lines, are impressed with the duty of maintaining our free, unaggressive and tolerant Empire abroad." The General Election of Oct. 1900 was hailed with delight by the Ministerialists, but the Opposition generally complained strongly of the course taken by the Government, urging that the election was forced on an exhausted register solely in order to exploit the patriotic fervour which then animated the whole nation. Mr. Balfour and Mr. Chamberlain, in their addresses to the electors, made the issue turn solely on the question of war, whether it had been just and inevitable or the reverse, and whether the Government's policy as to the settlement should be upheld. The result of the election was that the Government made a net gain of 3 seats. The figures were—

Conservatives . . . . .	354
Liberals . . . . .	186
Liberal Unionists . . . . .	68
Nationalists . . . . .	82

giving them a majority of 134, as against their majority of 152 in '95.

#### Events of 1901 and 1902.

During 1901 the differences between the Liberal Imperialists and other Liberals became acute at times, though a general meeting of the party on July 6th, 1901, expressed confidence in Sir H. Campbell-Bannerman. The Imperial Liberal Council became the Liberal Imperialist League, and Lord Rosebery made his famous Chesterfield Speech on Dec. 16th, 1901, outlining a policy of efficiency in regard to the Parliamentary and military machines, advocating legislation in regard to Education, the Housing Question, and Temperance Reform, and, with

reference to the war, pronouncing for a receptive attitude as to overtures of peace, and as large and liberal an amnesty as possible when the Boers accepted the arbitrament of the sword and acknowledged that their independence was gone for ever. He said the Liberal party was now free from the Irish alliance, and must "clean its slate." The speech was received with very general approval, and Sir H. Campbell-Bannerman said, at St. James's Hall (Jan. 13th, 1902), that he could find no substantial difference between his own views and those expressed by Lord Rosebery, though he criticised the policy of the "clean slate." Lord Rosebery spoke again, at Liverpool (Feb. 14th), and referred to the "clean slate." He said he was not prepared at any time or under any circumstances to grant an independent Parliament in Dublin, but looked for the solution of the Irish question through "some scheme of Imperial federation which should allow of local subordinate legislatures." Sir H. Campbell-Bannerman, speaking at Leicester (Feb. 19th), referred to the advice Lord Rosebery had offered the Liberal party, and said he did not know whether Lord Rosebery spoke "from the interior of our political tabernacle or from some vantage-ground outside." He added that he did not think it was quite fair to him for that question not to be answered. He (Sir Henry) was no believer in the doctrine of the "clean slate," and he reaffirmed his belief in Home Rule. Lord Rosebery's reply to this was a letter to the *Times* (Feb. 21st), in which he said: "Speaking pontifically within his tabernacle, he (Sir Henry) anathematised my declarations on the 'clean slate' and Home Rule. It is obvious that our views on the war and its methods are not less discordant. I remain, therefore, outside his tabernacle, but not, I think, in solitude." The Liberal League was then formed (Feb. 26th) to promote the policy of the Chesterfield speech, and the Liberal Imperialist League thereupon dissolved, many of the members joining the Liberal League.

The chief event of 1902, so far as the Unionist party were concerned, was the resignation of Lord Salisbury on July 11th, after nearly 14 years' tenure of office as Premier, and the acceptance of the post of Prime Minister by Mr. A. J. Balfour on July 12th, after consultation with Mr. Chamberlain, who assumed Mr. Balfour of his entire and cordial support. The bye-elections of the year showed some remarkable reductions in the Unionist vote—as, for instance, at North Leeds and Sevenoaks—and this was generally attributed to hostility to the Education Act. The Irish party showed signs of dissension during the year, and some of the members grouped themselves round Mr. Healy; while the Education Bill also led to differences of opinion.

#### Events of 1903-5.

The year 1903 (and, though not to the same extent, the year 1904) was completely overshadowed by the Fiscal Question, as to which see pp. 164-7. One of the most notable events in 1904 was the announcement of the retirement of Sir W. Harcourt, followed later in the year by his death. At the end of Nov. 1905, as a result of the long series of Liberal victories at the bye-elections, the Ministerial majority, which was 152 in '95 and 134 in 1900, was reduced to 69. The figures were as follows:—

Conservatives . . . . .	311	369
Liberal Unionists . . . . .	58	
Liberals . . . . .	218	300
Nationalists . . . . .	82	
Speaker . . . . .	1	
<hr/>		
Total . . . . .	670	
Government majority	69	

### The Change of Government.

Towards the end of Nov. 1905 there were rumours of the resignation of the Government, and a Cabinet meeting was held on Nov. 24th. The resignation of Mr. Balfour took place on Dec. 4th, and Sir Henry Campbell-Bannerman was sent for by H.M. the King and invited to form a Government. He accepted the task, and on Dec. 10th was able to present the complete list of his Cabinet to His Majesty. The new Liberal Administration was recognised on all hands to be a strong one, though Lord Rosebery, in accordance with his declaration at Bodmin, found no place in it.

Mr. Balfour, speaking at Manchester on Dec. 9th, 1905, gave as his reason for resigning that the great task remaining to the Government—the Redistribution Bill—was a measure which required more than usual unanimity, discipline, and enthusiasm to carry it through, and that the Unionist party was “distracted by internal controversies” on the Fiscal question. He therefore considered it to be the duty of himself and his colleagues “to hand over a task which we had to confess ourselves incapable of performing to those who think they are going to be strong enough to perform anything.”

For Party Organisations see pp. 435-6.

### Parties in 1906.

The Unionists held a party meeting at Lansdowne House (Feb. 15th, 1906), and carried a vote of confidence in Mr. Balfour as leader of the party; but the Duke of Devonshire made it plain that he and his friends could not act in harmony with the majority on the Fiscal question. The Balfour-Chamberlain correspondence is given on p. 165. The Unionist party machinery was reorganised during the year with a view to making it rest on a broader and more democratic basis. When Parliament met (20th) the Labour Representation Committee Members held a meeting and appointed Mr. Keir Hardie Chairman, Mr. Shackleton Deputy Chairman, and Messrs. A. Henderson and J. R. Macdonald joint Whips. A movement was set on foot soon afterwards to draw closer the ties between the Liberals and the old Labour party outside the L.R.C. members, and some friction arose through the hostility to the Liberal party displayed by the extreme Labour men, which in the case of the Cuckermouth election lost the Liberals a seat. The Master of Elibank, the Scottish Liberal Whip (Aug. 25th), referring to the Independent Labour party in the House, said it was really “the Socialist party,” and had opened war on the Liberal party. He was not sure that it would not be necessary for the Liberal party to embark on a crusade against Socialism. When the Scottish Liberal Association met at Peebles (Oct. 6th), the following resolution was carried by 55 votes to 34: “That, while expressing the deepest sympathy with the genuine aspirations of Labour, the meeting declares its belief that it is a primary

duty of the Liberal party to present strenuous opposition to all candidates who are not prepared to dissociate themselves from the Socialist party, the avowed object of which is the complete destruction of those principles of individual liberty for which Liberalism has always contended.” At the Annual Conference of the Miners' Federation at Swansea (Oct. 3rd and 4th), it was resolved by a decisive majority not to join the L.R.C. The Amalgamated Society of Railway Servants held their Conference at Cardiff at the same time, and a rule was carried that all Parliamentary candidates of the society should sign and accept the conditions of the L.R.C., and be subject to their Whips. Mr. R. Bell, M.P., fought strongly against the proposal, and there was a strong minority which supported him, sharp differences of opinion dividing the meeting. Mr. Winston Churchill at Glasgow (Oct. 11th) referred to the relations between Liberals and the Labour party, and agreed that the small minority of the latter who were animated by a purposeless and reckless hostility to Liberalism, and lost no opportunity of reviling the Liberal party and handing over its fortress to the Tories, must be resisted.

### 4. THE GENERAL ELECTION, JAN. 1906.

The General Election began on Jan. 12th with the contest at Ipswich, where the Liberals won one seat. The Ministerialist gains in the first few days were of an unprecedented character, and at that early stage gave an indication of the enormous majority which was finally accorded to the Liberal Government. Mr. A. J. Balfour lost his seat for East Manchester on Saturday, Jan. 13th, and the complete list of ex-ministers who were defeated was—

Mr. A. J. Balfour.	Capt. Pretymann.
Mr. Gerald Balfour.	Mr. Ailwyn Fellowes.
Mr. Walter Long.	Sir Savile Crossley.
Mr. A. Lyttelton.	Hon. Scott Dickson.
Mr. St. J. Brodrick.	Mr. Bonar Law.
Lord Stanley.	Mr. Bromley-Davenport.

Besides these, a large number of Parliamentary veterans on the Unionist side, some of whom, like Mr. Chaplin, had been in Parliament nearly 40 years, lost their seats. Amongst them may be mentioned: Mr. Chaplin, Sir G. Bartley, Sir C. Dalrymple, Sir J. Fergusson, Sir W. Tomlinson, Mr. C. A. Whitmore, Mr. Hayes Fisher, Sir A. Rollet, Mr. R. A. Yerburgh, Sir Lees Knowles, Mr. Gibson Bowles, Mr. E. Bond, Mr. W. E. Brymer, and Mr. J. G. Baird.

The tables below give a summary of the changes in the state of parties in the United Kingdom and in the Metropolis as a result of the General Elections from 1836 to 1906.

With the exception of Birmingham, and to some extent of Liverpool and Sheffield, the Liberals swept all the great towns of the country. Manchester, Salford, Leeds, Bradford, Halifax, Nottingham, Oldham, Preston, Wolverhampton, Sunderland, Stockport, Newcastle-on-Tyne, and Leicester, amongst others, were won entirely by Liberal and Labour members. In Glasgow 5 seats were won.

The lists of party gains on pp. 432-3 show how sweeping were the Liberal victories in the counties, notably in Cheshire, Essex, Lancashire, Middlesex, Somerset, and Suffolk.

Wales, it will be seen, returned a solid phalanx of 26 Liberals and 4 Labour members. Scotland returned 58 Liberals, 2 Labour men, 7 Conservatives, and 5 Liberal Unionists. The

\* At the dissolution in '02 the state of parties was—L. U. 65; L. 215; C. 304; N. 56; P. 30.  
† The figures here show a Gladstonian majority of 42, but this had immediately before the General Election of '95 dwindled to 28.  
‡ Including six Farnellite-members for boroughs and six for counties.  
§ See figures as to state of parties, Nov. 30th, 1905, on p. 429.

number of Liberals returned for both boroughs and counties, and for London, very largely exceeded any recent records, and for any parallel to the electoral revolution of January 1906 it is necessary to go back as far as 1832. A table is appended here showing the results of the various General Elections since that date:

**Strength of Political Parties as Returned at the General Elections 1832-1906.**

General Election.	L.	Lab.	C.	L.U.	N.	Total.

**The New Labour Party.**

The recent growth of the movement for more direct representation of Labour in Parliament by Labour representatives is apparent from the following facts.

**Labour M.P.'s 1900-5.**

Labour representatives elected at the 1900 General Election, their constituencies, and the votes recorded for them, were as follows:

	Constit.	Votes.
Abraham, W.	Rhondda D.	8,383
Bell, R.	Derby	7,640
Broadhurst, H.	Leicester	10,385
Burns, J.	Battersea	5,860
Burt, T.	Morpeth	3,117
Cremer, W. R.	Shoreditch (Haggerston)	2,290
Fenwick, C.	Wansbeck D.	5,474
Hardie, J. Keir	Merthyr Tydvil	5,745
Pickard, B.	Normanton D.	5,025

Labour candidates elected at bye-elections 1900-5 were:

	Constit.	Votes
Crooks, W.	Woolwich	6,687
†Parrott, W.	Normanton D.	6,855
†Hall, Fred.	"	Unopp.
Henderson, A.	Barnard Castle D.	3,370
Johnson, J.	Gateshead	8,220
Richards, T.	West Monmouth	7,905
Shackleton, D. J.	Clitheroe D.	Unopp.
Wilson, J.	Mid Durham	5,565

† Mr. B. Pickard died and was succeeded by Mr. Parrott, who also died and was succeeded by Mr. Hall as M.P. for Normanton D.

Labour candidates who stood unsuccessfully 1900-5 were as follows, the names of their constituencies and the votes recorded for them being similarly given:

	Constit.	Votes.
Belcher, W.	Dudley	5,876
Brocklehurst, F.	Manchester (S.W.)	2,308
Fletcher, A. E.	Glasgow (Camlachie)	3,107
Hardie, J. Keir	Preston	4,834
Hodge, J.	"	6,490
Hodge, J.	Glam. (W. or Gower)	4,276
Jones, B.	Deptford	3,806
Jowett, F. W.	Bradford (W.)	4,949
Macdonald, J. R.	Leicester	4,104
Parker, J.	Halifax	3,276
Roberts, G. H.	Norwich	2,444
Robertson, J.	Lanarkshire (N.E.)	3,984
Smillie, Robt.	"	2,900
Thorne, W.	West Ham (S.)	4,419
Ward, W.	Lancs., S.E. (Gorton)	5,241
Wilkie, A.	Sunderland	8,842

Socialist candidates, with their constituencies and votes, who were unsuccessful in the period 1900-5 were:

	Constit.	Votes.
Clarke, A.	Rochdale	901
Hempsall, J.	Lancs., N.E. (Accrington)	433
Johnson, J.	Ashton-under-Lyne	737
Lansbury, G.	Bow and Bromley (Tower Hamlets)	2,558
Quelch, H.	Dewsbury	1,597
Snowden, P.	Blackburn	7,096

**At the 1906 General Election.**

The following is a list of the M.P.'s returned at the General Election of Jan. 1906 as members of, and with the support of, the Labour Representation Committee. All members of the L.R.C. are pledged to form a distinct group in Parliament (with its own Whips and its own policy on Labour questions), and to abstain strictly from identifying themselves with or promoting the interests of any section of the Liberal or Conservative parties. A Parliamentary Fund has been raised by means of a levy on the societies affiliated to the L.R.C. at the rate of 1d. per annum, and the L.R.C. pays 25 per cent. of the Returning Officers' expenses of approved candidates and £200 per annum towards the maintenance of candidates elected to Parliament. At the 1906 Conference 231 societies were reported to be affiliated, with a total membership of 921,280. The Secretary of the L.R.C. is Mr. J. R. Macdonald, M.P. Offices: 28, Victoria Street, Westminster, S.W.

**29 L.R.C. M.P.'s.**

	Constit.	Votes.
Barnes, G. N.	Glasgow (Blackfriars)	3,284
Bowerman, C. W.	Deptford	6,236
Clynes, J. R.	Manchester N.E.	5,386
*Crooks, W.	Woolwich	9,026
Duncan, C.	Barrow-in-Furness	5,167
Gill, A. H.	Bolton	10,416
Glover, T.	St. Helens	6,088
*Hardie, J. Keir	Merthyr Tydvil	10,187
*Henderson, A.	Durham (Barnard Castle)	5,540
Hodge, J.	Lancs. S.E. (Gorton)	8,566
Hudson, W.	Newcastle-on-Tyne	18,869
Jenkins, J.	Chatham	6,692

	Constit.	Votes.
Jowett, F. W.	W. Bradford	4,952
Kelley, G. D.	S.W. Manchester	4,101
Maddonald, J. R.	Leicester	14,745
Macpherson, J. T.	Preston	10,181
O'Grady, J.	E. Leeds	4,299
Parker, J.	Halifax	8,937
Richards, T. F.	W. Wolverhampton	5,756
Roberts, G. H. (& S.D.F.)	Norwich	11,059
Seddon, J. A.	S.W. Lancs. (New- ton)	6,434
*Shackleton, D.	N.E. Lancs, (Clitheroe)	12,035
Snowden, P.	Blackburn	10,282
Summerbell, T.	Sunderland	13,430
Thorne, Will.	S. West Ham	10,210
Walsh, S.	S.W. Lancs. (Ince)	3,046
Wardle, G. J.	Stockport	7,299
Wilkie, A.	Dundee	6,833
Wilson, W. T.	S.E. Lancs. (West- Houghton)	9,262

#### 11 Miners' Members.

The following M.P.'s representing Miners' Associations were also returned at the 1906 General Election:

	Constit.	Votes.
*Abraham, W.	Glamorgan (Rhondda) Unop.	
Brace, W.	Glamorgan (S. D.)	10,514
*Burt, T.	Morpeth	5,518
Edwards, E.	Hanley	9,183
*Fenwick, C.	Northumberland (Wansbeck D.)	10,386
*Johnson, J.	Gateshead	9,651
Johnson, W.	Warwick (Nuneaton)	7,677
Wadsworth, J.	Yorks (Hallamshire)	8,375
*Richards, T.	West Monmouthshire Unop.	
Williams, J.	Glamorgan (Gower D.)	4,841
*Wilson, J.	Mid Durham	Unop.

#### 14 Other Labour M.P.'s.

There were other Labour M.P.'s representing other organisations. Mr. R. Bell, M.P. for Derby, for instance, is the railwaymen's representative; and several others, such as Mr. John Burns and Mr. Broadhurst, may be termed Independent Labour men. The following is a list of M.P.'s of this class returned:

	Constit.	Votes.
*Bell, R.	Derby	10,361
*Broadhurst, H.	Leicester	14,685
*Burns, J.	Battersea	7,387
*Cremer, W. R.	Shoreditch (Haggers- ton D.)	2,772
*Hall, F.	Yorks, W.R., S. (Nor- manton)	Unop.
Haslam, J.	Derbyshire (Chester- field)	7,254
Maddison, F.	Burnley	5,288
Nicholls, G.	Northants (North)	4,880
Richardson, A.	S. Nottingham	6,314
Rowlands, J.	Kent (Dartford)	9,532
Steadman, W. C.	Finsbury Central	3,493
Taylor, J. W.	Durham (Chester-le- Street)	8,085
Ward, J.	Stoke-on-Trent	7,660
Wilson, J. H.	Middlesbrough	9,251

It will be seen that all the Labour M.P.'s in the 1906 Parliament were returned at the General Election in January 1906. The numbers work out thus:

	No. of Labour M.P.'s
Returned at 1906 General Election	9
Returned at 1900-5 bye-elections	6*
Unsuccessful candidates 1900-5	22
Returned at 1906 General Election	54

\* Eight were returned, but two were to fill the vacancy caused first by Mr. Pickard's death and then by Mr. Parrott's.

#### The Socialist Vote, Etc.

Below is given a list of the candidates who stood as Socialists, with their constituencies and the votes recorded for them. The greater number of them were nominated by the Social Democratic Federation; some stood as Independent Socialists, and two were nominated both by the L.R.C. and the S.D.F. All members of the Independent Labour Party, like Mr. Keir Hardie, M.P., are Socialists, and many of the L.R.C. men who were returned to Parliament and are named in the list given above are also Socialists. But the majority of them stood at this election as Labour candidates and not as Socialists.

	Constit.	Votes.
*Belt, G.	Hammersmith	885
Gribble, J.	Northampton	2,366
Hartley, E. R.	Bradford	3,090
Hobson, S. G.	Rochdale	2,506
Hyndman, H.	Burnley	4,932
Irving, Dan	Lancs. (Accrington)	4,852
Jones, J.	Camborne	109
Kennedy, T.	Aberdeen	1,934
*Lansbury, G.	Middlesbrough	1,380
Quelch, H.	Southampton	2,146
† Roberts, G. H.	Norwich	11,059
† Tillett, Ben	Lancs. (Eccles)	3,985
Williams, J.	Northampton	2,544

\* Independent Socialists.

† L.R.C. and S.D.F.

#### Three-cornered Contests.

There were several constituencies in which three-cornered fights took place, Liberal, Labour, and Unionist candidates standing in competition. Unionist candidates won seats, owing to the fact that both Liberal and Labour candidates stood against them, at Ayrshire N., Croydon, Glasgow (Camachie), Lanarkshire (Govan), Lanarkshire N.W., Stockton, and Wigan.

In many cases, as at Huddersfield, Lanark N.E., Lancs. (Eccles), S. Leeds, Monmouth Dist., Northampton, Paisley, Portsmouth, and Yorks (Keighley), the Liberal candidates won against both Unionist and Labour candidates.

On the other hand, Labour candidates won against Unionists and Liberals at Deptford, Dundee, Durham (Chester-le-Street), Glamorganshire (Gower), and Glasgow (Blackfriars).

#### Combine of Liberal and Labour.

Where Liberal and Labour candidates stood together, as was found possible in some double-member constituencies, tremendous polls and enormous majorities were recorded, as at Derby, Halifax, Leicester, Newcastle-on-Tyne, and Norwich.

#### Other Points of Interest.

On the Fiscal issue the result of the election appeared to be a very decisive pronouncement, on the admission of all parties. The great majority of the new House was constituted of Free Traders, and they were estimated to be

in a majority of 376 over the supporters of Fiscal Reform. Lists were published directly after the election which classified 11 of the Unionists returned as Free Traders, 33 as adopting Mr. Balfour's official programme, and 110 as followers of Mr. Chamberlain's policy of Tariff Reform. Another analysis gave Mr. Balfour's followers as numbering 82.

### Unopposed Returns.

The number of members returned unopposed was 113, made up as follows:—

Nationalists . . . . .	73
Liberals . . . . .	23
Conservatives . . . . .	12
Labour . . . . .	4
Liberal Unionists . . . . .	1
Total . . . . .	113

### Election Petitions.

The following election petitions were presented, and were tried by the Parliamentary Election Petition Judges, Mr. Justice Grantham, Mr. Justice Channell, and Mr. Justice Lawrence.

1. Great Yarmouth. Petition dismissed (May 4th). Mr. Justice Channell held that the election should be set aside on the ground of bribery by an agent, but Mr. Justice Grantham could see no evidence of agency proved against Mr. Fell. No order as to costs.

2. Maidstone. Dismissed with costs (May 16th).

3. Worcester. Petition alleged bribery, treating, and illegal practices, and Mr. Williamson (C) was unseated (May 28th).

4. Sheffield (Attercliffe D.). Petition dismissed with costs.

5. Cornwall (Bodmin D.). Petition alleged bribery, treating, and undue influence, and the Hon. T. Agar Robartes (L) was unseated (June 18th).

6. Westmorland (Appleby D.). Petition was for a recount and a scrutiny, which increased the majority of Mr. Leif Jones from 3 to 5. Petition withdrawn (April 9th).

### The Total Votes Polled.

The *Liberal Magazine* for Feb. 1906 gave the following figures as to the total votes polled at the General Election. In two-member constituencies the votes cast for all the candidates on either side are added together and divided by two:—

	Liberal & Labour.	Unionist.	Majority.
ENGLAND—			
London ..	278,299	245,723	L 32,576
Boroughs ..	809,818	634,637	L 175,181
Counties ..	1,418,212	1,195,558	L 222,654
Total ENGLAND ..	2,506,339	2,075,918	L 430,421
WALES ..	171,315	96,912	L 74,403
SCOTLAND ..	366,605	233,901	L 132,704
Total Gt. BRITAIN ..	3,044,259	2,406,731	L 637,528
IRELAND ..	350,000	150,000	L 200,000
Total for UNITED KINGDOM ..	3,394,259	2,556,731	L 837,528

[Liberal majority in 1892, 200,000; Unionist majority in 1895, 104,000; and in 1900, 123,000.]

A *Times* article (Feb. 16th, 1906) very nearly agreed with the above figures, though, owing to the method adopted for computing the voting in the case of uncontested seats, lower totals were given as follows:—

	Minis-terialist.	Unionist.	M. majority.
England.. ..	2,498,348	2,059,533	438,815
Wales* .. ..	91,620	52,637	38,983
Scotland .. ..	355,127	221,710	133,417
Great Britain ..	2,945,095	2,333,880	611,215

\* Omitting three seats which were uncontested in 1900, and Merthyr Tydvil, where no Unionist candidate took part.

### Chief Liberal Organisations.

The chief Liberal organisations are:—

**Eighty Club**, 3, Hare Court, Temple, London, E.C. Formed in 1880 to promote Liberal Education and stimulate Liberal organisation. The members lecture on political subjects and address Liberal Associations and meetings throughout the country. No fees are charged. Secretary, R. C. Hawkin.

**League of Young Liberals**. President, Franklin Thomasson, M.P.; Hon. Treasurer, Oswald Partington, M.P.; Hon. Secretary, Aubrey Rees, 10, Adelphi Terrace, W.C. Affiliated branches, 48.

**Liberal Central Association**, 41, Parliament Street, Westminster.

**Liberal League**, The, formed in 1902 to promote the policy of Lord Rosebery's Chesterfield speech, acting on the lines of that policy, but co-operating cordially with the rest of the Liberal Party. President, Lord Rosebery; Vice-Presidents, Rt. Hon. H. H. Asquith, Sir Henry Fowler, Sir Edward Grey, and Rt. Hon. R. B. Haldane; Secretary, W. Allard. Office, 34, Victoria Street, Westminster.

**Liberal Publication Department**, The, has offices at 42, Parliament Street, S.W., and issues monthly the *Liberal Magazine* and the *Liberal Monthly*. The *Liberal Year Book* is published annually at the end of the year, and pamphlets and leaflets on current politics are issued at frequent intervals. Chairman, R. C. Lehmann, M.P.; Secretary, Charles Geake.

**London Liberal Federation**, 41, Parliament Street, Westminster. Chairman, W. H. Dickinson, L.C.C.; Hon. Secretary, H. W. Carr-Gomm. **National Liberal Federation (Home Counties Division)**, 42, Parliament Street, Westminster. President, Earl Carrington, G.C.M.G.; Chairman, G. Leveson Gower; Treasurer, Capt. the Hon. H. S. Stanhope, R.N.; Hon. Secretary, Noel E. Buxton; Secretary, W. M. Crook; Assistant Secretary, John Clarke.

**National Liberal Federation**, The (for history see ed. '88). Consists of a union for national purposes of all the Liberal Associations throughout England and Wales. The Liberal Central Association is charged with the official care of the Parliamentary interests of the party, while the Federation chiefly represents and gives effect to the ascertained opinions of the rank and file of the party in the constituencies. The headquarters of the Federation are at 42, Parliament Street, Westminster, S.W. Presi-

dent, The Rt. Hon. A. H. D. Acland. **Chairman of Committee**, Sir Edward Evans; **Secretary**, Sir Robert Hudson; **Assistant Secretary**, Frank Barter.

**National Reform Union**, The, was formed in 1864 by members of the Committee of the Anti-Corn-Law League, who took up the question of Parliamentary Reform after the defeat of Protection. Its first Chairman was George Wilson, who had been Chairman of the League. Its declared objects are: (1) The dissemination of political knowledge and the furtherance of Liberal organisation, especially in the county constituencies; (2) The promotion and agitation of any leading question which an important section of the Liberal party may from time to time place before the nation, and in regard to which it may be thought desirable to move and instruct public opinion. It has over 400 affiliated, subscribing, and corresponding branches, and sends out lecturers all over the country. The officers are: **President**, Rt. Hon. Lord Weardale of Stanhope; **Hon. Secretary**, Mr. H. J. Ogden; **Treasurer**, George Rhodes; **Chairman of Executive**, R. Barlow; **Secretary**, Arthur G. Symonds, M.A. **Offices**, 50, Haworth's Buildings, 5, Cross Street, Manchester, and at 50, Parliament Street, Westminster.

**Scottish Liberal Association**. **President**, Rt. Hon. Sir H. Campbell-Bannerman, G.C.B., M.P.; **Hon. Treasurer**, Master of Elibank, M.P. **Eastern Section: Secretary**, A. D. Wood, 95, Princes Street, Edinburgh. **Western Section: Secretary**, William Webster, 7, West George Street, Glasgow.

**Scottish Women's Liberal Federation**, 7, West George Street, Glasgow. **Secretary**, Miss Alice Younger.

**Women's Liberal Federation**, 124, Victoria Street, S.W. Affiliated branches, 595; approximate aggregate membership, 81,000. **President**, The Countess of Carlisle; **Hon. Secretaries**, Mrs. Bradley Reid and Lady Bamford-Slack; **Hon. Treasurer**, Mrs. Eva McLaren; **Secretary**, Miss Margaret Bunney.

**Women's National Liberal Association**, 138, Palace Chambers, Westminster, S.W. **President**, The Hon. Mrs. Henry Gladstone; **Chairman of Executive**, Mrs. W. P. Byles; **Secretary**, Miss E. E. Page.

### Chief Unionist Organisations.

The chief Conservative organisations are:—**Association of Conservative Clubs**, St. Stephen's Chambers, S.W. **Secretary**, Frank Solbe.

**Conservative Central Office**, St. Stephen's Chambers, Bridge Street, Westminster, S.W. Telephone 3163 Gerrard. Telegrams, "Conservative, London." **Principal Agent**, Lieut.-Col. A. B. Haig; **Secretary**, C. G. Hennings.

**National Conservative League**. **Grand Secretary**, F. H. Relton, 9, Broughton Road, Thornton Heath, Surrey.

**National Union of Conservative and Constitutional Associations**, England and Wales, St. Stephen's Chambers, Westminster, S.W. **President**, The Duke of Northumberland, K.G.; **Chairman of Council**, H. M. Imbert-Terry; **Secretary**, A. E. Southall.

**National Union of Conservative Associations**, Scotland, 119A, George Street, Edinburgh. **President**, Lord Dalkeith; **Secretary**, George Brown, Advocate.

**Primrose League**. A league founded in 1883, which supports three principles—the main-

tenance of Religion, the Estates of the Realm and the Imperial Ascendancy of the British Empire. On the anniversary of Lord Beaconsfield's death every member wears a bunch of primroses. The members, who include both sexes, are styled **Knights, Dames, and Associates**, and the branches are called "**Habitations**." The League is governed by a **Grand Council** which consists of 45 members besides the **Grand Master** four **Trustees** and the **Treasurer**. **Grand Master**, The Rt. Hon. A. J. Balfour; **Chancellor and Chairman of Grand Council**, The Earl of Zetland, **Treasurer**, Sir F. D. Dixon Hartland, Bart., M.P.; **President Ladies' Grand Council**, Miss Balfour. Members enrolled up to Oct. 1906 number, including Scotland, 1,779,566, divided among 2504 **Habitations**. **Vice-Chancellor**, George Lane-Fox; **Registrar**, F. Willis. **Clerk of the Council**, R. Bennett; **Head Offices**, 64, Victoria Street, S.W. **Official Organ**, *The Primrose League Gazette* (monthly), 3d.

The Liberal Unionists have a separate organisation called the

**Liberal Unionist Council**, formerly the **Liberal Unionist Association**, was formed to resist the Home Rule policy adopted by Mr. Gladstone in 1886, and reorganised in 1904 upon a fully representative basis. The Council consists of all Liberal Unionist Members of both Houses of Parliament, subscribing members, and representatives of branch associations in the proportion of one representative for every 1000 or portion of 1000 electors in the area covered by the Association. At the second annual meeting of the reconstituted Council, held at Bristol on Nov. 21st, 1905, 334 branch associations and constituencies were represented. **President**, The Right Hon. Joseph Chamberlain, M.P. **Chairman of Committees**, The Right Hon. Sir Savile B. Crossley, Bart., M.V.O. **Secretary**, John Boraston, Esq., J.P. **Offices**, 6, Great George Street, Westminster, S.W.

### PARAGUAY.

The Republic of Paraguay is one of the most promising states of South America, situated between the rivers Parana and Paraguay. It is governed, under a Constitution proclaimed in Nov. 1870, by a **President** elected for four years, a Congress consisting of a Senate and a Chamber of Deputies, both elected by universal suffrage, and five Ministers of State chosen by the President. The President has a salary of £1000, Ministers of £600, and the Senators and Deputies each receive £200. The State religion is Roman Catholic, but all others are tolerated. Education is free and nominally compulsory. The army numbers about 1500 men, but every citizen between 20 and 35 is liable to military service. A railway of about 160 miles runs from Asuncion to Pirapo. There are vast supplies of timber in the forests, but the chief products are Yerba maté, or Paraguay tea, tobacco, hides, and timber. Cotton is now being cultivated also. A large number of cattle are reared, and minerals are to be found, but are not worked. There is an English settlement near Villa Rica, worked on a communistic, co-operative basis, called the Cosme Colony, and another Australian colony, both of which are succeeding. Capital, Asuncion, pop. 60,000.

Area about 150,000 sq. m.; pop., 1902, 650,000,

including about 80,000 Indians. **Revenue**, 1900, £616,820; **expenditure**, £725,181; **Foreign Debt** of 1886-96—amount outstanding July 30th, 1905, £881,550; guarantee debt due to the Paraguay Central Railway April 30th, 1905, £1,442,509; **imports**, 1902, £466,459; 1903, £710,365; **exports**, 1902, £778,132; 1903, £850,730. Great Britain sent 32 per cent. of the imports in 1903, and Germany 14 per cent. Most of the exports go to the Argentine.

**President**, General Ferreya (elected Nov. 1906).

**Minister Plenipotentiary**, M. Eusebio Machain, 62, Rue Pierre Charron, Paris.

**Consul-General** in London, Alfred James, 18, Eldon Street, E.C.; **Consul**, Alexander Baillie; in Liverpool, William Nelson.

**British Minister** in Asuncion, W. B. Townley, Esq. (resident in Buenos Ayres); **Consul** at Asuncion, C. W. G. Gosling.

**Pasitch**, Nicholas, Servian Premier and Minister for Foreign Affairs, was b. 1848, and completed his education at the Zurich Polytechnic School. His career has been punctuated with two death sentences and several exiles. M. Pasitch began as an extreme Radical, but has modified his views since, and is now more Conservative. He was successively Mayor of Belgrade, President of the Skupshtina, head of the first Radical Cabinet formed, and Minister to Russia, when, in '99, King Milan was shot at in the streets of Belgrade, and M. Pasitch was one of the accused at the State trial. He was sentenced to imprisonment, but afterwards pardoned. In 1902 King Alexander asked him to form a Ministry, but he failed in the task. After the assassination of the King and his consort he became Minister for Foreign Affairs in the Gruitch Cabinet; and in Dec. 1904 he formed an Administration of his own from members of the Moderate Radical party, falling in May 1905. Returning to power in June 1906, the elections of the following month gave him a strong majority.

**Pastel Society**, The. This Society was founded in 1898 to revive public interest in the art of pastel painting, and includes among its members most of the well-known English and foreign pastellists. The annual exhibition, which is limited to the works of members, is held at the Royal Institute Galleries, Piccadilly. **Hon. Secretary**, Miss Marion Gemmell; **Acting Secretary**, Mr. Edgar Blackmore.

**Patent Agents**, Chartered Institute of, Staple Inn Buildings, W.C. **Sec. and Registrar**, H. Howgrave Graham.

## PATENTS AND THE PATENT OFFICE.

Patents for the United Kingdom are issued by the Comptroller-General of Patents at the Patent Office, 25, Southampton Buildings, London, W.C.

The law relating to patents is embodied in the **Patents Acts** of 1883, 1885, 1886, 1888, 1901, and 1902. The President of the Board of Trade promised in October 1906 to introduce a Bill dealing with several points in the Patent Laws which call for amendment. The procedure to be observed in applying for a patent is regulated by the Patents Rules. The Acts, Rules, and other official publications are on sale at

the Patent Office, and can be obtained through the post. A circular containing a large amount of useful information can also be obtained free on application at the Patent Office. The **Official Journal**, published weekly, and containing illustrated abridgments of recently patented inventions, can be consulted at many public libraries. The **Library of the Patent Office**, which is free to all comers, and provides excellent facilities for readers, contains all the official publications, the specifications of all patents granted in the United Kingdom, and in the United States, France, Germany, and other foreign states, and an extensive collection of technological journals and textbooks, both British and foreign.

Patents are usually, though not necessarily, taken out through professional patent agents. A list of Registered Patent Agents may be obtained from Messrs. Eyre & Spottiswoode, or through any bookseller.

The official fees to be paid, before a patent is sealed, amount to £5, of which £1 is paid on application, £3 on the filing of a complete specification, and £1 on sealing. A patent is granted for a term of fourteen years from the date of application, subject to the payment, before the end of the fourth and each succeeding year, of the prescribed renewal fees, all or any of which may be paid in advance. The renewal fees are £5 in respect of the fifth year, £6 in respect of the sixth year, and so on to £14 in respect of the fourteenth year, the total fees amounting to £100 for the fourteen years. Under exceptional circumstances the patent may be prolonged for a further period not exceeding fourteen years.

An application for a patent must be accompanied by either a provisional specification or a complete specification. If a provisional specification is filed in the first instance, a complete specification must be filed within a period of six months (formerly nine months) from the date of application. Patents may be obtained for inventions communicated from abroad. Inventions which have already been patented in certain foreign and colonial states, may be patented in the United Kingdom as of the date of the first foreign application, provided that the British application is made in company with a complete specification within twelve months from the date of the first foreign application. The complete specification, in this case, whether accepted or not, becomes open to public inspection on the expiry of the twelve months. By an International Convention similar rights are accorded in the same foreign and colonial states to British patentees. During 1903 Germany and Mexico acceded to this Convention.

Applications for patents and the accompanying specifications are examined in the Patent Office, to see that they comply with the Patents Acts. Amendment may be required. After acceptance, and before the patent is sealed, there is an interval, during which the patent is liable to outside opposition, on the ground that the invention has already been patented or on certain other grounds.

## Statistics, 1903-5.

The number of applications for patents and for registration of designs and trade marks in 1905, as compared with the two preceding years, is shown by the following table:—

	1903.	1904.	1905.
Patents—			
Applications . . . .	28,854	29,702	27,478
Specifications—			
Provisional . . . .	22,198	22,442	19,819
Complete . . . .	15,821	15,920	18,750
Sealed . . . .	15,718	15,089	14,786
Designs—			
Applications . . . .	21,104	22,531	23,938
Registered . . . .	20,426	23,604	23,318
Trade Marks—			
Applications . . . .	9,467	9,972	10,521
Registered . . . .	3,748	3,842	4,261

The income for the years 1904-5 was—

	1904.	1905.
	£	£
Patent Fees . . . .	222,971	238,047
Designs Fees . . . .	4,466	4,783
Trade Marks Fees . . . .	15,964	13,234
Sale of Publications . . . .	9,016	9,676
Total . . . .	252,417	265,740

The expenditure was: 1904, £213,842; 1905, £159,296: the difference being due to the cost of office extension in 1904.

**Patti, Madame Adelina Giovanna Maria**, was b. at Madrid in 1843. Was trained professionally under Ettore Barili, her step-brother, and made her first appearance on the stage at New York in '59. She first appeared in London in '61, as Amina in "*La Sonnambula*" at Covent Garden, and at once became the favourite *prima donna* of the day. She married in '68 Henri, Marquis de Caux, equerry to Napoleon III., from whom she was divorced in '83; Signor Nicolini, who died in '08; and Baron Olaf Rudolph Cederström in Jan. '09. Madame Patti in '95 reappeared at Covent Garden after a ten-years' absence. She now confines herself to concerts.

**Perkin, Sir William H.**, knighted July 1906, on the occasion of the international celebration of the jubilee of his discovery of the mauve dye which laid the foundation of the coal-tar colour industry. He was b. in London, March 12th, 1838; ed. City of London School and Royal College of Chemistry, and became assistant in Dr. Hofmann's Research Laboratory. F.R.S., L.L.D., Ph.D., D.Sc.; Vice-President Chemical Society. He has published numerous papers in the Chemical Society's Transactions. The 1906 celebrations referred to above included the presentation of an oil portrait, which at his death is to be the property of the nation, a marble bust placed in the rooms of the Chemical Society, and the formation of a Perkin Research Fund. A number of presentations from foreign scientific bodies were made, and a separate celebration was held by American chemists in the autumn. The Chestnuts, Sudbury, Harrow.

## PERSIA.

### Ruler.

The reigning Shah of Persia is **Muzaffer-ed-Din, K.G., Hon. G.C.M.G.**, a son of Nasr-ed-Din, the late Shah, and was b. March 25th, 1853. He was nominated by his father for the succession in spite of his being the second, and not

the eldest son, the Shah having the power always to appoint his successor. He held the post of Governor-General of the Azerbaijan province, his elder brother, Zil-es-Sultan, being Governor of Isfahan. On the death of his father by an assassin's hand, Muzaffer-ed-Din quietly succeeded to the throne (May 1st, '06), and was enthroned at Teheran (June 8th). He visited Germany and England in 1902, and afterwards went on to France and Russia; and paid another visit to the Czar at St. Petersburg in September 1905. The heir apparent is his son Mohammed Ali Mirza, b. in '72.

### Government, Army, etc.

The Shah, officially called the "*Shah-inshah*," or king of kings, is the autocrat of the realm, subject only to the precepts of the Mahometan religion, and until 1906 carried on his government through a cabinet of responsible ministers. During 1906, however, he issued a decree convoking a National Assembly. See *History* below.

An imperial decree was published on March 21st, 1905, ordering the reorganisation of the army. Under the new scheme there will be 12 divisions, composed of infantry, artillery, and cavalry. Details of the composition of the first division showed that it will consist of nine battalions of infantry, in all 7700 strong, artillery 500 strong, and 2900 cavalry.

The country is divided into 33 provinces under governors-general, generally called *Hakim*, who, with the *Sheikhs-el-Islam*, or chief judges of the cities, administer justice and superintend the collection of the revenue, which is derived in part from payments in cash or in kind assessed by Government officials throughout the country, and in part from customs duties, postal and telegraph service, etc., and the proceeds of concessions. The provinces are subdivided into districts, which are placed under lieutenant-governors, and every town and village has its administrative officer. The chiefs of the nomad tribes exercise authority over them and collect the revenues from them. The nomads consist chiefly of Arabs, Turks, Kurds and Leks, and altogether number nearly 2,000,000. The priests have great power in the country. Many colleges exist for instruction in religion, which is of the Shia sect, and in Persian literature. The chief cities are Teheran (pop. 280,000), Tabriz (200,000), Isfahan (80,000), Meshed (60,000), and Shiraz (50,000).

The principal ports are Bunder Abbas, Lingah, and Bushire, on the Persian Gulf, and Enzeli, Meshed-i-Sar, and Bender-i-Gez on the Caspian. Belgian officials administer the Customs Department. The trade and shipping of the Persian Gulf ports are very largely in British hands. The chief products of the country are silk, cotton, fruits, gums, opium, carpets, and tobacco. Dried fruits are exported in large quantities as food for the Russian peasants, and Russian money is being used to stimulate the culture of cotton. Wool is exported to Bombay and Baghdad. There are considerable mineral deposits, but they are very little worked. Imports, 1904: Bushire, £889,825 (£389,323 from United Kingdom, £204,009 from India); Lingah, £307,690 (£193,473 from India); Bunder Abbas, £317,808 (£150,580 from India, £99,134 from United Kingdom); exports, 1904, Bushire, £454,981 (£72,527 to United Kingdom, £122,911

to India, £184,760 to China); Lingah, £248,956; Bunder Abbas, £122,165 (£91,820 to India).

The Persian provinces of Khorasan and Seistan lie on the western border of Afghanistan, and of late years Russian influence has been actively at work in them, mainly through commercial agents. A branch of the Transcaspian Railway is proposed, to run from Ashkhabad to Meshed. A direct trade route from Quetta to Seistan has been opened up by the Indian Government, running along the Baluch side of the Afghan border, but the experiment has not been attended with any considerable success. The river Halmand forms part of the boundary between Seistan and Afghanistan, or rather between Persian Seistan and Afghan Seistan; and a British Commission under Col. McMahon in 1905 completed the demarcation of the boundary, which follows the old bed of the Halmand, and is now fixed irrespective of future changes in the course of the river.

### Statistics, Finance, and Trade.

Area, 628,000 sq. m.; pop. about 9,000,000. Revenue, 1900, about £1,500,000; 1904, £1,327,000. Debt, two loans of 22,500,000 roubles and 10,000,000 roubles were contracted with the Persian Loan Bank, with the approval of the Russian Government in 1900 and 1902. In Oct. 1906 the British and Russian Governments agreed to advance jointly a loan of £400,000 in equal moieties, on certain conditions which were not made public.

Imports, 1901-2, £5,584,000; 1902-3, £4,970,635; 1903-4, £7,000,657; 1904-5, £5,832,000. Exports, 1901-2, £2,800,000; 1902-3, £3,387,686; 1903-4, £4,632,204; 1904-5, £4,133,000. Trade with Russia: imports, 1903-4, £3,358,770; 1904-5, £2,833,006; exports, 1903-4, £2,827,497; 1904-5, £2,459,000. Trade with Great Britain: imports, 1903-4, £2,334,529; 1904-5, £1,995,000; exports, 1903-4, £383,852; 1904-5, £459,000.

### Diplomatic.

Ministry: *Prime Minister*, H.E. Mushir-ed-Dowleh. — *War*, Naib-es-Saltaneh. — *Foreign Affairs*, H.H. Prince Mirza Mohamed Ali Khan, Ala-es-Saltaneh. — *Finance*, Nasrulla Mulk.

Persian Legation in London, Cornwall House, Cornwall Gardens, S.W.—*Envoy in London*, H.E. Muhtasham-es-Saltaneh.

British Minister Plenipotentiary and Consul-General at Teheran, Sir C. A. Spring Rice, K.C.M.G. Secretary, C. M. Marling.

Political Resident for the Persian Gulf, Major P. Z. Cox, C.I.E. (acting), Bushire.

British Consuls:—*Consuls-General*: Major P. Z. Cox, C.I.E. (Bushire); H. D. Barnham, C.M.G. (Isfahan); Major P. M. Sykes, C.M.G. (Meshed); A. C. Wratislaw, C.M.G. (Tabriz). *Consuls*: Major C. I. Ducat (Kerman); Capt. MacPherson (Seistan); T. G. Grahame (Shiraz); Capt. T. H. Keyes (Turbat-i-Haidari); Lieut. W. H. Shakespear (Bunder Abbas); Capt. L. B. H. Haworth (Kermanshah); W. McDouall (Mohammerah).

### History, 1906.

Like Russia, Persia had a year of constitution making. The Mollahs, or priests, gave the chief impetus to the movement, which sprang from the growing discontent with the incompetence and misgovernment of the Grand Vizier, a kinsman of the Shah, the Ain-ed-Dowleh. In December 1905 they left Teheran, with many leading merchants, as a protest against the

prevailing misrule, and the Shah promised to convoke a Representative Assembly. As nothing had been done to fulfil this promise, the priests again left Teheran in July 1906, and went to Kum. Their followers in Teheran took refuge in the grounds of the British Legation, to the number of at least 16,000. Thereupon Ain-ed-Dowleh was dismissed, Mushir-ed-Dowleh was appointed Grand Vizier in his place, and the Shah signed a decree authorising the convocation of a National Council (Aug. 5th) elected by the princes, clergy, nobles, merchants, and tradesmen. A commission drew up regulations for the elections, providing that all male Persians between the ages of 30 and 70, not in the service of the State, and never having been convicted, should be entitled to vote. There are 12 electoral districts, returning from 6 to 19 deputies each, these aggregating 96 deputies, and 60 deputies were allocated to Teheran, making 156 in all. In Teheran the voting is direct, but in the other districts indirect, through colleges of voters. The deputies are elected for 2 years. The National Assembly met (Oct. 7th), and Sanieh-ed-Dowleh, formerly Minister of Commerce and a leader of the reform movement, was elected President. The Assembly at once began to prepare a scheme of fundamental laws.

### PERU.

A republic on the W. coast of S. America. The disastrous war with Chile, which broke out in 1875, and resulted in the cession to Chile of Tarapaca (absolutely) and of Arica and Tacna (provisionally), completely shattered the power of Peru. It was agreed that Arica and Tacna should be subject to Chile for ten years from '84, and that a plebiscite should then decide whether or no they should revert to Peru; but that plebiscite has never taken place, partly because of revolutionary outbreaks in Peru; and now Chile has consolidated her position in the two provinces there. An arbitration treaty as to the Bolivian boundary was signed (Jan. 2nd, 1903), appointing the Argentine Government as arbitrator. A dispute with Brazil arose respecting the Acre territory in 1904, and the situation looked threatening for a time, but eventually it was agreed to settle the matter by amicable negotiation or arbitration.

The Constitution of '56, revised in '60, is modelled on that of the United States, the legislative power being vested in a House of Representatives (116) elected by the provinces, one member for every 30,000 inhabitants, and a Senate (51) elected by the 18 departments and the province of Callao. One-third of the members of both Houses retire every two years. Congress meets annually on July 28th. Executive in the hands of a President elected for four years, who receives £4800 a year.

The Navy is administered by a Ministry of Marine, and was quite unimportant until 1906, when two protected cruisers, the *Almirante Grau* and the *Coronel Bolognesi* were put into the water at the yard of Messrs. Vickers, Son, and Maxim, Barrow. These vessels have a length of 370 ft., beam 40 ft. 6 in., draught 14 ft. 3 in., with displacement of 3200 tons. There is a deck protection for the vitals of 1½ in. in thickness and 3 in. armour on the conning tower. The armament consists of two 6-inch guns—fore and aft, with armoured

shields, eight 14-pounder quick-firing guns, and eight 1½-pounder guns with 2 torpedo-tubes. The horse power is 14,000, giving a speed of 24 knots, and the trials of the *Almirante Grau* in September were successful.

Absolute political but not religious freedom allowed, the constitution prohibiting the public exercise of any but the Roman Catholic religion, although some degree of toleration exists. Education is nominally compulsory and free in the elementary schools, but is badly neglected. More than half the population are Indians, the rest including those of Spanish descent and mixed races. Army about 4000 strong in time of peace (now being reorganised under French guidance), and a small navy of 5 vessels. There are vast stretches of rich agricultural and pastoral lands, besides profitable mining (gold, copper, silver, and coal) fields and immense forests. The climate is very good, and the country is admirably suited for European immigrants. The interior is now being opened up, and the Government have a scheme to construct a railway over the Andes. There are about 1146 miles of railways belonging to the State, but ceded to the bondholders in '90 for a term of 66 years. Several new lines are now being constructed. Chief products are silver, copper, gold, sugar, wool, cotton, rubber, coffee, and guano. In the comparative freedom from internal dissensions since '99 a decided improvement in commercial, mining, and railway development has been noticeable. The chief cities are the capital, Lima (pop. 130,000), Arequipa (35,000), Cuzco (20,000), and Callao (31,000).

Area, 713,674 sq. m.; pop. estimated at 4,500,000. Revenue (mainly derived from customs), 1904, £2,107,894; 1905, £2,371,354; expenditure, 1904, £2,191,703. Imports, 1902, £3,428,283; 1903, £3,783,380; 1904, £4,298,003; 1905, £4,329,151; exports, 1902, £3,703,971; 1903, £3,857,753; 1904, £4,066,639; 1905, £5,751,621. The United Kingdom sent £1,732,645 of the imports and took £2,099,460 of the exports in 1904. Internal debt, £3,500,000. Parliament authorised the Government in October 1906 to contract a loan of £3,000,000 for the construction of railways.

President, Señor Don José Pardo (assumed office Sept. 24th, 1904).

Vice-President, Señor José S. Caveno.

Ministry: *Premier and Minister for Finance*, Señor Augusto B. Leguía.—*Foreign Affairs*, Señor Javier Prado y Ugarteche.—*Interior*, Señor Hernán Valverde.—*War and Marine*, Colonel Pedro E. Muñiz.—*Public Works*, Señor José Balta.—*Justice*, Señor J. Polar.

Minister in London, Señor Don Carlos G. Candamo, 104, Victoria Street, S.W.—*Charge d'Affaires*, Señor Don Eduardo Lembcke.—*Secretary*, Señor Don Ricardo E. Lembcke.—*Attaché*, Señor Don P. E. Caballero.

British Minister in Lima, Mr. W. N. Beauclerk.

British Consul-General in Callao, Mr. Alfred St. John, C.M.G.; Consul at Iquitos, D. Cazes.

*Pharmaceutical Society*, 17, Bloomsbury Square, W.C. President, R. A. Robinson, J.P.; Sec. and Registrar, Richard Bremridge.

*Philharmonic Society*, Queen's Hall, Langham Place, W. Hon. Sec., Francesco Berger, Esq., 6, York Street, Portman Square, W.

Phillips, Stephen, is a son of the Rev. Stephen Phillips, D.D., Precentor of Peterborough Cathedral, and was b. near Oxford, ed. at Stratford and Peterborough Grammar

Schools, and afterwards went on the stage, playing in Benson's company. He then became an Army tutor, and after a time devoted himself to literature. His publications include "Christ in Hades," "Poems" (crowned by the *Academy*), "The Sin of David," "Paolo and Francesca," "Herod," "Ulysses," and "Aylmer's Secret," the last four of which have been produced upon the stage. Address: Woodthorpe Road, Ashford, Middlesex.

*Photographic Society*, Royal, 66, Russell Square, W.C. President, Major-Gen. J. Waterhouse, I.A.; Sec., J. McIntosh.

## PHOTOGRAPHY, 1906.

The first exhibition of importance was that held in Whitechapel Art Gallery. A very varied collection of photographs was gathered from all parts. One large gallery was devoted to the collection of nearly 300 pictures, which represented Great Britain at the St. Louis Exhibition. It was shown in Leeds, Bolton, and other North of England centres, and finally, before being disbanded, was hung as a section of the Whitechapel Exhibition.

The Federation of Scottish Photographic Societies' second "salon" in Dundee proved a marked success; and early in the year Kodak, Ltd., with something more than the mere spirit of commercial enterprise, held an exhibition at 115, Oxford Street, London, of photographs taken with a Kodak and on that Company's materials by H.M. the Queen and other members of the Royal Family.

With the Yorkshire and Scottish photographic societies as an example of what can be done by federation, the societies of Lancashire and Cheshire in like manner combined for mutual help and support, and in January the Hon. Sec., Mr. W. Tansley, was able to announce the adherence of 36 societies, a strong and authoritative selection committee for pictures and slides being appointed, and a list of 120 lectures published. The Photographic Convention was held in July at Southampton, with Mr. E. J. Humphrey as President. As one of the series of "one man" shows instituted by the Royal Photographic Society at its home, 66, Russell Square, London, a notable exhibition was made in February of the works of Mr. Alvin Langdon Coburn. The portraits shown perhaps attracted attention as much for the interest attaching to the personality of many of the originals as for the artistic merit of the photographs themselves. Contemporaneously an exhibition of examples of colour photography was held at the offices of *The British Journal of Photography*. Later in the year the same journal organised a society of colour photographers, with Mr. Comley of Stroud as secretary. It must, however, be recorded that, in spite of all the encouragement which has been given to colour photography, it has made little if any progress, and has not passed beyond the stage of being merely a repetition, perhaps slightly improved, of the tricolour heliochromy of Ducos du Hauron. The hopes which were built on the early attempts to employ the fading-out or bleaching-out methods have not as yet been realised.

What has since proved to be a very vigorous photographic society in London was started under the title of the North London Photographic Society, which later succeeded in securing a good deal of practical support

from the London County Council, including the use of the Islington Free Library as its headquarters and meeting-room.

At the annual meeting of the Royal Photographic Society Major-Gen. J. Waterhouse was re-elected President for the year, and read an interesting paper on the work of Dr. J. O. Janssen, to whom was awarded the Society's Progress Medal. This octogenarian photographer, although in some respects his work had been more physical than photographic, was yet one of the foremost representatives of scientific photography in France. In particular he had done a great deal in connection with eclipse observation and solar photography generally; and one of his most important inventions was a photographic revolver with rotating plate, by means of which several records of an eclipse could be taken at one time. Special importance also attaches to his observation work carried out at the summit of Mont Blanc.

A movement to further the interests of photography in the extreme north of England was made in March, when the photographic societies of Northumberland and Durham gave a dinner in Newcastle-upon-Tyne, Mr. A. Horsley Hinton, editor of the *Amateur Photographer*, being the guest of the evening.

An exhibition of photography was held at Cape Town, to which the Royal Photographic Society, the Linked Ring, and several independent photographers contributed collections.

The scarcity of platinum and its consequently greatly advanced price has begun to make itself felt in the increased price of that pre-eminent printing process platinotype; and those who have confined themselves chiefly or exclusively to this process begin to look with alarm to the time when platinotype paper will only be obtainable at prohibitive prices. Unfortunately, unless some new sources of platinum are discovered, there seems little prospect of the price being lower. In accordance with the agreement come to between the Liverpool Amateur Photographic Association, the Manchester Amateur Photographic Society, and the Leeds Camera Club, each of which undertakes to hold an exhibition under the name of "The Northern Photographic Exhibition" every three years in rotation, Manchester held a carefully selected and well arranged show in the Manchester Athenæum early in May. Numerous plaques and honourable mentions were awarded by the judges, and it is felt that as these northern exhibitions continue year by year they will have to depend more and more on new work, and thus gradually become more equal contemporaries with the London exhibitions, robbing them of a certain amount of the popular support they have hitherto monopolised. In connection with the photographic recording of buildings, sites, and customs which are being swept away by the tide of civilisation, much definite progress has been made during the past year. The National Photographic Record Association has now accumulated nearly 4000 permanent prints, which are deposited with the British Museum, where they are available for reference. This institution, with Sir J. Benjamin Stone, M.P., as president, has been the means of stimulating the growth of similar institutions with a more local mission in various parts of the country, similar work having been taken up in some of the Colonies. An important meeting was held in Marseilles in October, under the ægis of the

Congrès International de la Documentation Photographique, General Sebert being president, and various questions in reference to record work were discussed, including the arrangement in libraries and method of access, the means of exchange and communication between the various museums and public bodies, indexing, and the establishment of a central office as a connecting link for all the existing societies, in order to facilitate the exchange of documents, and where a complete list of all record photographs could be kept for reference. Two county organisations have shown themselves alive to the work which lies close at hand. The Essex Photographic and Pictorial Survey held a successful meeting in Colchester in June, and in the same month the Photographic Survey and Record of Surrey held its annual meeting, under the presidency of Viscount Middleton, when a selection from the 2000 prints already collected was shown.

The only printing process introduced during the year which can claim to possess novelty is Ozobrome, invented by Mr. Thomas Manly, whereby by simple contact with a bromide print suitably prepared, and without the use of light, a carbon print may be made. This process seems to have met with a more favourable reception than Mr. Manly's previous invention, Ozotype.

By the death of Colonel J. Gale, on Aug. 5th, there is lost another of the few remaining links which connect the earliest days of pictorial photography with the present. His dainty and delicate landscape subjects, chosen chiefly in the least frequented recesses of the South Downs, marked a period and created a school in pictorial photography.

The fifty-first annual Exhibition of the Royal Photographic Society was held, as in previous recent years, in the New Gallery, Regent Street; and contemporaneously The Photographic Salon held its fourteenth annual exhibition in the Galleries of the Royal Society of Painters in Water Colours, both institutions receiving more than the usual public support. These two London shows were, as usual, followed by a constant succession of minor exhibitions in the London suburbs and throughout the provinces; and in every direction there is evidence of increased and still increasing interest being taken in photography. Many leading manufacturers of photographic appliances and materials extended their works and built new premises, and the export of photographic commodities very largely increased. The competition between glass plates and celluloid films continued, and whilst the consumption of both increased it cannot be said that either forged ahead at the expense of the other. The use of orthochromatic methods became more general, and the benefits arising from the use of a dyed plate in conjunction with a light filter or screen of suitable intensity were more generally appreciated, with the consequent improvement in average amateur work.

Amongst the publications of the year must be counted "The Complete Photographer" by R. Child Bayley; "Cloud Studies," by Prof. Arthur W. Clayden, M.A., and numerous handbooks and smaller works of instruction; a selection of Sir Benjamin Stone's photographs of old English festivals, customs, etc., originally published by Cassell & Co. serially, being now obtainable bound in volumes.

**Phrenological Society, British**, founded 1886, incorporated '99, has for its objects the scientific study of phrenology, and the practical application of phrenology to the analysis of the mind and the delineation of individual character. It holds examinations and grants certificates. **Hon. Sec., Mr. G. Hart-Cox.** Office, 63, Chancery Lane, W.C.

**Physical Education, National Society of**, aims at promoting the cause of physical education, grants certificates of proficiency in drill, and diplomas for gymnastics, etc. **Hon. Secs., E. Sully and W. M. Vardon.** Office, 37, Myddelton Square, London, E.C.

**Pichon, Stephen**, French statesman, was educated at Besançon, and on going up to Paris became an assistant of M. Clemenceau in '80 on the staff of *Justice*. He entered the Chamber in '85 as a Radical Republican, and fought strenuously against the Boulangist movement. In '93 he was defeated when standing for the Chamber again, and then entered on a diplomatic career. He was the French Minister in Peking at the time of the Boxer troubles, and was appointed Resident-General of Tunis in 1901. In October 1906 he accepted the post of Minister of Foreign Affairs in M. Clemenceau's Cabinet.

**Picquart, General**, French soldier and statesman, was born at Strasburg in 1854, and ed. at St. Cyr '72-'74 and at the General Staff School '74-'76. He served with the Zouaves in Algeria, and then entered the infantry, gaining his captaincy in '80. He was appointed to the War Office staff '83, served in Tonquin '85-'88, became Professor at the Military School, rejoined the War Office '93, and was head of the Intelligence Department '95. He was a staunch supporter of the innocence of Dreyfus, and was for that reason sent to Tunis in '97. In Feb. '98 he was placed on the retired list, and afterwards imprisoned on a charge of revealing War Office secrets. He was one of the leading witnesses for Dreyfus at the Rennes court-martial in '99. In 1905 he was restored to the Active List with the rank of Brigadier-General, and in October became Minister of War in M. Clemenceau's administration.

**Pinero, Arthur Wing**, dramatic author, was b. in London in 1855. Commencing a legal career, he afterwards became connected with the stage, and acted at the Lyceum and Haymarket Theatres. Devoting himself to play-writing he produced his first piece, which was entitled "Two can Play at that Game," at the Lyceum. Other plays from his pen include "£200 a Year" ('77), "The Money Spinner" ('80), "The Squire" ('81), "Lords and Commons," ("80), "The Rocket" ('83), "The Magistrate" ('85), "Sweet Lavender," "The Profligate," "In Chancery," "Lady Bountiful," "The Times," "The Second Mrs. Tanqueray" ('93), "The Notorious Mrs. Ebbsmith" and "The Benefit of the Doubt" ('95), "The Princess and the Butcher" ('97), "Trelawny of the Wells" ('98), "The Gay Lord Quex" ('99), "Iris" ('1901), "Letty" ('1903), and "A Wife without a Smile" ('1904). He also collaborated with Sir Arthur Sullivan and Mr. Comyns Carr in "The Beauty Stone," a romantic musical drama produced in May '98. Address: Stillands, North Chapel, Sussex.

**Pius X.** His Holiness Pius X., the 258th Roman Pontiff, succeeded to the Pontificate on Aug. 4th, 1903. His name is Giuseppe (*Anglice*

Joseph) Sarto, and he was born June 2nd, 1835, at Riese, in the diocese of Treviso, his father being a minor municipal official. His relatives are still shopkeepers and people of the humble position. He was educated at Castelfranco and the diocesan seminary of Padua, and ordained priest Sept. 18th, 1858. He officiated nine years as curate at Tombolo, nine years as parish priest of Salzano; and in recognition of his services was made Canon and Chancellor of the diocese of Treviso in '75, the Bishop also appointing him spiritual director and religious instructor in the diocesan seminary. In '84 he was appointed Bishop of Mantua, and his conspicuous ability attracted the attention of Leo XIII., who made him a Cardinal and Patriarch of Venice in 1893. His charity and tact in the discharge of the duties of his high position brought him unbounded popularity, and he was more than once instrumental in settling serious strikes and labour disputes. When the foundation stone of the new Campanile was laid in April 1903 he performed the ceremony of benediction, and made special reference in his speech on the occasion to the historic glories of the House of Savoy. He also came into direct personal contact with the King and Queen of Italy while he was Cardinal, but he is credited with an inflexible resolve to maintain the rights and liberty of the Church. On the death of Leo XIII., July 20th, 1903, the Conclave met July 31st, and on Aug. 4th, at the seventh scrutiny, after a session of less than three days, elected Cardinal Sarto as Pope, and he chose to be known as Pope Pius X. His career, it will be seen, has been spent in the pastoral and episcopal service of the Church rather than in the paths of diplomatic and official service. He is described as possessing a fine physique, and being a man of personal fascination and splendid presence. He has always shown deep interest in social questions and the betterment of the life of the poor. His charity at Venice was proverbial, and "more than once," according to the *Dublin Review*, "the episcopal ring of the chief pastor of Venice was in pawn, in order that the cry of the indigent poor should not be left unheeded." It is said that the average annual expenses of the Vatican are about £286,400. Of this sum £20,000 are at the Pope's disposal, £28,000 go to those of the cardinals who reside in Rome, £18,400 to poor bishops, £72,000 for administration of apostolic palaces, £40,000 for diplomatic expenses, £60,000 for employés, £48,000 for schools and charities.

**Pobiedonostzeff, Constantine**, was b. at Moscow, 1827. He was Professor of Civil Law at Moscow, '59 to '65, and tutor to the Czar Alexander III. In '68 he was created a senator, in '72 elected a member of the Imperial Council, and after the accession of Alexander III. in '81, he was appointed Procurator of the Holy Synod, but he ceased to hold that office in 1905. His influence with his Imperial master has always been very considerable. In '68 he published "Cours de Droit Civile," and a manual of Civil Procedure. He has also translated "De Imitatione Christi" from the Latin of Thomas à Kempis. A volume of essays from his pen, translated into French, German, and English, and entitled "Reflections of a Russian Statesman," was published in England in '98. The general thesis of these essays is that autocracy is the only really suitable form of government. Among the most fallacious of political principles

is, he holds, that of the sovereignty of the people, out of it springing Parliamentary government, which he contends is the highest expression of egoism. See RUSSIA.

**Poet Laureate.** An office in the household of the sovereigns of Great Britain, the appellation having its origin in a custom of the English Universities, which continued to 1512, of presenting a laurel leaf to graduates in rhetoric and versification, the king's "laureate" being a graduated rhetorician in the service of the king. The first appointment of a poet laureate dates from the reign of Edward IV., the first patent being granted in 1630. It was formerly the duty of the poet laureate to write an ode on the birthday of the monarch, but this custom has been discontinued since the reign of George III. Amongst those who have held this office may be mentioned Dryden, Southey, Wordsworth, and Tennyson. Mr. Alfred Austin (*q.v.*) is the present holder of the office.

**Political Parties.** The article on Parties in the United Kingdom will be found under PARLIAMENT, p. 427. In the case of the chief foreign countries, particulars of the leading political parties will be found in the articles on those countries given under their proper alphabetical headings.

**Polytechnic, Regent Street.** With the view of further developing the movement on behalf of young men to whom the late Mr. Quintin Hogg had shown such generosity, he purchased in '80 the old Polytechnic, in Regent Street, for £50,000, and converted it into a great technical and recreative school. The curriculum embraces over 500 classes weekly in upwards of 80 different subjects, including carpentering, plumbing, metal work, engineering, pottery work, photography, furniture, decorative art, electricity, etc. A Young Women's Institute has also been founded in premises adjoining the Polytechnic, and promises to be as successful as the latter. The Marlborough Rooms, acquired in '92, have been converted into one of the most commodious schools of art in London. Mr. J. E. K. Studd is Vice-President, Mr. R. Mitchell Director of Education, and the Secretary is Mr. Leonard H. Harris. Continental tours are also a feature of the Institute, over 6000 persons making use of them every year. They include cruises to Norway, visits to the Polytechnic chalets in Switzerland, where a considerable freehold has been purchased, and trips all over the Continent, Baltic, Madeira, etc.

## PORTUGAL.

### Sovereign.

Carlos I., King of Portugal, is the son of King Louis I., and was b. Sept. 28th, 1863. Prior to his accession to the throne he was known as the Duke of Braganza. In May '86 he married Marie Amélie, daughter of the Comte de Paris. He succeeded his father as King of Portugal Oct. 10th, '89. The heir to the throne is Luiz Philippe, Duke of Braganza, born March 21st, '87, who was in 1902 made a Knight of the Garter by King Edward VII. During the financial difficulties of '92 the King and the royal family renounced 20 per cent. of the endowments paid them by the nation, a sacrifice of £23,000 a year. His Majesty visited King Edward VII. at Windsor in 1902 and 1904; received President Loubet at Lisbon Oct. 27th, 1905, and returned the visit at Paris on Nov. 22nd of the same year.

### Government.

The Constitution of 1826 (amended in '52, '85, and '95) gives a special moderating power to the king. There are two legislative chambers, the Peers and the Deputies, collectively called the *Cortes*. In case of a disagreement between the two legislative chambers, a committee of both decides, and if the committee disagree, the king decides. The Chamber of Peers consists of 90 members nominated for life, in addition to the princes of the blood and the twelve bishops of the continental dioceses. The nominated peers may be selected without limitation as to class, but certain restrictions and disqualifications are imposed. The Chamber of Deputies is composed of members elected under a system of universal suffrage every four years, to the number of 155, of whom 7 are elected by Portuguese colonies. The king has no veto on a law twice passed by both houses.

### Army and Navy, etc.

The army was reorganised on Oct. 1st, '99. The peace footing is 62,427, including 33,420 militia. The infantry of the line are 18,000, the cavalry 3032, the dragoons 1804, the light troops 1212, the field artillery 3375, and the horse artillery 479. The total number of guns is 448. The war footing is 100,264, including 52,675 militia. By a law introduced in Sept. '95, the service is 3 years with the colours, 5 with the first reserve and 4 with the second. The recruit contingent annually is about 15,000 men. There is in addition a colonial army of 10,000. The rules of exemption are most liberal, a sum of money paid to the Government being accepted as an equivalent. There are 4 military districts—Lisbon, Vizeu, Oporto, and Evora, with garrisons at the Azores and Madeira. The forces are disposed thus: 4 divisions of the active army; cavalry, artillery, and engineers, independent of the divisions, the garrison of Madeira and the Azores, and the troops of the reserve.

The number of men in the navy is about 5000, and, in addition, there are 2 vice-admirals, 5 rear-admirals, 16 captains, 25 commanders, 25 lieutenant-commanders, 80 lieutenants, 110 sub-lieutenants, 37 midshipmen, and 96 cadets. The age for retirement of a vice-admiral is 70 years, rear-admiral 66 years, and other officers 64 years.

Minister of Marine, A. de Sousa.

The strength in ships built and building on Oct. 31st was:—

	Built.	Projected.
Battleship . . . . .	1	—
Coast defence vessels . . . . .	—	2
Unprotected cruisers . . . . .	5	5
Torpedo destroyer . . . . .	1	—

The two coast-defence vessels are to be of 2500 tons displacement, and will steam 15 knots. There are four small docks at Lisbon.

A naval mutiny broke out in the warships at Lisbon in April 1906, the cause assigned being the undue severity of the officers. The ships were brought under the guns of the forts and the men surrendered. The ringleaders were severely punished.

For the administration of justice there are courts of first instance in all the chief towns, appeal courts at Lisbon, Oporto, and Ponta Delgada in the Azores, and a Supreme Court at Lisbon. The State religion is Roman Catholic, but all others are tolerated. Education,

though nominally compulsory, is in a very backward state. The capital, Lisbon, has a pop. of 357,000; and Oporto has a pop. of 172,421. Three-fifths of the people are engaged in agriculture, and about one-fifth in industrial occupations. Chief exports: wine, cork, cattle, sardines, fruit, and copper. There are valuable minerals, but they are very little worked. There are 1486 miles of railway, of which 531 belong to the State.

### Statistics and Diplomatic.

**Area** (including the Azores and Madeira, which are regarded as an integral part of the kingdom), 35,490 sq. m.; pop. 5,423,132.

**The Azores**, a group of islands in the North Atlantic; area, 922 sq. m.; pop. 256,291. Capital, *Ponta Delgada*, on San Miguel Island; but the Governor usually resides at Angra, in the island of Terceira. They are governed as a province of Portugal.

**The Madeira Islands** lie off the N.W. African coast, and are also governed as a province. Area, 314 sq. m.; pop. 150,574. Capital and port, *Funchal*, a fine town of 20,000 inhabitants.

**Revenue** (estimated), 1902-3, £12,203,000; expenditure, £12,415,000; imports, 1902, £12,019,532; exports, £7,350,936. Public debt, 1901, £171,723,502.

A change of Ministry took place in December 1905, the new Premier being Senhor Luciano de Castro. He was succeeded in March 1906 by Senhor Hintze Ribeiro, and he in turn by Senhor Franco in May.

**Ministry: Premier and Minister of the Interior**, Senhor João Franco.—*Finance*, Senhor Ernesto Driesel Schroter.—*Foreign Affairs*, Senhor Luiz de Magalhães.—*Justice*, Senhor José Novaes.—*Marine*, Senhor Ayres de Ornellas.—*War*, Senhor Antonio Vasconcellos Porto.—*Public Works*, Senhor Malheiro Rey-mão.

**British Minister** at Lisbon, The Hon. Sir F. Villiers, K.C.M.G., C.B.—*First Secretary*, H. D. Beaumont.—*Naval Attaché*, Captain F. R. W. Morgan, R.N., M.V.O.—*Military Attaché*, Col. H. C. Lowther, D.S.O.—*Commercial Attaché*, S. P. Cockerell.

**British Consuls:** H. L. Churchill (Lisbon), H. Grant (Oporto), E. R. E. Vicars (Madeira), W. Read (St. Michael's, Azores), W. Rice (Cape Verd), R. A. Becker (Marmugão).

**Minister in London**, Marquis de Soveral, 12, Gloucester Place, W.

### Colonies.

**Angola** is the name given to Portuguese South-West Africa, or Lower Guinea. It is bounded on the north and east by the Congo State and Rhodesia, on the south by German South-West Africa, and on the west by the Atlantic Ocean. The boundary between Angola and the Barotse region of Rhodesia was settled in July 1905. Estimated area, 517,000 sq. m.; pop. estimated officially at 19,400,000, but probably not more than 5,000,000. Capital, *St. Paul de Loanda*. Divided into six districts: Congo, Loanda, Benguela, Lunda, Huila, and Mossamedes. The greater part of the country is in the hands of the native owners under their tribal chiefs, the Bantus numbering several millions. There are 244 miles of railway in operation, the line running from Loanda to Ambacca. A line 1200 miles in length, from Lobito Bay in Benguela to Katanga and the

Tanganyika Co.'s concessions, is being constructed. A line from Mossamedes to the tableland of Chella is also being built. The chief products are coffee, rubber, sugar, oils, and ivory, and the trade is chiefly carried on by bartering with the natives, but there are great agricultural and mining possibilities. A company working in Mossamedes has a concession for mining, cattle-rearing, and fish-curing; and minerals, including gold, are known to exist in paying quantities. There are several other companies at work in the colony. Imports, 1903, £1,150,600; 1904, 1,522,000; 1905, £1,366,400; exports, 1903, £1,080,900; 1904, £1,103,000; 1905, £961,300.

**British Consul**, H. G. Mackie (Loanda).

**Cape Verde Islands** lie 350 miles from Cape Verde, the westernmost point of Africa. Belong to Portugal. Capital, *Fraia*. Coaling station, *St. Vincent*. Area, 1480 sq. m.; pop. 147,424. Chief products coffee, tamarinds and millet. The people are Portuguese and Negro. **British Consul**, W. Rice (St. Vincent).

**Portuguese East Africa** comprises the two districts of Lorenzo Marques and Mozambique, which are separated from one another by the Zambesi, and the other smaller districts of Zambesia, Inhambane, Gaza, and Tete. Its coast-line extends southwards from Cape Delgado, the southern extremity of the coast-line of German East Africa, to Kosi Bay, just below Delagoa Bay, at a point separating British from Portuguese territory, as fixed by the Anglo-Portuguese Agreement of '01. The colony is administered by a **Royal Commissioner** appointed for three years. There is a military force of about 5000 men. The Manica and Sofala region, where gold exists, is placed under the **Mozambique Company**, which has a royal charter. The **Nyasa Company**, which also has a royal charter, administers the region between the Rovuma, Lake Nyasa, and the Lurio. Other companies are working in Zambesia and other parts of the country. The two principal railways of this region are the **Delagoa Bay**, which has a length of 57 miles in the colony, and the **Beira Railway**, which runs from the river Pungwé on the east coast, a point 12 miles from the mouth of the river, to New Umtali on the frontier, a distance of 203 miles, and is then continued by the Mashonaland Railway to Salisbury, the capital of Rhodesia, about 170 miles farther on. The **Quilimane Railway** is to be built from the port of Quilimane to Port Herald, almost parallel to the Zambesi, with a total length of 153 miles. The chief ports are Mozambique, Quilimane, Beira, Chinde (pop. 2927), and Lorenzo Marques (pop. 9849). The principal exports are ores, sugar, rubber, ivory, and wax. Area, about 300,000 sq. m.; pop. about 3,000,000. Imports, 1905: Chinde, £89,633; Lorenzo Marques, £1,042,507; Beira, £212,089; Mozambique, £114,272; Quilimane, £41,671. Exports, 1904: Chinde, £64,313; Lorenzo Marques, £41,511; Beira, £89,440; Mozambique, £64,384; Quilimane, £31,166.

**British Consul-General**, Major J. Grey Baldwin (at Lorenzo Marques).

**British Consul**, R. C. F. Maugham (Beira).

**Guinea** lies on the west coast of Africa, and is surrounded on the land side by French possessions. It includes the Bissagos Islands, off the coast opposite the mouth of the Rio

Grande, and the island of Bolama. Area, 4400 sq. m.; pop. 820,000. Capital, Bolama. Chief port, Bissao. Principal products, rubber, wax, oil, and ivory.

British Consul, Captain C. F. Cromie, C.M.G. (resides at Dakar, Senegal).

**St. Thomé and Príncipe Islands**, in the Gulf of Guinea, are ruled by a Governor. They are very fertile, and yield cocoa, coffee, and cinchona. Area, 454 sq. m.; pop. 42,103. Imports, 1900, £356,641; exports, 1901, £764,830.

**Goa** is a port-town and territory between the boundaries of Madras and Bombay, India. Once the seat of great trade, now decayed and ruinous. Belongs to Portugal, with Damão, on the coast 100 miles north of Bombay, and Diu, a small island 140 miles off Damão. The capital is Panjin, in Goa. There are a number of salt works in Goa. Area of Portuguese India, 1,638 sq. m.; pop. 531,800.

**Macao** is an island at the mouth of the Canton River, in China, forming with small islands adjacent a Portuguese dependency. Area, 5 sq. m.; pop. 80,000.

**Timor** is an island in the Malay Archipelago. The eastern portion of it, with the island of Pulo Cambing, is Portuguese. Chief products, coffee and wax. Area, 7990 sq. m.; pop. 300,000.

## POST OFFICE REPORT AND STATISTICS.

The 1906 Report announced that Imperial Penny Postage has now been extended, so far as outward letters are concerned, to the whole of the Empire, with the exception of one or two small islands in the Pacific Ocean, and also to Egypt and the Soudan.

The number of postal packets delivered in the United Kingdom during the year ended March 31st, 1906, was estimated as follows:—

	Number.	Increase per cent.	Average Number to each Person.
Letters . . . .	2,707,200,000	3'1	62'5
Post-cards . . . .	800,300,000	9'0	18'5
Halfpenny packets . . . .	891,600,000	5'7	20'6
Newspapers . . . .	185,400,000	3'3	4'3
Parcels . . . .	101,700,000	4'6	2'3
Total . . . .	4,686,200,000	4'6	108'2

The number of letters registered in the United Kingdom was 18,634,333, and that of parcels registered was 1,047,675. The total number of express services was 1,578,746. The numbers of undelivered postal packets were: Letters, 10,868,272, and postcards, 2,656,770; book packets, etc., 12,439,377; newspapers, 473,346; and parcels, 248,526. There were 320,041 registered letters and letters containing property posted with insufficient addresses. They contained £16,887 in cash and notes, and £656,845 in bills, cheques, money orders, etc. Letters to the number of 4599 were posted without any address at all, containing £9766 in various forms.

Inland money orders by post and telegraph numbered 10,758,785, representing an amount of £36,872,608; and foreign and colonial orders numbered 2,837,368, representing a value of £7,740,177. Postal orders numbered 97,271,000, representing a value of £38,770,000.

In the Savings Bank £42,300,617 was deposited and £42,096,037 withdrawn, the total sum standing to the credit of 9,963,049 depositors at the end of 1905 being £152,111,140. This amount was credited thus:—

	No. of Depositors.	Amount Deposited.	Average Deposit.
		£	£ s. d.
England and Wales . .	9,027,112	135,668,450	15 0 7
Scotland . .	451,627	6,205,339	13 14 10
Ireland . .	484,310	10,237,351	21 2 9
	9,963,049	152,111,140	15 5 4

The number of telegrams sent was 89,478,000, including 8,796,000 foreign telegrams and 6,649,000 press telegrams.

There were 23,283 post offices open on March 31st, 1906, with a staff of 195,432 (86,078 on the establishment), including 10,372 which are also telegraph offices, and 487 post offices open for trunk telephone business. There were 17,974,000 trunk-line conversations during the year. See TELEPHONES.

The number of parcels sent to and received from places abroad was: Despatched, 2,474,003; received, 1,431,035. According to the Board of Trade returns, the value of the goods exported and imported by Parcel Post during the last three years was:—

	1904.	1905.	1906.
Exports . .	3,475,707	3,778,558	4,175,661
Imports . .	1,306,251	1,377,943	1,530,368

The postal revenue was £17,064,023, and the expenditure £11,795,109, giving a net profit of £5,268,914. The telegraph revenue was £4,151,380, and the expenditure £4,906,087, a deficit of £754,707. The combined postal and telegraph revenue, therefore, was £21,215,403; the combined expenditure, £16,701,196; and the combined net revenue, £4,514,207.

**Poynter, Sir E. J., Bart.**, was b. in Paris in 1836, and is the son of Mr. Ambrose Poynter, an architect. He was ed. at Westminster School and Ipswich Grammar School, and studied art in English schools, and at Paris under Gleyre '56-9. He was elected an Associate of the Royal Academy in '69, and an Academician in '76. In '71 a member of the Belgian Water Colour Society, and in '71 and again in '73 Slade Professor of Art at University College, London. He was Director for Art and Principal of the National Art Training School at South Kensington for some years, and Director of the National Gallery '94-1904. In '96, on the death of Sir John Millais, he was elected to the Presidency of the Royal Academy. His best known pictures are "Israel in Egypt" '67, "Perseus and Andromeda" ('72), "Atalanta's Race" ('76), "A Visit to Æsculapius" ('80—now in the National Gallery of British Art), "The Meeting of Solomon and the Queen of Sheba" ('91), "Helen and Hermia" (1900), "The Storm Nymphs" (1903). Knighted '97; baronet 1902. Lady Poynter died on June 12th, 1906.

## H.M. MOST HONOURABLE PRIVY COUNCIL.

The Privy Council is a body of persons who are nominated by the sovereign without any patent or grant, and who, upon taking the oath of office, are at once qualified members. A privy councillor must be a natural-born or naturalised British subject, and as he is created by the sovereign, so he can be removed from the list at his pleasure. It is customary to include in the body the royal princes and the archbishops; several of the principal officers of State and of the Household become privy councillors by virtue of their office; the principal Secretaries of State are of course sworn of the Council before they can take part in the deliberations of the select number of the body which we know as the Cabinet Council; and the rank is bestowed upon Ambassadors and the principal Colonial Governors, and frequently upon respected politicians who may never have been in office, as an honorary distinction. Occasionally in recent years a Colonial statesman of eminence has been appointed, and in '97 all the Premiers of the self-governing colonies, who by invitation officially attended the celebration in London of the Diamond Jubilee of H.M. the late Queen Victoria, were added. Any privy councillor may act as a justice of the peace.

The Lord President of the Council is appointed by letters patent under the great seal; his duty is to manage the debates in council, to propose matters from the sovereign at the council table, and to report to His Majesty the resolutions taken thereon. It is only on rare occasions that the whole body of members assembles, one of those instances being at the demise of the Crown, when it is the duty of the Privy Council to meet and proclaim the new sovereign. For the ordinary business of the Council only those who are summoned attend, and the number thus called upon is usually very small, and consists generally of members of the party in power. Among other important functions of the Council are the granting of charters of incorporation to public and private bodies, and the bringing into operation by means of orders in council of the provisions of many statutes which Parliament leaves to the executive to enforce, temporarily or permanently, at such time or times as it may deem necessary and desirable. Royal proclamations, summoning or proroguing or dissolving Parliament, and for many other purposes, are made by and with the advice of the Privy Council before being issued.

Several public departments have grown out of or are even now committees of the Council. The Board of Trade, although it is now an entirely separate department, is still officially entitled the Committee of Council for Trade. The Board of Education was a Committee of the Privy Council; and there are still a Universities Committee, which reviews the statutes made under the Oxford and Cambridge Act, a Scottish Universities Committee, and a Judicial Committee (see p. 251) for appellate business. It is provided by statute that certain of the colonial judges, acting or retired, who may have been appointed members of the Privy Council, shall be members of this last Committee.

*The Privy Council in Ireland.*

The Privy Council in Ireland, a smaller body than that in England, advises the Lord-

Lieutenant, and exercises some of the powers possessed by the Council in Great Britain, but in relation to Irish affairs only.

As the Privy Council in Great Britain and the Privy Council in Ireland are distinct bodies, though it will be noticed that some persons are members of both, a separate list of each is set out, corrected to Nov. 30th, 1906. The word "Peer" is intended to signify that some particulars regarding the public life of the noble lord referred to are given in "Peerage" under the heading PARLIAMENT; and "M.P." is meant to refer the reader to the biographical list of the House of Commons also under PARLIAMENT. All Privy Councillors should be addressed as "Right Honourable."

## I. THE PRIVY COUNCIL IN GREAT BRITAIN.

*Lord President*—Earl of Crewe.

- Aberdeen, Earl of. (Feb. '86.) Peer.  
 Acland, A. H. Dyke. (Aug. '92.) B. '47; E. Rugby and Christ Church, Oxford, Fellow of Balliol College; Liberal M.P. for Yorks, West Riding (Rotherham D.), from '85 to '99; Vice-President of the Committee of Council on Education '92-5; author of a "Handbook on English Political History," and of "Working Men Co-operators." Westholme, Scarborough; 28, Cheyne Walk, S.W. Reform, Athenæum, Cobden.  
 Acland-Hood, Sir Alexander F., Bart. (Nov. 1904.) M.P.  
 Akers-Douglas, Aretas. (June '91.) M.P.  
 Allerton, Lord. (June '90.) Peer.  
 Althorp, Viscount. (Aug. '92.) Peer.  
 Alverstone, Lord. (May 1900.) Peer.  
 Ancaster, Earl of. (Mar. '80.) Peer.  
 Argyll, Duke of. (Mar. '75.) Peer.  
 Arnold-Forster, Hugh Oakeley. (Oct. 1903.) M.P.  
 Ashbourne, Lord. (June '85.) Peer.  
 Ashcombe, Lord. (Mar. '80.) Peer.  
 Ashley, Hon. Anthony Evelyn Melbourne. (June '91.) B. '36; s. 7th E. Shaftesbury. Called bar Lincoln's Inn '63; Private Sec. Ld. Palmerston '58 and '59-65; Parliamentary Sec. to Bd. of Trade '80-82; Under Col. Sec. '82-5; M.P. Poole '74-80, I. of Wight '80-85.  
 Asquith, Herbert Henry. (Aug. '92.) M.P.  
 Atkinson, Lord. (Dec. 1905.) Peer.  
 Avebury, Lord. (Feb. '90.) Peer.  
 Aubrey-Fletcher, Sir Henry. (Dec. 1901.) M.P.  
 Balfour, A. J. (June '85.) M.P.  
 Balfour, Gerald. (Nov. 1900.)  
 Balfour of Burleigh, Lord. (June '92.) Peer.  
 Barnes, Sir John Gorell. (Feb. 1905.) President of the Probate Divorce and Admiralty Division of the High Court 1905.  
 Barton, Sir Edmund. (Jan. 1901.) See special biography.  
 Beauchamp, Earl. (Jan. 1906.) Peer.  
 Belper, Lord. (July '95.) Peer.  
 Bertie, Hon. Sir Francis Leveson, G.C.V.O. K.C.B. (Mar. 1903.)  
 Birrell, Augustine. (Dec. 1905.) M.P.  
 Bond, Sir Robert. (Aug. 1902.) B. '37. Premier and Colonial Sec. of Newfoundland since 1900. K.C.M.G.

- Bonser**, Sir John Winfield. (Nov. 1901.) B. '47. *E.* at Ashby-de-la-Zouche, Loughborough, Halifax Grammar School, and Christ's Coll., Camb. Called to the bar '72; was Att.-Gen. Straits Settlements '83-94, when he was app. Chief Justice, and in the same year Chief Justice of Ceylon.
- Booth**, Charles. (June 1904.) See special biography.
- Brackenbury**, General Sir Henry, G.C.B., K.C.S.I., R.A. (Feb. 1904.) B. 37; *E.* at Eton and Woolwich; served in India '57-8; Franco-German war '70-1; Ashanti war '73-4; Zulu war '79-80; and Egypt '84-5; President Ordnance Committee '96-9. 23, Hanover Square, W.
- Brampton**, Lord. (Mar. '99.) Peer.
- Breadalbane**, Marquis of. (May '80.) Peer.
- Brodrick**, William St. John Fremantle. (Jan. '97.)
- Brownlow**, Earl. (July '87.) Peer.
- Bruce**, Sir Gainsford. (June 1904.)
- Brunner**, Sir J. T., Bart. (June 1906.) M.P.
- Byce**, James. (Aug. '92.) M.P.
- Buculeuch**, Duke of. (Dec. 1901.) Peer.
- Burgholere**, Lord. (Aug. '92.) Peer.
- Burns**, John. (Dec. 1905.) M.P.
- Burt**, Thomas. (Jan. 1906.) M.P.
- Bunsen**, Sir Maurice W. E. de, G.C.V.O., K.C.M.G., G.C.B. (Feb. 1906.)
- Buxton**, Sidney Charles. (Dec. 1905.)
- Cadogan**, Earl. (June '85.) Peer.
- Campbell**, J. H. A. (July '98.) M.P.
- Campbell-Bannerman**, Sir Henry. (Nov. '84.) M.P.
- Cantebury**, Randall Thomas, Archbishop of, G.C.V.O. (Feb. 1903.) See PEERS.
- Carrington**, Earl. (July '81.) Peer.
- Carson**, Sir E. H., K.C. (Dec. 1905.) M.P.
- Cartwright**, Hon. Sir Richard John. (Nov. 1902.) B. '35; *E.* Trinity Coll., Dublin. Was Finance Minister of the Canadian Government '73-8; and has been Minister of Trade and Commerce since '96. G.C.M.G.
- Cassel**, Sir Ernest. (Aug. 1902.) B. '52; *E.* at Cologne. A merchant of London who received the honour of K.C.M.G. for services rendered in connection with Egypt. Gave £200,000 for charitable purposes, which the King applied to the foundation of sanatoria for persons suffering from tuberculosis. G.C.M.G., G.C.V.O.
- Causton**, R. R. (Dec. 1905.) M.P.
- Cavendish**, Victor C. W. (Dec. 1905.) M.P.
- Cawdor**, Earl. (Mar. 1905.) Peer.
- Chamberlain**, Joseph. (May '80.) M.P.
- Chamberlain**, Joseph Austen. (Aug. 1902.) M.P.
- Chaplin**, H. (June '85.)
- Charles**, Sir Arthur. (July 1903.)
- Chesham**, Lord. (July 1901.) Peer.
- Chesterfield**, Earl of. (Apr. '94.) Peer.
- Cholmondeley**, Marquis of. (July 1901.) Peer.
- Christian**, H.R.H. Prince Frederick Christian Charles Augustus of Schleswig-Holstein, K.G., G.C.V.O. (Aug. '94.) B. '31; *m.*, '66, H.R.H. Princess Helena; is a general in the army; High Steward of Windsor; created "Royal Highness" by English warrant.
- Clarendon**, Earl of. (Nov. 1900.) Peer.
- Cohen**, Arthur, K.C. (Nov. 1905.)
- Collings**, Jesse. (Aug. '92.) M.P.
- Collins**, Sir Richard Henn. (Nov. '97.) B. '42, being a son of Stephens Collins, Q.C., of Dublin. Called bar Mid. Temple '67; Q.C. '83; was joint ed. of "Smith's Leading Cases"; Judge Q.B. Division '91-7; a Lord Justice of Appeal, '97-1901, when he was app. Master of the Rolls; was an arbitrator on the Venezuelan Boundary Question; Chm. of the War Funds Committee of Inquiry 1900. 2, Bramham Gardens, S.W. *Athenæum*.
- Connaught**, H.R.H. Duke of. (May '71.) See special biography.
- Courtney**, Lord. (Jan. '89.) Peer.
- Coventry**, Earl of. (Aug. '77.) Peer.
- Cozens-Hardy**, Sir Herbert H. (Nov. 1901.) Lord Justice, Court of Appeal, 1901. B. '38; *E.* Amersham School and Univ. College, London (Fellow); Bench Lincoln's Inn; took silk '82; Judge Chancery Division of High Court '99-1901. Liberal M.P. North Norfolk '85-99.
- Crewe**, Earl of. (Aug. '92.) Peer.
- Cromer**, Earl of. (Sept. 1900.) Peer.
- Cross**, Viscount. (Feb. '74.) Peer.
- Crossley**, Sir Savile Brinton. (Dec. 1902.)
- Curzon** of Kedleston, Lord. (June '95.) Peer.
- Dalrymple**, Sir Chas., Bart. (Dec. 1905.) Ex-M.P.
- Darley**, Sir Frederick M., G.C.M.G., Lieut.-Governor and Chief Justice Supreme Court, New South Wales. (Nov. 1905.)
- Dartmouth**, Earl of. (June '85.) Peer.
- Davey**, Lord. (Nov. '93.) Peer.
- Day**, Sir John Charles. (March 1902.) B. '26; *E.* at St. Gregory's, Downside, and London Univ.; called to the bar '49; Q.C. '72; bencher '73. App. a judge Queen's Bench Div. '82; was Pres. of the Belfast Commn. '86, and a member of the Parnell Commn. '88-9.
- Derby**, Earl of. (April '78.) Peer.
- Devonshire**, Duke of. (Feb. '66.) Peer.
- Dickson**, Charles Scott. (Oct. 1903.)
- Dilke**, Sir Charles Wentworth, Bart. (Dec. '82.) M.P.
- Dimsdale**, Sir Joseph Cockfield. (Dec. 1902.)
- Dorington**, Sir John Edward. (Aug. 1902.)
- Ducie**, Earl of. (July '59.) Peer.
- Dudley**, Earl of. (Aug. 1902.) Peer.
- Dunedin**, Lord. (1896.) Peer.
- Durand**, Sir Henry Mortimer. (Feb. 1901.) B. '50. *E.* Blackheath School; called to the bar Lincoln's Inn '72; entered Bengal Civil Service '73; was Political Sec. to Earl Roberts during Kabul campaign '79, Sec. Foreign Dept. '85-94, Min. and Consul-Gen. at Teheran '94-1900, Amb. at Madrid, 1900-3, when he was app. Amb. at Washington. G.C.M.G., K.C.S.I., K.C.I.E.
- Dyke**, Sir W. H., Bart. (April '80.)
- Edwards**, Sir Fleetwood, K.C.B. (Oct. '95.) B. '42. Entered R.E. '63; Maj. '83, Lieut.-Col. 90; A.D.C. to Gov. of Bermuda '67-9; attached to the special Embassy during the Berlin Congress '78; Assist. Keeper Privy Purse, and Assist. Private Sec. to her late Majesty, '78-95; Keeper of the Privy Purse, '95-1900. G.C.V.O.
- Egerton**, Sir Edwin H., G.C.M.G., K.C.B. (Jan. 1904.) Ambassador to Italy.
- Elgin**, Earl of. (Feb. '86.) Peer.
- Elliot**, Hon. Sir Henry George. (June 67.) B. '17; 2nd son of 2nd E. Minto. Was many years in dip. service; was Min. at Copenhagen '58-9, Naples '59-62, Greece '62-3, Italy '63-6, Turkey '66-77, Vienna '77-84; retired '84; G.C.B.

- Ellis, J. E. (Dec. 1905.) M.P.  
 Eversley, Lord. (Dec. '80.) Peer.  
 Farquharson, Robert, M.D. (June 1906.)  
 Ex-M.P. West Aberdeenshire.  
 Farwell, Sir George. (June 1906.) Lord  
 Justice of Appeal.  
 Fellowes, Ailwyn. (Mar. 1905.) M.P.  
 Fergusson, Sir James, Bart., G.C.S.I., K.C.M.G.,  
 C.I.E. (Nov. '68.)  
 Field, Lord. (Mar. '90.) Peer.  
 Fife, Duke of. (May '80.) Peer.  
 Finch, George H. (Dec. 1902.) M.P.  
 Finlay, Sir Robert B. (June 1905.)  
 Fitz-Gibbon, Gerald. (Nov. 1900, and of the  
 Irish Privy Council since '79.) B. '37. Irish  
 bar '60, English bar '61; Q.C. '72, Sol.-Gen.  
 Ireland '77-8; a Lord Justice of Appeal,  
 Ireland, since '78.  
 Foljambe, Francis John Savile. (Nov. '95.) B.  
 '30. M.P. East Retford '57-85; Lord High  
 Steward of East Retford.  
 Forrest, Sir John. (July '97.) Treasurer  
 Australian Commonwealth 1905.  
 Foster, Sir Walter. (Dec. 1905.) M.P.  
 Fowler, Sir Henry H. (June '86.) M.P.  
 Fry, Sir Edward. (April '83.) B. '27. Called  
 to bar '54; Q.C. '69; Judge of High Court  
 '77; Lord Justice of Appeal '83-92; was '97-8  
 Chm. of the Royal Comm. of Inquiry into the  
 Procedure and Practice of the Irish Land  
 Commn.

**Wrench, Frederick Stringer.** (1903.)

**Wyndham, George.** (1900.) M.P.

**Young, John.** ('86.) B. '26; son of W. Young, of Galgorm, M.D. M.A. Trin. Coll. Dublin; J.P. and D.L. co. Antrim; High Sheriff '63. *Residence, Galgorm Castle, Ballymena, co. Antrim.*

*Assist. Under-Sec. to the Lord-Lieut. and Clerk of the Council, Sir James B. Dougherty, C.V.O., C.B., Dublin Castle.*

**Preceptors, College of.** Established 1846, incorporated by royal charter, '49, "for the purpose of promoting sound learning and of advancing the interests of education, especially among the middle classes, by affording facilities to the teacher for acquiring a knowledge of his profession, and by providing for the periodical session of a competent Board of Examiners to ascertain and give certificates of the acquirements and fitness for their office of persons engaged or desiring to be engaged in the education of youth." Under the powers conferred by the charter, the Council have established schemes of examination. (1) For teachers, to ascertain their qualifications and fitness to take part in the work of instruction; (2) for pupils, to test their progress, and to afford at once to the teacher and to the public a satisfactory criterion of the value of the instruction they receive. The diplomas granted by the College to teachers are of three grades—Associate, Licentiate, and Fellow; and a distinctive feature of the examinations is, that in all cases the theory and practice of education is an obligatory subject for each grade. Visiting examiners are appointed by the College for the inspection and examination of public and private schools. In '73 the Council of the College instituted a Professorship (the first established in this country) of the Science and Art of Education; and regular courses of lectures for teachers are delivered in the College lecture-hall. Offices, Bloomsbury Square. *Organ, Educational Times.* Secretary, C. R. Hodgson, B.A.

**Provident Medical Association, Metropolitan.** Established for the purpose of securing the supply of medical attendance and medicine during sickness to the families of the wage-earning classes throughout London by the payment of a weekly sum, regulated by the number in each family. Twenty-one branches already established. Secretary, Chas. H. Warren, 5, Lamb's Conduit Street, Bloomsbury, W.C.

**Provis, Sir Samuel Butler, K.C.B.,** Permanent Secretary of the Local Government Board since '98, is the son of Mr. Samuel Provis. B. at Warminster, Feb. '45; ed. at Queens' College, Cambridge; called to the Bar (Middle Temple) '66. Became junior Legal Assistant to the Local Government Board '72; Assistant Secretary '82; created a C.B. '87.

**Psychical Research, The Incorporated Society for.** Founded 1882, under the presidency of the late Prof. Henry Sidgwick, to investigate mesmeric, psychical, and spiritualistic phenomena. An important branch of the Society's work has hitherto been the examination of telepathy. Reports of a number of varied and careful experiments in induced telepathic communication are published in the "Proceedings," and a large collection of spontaneous cases has been published in a book entitled "Phantasms of the Living." See also "Apparitions and Thought-Transference," by Mr. F. Podmore. For a general review of the Society's work, and its bearing on philosophical problems, see Mr. F. W. H. Myers's "Human Personality." The Society has about 900 members and associates. **President** for 1906, Right Hon. G. W. Balfour; **Hon. Secretaries**, Mr. J. G. Piddington and the Hon. Everard Feilding. **Offices and Library**, 20, Hanover Square, London, W.

**Public-house Trust Movement.** During the last five years systematic attempts have been made, in different parts of Great Britain, to get public-houses under public management by means of Public-house Trust Companies. Whilst recognising that public-houses are a public necessity, the object is to eliminate, as far as possible, the element of private profit from the retail trade of intoxicating liquors; to secure a strict enforcement of the regulative provisions of the existing licensing law; to maintain the public-houses acquired not as mere drinking saloons, but as refreshment houses so far as local conditions will permit; to limit the shareholders' dividends to 5 per cent., and to pay all profits (over and above depreciation, reserve, and dividend) to trustees for public purposes. In order to remove all temptation to the manager to push the sale of intoxicants, he is paid a fixed salary, and is allowed no profit whatever on the sale of alcoholic drinks, but is allowed a profit on all trade in food and non-alcoholics. Tea, coffee, and other temperance drinks, and food, are made readily accessible at the bars, and are served promptly. To Earl Grey and the Bishop of Chester is due the credit of having originated the movement. There are now 38 Trust Companies in the United Kingdom—33 in England and Wales, 1 in Ireland, and 4 in Scotland. There are about 210 houses now under trust management, and a large number will be offered for trust management on the expiration of the existing leases. **Secretary**, Mr. Hugh A. Paget. **Office**, 15, Dean's Yard, Westminster, S. W.

### PUBLIC SCHOOLS.

**Bedford Grammar School.** Founded 1566; reorganised 1873. Annual income, £3500. Eight leaving exhibitions of £70 and £60 for four years. Two fall vacant annually. Exhibitions tenable in the school from £60 to £10. **Pupils** 850. Boys are prepared for the Universities, for Woolwich and Sandhurst and other public examinations. The school is well equipped with laboratories for science teaching. There is an Engineering side with full provision of workshops. There are eight boarding-houses. There is an Engineering Corps. **Head Master**, J. E. King, M.A.

**Berkhamsted School, Herts.** Number of pupils over 400. Five boarding-houses. **Head Master**, Rev. T. C. Fry, D.D.

**Birmingham, King Edward's School,** comprises a high school for boys, a high school for girls, three grammar schools for boys and four grammar schools for girls. Founded 1552, reorganised 1878. In 1900, the Birmingham (King Edward VI.) Schools Act liberated the Foundation from control by the Charity Commissioners. Income, £50,000. Numerous scholarships and exhibitions both for boys and girls. The pupils number about 2800; 450 in high school for boys. **Head Master**, R. Cary Gilson, M.A. **Motto**, *Domine, Salvum fac Regem.*

**Brighton College, Brighton.** Founded 1847. Governed by a Council of twelve. There are two leaving scholarships of the annual value of £60, and three of £30, tenable at Oxford or Cambridge. Entrance scholarships are awarded every year, at least three of the annual value of £70 or £50, and some smaller exhibitions. **Pupils**, 180. **Head Master**, Rev. W. R. Dawson, M.A.

**Charterhouse School, Godalming.** Founded 1611, and until 1872 situated near Smithfield, London, on ground that once belonged to the Carthusian Monastery. One of the nine great public schools of the Public Schools Commission. Sixty scholarships are tenable in the school, and there are ten or more vacancies annually. Twenty or more exhibitions to the Universities, each of the annual value of £80, tenable for four years. **Pupils**, 560. **Head Master**, Rev. G. H. Rendall, M.A., Litt.D. **Motto**, *Deo dante dedi.*

**Cheltenham College, Gloucestershire.** Founded 1841. Incorporated '94; governed by a President and twenty members of Council. There are three sides in the Senior Department—the Classical, the Military and Civil (Head Master, W. H. Baker, M.A.), and the Modern. There is a Junior Department (Head Master, F. J. Cade, M.A.). Numerous scholarships are attached to the College. **Pupils** 600. **Principal**, the Rev. R. Waterfield, M.A. **Bursar**, A. A. Hunter, Esq.

**Christ's Hospital.** Founded 1552. The Hospital schools are: (1) the Boys' School, West Horsham, with accommodation for 820 boys, including Preparatory School. **Head Master**, Rev. A. W. Upcott, D.D., Exeter College, Oxford; (2) the Girls' School, Hertford, with accommodation for 280 girls. **Head Mistress**, Miss M. E. Robertson, Newnham College, Cambridge. With relation to two-thirds of the scholars at the Hospital schools, fees ranging from £10 to £20 may be charged if the Council of Almoners consider "that the parents or next friends are in a position to contribute substantially towards the child's education and maintenance." Entrance to the Hospital schools is gained by presentation or by competition. Presentation to about 425 places lies in the hands of the President, certain City companies, and donation governors; and 89 scholars (sons of Naval Officers, of persons distinguished in Literature, Science, Art, or in the service of the Crown, etc.), may be presented by the Council of Almoners (which numbers 43 members). The Council have the right of presentation to 12 places in the Girls' School for daughters of officers, civil servants, etc. There is Competition for about 100 scholars, nominated by donation governors. From Metropolitan schools of a public elementary nature come 179 successful competitors; various parishes

supply 108 scholars; and the residue of the places are at the disposal of boys and girls nominated by the governors of endowed schools at which they have attended for the period of two years. There are numerous exhibitions and prizes. Hospital exhibition funds for both boys and girls provide exhibitions to universities, including the *Times* scholarship, and the "Montefiore," "Rowed," and "Pitt Club" exhibitions. At the end of 1905 the Boys' Schools (including Preparatory) numbered 805 boys. Clerk, R. L. Franks. Office, 60, Aldersgate Street, London, E.C.

City of London School, Victoria Embankment, E.C. Established by the Corporation of London in 1834. Tenable at the Universities or other places of higher education are 26 scholarships varying from £80 to £200; and about 50 others tenable at the school. Pupils admitted between the ages of 7 and 15. The average number in 1905-6 was 690. Head Master, Rev. Arthur Chilton, M.A. Secretary, Mr. A. J. Austin.

Clifton College, Bristol. Opened 1862, received charter '77. It is under a Council of fifteen, the Earl of Ducie being President, and the Bishop of Hereford Chairman of the Council, and consists of Classical, Modern and Military sides, and Junior and Preparatory Schools. Three exhibitions, of £25, which may be increased to £50 a year, tenable at the Universities, and at least eleven scholarships, varying in value from £25 to £100 a year, tenable at the College, offered annually. Pupils, 560. Head Master, Rev. A. A. David, M.A. Secretary, W. D. L. Macpherson. Motto, *Spiritus intus alit*.

Dulwich College (Alley's) "College of God's Gift" at Dulwich) was founded A.D. 1619, by Edward Alley, the Actor, under Letters Patent of King James I. Reconstituted '58, and removed to new site and new building '70. Pupils 680. No boy may enter the school before the age of 10, or remain after the age of 19. Endowment about £5000 per annum. £1000 may be annually allotted among "boys, proceeding to a place of higher education," and £500 also may be paid annually in scholarships to boys either already in the school or about to enter it. Such scholarships are awarded as the result of open examination. Head Master, A. H. Gilkes, M.A.; School Secretary, Gilbert B. Stretton, M.A.; Motto, *Detur Gloria soli Deo*.

Epsom College. Established in 1855 as a Public School with a Royal Medical Foundation. School accommodation for about 250 boys; and Preparatory for 100 boys under fifteen. Nine medical scholarships at the Hospital Schools in London, and 18 other scholarships. There are 50 foundation scholars, and a large number of pensioners. Head Master, Rev. T. N. H. Smith-Pearse, M.A.; Secretary, J. Bernard Lamb, 37, Soho Square, W.

Eton College. Founded 1440. Endowment exceeds £20,000 per annum. Pupils consist of King's scholars or "Collagers" (of whom there are 70, and who enter college between twelve and fourteen years of age), and of Oppidians, who enter between ten and fourteen years of age. Exhibitions and scholarships to both Universities, ranging from £60 for four years downwards. Motto, *Floreat Etona*. Head Master, Rev. the Hon. Edward Lytton, M.A. A mission is supported by past and present Etonians at Hackney Wick. Consult the *College Calendar*.

Felsted School. Founded in 1564. Classical, Modern, Engineering, and Armsides. Scholarships £70, £50, and £20; leaving exhibitions £60 and £50. It has about 250 pupils. Head Master, Rev. Frank Stephenson, M.A. Bursar, E. B. Trow, LL.D., M.A., B.C.L.

Fettes College, Edinburgh. Founded in 1870. Has about 230 scholars. Head Master, Rev. W. A. Heard, LL.D.

Glenalmond. Founded with the name Trinity College, Glenalmond, in 1841. It stands on the river Almond, in the Grampians, near Perth. Pupils about 140. Warden, Rev. A. R. F. Hyslop, M.A.

Haileybury College, Herts. Founded 1862, received Royal Charter '64. Entrance scholarships. Exhibitions to Oxford and Cambridge five annually (£60, £50, £50, £40, and £20) for three years. Pupils 450. Head Master, Rev. St. J. B. Wynne Willson, M.A.

Harrow School. Founded 1571, by John Lyon, a yeoman, b. at Preston, near Harrow. Age of admission from 12 to 14. Ten or eleven entrance scholarships, of the value of £100, £80, £60, and £35 a year, are offered every Easter to boys (not members of the school) over 12 and under 14 years of age on the previous 1st of January. The governors can, at their discretion, add £20 a year to any scholarship, if the circumstances of the scholar appear to make it desirable. To one of these scholarships, and to one only, is added, at intervals, the Edward Stanhope Scholarship of £50. The Bowen Scholarship of £120 a year is given for proficiency in mathematics, French, history, geography, literature, and Latin. In years when it is not vacant a scholarship of less value is offered on the same terms. There are also two scholarships, each of £25, for two years, open to boys in the fifth form, and awarded for proficiency in such subjects as are common to both sides (classical and modern) of the school. There are numerous Scholarships, from £100 downwards, to the Universities. Pupils, nearly 600. Head Master, Rev. Joseph Wood, D.D., M.V.O. Motto, *Stet fortuna domus*.

Lancing College, Sussex. Founded 1848. Pupils 150. Head Master, B. Tower, Esq.

Leys School, The, Cambridge, founded in '75, and incorporated July 16th, '78. The founders were chiefly members of the Methodist Church, but it draws pupils and masters from the Anglican and other Protestant Churches. There are admirable laboratories, swimming bath, and ample playing-fields. Boys are received from ten years of age upwards. Entrance scholarships, varying in value from £40 to £60 (occasionally more) per annum, are offered for competition at the end of each term. A mission is supported by the old students in London. The school motto is "*In fide fiducia*." Head Master, Rev. W. T. A. Barber, D.D. Bursar, J. C. Isard, M.A.

Loretto School, Musselburgh, now contains about 135 boys. The Head Master is H. B. Tristram, M.A.

Malvern College, Worcestershire. Founded 1865. Exhibitions at the Universities, one of £40 for three years, offered annually, and one of £27 for one year; also one of £40 for three years, tenable at B.N.C., Oxford. Entrance scholarships annually filled, one or more of £87, four or more of £50, six or more of £30.

Pupils, 480. **Head Master**, Rev. Sydney R. James, M.A. **Secretary**, E. B. Scallan, M.A.

**Manchester Grammar School**. Founded in 1515 by Hugh Oldham, Bishop of Exeter, and others. The school consists of 152 foundationers (free) and about 700 capitation scholars. Close scholarships at Wadham and Brasenose College, Oxford, and St. John's College, Cambridge, range in annual value from £50 to £80. There are 23 scholarships for classics, mathematics or physical science, tenable at the Universities, ranging in value from £17 to £50 each per annum; also 29 scholarships, tenable at the school, ranging in value from £14 to £25 each per annum, together with numerous prizes. **High Master**, J. L. Paton, M.A., late Fellow of St. John's College, Cambridge; **Receiver**, Owen W. Cox. **Motto**, *Sapere aude*.

**Marlborough College**, Wiltshire. Founded 1843, incorporated by royal charter '45, received additional charter '53. Exhibitions to Universities, one each of £50, £40, and £30 for three years, offered annually, and every three years the "Old Marlburian," £50, the Council Exhibition £30, and Leaf Exhibition £22 10s., fall vacant alternately. Also 2 Modern School Exhibitions of £25 and £20 each, offered annually. Scholarships filled annually: 15 or 16 "Foundation," for sons of clergy, £30; 4 "Senior," £30; 6 "Junior," £30; 1 or 2 "House," £80, all open; Minor Scholarships for Modern Languages, etc. **Pupils**, 600. **Master**, Frank Fletcher, M.A.

**Merchant Taylors' School**, London. Founded (1561) by Sir Thomas White (founder of St. John's College, Oxford), and the court of the Merchant Taylors' Company. The Company remains the governing body of the school, which has always continued a day school. Forty-two scholarships at the school, and exhibitions of £86 and £100 for five and seven years, to St. John's College, Oxford; others, ranging from £90, to Cambridge. **Pupils** 480; on entrance must be over 9 and under 14. **Head Master**, Rev. J. Arbuthnot Nairn, Litt.D., B.D. **Secretary**, C. Waters, M.A. **Motto**, *Homo plantat, homo irrigat, sed Deus dat incrementum*.

**Mill Hill School** (London, N.W.). Founded 1807 as Protestant Dissenters' Grammar School, reconstituted under direction of the Court of Chancery '60 on a broader basis. Awards the three "Wills" Scholarships of £70 each, the "Bousfield" of about £50, the "Scrutton" of about £30, and four other leaving scholarships each tenable for three years. Also several Ministerial Exhibitions (about £60 a year) and Entrance Scholarships (£30 to £90). Number of boys 240. **Motto**, *Et virtutem, et musas*. The "Old Mill-Hillians Club" numbers over 600 members. **Head Master**, J. D. McClure, M.A., LL.D., B.Mus.

**Radley College**, Abingdon, Berks. Founded 1847. Has about 220 scholars. **Warden**, Rev. T. Field, D.D.

**Repton School**, Derbyshire. Founded 1557; reorganised 1874. **Pupils**, 320. Twenty-two assistant masters. **Head Master**, Rev. Lionel Ford, M.A.

**Rossall School**, Fleetwood, Lancashire. Founded 1844. Royal Charter granted Nov. '90. Two Exhibitions, one of £50 and one of £30 at Oxford or Cambridge, each for three years, offered every year; and the Phillips memorial exhibition for mathematics, of £40 for one year at Oxford or Cambridge. Besides this there

are about 9 Scholarships tenable at the school, offered each year by examination held about the end of March—Foundation, Senior and Junior. **Head Master**, Rev. J. P. Way, D.D.

**Rugby School**. Founded by Lawrence Sheriff, a native of Rugby (1567), and originally entrusted to two trustees, in place of which twelve gentlemen of Warwickshire were appointed by Commissioners under the Great Seal in 1602. The boys are divided into foundationers and non-foundationers. Has, every July, 1000 entrance and other scholarships of £100 to £20, and 7 leaving exhibitions tenable at the Universities for 4 years, 3 of £60 and 4 of £30 annual value. **Pupils**, 570; admission at the age of 12. **Head Master**, Rev. H. A. James, M.A., D.D. **Motto**, *Orando laborando*. In '89 there was established a Home Mission in addition to the Fox Memorial Mastership in India, in connection with the School. Consult *Rugby School Register*.

**St. Paul's School**, London. Founded 1509 by John Colet, D.D., Dean of St. Paul's. The school consists of 153 foundation scholars, elected by competitive examination, and of so many capitation scholars as the governors may from time to time decide. The capitation scholars pay a tuition fee of £24 9s. a year. The foundation scholars are exempt from fees. **Pupils** 580. The governors give annually 9 exhibitions for 4 years, varying in value from £70 to £30, to the scholars proceeding to Oxford and Cambridge, and one exhibition of £50 for two years for a boy proceeding to the Royal Academy, Woolwich. **Motto**, *Fide et literis*. **High Master**, Rev. A. E. Hillard, M.A. **Bursar**, S. Bewsher.

**Sherborne School**, Dorsetshire. Refounded by Edward VI. (the earliest school founded by that monarch), 1550, reorganised 1870. Accommodation for 280 pupils. An Exhibition to either Univ. of £40 for four years falls vacant every year; pupils may also compete for Huish Exhibitions of £50 for four years; this privilege is allowed to three other public schools only. There are also numerous Foundation, House, and other Scholarships and Prizes. **Head Master**, Rev. Canon F. B. Westcott, M.A., late Fellow Trin. Coll. Camb. **Clerk to Governors**, Mr. James Douglas. **Motto** (royal arms of Ed. VI.), *Honi soit qui mal y pense*.

**Shrewsbury School**. Founded by King Edward VI. in 1551, augmented by Queen Elizabeth in 1571. One of the seven schools reorganised by the Public Schools Act in '68. The school was moved to a new site (now covering an area of 58 acres) in '82. Since then its numbers have increased from 170 to 280. **Head Master**, Rev. H. Whitehead Moss, M.A. **Motto**, *Intus sit recte, ne labora*.

**Stonyhurst College**, near Blackburn. Directed by the Jesuit Fathers. First founded in 1592 at St. Omers in Flanders; transferred to Stonyhurst in 1794. **Rector**, the Rev. J. Browne, S.J. The Observatory attached to the College turns out excellent solar and other work. Preparatory school for 60 boys at Hodder.

**Tonbridge School** was founded 1553, and was reorganised 1880. **Governors**: Master, Warden, and Court of the Company of Skinners. Four exhibitions of £75 for four years fall vacant annually, and are tenable at any place of higher education that the Governors approve of; four others of £30 a year for four years, one vacant each year, are tenable only at Oxford or Cambridge. **Pupils**, 400. **Head Master**, Rev.

Charles C. Tancock, D.D., Oxon., Hon. Canon of Rochester. *Motto, Deus dat incrementum.*

**University College School**, Gower Street, London, established 1832, is completely unsectarian. Prepares for University College and London matriculation, as well as for Universities, Woolwich, etc. Pupils, 381. *Motto, Paulatim.* Head Master, H. J. Spenser, M.A., LL.D. Principal, T. Gregory Foster, B.A., Ph.D. School Registrar, Arthur C. Hull.

**Uppingham School**. Archdeacon Johnson's School, founded 1584; reorganised 1875. Three leaving exhibitions of £60, £50 and £40 offered every year, and 14 of about £22 each to Cambridge. Entrance scholarships, two of £70, two of £50, two of £30 annually. There are 415 boys in the School and 31 masters, and 6 assistant music masters. There is also a Lower School. Head Master, Rev. E. C. Selwyn, D.D.

**Wellington College** (Berks) was founded in 1856. The foundation consists of ninety nominations for the sons of deceased officers, who are educated for £10 a year. There are, as a rule, ten open scholarships annually, and a limited number of officers' sons are educated at £99 a year. There is a classical school, in which boys are prepared for the Universities, etc., and a modern side where boys are educated for the army, etc. Average number of pupils, 488. *Motto, "Heroum filii."* Chairman of Governors, H.R.H. the Duke of Connaught. Master, Rev. Bertram Pollock, D.D., M.V.O. Bursar, P. Sherston.

**Westminster School**, or the Royal College of St. Peter's, Westminster. Refounded 1560, reorganised 1868. Foundationers, 60; about 12

annual vacancies. The Westminster Play, an annual representation of a Latin comedy by the scholars, is of some celebrity. There are a number of close scholarships and exhibitions to Christ Church, Oxford, and of exhibitions to Trinity College, Cambridge. Head Master, Rev. James Gow, M.A., Litt.D. *Motto, Dat Deus incrementum.* Bursar, J. Tyson, B.A.

**Winchester College**, the oldest of the public schools, was founded (1387) by William of Wykeham, and opened March 26th, 1393. About a dozen vacancies yearly occur for foundationers, who are elected by the governors after open competition. His Majesty gives two gold and two silver medals to be competed for. Tenable at the Universities are four exhibitions of £50 for four years, and at New College, Oxford, six scholarships. Head Master, Rev. H. M. Burge, D.D. *Motto, Manners makyth man.*

**Public Works Loan Commissioners** are an unpaid body who are empowered to grant loans to local authorities for baths and washhouses, burial grounds, conservancy and improvement of rivers, main drainage, docks, harbours, piers, improvement of towns, labourers' dwellings, lighthouses, lunatic asylums, police stations in counties and boroughs, public libraries and museums, schoolhouses, waterworks, and other sanitary and local purposes. During 1905-6 the Commissioners made 1030 advances for sums amounting to £2,266,305, as compared with 1288 advances for £3,491,513 in 1904-5. The rates of interest varied from 2½ per cent. to 4½ per cent. Office, Old Jewry, London, E.C.

## R

### RAILWAYS.

- I.—RAILWAYS OF THE WORLD.  
II.—RAILWAYS OF THE UNITED KINGDOM.  
III.—BRITISH RAILWAYS IN 1906.

#### I. RAILWAYS OF THE WORLD.

The capital invested in the world's railways is approximately:

In Europe, £3,950,450,000.

In other parts of the world, £3,394,900,000.

Total, £7,345,350,000.

The increase in the world's railway mileage between 1898 and 1902 (the latest year for which figures are available at the time of writing) is shown by the following table:—

	Miles open.		Increase per cent.
	1898.	1902.	
Europe . . . . .	167,614	183,960	9'7
America . . . . .	240,063	261,956	9'1
Asia . . . . .	33,309	44,349	33'1
Africa . . . . .	11,156	14,550	30'4
Australia . . . . .	14,499	16,034	10'6
Totals . . . . .	466,641	520,849	11'6

Taking certain individual countries in different parts of the world, we get the following figures:—

	Miles open.		Increase per cent.
	1898.	1902.	
Great Britain and Ireland . . . . .	21,542	22,115	2'7
France . . . . .	25,914	27,747	7'1
Germany . . . . .	30,795	33,368	8'3
Italy . . . . .	9,765	9,906	1'4
Russia in Europe and Finland . . . . .	26,430	32,522	23'0
Sweden . . . . .	6,363	7,566	18'9
U.S.A. . . . .	186,359	202,432	8'6
Canada . . . . .	16,877	18,863	11'8
Mexico . . . . .	8,503	10,357	21'8
British India . . . . .	21,987	25,925	17'9
Siberia and Manchuria . . . . .	2,575	5,664	120'0
Japan . . . . .	2,949	4,236	43'6
China . . . . .	401	942	134'7
Korea . . . . .	—	37	—
Siam . . . . .	167	331	98'5
Cambodia, Cochinchina, Annam, Tonkin, Pondicherry, Malacca, Philippine Isles	238	1,728	626'1

The average cost per mile is, for Europe, £24,089; for the rest of the world, £11,067. The most heavily capitalised of any railways are those of Great Britain and Ireland, which

cost £53,913 per mile, as compared with, for example, Belgium, £31,537 per mile; France, £25,320; Germany, £20,825; Holland, £17,350; the United States of America, £12,588; Denmark, £8,626; and Sweden (private companies), £4,557. It should, however, be borne in mind that the above tables and figures refer to "route mileage." If "track mileage" were taken they would be more favourable for the United Kingdom.

## II. RAILWAYS OF THE UNITED KINGDOM.

The total railway mileage open in the United Kingdom on Dec. 31st, 1905, was 22,847, viz.:  
15,731 miles in England and Wales,  
3,804 in Scotland,  
3,312 in Ireland.

These figures represent "length of line" only, irrespective both of the number of tracks and of sidings. Thus, of the total mileage of 22,847, single track accounts for 10,154; double track, 11,425; three tracks, 235; and four tracks, or more, 1,033. The total length of "track" is 38,431 miles. Adding to this figure the length of sidings, reduced to single track (13,891), we get a total of 52,322 miles of track. Compared with 1904, the "length of line open" shows an increase of 214 miles, and the "length of track" an increase of 688 miles.

The number of companies working railways in England and Wales on Dec. 31st, 1905, was 109; in Scotland, 9; and in Ireland, 27 (17 operating ordinary railways and 10 light railways).

Of the English lines 7 are worked by electrical power. In Glasgow there is a district subway line worked by cable, and in Ireland there is a light railway worked by electrical power.

The English and Welsh railway companies owned on the date mentioned 18,962 locomotives and 624,261 other vehicles; the Scotch 2399 locomotives and 162,983 other vehicles; and the Irish 829 locomotives and 23,097 other vehicles.

The accompanying tables show the principal railways of the United Kingdom, their mileage (both in "route" miles, and including sidings reduced to single track), capital cost, financial position, rolling-stock, the names of their general managers, and the location of their head offices. The figures given are those for 1905, the 1906 returns being not available at the time of going to press, except as regards the results reported by the leading lines for the first half of the year.

### Companies' Capital.

The total paid-up capital of the companies was at the close of 1905 approximately £1,283,000,000, of which over £194,000,000, or over 15 per cent., represents nominal additions due to consolidation, conversion, or division of stocks. This deduction leaves a total "cash" capital of £1,089,000,000, being nearly £47,665 per "route" mile and £24,521 per mile of single track, including sidings. Of the total capital 38 per cent. consists of "ordinary" stock, 35 per cent. of "guaranteed and preference," and 27 per cent. of "loans and debentures." It should, however, be stated here that an amount of £2,325,000 included in previous years as ordinary capital, has been included in the Board of Trade return for 1905 as guaranteed capital. The increase in capital during 1905 was £14,306,000, the smallest augmentation of any year since 1894 (1·1 per cent.), of which £1,624,000 was due to nominal additions. The increase in paid-up

capital since 1900 has been £106,800,000 (over 9 per cent.).

### Traffic Receipts.

The gross receipts of the companies in 1905 were as follows: Passenger traffic, £40,257,000; excess luggage, mails, parcels, carriages, horses, dogs, etc., £8,463,000; goods traffic, £56,412,000; and miscellaneous, £8,399,000; total, £113,531,000. Compared with 1904, these figures show increases of £332,000 (including excess luggage, etc.), or 0·7 per cent., from passenger traffic; £1,012,000, or 1·8 per cent., from goods traffic; and £354,000 from miscellaneous sources of revenue (which item includes steamboats, canals, harbours, docks, rents, tolls, hotels, etc.), the total increase being £1,698,000, or 1·5 per cent.

### Passenger Traffic.

Analysing the passenger receipts, we find there was in 1905, as compared with 1904, an increase of £38,000, or 1·1 per cent., in regard to ordinary first-class passengers, but a decrease of £211,000, or 6·5 per cent., on second class; an increase of £247,000, or 0·8 per cent., on ordinary third-class passengers; of £117,000, or 2·9 per cent., in the receipts from season-ticket holders; and of £141,000, or 1·7 per cent., from excess luggage, mails, parcels, carriages, horses, dogs, etc. The net result is an increase of 0·7 per cent. It should be stated here that up to, and inclusive of, the year 1904, passengers, other than first-class passengers, travelling on the Liverpool Overhead Railway (a railway which has only two classes of passengers) were included in the returns as second-class passengers, whereas in the return for 1905 they are included as third-class passengers. The receipts from these in 1905 were about £63,000. The real decrease in 1905 in the receipts from second-class passengers, and the real increase in the receipts from third-class passengers were therefore £148,000 and £184,000 respectively. This increase in third-class receipts at the expense of the second-class is largely due to the partial abolition of the latter class on the Metropolitan and Metropolitan District Railways, consequent on the electrification of those lines; but the returns of many other companies show a slight falling off in 1905 in the receipts from second-class passengers.

The number of ordinary second-class passengers carried decreased by 18,711,000, or 26·2 per cent.; third-class passengers increased by 17,475,000, or 1·6 per cent.; and first-class passengers by 1,484,000, or 4·2 per cent.

Thus the net gain on all classes was 248,000. The number of first-class season ticket-holders declined by 0·7 per cent., and of second-class by 6·8 per cent., but third-class increased by 9·2 per cent. The net gain on all classes was 19,000, or 3 per cent.

The concession of third-class season tickets is one of the inducements now offered by certain railway companies to suburban residents with a view to checking tramway competition. In 1902 the increased receipts from this source amounted to £79,000; in 1903 the increase was £126,000, in 1904 it rose to £171,000, and in 1905 there was a further gain of £131,000. As against this, however, there must be set a decrease, in 1905, of £16,000 from second-class season tickets, following a decrease of £54,000 in 1904. Receipts in 1905 from first-class season tickets showed an increase of £4,000.

\* Including 26 motor coaches and 35 trailers.

† The Company had for use 109 additional engines under agreement; also 5,809 carriages, waggons, and trucks.

‡ These are electric, and exclusive of 53 disused steam engines.

\* \* Whilst the financial year of the English railway companies ends with December, the Scotch companies' year terminates in January. The Scotch dividends in this table are, therefore, for the year ended Jan. 1906.

**Goods Traffic and Train Mileage.**

The receipts from goods traffic in 1905 amounted to £56,412,000, an increase of £1,012,000, or 1·8 per cent., as compared with 1904. In minerals there was an increase of £601,000, or 2·3 per cent., and in general merchandise an increase of £435,000, or 1·5 per cent.; but live stock declined £24,000, or 1·7 per cent. In the tonnage of minerals and general merchandise there was an increase of over 11,000,000 tons, or 2·5 per cent.

Notwithstanding this increased tonnage, the persistent efforts of the railway companies to effect economies in transport by reducing goods train mileage resulted in a decrease of 400,000 miles in 1905, following on a decrease of 4,500,000 miles which had already been brought about in 1904, and 10,000,000 miles in 1903. On the other hand, the passenger train mileage was 1·8 per cent. more in 1905 than in 1904. While the receipts from goods traffic increased from 85·42d. per train mile in 1904 to 87·29d. in 1905, the receipts from passenger traffic per train mile declined from 48·09d. in 1904 to 47·58d. in 1905.

**Working Expenditure.**

The total outlay under the head of working expenditure in 1905 was £70,065,000. This was an increase of £892,000, or 1·3 per cent., as compared with 1904. The proportion of working expenses to gross receipts was the same in 1905 as in 1904, namely, 62 per cent.

Rates and taxes rose to £4,933,000 in 1905, an increase of £197,000 as compared with 1904, or of £1,784,000 as compared with 1896, an advance of about 56 per cent. in nine years.

**Net Earnings and Dividends.**

As already stated, the gross receipts of the companies amounted in 1905 to £113,531,000, and the total working expenditure to £70,065,000. The net earnings, therefore, amounted to £43,466,000, an increase of £806,000 as compared with 1904. The proportion of net earnings to capital was 3·39 per cent. in 1905, against 3·36 in 1904.

The average dividends paid on the various classes of capital in 1905 were (with the exception of the rate of interest on loans) 3·27 per cent. on the ordinary capital, 3·44 per cent. on the preference, 4 per cent. on the guaranteed, and 3·42 per cent. on the debenture stock, these being about the same as in 1904. The rate of interest on loans was 4·12, as against 4·11 in 1904.

The following table shows the amounts of the ordinary capital grouped according to the dividends paid in 1905:—

Rates of Dividend.	Amount Million £.	Percent. of total.
Nil . . . . .	66·8	13·8
Not above 1% . . . . .	16·0	3·3
Above 1 and not above 2% . . . . .	42·8	8·9
" 2 " " 3 " . . . . .	126·7	26·2
" 3 " " 4 " . . . . .	79·3	16·4
" 4 " " 5 " . . . . .	14·1	2·9
" 5 " " 6 " . . . . .	87·8	18·2
" 6 " " 7 " . . . . .	48·4	10
" 7 " " 8 " . . . . .	1·4	0·3
" 8 " " 9 " . . . . .	0·2	—
Total . . . . .	483·5	100·0

**Railway Accidents in 1905.**

In 1905 the number of passengers killed by accidents to trains, rolling stock, permanent way, etc., was 39, the number injured was 396, and 109 were killed and 1972 injured by accidents from other causes. Of servants of companies or contractors, 6 were killed and 112 injured from accidents to trains, etc., and 393 were killed and 3690 injured by accidents from other causes. Of other persons 1 was killed and 8 were injured from accidents to trains, etc.; 58 persons passing over railways at level crossings were killed and 36 injured; 439 trespassers (including suicides) were killed and 113 injured; while of "other persons," 55 were killed and 133 injured. The totals for the year 1905 were 1100 killed and 6460 injured, the former figure being an increase of 27, and the latter a decrease of 429, as compared with 1904.

In this connection comparison with the official statistics of the United States for the year ended June 1905 is interesting. These show that the number of persons killed on American railroads during 1904-5 was 9,703, while the injured numbered no fewer than 86,008. This represents an average of 26 killed and 238 hurt every day. The greatest proportionate number of victims, of course, is found among the railway employes—namely, the trainmen, of whom there were killed 1,090, and injured 29,853. Of these 230 were killed and 3,543 injured while coupling or uncoupling cars. In collisions or derailments, 672 employes were killed and 5,413 injured. The number of passengers killed was 537, and injured 10,457, while the casualties to persons trespassing were 4,865 killed and 5,251 injured. The ratio of casualties indicate that one employe in every 411 was killed, and one employe in every 21 was injured. During 1904, 441 passengers were killed and 9,111 injured.

**III. BRITISH RAILWAYS IN 1906.**

The year 1906 was fruitful of managerial changes. In March the directors of the North-Eastern appointed Mr. A. Kaye Butterworth, the company's solicitor, to be general manager in succession to Sir George Gibb. Sir George at the beginning of the year was elected deputy-chairman and managing director of the Underground Electric Railways Co., and, at the same time, chairman and managing director of the Metropolitan District Railway in succession to the late Mr. C. T. Yerkes.

In April the resignation was announced of Mr. William Moffatt, secretary and general manager of the Great North of Scotland Railway. It was resolved to separate the joint offices held by Mr. Moffatt, and appoint Mr. George Davidson, the solicitor, to be general manager, and Mr. T. S. Mackintosh, Clerk to the Committees, to be Secretary of the company.

In the same month, Mr. John Young, the general manager of the Metropolitan District Railway, resigned his position as general manager and joined the Board of Directors. Mr. A. Collinson, of the Mechanical Engineer's Department of the North-Eastern Railway, was appointed to succeed him as manager.

In July Mr. John Mathieson, manager of the Midland, resigned owing to ill-health. The Board elected Mr. W. Guy Granet, who had been assistant-manager, to fill the vacancy. Mr. Mathieson died very soon after his retirement.

From July 1st the Great Western leased the whole of the Manchester and Milford line between the Great Western junction at Pencader and Aberystwith, a distance of 41 miles. Shortly afterwards it was officially announced that the Great Western would work the Rhondda and Swansea line. The arrangement provided that the Great Western should have running powers over the system, securing to the Rhondda Co. revenue sufficient to provide for payment of rent charges in respect of 4 per cent. on debenture debt, 5 per cent. on preference shares, and interest on ordinary shares at progressive rates—3 per cent. for 1906, 4 per cent. for 1907, 5 per cent. for 1908 and every year thereafter, with possible further contingent benefit.

The scheme for the amalgamation of the Highland and Great North of Scotland Companies, which had looked like a certainty the previous year, was not proceeded with.

July 16th was the recognised Diamond Jubilee of the London and North-Western, although sections of the system, such as the Liverpool and Manchester, and the London and Birmingham, are much older.

Railway companies have, for years past, been resisting what they regard as unfair assessments. In the year under review the Taff Vale Co. at Cardiff, and the Lancashire and Yorkshire at Salford, secured important reductions.

A threatened strike of North-Eastern labour was happily averted by reasonable arrangement. A tendency to unrest was, however, manifest amongst railway employes in 1906, months prior to the National Conference of the Amalgamated Society of Railway Servants. Yet though, under the Act of 1893, such grievances as excessively long hours of work are investigated and dealt with by the Board of Trade, a return for the year ended July showed a remarkable paucity of complaints. The average annual number of these during 13 years was only 63, though the number of railway servants employed is over half a million. Some leading companies have an absolutely clean record, with no complaints against them. Such railways include the North-Western, the South-Western, and the Great Eastern.

The employment of Road Motor-Omnibuses as auxiliaries to railway transit is extending. The past year saw a London and North-Western service start between Watford Station and Croxley Green; also the introduction of the road motor-omnibuses to Wales by the Cambrian Railway.

The development of Rail Motors—especially by the Great Western, the South-Western, and the Brighton companies—has been a feature. One of the most interesting novelties was the transformation of an old Pullman car to run with a small bogie tank locomotive as a rail motor-car on the Melbourne, Ripley and Wirksworth branch of the Midland Railway. The Lancashire and Yorkshire turned out composite motor-cars for working on the Liverpool Overhead system. The London and North-Western started a motor-car service between Walsall and Lichfield, and Walsall and Rugeley; the Isle of Wight Central on its system; and the South-Eastern and Chatham for the Otford and Sevenoaks service.

### Results of Operation in June Half.

The first half of 1906 was a prosperous period for British railways as regards gross earnings.

Thanks to industrial activity and trade expansion the leading companies had an aggregate revenue of £41,721,000 for the six months ended June—an increase of over £1,500,000, or 3·8 per cent. That was the largest actual and per centum increase in any half-year since the second half of 1899. Passenger receipts improved by £377,000, or 2·3 per cent., but goods receipts went up £1,114,000, or nearly 5 per cent. Working expenses showed an increase of £920,000, and the ratio to gross receipts was 62·2 per cent., comparing with 62·3 per cent. in the first half of 1905, and 62·4 per cent. in 1904. The per centum reduction, therefore, was scarcely appreciable. But many companies, including the big trade lines, made large provision from revenue for up-keep. Moreover, £36,000 of the addition to expenses represented the growth of rates and taxes.

Out of ten English companies which return something on their ordinary stocks, six improved their dividend, whilst the carry-forward was £107,000 better than from the corresponding period of 1905. The following are the ten companies referred to, with the changes in ordinary dividend rate per annum shown:—

COMPANY.	Dividend first half-year.		+Inc. or -dec.
	1905.	1906.	
Great Eastern . . .	1½	1¾	+ ¼
Great Northern . . .	3	3	..
Great Western . . .	3¾	3¾	..
Lancashire & Yorkshire .	3¾	4	+ ¼
London & Brighton . .	3¾	3½	..
London & North-Western	5	5½	+ ½
London & South-Western	4	4	..
Midland . . . . .	4½	4¾	+ ¼
North-Eastern . . .	4½	5½	+ 1
South-Eastern . . .	2	1	+ ½

The London Undergrounds, unlike English railways in general, showed a decline of 2 per cent. in receipts on operation, though the number of passengers carried was 7,140,000 more—an anomaly for which tram and bus competition was responsible. Two only of the six lines showed declines in the number of passengers carried—viz., the Central London and the Waterloo and City. The decline in gross receipts was to some extent compensated by increased net revenue credits, but goods and miscellaneous income declined 17 per cent., whilst operating expenses increased 9 per cent., and pre-ordinary charges 1½ per cent., the result being a drop of 13 per cent. in available surplus for distribution on ordinary capital. The District Railway showed a loss of £40,000 on working, against a surplus of £5,000 in 1905. The only dividend changes were that the City and South London distributed at the rate of ½ per cent. per annum more than for the corresponding period, and the Metropolitan 1 per cent. per annum less.

The South Wales railways mainly concerned with mineral traffic had a record half-year. For the first time in their history the combined receipts of the three leading lines—namely, the Taff Vale, the Barry, and the Rhymney—exceeded £1,000,000 sterling. The annual

dividend rates declared by the six companies for the half-year were as follow:—

COMPANY.	1905.	1906.	+Inc. or -dec.
Taff Vale . . . .	4	4	..
Barry . . . .	8	10	+ 2
Rhymney . . . .	7½	7	- ½
Brecon and Merthyr (1st Preference) . .	..	4	+ 4
Port Talbot . . . .	..	2	+ 1
Rhondda and Swansea Bay . . . .	..	1½	+ 1½

Notwithstanding that the gross traffic receipts of the Scotch railways showed handsome increases, the net results were disappointing. The following table makes comparison with the first half of 1905:—

COMPANY.	1905.	1906.	+Inc. or -dec.
Caledonian . . . .	3¾	3¾	..
Glasgow and South- Western . . . .	4	4½	+ ½
Great North of Scotland (Deferred Stock) . .	½	1	+ ½
Highland . . . .	1½	1½	..
North British . . . .	1½	1½	..

The Irish railway returns for the half-year were disappointing. Taking nine of the principal railways, the gross receipts amounted to £1,661,000, an increase of only £8300, or 0·5 per cent. on the corresponding period. Thanks, however, to economy in expenses the net receipts, amounting to £663,000, showed an increase of £12,000, or nearly 2 per cent. Three lines, including the Great Southern and Western, increased their dividend rates on ordinary capital by ½ per cent. per annum. The Donegal was the only company to reduce its dividend—namely, by ½ per cent. per annum.

COMPANY.	1905.	1906.	+Inc. or -dec.
Belfast and County Down Cavan and Leitrim (guaranteed dividend) .	6	6	..
Cork and Macroom . .	5	5	..
Cork, Bandon and South Coast . . . .	2½	2¾	+ ¼
Dublin, Wicklow and Wexford (on 1857 Pre- ference) . . . .	2½	2¾	+ ¼
Donegal . . . .	6	6	..
Great Southern and Western . . . .	3	2½	- ½
Great Northern . . . .	3½	3¾	+ ¼
Midland Great Western .	6½	6½	..
	3	3	..

The half-year in the cases of the Cavan and Leitrim and the Donegal ends on May 1st, while the other companies make their books up to June 30th.

#### New Routes, Extensions, and Services.

The year saw the opening of the Great Central and Great Western new lines for public service in Middlesex and Bucks. Those two companies also started what is known as the South Wales and North England Express.

The Great Western inaugurated its new route to Ireland, known as the Fishguard and Ross-lare route. The distance from Paddington to Fishguard is 258½ miles, against 264 miles from Euston to Holyhead; the sea passage from Fishguard to Ross-lare is 54 nautical miles, against 65½ from Holyhead to Dublin.

A new branch of the Great Eastern from the Cromer main line gives the company through communication to West Runtun and Sheringham, and saves 1½ hours by direct express service from Liverpool Street.

The first portion of a line from Royston on the Midland Railway to Bradford was completed as far as Dewsbury in March, and opened for goods, mineral, and cattle traffic.

Good progress was made by the London, Brighton and South Coast with the widening of its system out of London. The completion of the works will practically quadruple throughout the main line from London to Brighton.

The London and South-Western opened its light railway to serve the military camps at Salisbury Plain between Amesbury and Bulford.

The North British put into service new block trains of the most modern construction between Edinburgh and Glasgow; also between those cities and Aberdeen, *via* the Forth and Tay bridges and Dundee. Services are accelerated and the journey completed in less time than previously.

In Ireland the last link to unite two important Ulster railway systems was opened—namely the extension between Ballyronney, on the Great Northern line, and Castlewellan—the joint meeting point with the County Down system.

The North-Eastern completed and opened its new high-level bridge over the river Tyne at Newcastle. That was the largest bridge contract let in Great Britain since the erection of the Tay Bridge. The first stone was laid in July 1902.

The Lancashire and Yorkshire opened a new route to the Continent by instituting a summer service of bi-weekly steamers between Hull, Zeebrugge, and Bruges.

Charing Cross Station, which at the end of the preceding year had been partly wrecked by a fatal fall of roof, due to the breaking of a tie-rod was reopened for traffic.

As much of the new Victoria Station as was ready for traffic was opened and brilliantly lighted with gas.

The Great Western entered into occupation of a new block of offices at Paddington.

#### Railway Rates.

The Departmental Committee of the Board of Agriculture and Fisheries appointed to inquire into the rates charged by railway companies in Great Britain in respect of the carriage of foreign and colonial farm, dairy, and market garden produce, began taking evidence on June 28th, 1904. The second day's sitting was not held until Feb. 15th, 1905, but from that date meetings were held at frequent intervals throughout the session, and a great mass of evidence was taken, various complaints and recommendations being advanced by, or on behalf of, the traders, and replied to in detail by representatives of the railway companies.

The Committee complained that, though general allegations were made concerning the carriage of foreign produce to English markets at cheaper rates than were charged for the conveyance of home produce to the same market.

there was an absence of concrete evidence supporting such statements. This, too, notwithstanding that every Chamber of Agriculture, every Farmers' Club, and every Agricultural Society had been asked to send up witnesses to give evidence before the Committee on the question of preferential rates.

In May 1906 the report of the Departmental Committee was published. It stated that the Committee were not prepared to recommend that any "further steps should be taken either by legislation or otherwise to secure the better enforcement of the law in the matter, as the evidence shows that there has been a marked absence on the part of the complainants to avail themselves of the existing remedies provided by legislation, and there is no proof that these remedies are inadequate for the purpose." That is tantamount to a vindication by the Committee of the companies from the charges made against them of undue preference to the foreigner at the expense of the home producer.

The Committee were of opinion that Co-operation affords a practical method of enabling farmers to meet foreign competition and to put themselves in a position to obtain lower railway rates for the conveyance of agricultural produce.

### Electric Traction.

At the close of 1905 the mileage of track worked solely by electric power was 140½, whilst 170½ miles more were worked partly by electricity. The electric locomotives numbered 92, including 26 owned by the Central London, but withdrawn from service in 1903. The electric motor-cars numbered 550, whilst there were 380 additional cars not fitted with motors. The energy utilised for train running and other purposes by these railways was nearly 101,000,000 Board of Trade units. See separate article on LONDON ELECTRIC LINES. Good progress was made with the electrification of the Brighton Co.'s section from Victoria to London Bridge.

The Midland Railway opened the first electric tramway built by a great railway company—namely, the Burton-on-Trent and Ashby Light Railway. The tramway is a useful feeder to the railway, and it stalls off competition. The length of the line is 11½ miles, of which 1½ miles are within Burton. The urban section was constructed and is owned by the Burton Corporation, but is leased by the corporation to the Midland Railway. The line extends through parts of the three counties of Stafford, Derby, and Leicester.

The project for the electrification of the Midland Co.'s line between Lancaster and Morecambe and Heysham Harbour was approved. The decision to use motor-cars with trailers was prompted by a desire to provide motive power of greater flexibility, and enable the company to give the advantages of a tramway service under railway conditions.

**Rainy, Robert, D.D.** (Glasgow and Edin.), b. in Glasgow 1826. Ed. Glasgow University, graduated M.A. '43, and studied theology at New College (Edin.) '44-48. Ordained minister of Free Church, Huntly, '51. Elected to Free High Church, Edinburgh, '54; Professor of Church History, New College, Edinburgh, '62; Principal, '74. Dr. Rainy takes the first place in Scotland as an ecclesiastical statesman and leader. He was elected Moderator of the Free Church '87, First Moderator of the United Free Church of Scotland, Oct. 31st, 1900, and Moderator again in 1905. He was

extruded, with all his colleagues, from the College Buildings in virtue of the Lords' decision in the Scottish Church case, Oct. 31st, 1904. His chief works are "Three Lectures on the Church of Scotland" ('72), "The Delivery and Development of Christian Doctrine" ('74), "The Bible and Criticism" ('78), and "Epistle to the Philippians" ('92), "History of Ancient Catholic Church" (1901), "Sermons" (1902). Address: 8, Rosebery Crescent, Edinburgh.

**Rawson, Admiral Sir Harry H., G.C.B.**, Governor of New South Wales, was b. at Walton-on-Hill, Lancashire, Nov. 5th, 1843; ed. at Marlborough, and entered the Navy in April '57, becoming lieutenant '63, Commander '71, Captain '77, Rear-Admiral '92, and Vice-Admiral '98. He has seen service in the China War '58-61, was principal transport officer in the Egyptian War '82; while in command on the Cape of Good Hope Station organised the expeditions against the rebel chief Mbaruk '95 and Benin '97, and bombarded the Sultan of Zanzibar's Palace '96. He jumped overboard and saved a marine in the Shanghai river '61, and in '70 gained the silver medal of the Royal Humane Society. In '78 he received the thanks of the Admiralty for the arrangements made for the defence of the Suez Canal, and was a member of the International Signal Committee '92-5. From '98 to 1901 he commanded the Channel Squadron, and in Jan. 1902 was appointed Governor of New South Wales.

**Record Office, Public.** The public records and state papers are preserved in this office, which is situated between Chancery Lane and Fetter Lane. Previous to the erection of this building they were stored in the Chapter-house of Westminster Abbey, the Tower, the Rolls Chapel, the State Paper Office, the King's Mews at Charing Cross, and the Carlton Ride. Among the more interesting books at the Office is the *Domesday Book* of William the Conqueror. A Record Commission was established in 1800 to search the records, examine their state, and publish such of them as they thought of sufficient interest. The publications of this Commission, which expired in 1837, were 54 in number, and included transcripts in full of many of the more important records. In 1837 the Master of the Rolls was constituted Keeper of the Public Records, and under his direction the publication of calendars and indexes of the Records has made extensive progress, thus rendering them readily accessible to the public. There are public search rooms at the Office, where the records and state papers may be freely consulted by historians and others. Secretary, S. R. Scargill Bird.

**Reid, The Rt. Hon. G. H.**, was b. at Johnstone, Renfrewshire, 1845, and is the son of a Presbyterian minister, who went to Melbourne in '52, and to New South Wales in '59. Mr. Reid was called to the New South Wales bar, but soon entered politics as member for East Sydney in '80. He was appointed Minister of Education '83, became Leader of the Opposition '91, and Premier '94. He visited England for the Jubilee celebrations in '97, and was made a Privy Councillor. In '98 he became K.C. He was defeated and resigned office in Sept. '99; was returned to the Commonwealth Parliament in 1901, and led the Opposition till, on the defeat of the Labour Cabinet under Mr. Watson in 1904, he became Prime Minister. His Government was defeated and resigned on June 30th, 1905. See BRITISH EMPIRE (Australia).

### RELIGIOUS REVIEW OF THE YEAR.

The unwieldy size of several dioceses in England has led to a movement for an increase of the episcopate. Proposals have been made, and to some extent approved, for the formation of new dioceses in Carlisle, York, Chester, Oxford, Manchester, and Winchester. In one other case, proposals have been formulated into a scheme which was laid before a representative meeting of East Anglians at the Mansion House on June 25th. The three bishops of Ely, Norwich, and St. Albans have agreed to surrender annual sums amounting to £3200. In addition, about £24,000 has been subscribed in the county of Essex and £7000 in Suffolk. It is proposed to form new dioceses for these two counties, and to make the diocese of Ely consist of Cambridgeshire and Huntingdonshire, the diocese of Norwich of the county of Norfolk, and the diocese of St. Albans of Hertfordshire and Bedfordshire. The scheme cannot be carried out without a special Act of Parliament, but it is the intention of the promoters not to ask for permission *ad hoc*, but (in accordance with Recommendation 10 of the Commission on Ecclesiastical Discipline) for a General Enabling Act, so that the Ecclesiastical Commissioners may move the King in Council to consent to the creation of any diocese when all necessary funds are provided and requirements satisfied, and when the scheme has lain before Parliament during thirty sessional days.

In the Church of England there has lately emerged into prominence a new variety of Erastianism. Its two ablest exponents are the editors of the *Spectator* and the *Liverpool Daily Post*. Unlike older varieties of Erastianism, it regards the State as an ethical and religious institution, which is bound to concern itself with the spiritual affairs of the nation. When, as at present, the nation is divided on religious questions, the State must liberalise the national form of religion, so as to make it comprehensive enough to embrace all reasonable varieties of Christian opinion. The State, therefore, has the right to regulate the affairs of the Church, and the Church (in so far as internal management is concerned), must submit to the will of the people as much as the Army and Navy. How far such views find adherents in the Church of England it is difficult to say, but it seems impossible that they can be received either by High or Low Churchmen, and it may be doubted if the members of the Broad School are quite prepared to accept them.

The question of the Rating of Chapels was brought into prominence through the successful action of the Paddington Council in levying rates on Westbourne Park Baptist Chapel, the pastor of which is Rev. Dr. John Clifford. The present Rating Act was passed in 1833, and exempted chapels from rates provided they were used for no other purpose than public worship. The Council contended that Westbourne Park Chapel was sometimes used for meetings that were literary, social, or political, and that therefore it was liable to be rated. If, as seems probable, this contention is upheld, the consequences will be serious to many Nonconformist chapels, unless a new Rating Act is passed.

The Sunday National Observance Movement is worthy of notice. Consequent upon a resolution adopted by the Canterbury Diocesan Conference at Lambeth Palace on June 27th, 1905, an Advisory Committee was appointed by the Archbishop to report as to the best means of securing united action on the question of Sunday observance. The committee presented their report on March 5th, 1906, and it excited so much interest that a National Conference on the subject met at the Caxton Hall, London, on May 9th, attended not only by Anglican and Nonconformist leaders, but also by the Roman Catholic Archbishop of Westminster and the Duke of Norfolk. The Conference recommended that on July 1st simultaneous sermons should be preached on Sunday Observance in all churches and chapels, and that during the second week in March 1907 an effort should be made by all the religious denominations to educate public opinion as to the true ideals, privileges, and obligations of Sunday. In March 1906 a joint committee of the two Houses of Parliament was appointed to consider the subject of Sunday trading, and its report was issued on July 19th. The leading note of its recommendations is indicated by Clause 2: "(The Committee) are satisfied of the great importance of maintaining the Sunday as a Day of Rest, not only on religious and moral grounds, but also as necessary to the preservation of the health and strength of the community."

The Scottish Church Commission is still engaged in allocating disputed church property. About 708 cases have been settled, and 300 more remain to be dealt with. So far the decisions have not been favourable to the claims of the Free Church. The United Free Church was allowed to retain possession of the Theological Colleges in Edinburgh, Glasgow, and Aberdeen, but some of the

endowments were made over to the Free Church, which also received the Church Offices in Edinburgh.

In England the cause of Church Union was advanced by the resolutions adopted by the Conferences of the Methodist New Connexion, United Methodist Free Church and Bible Christians to unite during the coming year. The wider scheme of a union to embrace all Methodist bodies in Great Britain fell through owing to the reluctance of the Wesleyan Methodists to commit themselves to it. A most remarkable scheme seems likely to result in a favourable issue next year in Canada. A Union Committee representing the Presbyterian, Methodist and Congregational Churches, has recommended a basis of union for the three denominations. This basis is said to embrace Congregational liberty, Presbyterian order and Methodist doctrine. If the union is consummated in Canada, it may possibly be followed by similar movements throughout the British Empire and in the United States.

Anglicans have made many individual efforts to promote friendliness between themselves and the Eastern Churches, and on Oct. 10th a society was formed with this object as its aim. It is called the Anglican and Eastern Orthodox Churches Union, and is meant to promote knowledge and intercourse by means of lectures and meetings, translating and publishing books, supporting Eastern and Anglican students of theology, mutual visits, international conferences, and formation of branches in the various countries to carry on the work.

Owing to the manner in which the Colonial Clergy Act was administered, protests have been frequently made by Colonial clergymen desiring to officiate in England. The General Synod of the Canadian Church approached the Archbishop of Canterbury two years ago, and in 1906 he (with the concurrence of the Archbishop of York) gave his decision. In future the particulars to be furnished by clergymen applying for licence under the Colonial Clergy Act will be divided into two parts. (1) Clergymen on temporary leave of absence are only required to give their name, address, age, date and place of ordination, reasons for and length of absence, and description of recommendatory letters. (2) Clergymen applying for permanent work in England must, in addition, answer questions concerning education and scholarship. These changes were received with satisfaction in the Colonies.

In Biblical Criticism the centre of interest has now shifted from the Old Testament to the New. At present there is a pronounced reaction against the destructive criticism which denied the credibility of the first five books of the New Testament, and many wild theories are now put out of court. The temper which made some critics reject whatever was traditional is now succeeded by a wiser mood, which promises to put the study of the origins of Christianity on a sounder basis. A notable work on the Acts of the Apostles was published recently by Prof. Harnack of Berlin. He not only makes all the concessions granted by modern German scholars in favour of the Lucan authorship of sections of the Acts, but he maintains that the entire book is the work of St. Luke. A revived interest in Apocalyptic Literature was also apparent during the year; and Dr. Sanday, in his lecture at Oxford in November on the "Reconstruction of the Life of Christ," main-

tained that the study of Jewish Apocalyptic Literature was necessary to a right understanding of the teaching of Christ on the kingdom of God.

The Report of the Royal Commission on Ecclesiastical Discipline (see p. 466), by its unanimity, the judicial fairness of the Commissioners, and the practical nature of their recommendations, made a deep impression on the public mind. One of these recommendations (No. 2) was at once acted upon, as the Government granted Letters of Business to the Convocations. On Nov. 13th both Houses of the Convocation of Canterbury unanimously agreed to take further action as outlined in the recommendation.

The Representative Church Council at its July meeting in London considered an important proposal concerning the scheme for the representation of the laity. The question was whether voters should have rights simply as parishioners, or whether they might have them as members of particular congregations. After a prolonged discussion, a vote was taken, and the result of the division was to show 176 in favour of the parochial and 143 in favour of the congregational scheme. The former was accordingly adopted.

The Wesleyan Methodist Conference at Nottingham on July 18th was marked by a great increase of fervour in the missionary zeal of the Society. A deficit of £15,000 was converted by additional subscriptions into a surplus, and amid a scene of enthusiasm it was resolved to go forward to fresh extension in missionary work. The Baptist Assembly at Huddersfield on Oct. 3rd was remarkable for the dissatisfaction expressed with the form of Congregationalism which prevails in the denomination. The Congregational Union Assembly at Wolverhampton on Oct. 19th had a significant discussion on the Virgin Birth of our Lord, introduced by the Rev. Dr. Barrett, of Norwich, who defended the orthodox view. Amongst the speakers who followed him were the Rev. Drs. Forsyth, Ritchie, and Bartlet.

The forty-sixth Church Congress met at Barrow-in-Furness on Oct. 2nd, and was attended by 2133 members. It was notable in two ways: (1) for the spirit of tolerance displayed by the members. The most diverse and conflicting views were heard with patience, and statements that would have provoked a storm a few years ago aroused only a murmur. (2) For the prominence given to Socialism. This was apparent all through, from the Congress Sermon of the Bishop of Birmingham to the devotional meeting at the close. The Bishop of Carlisle (Dr. Diggle) presided, and delivered the opening address, on the adaptability of the Church. The first paper was by Prof. Flinders Petrie, who dealt with his latest discovery of the capital of the Hyksos or Shepherd Kings in Egypt, and said that his researches convinced him that the civilisation of the Hyksos corresponded with that of the patriarchs. The Rev. C. H. W. Johns, a Cambridge Assyriologist, read a technical paper, on the Babylonian discoveries. Prof. Burkitt, Norrisian Professor of Divinity, sketched the province of historical criticism in the normal conception of Christian duty, and Canon Knowling read a vigorous paper on Biblical Criticism. At the evening meeting, the Rev. Leighton Pullan advocated an extension of the list of holy days and special services, but the Bishop of Southwell thought that what was needed was subtraction rather than addition.

The Bishop of Edinburgh (Dr. Dowden) gave a long list of revisions which ought to be effected in the Prayer Book, and Archdeacon Morris read a most outspoken paper on the subject. He said, amid sympathetic cheers, "We want elasticity, we want freedom. We are being killed by uniformity." An interesting series of papers was read on "The Church in Town and Country." The subdivisions of the subject were (a) the **Housing Question**, by the Rev. W. J. Conybeare; (b) **Recreation**, by Mrs. Barnett, who strongly condemned horse-racing; and (c) **Garden Cities**, by Canon Rawnley, who also put in a plea for games, festivals and pageants. On Wednesday morning there was a fair attendance of members to consider the relations of Church and State. Mr. J. St. Loe Strachey expounded the new Erastianism (see above) to an unsympathetic audience, and the Bishop of St. David's followed with a striking paper on the Church in Wales. He claimed that the number of communicants had doubled during the last twenty years. Chancellor Smith and Dean Wace took exception to the views of Mr. Strachey, and an animated discussion followed. The subject of **The Church and Art** drew a good attendance on the same day. The subdivisions were: (a) "The place and limitations of Music in public worship," introduced by the Rev. W. Pennyman, who pled for simplicity and reverence, and by Mr. S. H. Nicholson, who read a clever and amusing paper on the same lines; (b) **Symbolism in the decoration of churches**, introduced by the Rev. A. Pinchard and Mr. F. Burgess, F.S.A., both of whom pleaded that the clergy should avoid church-furnishers and employ independent craftsmen. In the afternoon Sir E. Russell dealt with the Church and Politics, and urged that the Church should raise her voice on the justice, humanity, moral and philanthropic character of legislation and administration. The Rev. T. A. Lacey followed with an able paper on the Church and the Press. The Church and Elections was dealt with by Mr. Mac Innes, J.P., and Mr. S. Buxton. The former argued that the clergy would not interfere in elections if the laity were more active in defending the interests of the Church. The Education Policy of the Government was denounced by Mr. Cripps, K.C., who said he would rather be beaten in a stand-up fight than compromise a single principle. Mr. W. Temple, son of the late Archbishop, caused a sensation by pleading for undenominationalism, and was severely handled by subsequent speakers. The evening subject was **The Church and the People**, which was introduced by Bishop Stubbs, who announced himself as a Socialist, and asked for more knowledge and sympathy on the part of the Church. Mr. Summerbell, M.P., and Mr. Lansbury received a sympathetic hearing as they also pled for Christian Socialism. A very large attendance awaited the discussion of the Report of the Royal Commission on Ecclesiastical Discipline. Lord Halifax, while satisfied with the Report as a whole, yet took exception to certain parts, such as the distinction between significant and non-significant breaches of the law. He also deprecated the conclusion of the Committee that anything Roman in practice or devotion was necessarily wrong. Dr. Wace, Dean of Canterbury, defended the Report, but was doubtful of the wisdom of asking for letters of business to Convocation. Canon Beeching's paper on the Limits of Ritual took a moderate view, but the speaker who succeeded him (the Mayor of

Hyde) spoke as an extremist on the Low Church side. The Rev. T. A. Lacey said that most ecclesiastical disorders were due to the interference of lawyers, who prevented the Bishops from governing the Church. Prebendary Webb-Peploe said that if Lord Halifax and his friends would forgo some of their practices, Low Churchmen like himself would try to rise to proper conformity. There was but a small attendance at the discussion on **The Church and Reform**. The Bishop of St. Albans pled for an increase of the episcopate, and was ably seconded by Viscount Cross. Mr. J. G. Talbot, M.P., advised a scheme for clergy pensions. An interesting discussion took place on the **Training of the Clergy**. Dr. Gee pressed for a thorough university education as a preliminary to theological training, and Canon Henson held that incumbents ought to train their junior clergy in their sacred business. The Congress concluded with a Devotional Meeting, when papers were read on the Joys of Religion—Faith, Service, Sacrifice, and Adoration.

Dr. H. Zeller, director of the Stuttgart Statistical Bureau, is the authority for a Religious Census of the World, according to which the adherents of the principal religions are thus distributed:

		Per cent. of total.
Christians . . .	534,940,000	.. 34.6

## ROYAL COMMISSION ON ECCLESIASTICAL DISCIPLINE.

The Commission was appointed on April 23rd, 1904, and consisted of Lord St. Aldwyn (Chairman), the Archbishop of Canterbury, the Marquess of Northampton, the Bishop of Oxford, Lord St. Helier, Sir John Kennaway, Bart., M.P., J. G. Talbot, Esq., M.P., Sir Samuel Hoare, Bart., M.P., Sir Edward G. Clarke, K.C., Sir Lewis D. Dibdin, K.C., the Bishop of Gloucester, Rev. T. W. Drury, Dr. G. W. Prothero, G. Harwood, Esq., M.P. On April 28th, 1905, Lord Alverstone was appointed in the room of Lord St. Helier, deceased.

The Commission was charged to inquire into the alleged prevalence of breaches or neglect of the law relating to the conduct of divine service in the Church of England, and to the ornaments and fittings of churches; to consider the existing powers and procedure applicable to such irregularities, and to make such recommendations as they deemed requisite.

The Commission gave in their report on June 21st, 1906, having held 118 sittings and examined 164 witnesses. After their first meeting the Commissioners advertised their readiness to receive evidence from church officers and parishioners; but this produced little or no response, and nearly all the witnesses who were examined were brought forward by (a) the editor of the *Record*, (b) the Joint Evidence Committee of the Church of England League and the National Protestant Church Union, and

(c) the Church Association. These witnesses gave evidence as to 687 separate services in 559 churches. Many of the witnesses were agents of the Societies which brought them before the Commission, and all of them were out of sympathy with the services they attended. On the other side, scarcely any evidence was offered of negligence in the conduct of divine service, and the Commissioners accepted all that was tendered. The report is divided into ten chapters.

Chapter I deals with the procedure of the Commissioners.

Chapter II contains a statement of the law, and affirms that the date for the standard for ceremonies is 1662 (Act of Uniformity), for vestments 1566 (Advertisements of Queen Elizabeth), and for church ornaments 1549 (first Prayer-book of Edward VI).

Chapter III shows that from the sixteenth century down to the present time there has existed a contrast between the theory of the law clearly expressed in the Acts of Uniformity, and the practice of the clergy in the conduct of public worship.

Chapter IV divides illegal practices into two classes: (1) those which have no significance in themselves, and (2) those that have a significance beyond that which the practices themselves possess. The Commissioners note 21 practices as belonging to the former class, and 34 to the latter.

Chapter V refers briefly and dubiously to Confession.

Chapter VI deals with Prayers for the Dead, and admits that these are not condemned by the Church of England. They may therefore be offered privately, although they should not be offered as a part of public worship.

Chapter VII gives extracts from a number of manuals which teach illegal doctrines and practices.

Chapter VIII gives the result of the evidence. The Commissioners find that the law is nowhere exactly observed. They lay little stress on defects such as neglect of Daily Services, and non-observance of Holy Days, as these are due to a carelessness which is decreasing. The errors in excess are of greater importance, and they gather around the Celebration of Holy Communion. Such things as incense, illegal lights, vestments, the Lavabo, wafers, sacring-bell, and the Last Gospel—all of which are in use in certain churches—have so changed the traditional service of the Church of England as to make it approximate to the service of the Church of Rome. But the *prima facie* significance of this similarity is strenuously repudiated by large numbers of loyal Churchmen, who claim quite truly that many of these things arose previous to the introduction of Roman abuses, and that therefore, as they are Catholic and not Roman, they may be practised in the Church of England. There are other practices, however, in favour of which this plea cannot be urged, as they are significant of doctrine condemned by the Church of England.

Chapter IX contains an historical survey, tracing the growth of what is now called "Ritualism" during three periods: (a) from 1340-66; (b) from 1866-92; (c) from 1892. At first the movement was no more than an effort to observe more strictly the rubrics of the Prayer-book, but as it gained strength it aimed at reviving practices which had been unknown in the English Church for more than two cen-

turies. Repressive measures were attempted by passing various Acts of Parliament, and by halting prominent "Ritualists" before the Law Courts, but such measures failed completely.

Chapter X deals with the causes of this failure to check irregularities, and suggests other remedies. The causes are: (a) It has proved impracticable to obtain complete obedience to the Acts of Uniformity in one particular direction, partly because it is not now and never has been demanded in other directions. (b) The constitution of the Court for Final Appeal for ecclesiastical causes is unsatisfactory, for the authority it exercises is that of the Crown and not that of the Church. Without being itself a Court, and without pretending to possess spiritual jurisdiction, it has the duty of revising, where necessary, judgments given in Church Courts possessing spiritual jurisdiction. The Commissioners quote the recommendations of the Ecclesiastical Courts Commission of 1893. These approve of three courts: (a) A Diocesan Court, to consist of the Bishop and one legal assessor. In cases of heresy there should be in addition a theological assessor. (b) A Provincial Court presided over by the Archbishop. (c) A Court of Final Appeal, consisting of at least five lay judges (all of whom are members of the Church of England), nominated by the Crown. These judges are to have the power of consulting the Archbishops and Bishops on any questions of doctrine or ritual, but are not bound to accept the opinion thus obtained. In proceeding to review the action of the Bishops towards clergy accused of illegal practices, the Commissioners point out that while the Bishops have generally striven to bring about conformity with the Book of Common Prayer, there has not been the same disposition to insist on obedience to the law of the Church of England as declared by the Courts. The Commissioners criticise and disapprove of the actions of the Bishops of London and Southwark in dealing with disorders in their dioceses. Finally they condemn as illegal, and subversive of the doctrine of the Church of England, the following practices: Interpolation of prayers and ceremonies belonging to the Canon of the Mass; the use of the words "Behold the Lamb of God" accompanied by the exhibition of a consecrated wafer; reservation of the Sacrament under conditions which lead to its adoration; Mass of the Pre-sanctified; Corpus Christi processions with the Sacrament; Benediction with the Sacrament; celebration of the Holy Eucharist with the intent that there shall be no communicant except the celebrant; hymns, prayers, and devotions involving invocation of or confession to the Blessed Virgin Mary or the Saints; the observance of the Festivals of the Assumption of the Blessed Virgin Mary and of the Sacred Heart; the veneration of images and roods.

The consideration of the evidence laid before them led the Commissioners to two main conclusions:—

(1) The law of public worship in the Church of England is too narrow for the religious life of the present generation.

(2) The machinery for discipline has broken down.

To preclude an impression which would, they believe, be unjust to the general body of the clergy, the Commissioners desire to place on record their conviction that the evidence gives no justification for any doubt that in the large

majority of parishes the work of the Church is being quietly and diligently performed by clergy who are entirely loyal to the principles of the English Reformation as expressed in the Book of Common Prayer.

### **Recommendations.**

(1) The practices condemned in Chapter X should be made to cease.

(2) Letters of business should be issued to the Convocations with instructions (a) to prepare a new **Ornaments Rubric**, (b) to frame a modification of the existing law in regard to **Divine Service**, so as to permit a greater elasticity.

(3) Wider scope should be given to the Bishops to regulate the use of additional and special services, collects, and hymns.

(4) Bishops should have power to refuse the institution or admission of a presentee into a benefice who has not previously satisfied the Bishop of the diocese of his willingness to obey the law as to the conduct of divine service, and as to the ornaments and fittings of churches, and to submit to directions given by the Bishop in accordance with Recommendation (3).

(5) The recommendations of the Ecclesiastical Courts Commission in 1883 as to the constitution of the **Diocesan and Provincial Courts** and of the Court of Final Appeal (see above, Chapter X)

should be carried into effect with one modification: when a case is brought before the Final Court involving charges of heresy or breach of ritual, and any doctrine or use of the Church of England shall be in controversy, such question shall be referred to the Archbishops and Bishops, whose opinion shall be accepted by the Court of Appeal.

(6) If an incumbent is convicted under the Church Discipline Act of 1840 and disobeys the sentence, he is to be deprived of his benefice and not allowed to hold any other appointment until he has promised obedience.

(7) The Episcopal veto under the Act of 1840 should be abolished, and the Public Worship Regulation Act of 1874 should be repealed.

(8) A Bishop should have power to remove from a church any ornaments or fittings placed there without a faculty.

(9) Episcopal and Archidiaconal visitations and Rural Deans' inspections of churches should be made more effective.

(10) For the purposes of effective supervision and administration it is desirable that many dioceses should be subdivided; and that a general Act providing machinery for the creation of new dioceses by Order in Council should be passed, so as to prevent the necessity of an enactment of a separate statute on the formation of each new diocese.

## **THE CHURCH OF ENGLAND.**

The Church of England, properly so called, owes her foundation to **St. Augustine**, who was sent to England by Pope Gregory the Great in 596. Queen Bertha, the wife of Ethelred the King, was a Christian, and on St. Augustine landing in what is now Kent, the King gave him every facility for doing all he desired towards spreading that religion in the country—and in a very short time the King himself was converted. St. Augustine was made the first **Archbishop of Canterbury** in 597—the 1300th anniversary of which event and of the foundation of the Anglican Church was celebrated during '97.

By the Anglican Church is meant collectively that group of autonomous churches which are in communion with or have sprung from the mother Church of England. They are the following: The Church of Ireland, the Episcopal Church of Scotland, the Protestant Episcopal Church of the United States of America, the Church of Canada, the Church of Australia, the Indian Church, and the Church of South Africa, which are all autonomous bodies under the jurisdiction of their own metropolitans, and not amenable to the Ecclesiastical Courts of the Church of England, though they all look to the Archbishop of Canterbury as Patriarch. In addition to these autonomous Churches in connection with the Anglican Communion there are twenty-five missionary bishops, representing the English Church in various remote regions of Asia, Africa, and America; and ten representing the Protestant Episcopal Church of America. The Reformed Episcopal Church of America and the Free Church of England are not recognised as authentic branches of the Anglican Church. The American Church possesses 91 bishops in 62 dioceses and 29 missionary jurisdictions, and 5229 other clergy. It has 807,351 communicants, and upwards of 1,650,000 baptised members.

See **Irish and Scotch Episcopal Churches** on pp. 471-2.

India and the Colonies of the British Empire possess 101 bishops of the Anglican Church, while two are appointed for Europe. In all essential respects the doctrine and discipline of the Churches in connection with the Anglican Communion is the same, differentiations being rather in detail of development than in form or character. One important difference is the restoration of Diocesan Synods and the general Synodical action which marks the un-Established branches of the Church. The tendency of the American, South African, and Scotch Churches is towards High Churchmanship, and the same may be said in a less degree of the Indian Church; while Broad Evangelicalism is the rule in the Colonies.

The next Lambeth Conference will take place in 1908. Information can be obtained from the Secretaries of the Congress, Church House, Westminster.

### **Government.**

The government of the Church of England in England and Wales is carried on by Bishops, of whom there are thirty-seven (two of them Archbishops), including the new sees of Birmingham and Southwark created in 1904. The Bishops superintend the work in each diocese, and are aided in the episcopal work of confirmations, consecration and opening of burial grounds by suffragans, or assistant Bishops, of whom there are thirty-two. The Bishops are appointed by the King, in virtue of his supremacy, their appointment being ratified by the Church, by their election by the Dean and Chapter of the Cathedral of the diocese, in pursuance of a *congé d'élire* sent to them by the Crown. The suffragans are appointed by the Bishops themselves. The whole of England is divided into parishes of various sizes; for the inhabitants

of each parish there is appointed a parish priest whose duty it is to minister to them. A certain number of parishes grouped together form a **Rural Deanery**; they in their turn added together form an **Archdeaconry**; a **Diocese**, over which the Bishop presides, is made up of two or more Archdeaconries. The Archdeacon—the *oculus episcopi*—assisted by the Rural Deans, reports as to the state of the livings. There are also in the diocese laymen who hold ecclesiastical appointments to control the temporal and legal business. There are two **Vicars General**, one for each province (though Mr. C. A. Cripps, K.C., now holds both offices himself), **Chancellors** (usually barristers), **registrars**, **surveyors**, **architects**, etc. Each parish has at least two **Churchwardens** to look after the temporal affairs connected with the Church. There is in most Rural Deaneries a **Ruri-decanal Conference**, composed of the clergy and leading laymen—and in each Diocese a **Diocesan Conference** in which Church questions are discussed.

The Cathedral in each diocese is the seat—the "*Cathedra*"—of the bishop, but he has no voice in the government of the Cathedral, which is vested in the Chapter, of which the Dean is the head. The Deans and Canons are appointed by the Crown; the Minor Canons, who sing the daily Offices, and the various officers of the Cathedral, are appointed by the Chapter. There are two **Deaneries** which are called **Peculiars**—Westminster and Windsor—the Abbey and St. George's Chapel being outside the jurisdiction of the bishops of the diocese in which they are severally situate. There are a few Deans in name only, such as the Dean of Battle—a survival of the title of the Abbot of Battle Abbey; there is also the Dean of the Chapels Royal (the Bishop of London), and the Dean of the Closet—but their offices are connected with the Royal Household. The dioceses, roughly speaking, are continuous with the counties of which the chief town is the See, though there are important exceptions. All the dioceses of England and Wales (except those of York, Durham, Liverpool, Newcastle, Ripon, Manchester, Carlisle, Wakefield, Chester, and Sodor and Man, which form the Province of York) are in the Province of Canterbury.

#### **Bishops and Deans.**

On the next page is a list of the territorial prelates of the Church of England, with the date of their appointment to the see, and with the annual income. The table, it will be seen, includes the **Suffragans** appointed for each see; and the names of the **Deans**. For biographies of the Bishops see under the alphabetical heading of each in **PARLIAMENT** (pp. 336–372), where also it is shown which Bishops actually sit in the House of Lords.

#### **Convocation.**

There are two **Convocations**, or **Provincial Synods**, of the clergy of the Church of England for the two Provinces of Canterbury and York. The greater importance of the Synod of Canterbury, until recent years, has led to its being commonly spoken of as **Convocation**. It was silenced in 1717, and its meetings were, with few exceptions, merely formal until 1852, from which date it has regularly met for business, generally thrice yearly for a week at a time. It consists of two Houses. In the Upper House sit the

Archbishop and Bishops of the province in their scarlet Convocation robes; in the Lower House, the Deans, Archdeacons, and Proctors elected to represent the cathedral chapters and the beneficed clergy. The members of the Lower House wear the academic dress, the doctors their scarlet gowns. With every new Parliament a new Convocation is summoned by the Archbishop in obedience to a royal writ. When the Crown desires to refer to the Convocation any question affecting the Church, **Letters of Business** are issued directing it to take that question into its consideration. If the Convocation wishes to make any alteration in the canons of the Church, it prepares draft amended canons, and submits them to the Crown, both Convocations concurring in the same proposals. If the advisers of the Crown approve, the "royal licence" is issued, and the canons are enacted and promulgated by the Convocations and bind the ecclesiastical courts. Where the law of the Church has been settled by statute—as is the case with the rubrics and services of the Prayer-Book, and many other matters—it cannot be altered without the authority of Parliament. In the absence of Letters of Business, Convocation is free to discuss all questions concerning the interests of the Church and the spiritual welfare of the nation.

**Province of Canterbury.**—*Vicar-General*: C. A. Cripps, Esq., K.C.; *Registrar*: Harry W. Lee, Esq.; *Actuary*: H. R. E. Childers, Esq.; *Apparitor-General*: Sir J. A. Hanham, Bart. *Clerk*: Mr. Arthur Ryder, 3, Creed Lane, Ludgate Hill, E.C.

**Province of York.** *Registrar and Notary*: H. A. Hudson, Esq., Minster Yard, York; *Treasurer*: Canon G. M. Argles, York. *Synodal Sec.*, Rev. H. Robinson, The Rectory, Monkgate, York.

#### **Laymen, Houses of.**

The first House of Laymen for the Province of Canterbury assembled with the Houses of Convocation at the opening of the Parliament of 1886. The representation originally consisted of a certain number of members elected by the various diocesan conferences, a fixed number being allotted to each diocese irrespective of population. Thus, London had 10 members; Rochester, 8; Winchester, Lichfield, St. Albans and Worcester, 6 each; and the remaining dioceses 4 each. The Archbishop also had the power of nominating 10 additional members. By the resolution of the Representative Church Council, which was confirmed by Convocation in Feb. 1906, the representation was altered, and the elections are now made with reference to the population of each diocese, and on the principle of giving one representative for the first 100,000 or under of the population, and one more for every further complete 100,000, and any additional fraction of 100,000. London has now 36 members; Southwark, 21; St. Albans, 14; and the other dioceses varying numbers, from 13 in the case of Lichfield, down to 3 in the case of Bangor, Hereford, and St. Asaph.

There are now no ex-officio or nominated members, but the House may co-opt, on the proposal of the Chairman, not more than 3 members. The House is bound to avoid discussions upon doctrine. Like Convocation, the House of Laymen is elected with every fresh Parliament.

Deans of Collegiate Churches. { Westminster, Very Rev. J. Armitage Robinson, D.D.  
Windsor, Very Rev. Dr. Eliot.

Province of Canterbury.—Chairman, Marquess of Salisbury; Vice-Chairman, Sir Lewis T. Dibdin; Secretary, Mr. Sydney W. Flamank, Church House, Westminster, S.W.

In '92 the first House of Laymen for the Province of York, containing 106 members, held its first meeting. The meetings are held at York, at least twice a year, or as often as may seem good to the Archbishop. See Convocation above.

Province of York.—Chairman, Viscount Cross, G.C.B.; Vice-Chairmen, Sir Francis S. Powell, Bart., M.P., and Viscount Halifax; Hon. Sec., E. P. Charlewood, Esq., 19, Carlyle Mansions, Cheyne Walk, London, S.W.; Hon. Treasurer, W. F. H. Thomson, Esq., York and East Riding Bank, York.

### Representative Church Council.

The Representative Church Council consists of the two Houses of Convocation and the two Houses of Laymen meeting together as one body for consultative purposes. It is intended that all the members shall by-and-by be elected *ad hoc* by the clergy and laity. The Constitution adopted in Nov. 1905 places large powers in the hands of the laity, and practically puts them on an equal footing with the clergy. Care has been taken, however, that this shall not interfere with the inherent rights of the episcopate.

### Statistics.

The number of clergy in England and Wales is about 30,000, of whom over 14,000 are benefited. The funds contributed to central and diocesan societies and institutions and administered by their executives for the year ending Easter 1905 were:—

Home Missions (including funds for church extension), Universities and Public Schools Missions, General Home Mission Societies, Missions to Soldiers and Sailors, and Temperance work, £654,192.

Foreign Missions, £772,995.

Educational work (including diocesan inspection and support of training colleges, and societies for the circulation of literature and other agencies), £127,736.

The clergy (educational and charitable assistance), including funds for their widows and orphans, £230,711.

Philanthropic work, including industrial schools, penitentiaries and prevention homes, orphanages, nursing and convalescent homes, £504,612.

Total, £2,290,247.

Funds locally raised and retained and administered by the clergy for parochial purposes and for the maintenance of assistant clergy, with church collections and Easter offerings to subsidise clerical incomes, £878,480.

For elementary education, general maintenance of elementary schools, annual contributions, £252,261.

Interest on invested funds, £89,235.

School buildings (new or enlarged day and Sunday), £198,800.

Sunday schools, £187,933.

For the maintenance of church services, etc., £1,412,309.

For the support of the poor, £538,668.

For any other purposes (religious or secular), £263,614.

For church buildings, fabric and fittings, £1,413,346.

Burial grounds, £24,476.

Endowment of benefices, £185,476.

Parsonage houses, £101,423.

Total, £5,546,028.

Funds raised by voluntary contributions in connection with the new sees of Birmingham and Southwark, £193,437.

The grand total amounts to £8,029,713, representing the voluntary offerings of the Church of England for the year ended at Easter 1905 (the returns for 1906 are not yet available). This sum is exclusive of contributions to societies supported by the co-operation of Churchmen and Nonconformists—*e.g.* the Bible Society.

### EPISCOPAL CHURCH OF IRELAND.

St. Patrick is universally recognised as the Apostle of Christianity in Ireland, and he probably went to that country as a missionary bishop A.D. 432. He planted there a native church and raised up a native priesthood, and during the sixth and seventh centuries missionaries from Ireland poured out to Britain and other European countries. Up till the twelfth century the Irish Church was independent, but it then became subject to Rome, and so remained till the Reformation. In 1800, by the Act of Union, the Church was united to the Church of England. In '69 the Irish Church Disestablishment Act was passed, taking effect on Jan. 1st, '71. Since then the Church has flourished in spite of the loss of the revenues and property formerly belonging to her. The government is in the hands of a General Synod composed of three distinct orders—the bishops, the clergy, and the laity. The bishops form one House; and 208 of the clergy with 416 of the laity form a Second House—the House of Representatives. Both sit together to constitute the Synod. This latter House is elected triennially by the 21 diocesan synods throughout the country. The General Synod meets annually at Dublin on the second Tuesday after Easter. The affairs of each diocese are managed by a diocesan synod acting through a diocesan council. The financial affairs of the Church are in the hands of the Representative Church Body, composed of archbishops and bishops, 13 clergymen, and 26 laymen chosen by the diocesan representatives in the General Synod, with 13 co-opted members, making a total of 65 members. This body holds the property of the Church in trust. The sum handed over by the Church Temporalities Commission to this body was £8,081,075, which comprised £7,581,075, the life annuities of the bishops and clergy paid as commutation money, and £500,000 compensation for private endowments. The funds in hand on Dec. 31st, 1905, amounted to £8,650,970, and are appropriated to the following purposes. Commutation capital, £691,238; Parochial sustentation, £5,294,219; Episcopal sustentation, £563,066; Glebes capital, £348,476; Miscellaneous capital, £1,697,727; and there are besides balances due to parishes, etc., £56,243. Total, £8,650,970. The annuitants now only amount to about 150, and the interest on commutation capital more than pays these, so that in many dioceses 10 to 12 per cent. is paid to the clergy as bonus on their stipends. The number of clergy in the church is 13 bishops, about 1300 incumbents, and 370 curates. The Church population in 1901 was 581,089. The incumbents are elected by Boards of Nomination, consisting of 1 bishop, 3 diocesan and 3 parochial members. The incumbents nominate their

curates. Bishops are chosen by the members of the diocesan synods, and the Primate by the bishops from amongst themselves. The average stipend of an incumbent is £200 with house, and of a curate £120. Bishops receive from £1500 to £2000, and the Archbishops £2500, with houses free of rent. **Secretary of the Representative Church Body:** Mr. Thos. Greene, M.A., 52, St. Stephen's Green, Dublin.

#### EPISCOPAL CHURCH IN SCOTLAND.

The Episcopal Church in Scotland has seven bishops—viz., the Primus, The Most Rev. G. H. Wilkinson, D.D., Bishop of St. Andrews, Dunkeld, and Dunblane; The Right Rev. John Dowden, D.D., Bishop of Edinburgh; The Right Rev. J. F. Robberds, D.D., Bishop of Brechin; The Right Rev. A. Ean Campbell, D.D., Bishop of Glasgow and Galloway; The Right Rev. A. J. Maclean, D.D., Bishop of Moray, Ross, and Caithness; and The Right Rev. Rowland Ellis, D.D., Bishop of Aberdeen and Orkney. There are 383 churches and mission stations, 146 parsonages, 331 clergy, and 49,378 communicant members. Registrar

to the Primus and Lay Clerk to the College of Bishops, W. Robertson, S.S.C., 14, Young Street, Edinburgh. (Diocese of Argyll and Isles vacant.)

The Representative Church Council, constituted in '76, is recognised as the organ of the Church in matters of finance, but cannot deal with questions of doctrine or worship, nor with matters of discipline, save to give effect to the Canonical sentences of the Church. The Council consists of the bishops, deans, priests and deacons, trustees of the Council, chancellors, auditors, registrars of the dioceses, and the provincial accountant; the secretaries of diocesan councils, secretaries and treasurers of foreign mission boards, and a lay representative elected by the congregation from each incumbency and mission contributing to the council's funds. Each diocesan council may appoint 3 priests or deacons and 3 lay representatives. There are 652 members—315 clerical, 27 official and 310 laymen. **Joint Secs. and Treasurers,** R. T. Norfor, C.A., and W. W. Farquharson, 13, Queen Street, Edinburgh; Cashier, William Watt.

### PRESBYTERIAN CHURCHES.

#### CHURCH OF SCOTLAND.

Christianity was introduced into Scotland in the fourth century, and the Church that resulted differed in several respects from the rest of Western Christendom. The chief distinction lay in its government. Three orders of clergy were recognised: bishops, priests, and deacons; but the bishops had no dioceses, and were in subordination to the abbots who presided over the great missionary college at Iona. St. Columba, the first of these abbots, like some of his successors, was a simple presbyter. Gradually the early Scottish Church assimilated to the Roman use, although it was not till the fifteenth century that metropolitans were appointed, with jurisdiction over the other sees. At the Reformation prelacy was abolished, and the Church of Scotland was constituted on its present basis. A long conflict ensued between the adherents of prelacy and presbytery, but in the end the latter prevailed, and the Reformation constitution was ratified by William and Mary, and in 1707 was confirmed by the British Parliament.—**Doctrine.** The standards of the Church of Scotland are the Confession of Faith and the Larger and Shorter Catechisms compiled by the Westminster Assembly of 1643. The doctrine they contain is Protestant and Evangelical, following the theological teaching of Augustine and Calvin.—**Polity.** The Church of Scotland is Presbyterian in government—i.e., it recognises the equality of all presbyters. Its congregations are ruled by a board of elders or laymen elected for life from the Church members. This is known as the **Kirk Session**, and the minister of the parish is *ex-officio* president. Its duties are chiefly spiritual, but they are also temporal and disciplinary. Over the Session is the **Presbytery**, consisting of the ministers and one elder from each congregation within a certain district. Over this again is the **Synod**, composed of the presbyteries of a province; and overall is the **General Assembly**, the supreme court of the Church, which meets yearly in Edinburgh in May. The Assembly is summoned by its own warrant. The King's Commissioner is present at its sittings. When

its business is concluded it is dissolved by its Moderator, who at the same time fixes the date when the next Assembly shall meet. The Royal Commissioner then also dissolves the Assembly in the name of the King, and appoints the next meeting to be held on the date fixed by the Moderator.—**Worship.** The Church of Scotland uses no liturgy in the conduct of public worship, but the order of service is to some extent prescribed by the Westminster Directory of Worship (1643). At present the tendency in the Church is towards greater uniformity and order, and a few clergymen use the *Euchologion*, a service-book issued by the Church Service Society.—**Statistics.** Ministers, 1682; missionaries, 80; elders, 10,578; communicants, 674,293; parishes, 1391; churches, 1809; presbyteries, 84; synods, 16; income, £445,583, exclusive of seat-rents, bequests, tithes or tithes, and Government grants. There are 13 churches in England connected with the Church of Scotland, and 6 at popular places of resort on the Continent, and vigorous missions are carried on in India and Africa. Commissioned chaplains for Presbyterian troops are chosen chiefly from the Church of Scotland, but clergymen of the United Free Church of Scotland and of the Presbyterian Church in Ireland are also eligible for appointments. His Majesty has decreed that during his year of office the Moderator of the General Assembly of the Church of Scotland should take rank in Scotland after the Lord Chancellor. His Majesty has followed the example of Queen Victoria in appointing Royal Chaplains from the Church of Scotland, and in attending worship at Crathie parish church while in Balmoral. **Moderator for 1907,** Rev. J. Mitford Mitchell, D.D.; **Lord High Commissioner,** The Right Hon. Lord Colebrooke.

#### UNITED FREE CHURCH OF SCOTLAND.

This Church was formed by the union of the Free Church of Scotland and the United Presbyterian Church. In 1863, on the invitation of the United Presbyterian Church, the Free Church appointed a Committee to consider

if the union of the two Churches could be accomplished. A majority of the Free Church were found to favour union, but owing to the determined opposition of the Constitutional party, led by Dr. Begg, the project had to be abandoned in '73. As a compromise, a Mutual Eligibility Act was passed, enabling congregations to call ministers from either body. Again, in '94, on the initiative of the United Presbyterian Church, a fresh movement was made for union. In 1900 the United Presbyterian Synod agreed to union unanimously, and the Free Church Assembly agreed by a majority of 557 in a house of 615 members. The Union took place in Edinburgh on Wednesday, Oct. 31st, 1900. The congregations of the United Presbyterian Church numbered 594, with 198,089 communicants; the Free Church had 1104 congregations, with 296,085 communicants. Principal Rainy was elected the first Moderator of the United Church.

**Statistics.**—Churches, 1687; ministers (including 16 professors), 1733; missionaries, 314; native agents, 4188; elders, 16,158; deacons and managers, 18,730; communicants, 504,853; in foreign field, 44,089; Continental stations, 25; income, £1,108,413 2s. 11d. **Moderator, 1906,** Rev. G. C. Hutton, D.D.

The Free Church of Scotland originated in the claim made by a majority in the Established Church (commonly known as the Evangelical party) to be free of control by the State in determining her own affairs. The conflict with the Civil Courts related to the right to veto a presentation to a parish when the majority of the people opposed it, and the right to admit other ministers than those of the civil parishes to sit in Church courts. On both points the courts of law decided against the Church, and the Government refused relief. The result was the **Disruption** on May 18th, 1843, when 474 ministers, headed by Dr. Chalmers, left the Establishment and formed the Free Church, surrendering all State support, in order to possess "spiritual independence." The Church was speedily organised, and supplied herself with churches, mansees, schools and colleges. In '52 the Synod of the United Original Seceders, and in '76 the Reformed Presbyterian Church, numbering 37 ministers, united with the Free Church. This Church (popularly known as the Cameronian) traced its descent to the Covenanters, who refused to conform to the State Church because at the Revolution of 1688 the Covenant was not enforced. In '92 a **Declaratory Act** was passed by the General Assembly, declaring the sense in which the Westminster Confession expressed the faith of the Church on certain points. The United Presbyterian Church had already in '79 passed a similar Act. In consequence of this action on the part of the Free Church, 4 of her ministers and about 1000 members seceded and formed the Free Presbyterian Church, which has now 18 charges, with 12 ministers, three-fourths of them in the Highlands.

The United Presbyterian Church was constituted in '47 by the union of the Secession and the Relief Churches. The Secession Church owed its origin to the action of the Rev. Ebenezer Erskine, of Stirling, who in 1732, along with 3 other ministers, seceded from the Established Church in protest against its defection from Reformed principles and its suppression of their ministerial freedom. It was from the first an evangelical and missionary

church, and at the time of the union in '47 it had increased to 384 congregations. The Relief Church was founded by the Rev. Thomas Gillespie, of Carnock, who was deposed in 1752 for refusing, at the bidding of the Assembly, to take part in the forced settlement of an obnoxious minister. More liberal in doctrine and spirit than the founders of the Secession, he kept apart, and in 1760 organised the Relief Church, which at its union with the Secession numbered 113 congregations.

The minority of the Free Church who refused to enter into the United Free Church, claimed to represent the original Free Church, and appealed to the law to declare to that effect and to assign to it the property vested in the Free Church. In the Scottish Courts all the judges found in favour of the United Free Church. In the House of Lords, after two hearings, by 5 to 2, the final judgment was given in favour of the non-uniting remnant, which was thus found in law to be the Free Church of Scotland, with the Establishment principle fundamental in its constitution. It was also pledged to rescind the Declaratory Act. The effect of the decision was that the whole of the funds and heritable property of the Free Church vested in the non-uniting minority; and as they were clearly unable to occupy all the churches or administer the funds, a Royal Commission was appointed on Dec. 17th, 1904, to inquire into the matter; and a Special Commissioner to determine the interim state of possession of the properties. Following on the Commissioners' report an Act of Parliament was passed in 1905, under which an Executive Commission was set up to allocate the property, etc., as between the two Churches.

#### FREE CHURCH OF SCOTLAND.

A considerable number of ministers, elders, and communicants of the Free Church were opposed to union with the United Presbyterian Church. It seemed to them to involve the surrender of the principle of National religion (the United Presbyterian Church being voluntary—i.e., opposed to the principle of Establishment) and of the Confession of Faith, which was qualified in the United Free Church by two Declaratory Acts, and largely nullified by a change of formula. Holding these opinions (which were identical with those professed by the Free Church in '43), they could not consistently enter into the union. They were therefore extruded by the majority who are now in the United Free Church from the use of the Free Church buildings and funds. The extruded parties went to law, and eventually in Aug. 1904 judgment was pronounced in favour of the Free Church. For subsequent developments see above under **United Free Church.**

The Church consists of 5 synods, 11 presbyteries, 72 ministers, 10 probationers, and 200 congregations, representing about 100,000 people. The membership cannot accurately be given. **Moderator,** Rev. Prof. C. A. Bannatyne, M.A.; **Clerk,** Rev. Prof. J. K. Cameron; **Deputy Clerk and Gen. Secretary,** Mr. J. Hay Thorburn. **Free Church Offices,** The Mound, Edinburgh; telegraphic address, Citadel.

#### REFORMED PRESBYTERIAN CHURCH.

Prior to the union in '76 of the Free Church with the Reformed Presbyterian Church, there were in existence two bodies bearing the title

of Reformed Presbyterians, and usually distinguished as the "Majority" and "Minority," a division having arisen in the Reformed Presbyterian Church in '63. The "Minority" has stood separate from all other denominations since that date, and still holds intact the doctrines and principles of the second Reformation, such as the infallibility of the Scriptures, Confession of Faith and Catechisms, Presbyterianism, the perpetual obligation of Covenantants, and dissent from the civil constitution of the country. — **Statistics for Scotland:** Presbyteries, 2; churches, 10; ministers, 8; elders, 60; communicants, 1000; income, £2237. Moderator, 1905, Rev. A. C. Gregg, B.A., Loanhead. **Statistics for Ireland:** Presbyteries, 4; churches, 40; ministers, 30; missionaries, 2; elders, 170; communicants, 3945; income, £4726. Moderator, Rev. Gawn Douglas, Loughbrickland.

#### UNITED ORIGINAL SECESSION CHURCH,

popularly known as "Auld Lights." This Church was constituted in 1842 by the union of two small bodies that had retained the original principles and practices of the Secession Church, and refused to change with the majority. The "Auld Lights" are orthodox in theology and simple in worship. They believe in the principle of a union between Church and State, and in the continued obligation of the Scottish Covenants. They have a mission in Seoni, C. P., India. — **Statistics.** Presbyteries, 5; churches, 28; ministers, 27; elders, 148; communicants, 3784; income, £5868 6s. 6d. Moderator, 1906-7, Rev. Alexander Smellie, M.A., Carlisle.

#### PRESBYTERIAN CHURCH OF ENGLAND.

The revival of Presbyterianism in England in the earlier portion of the last century was due to the influence on English Presbyterianism, on the one hand of the Evangelical movement in the Established Church of Scotland which led up to the Disruption, and on the other of the consolidation of the dissenting Presbyterianism of Scotland which led up to the formation of the United Presbyterian Synod in '47. The English section of that Synod united with the older Presbyterian body in England in '76, so forming the Presbyterian Church of England. Of the present congregations, 28 trace back their existence to the seventeenth century, 42 to the eighteenth century, while the remaining 272 have been established within the last 100 years. — **Statistics.** The Church consists of 342 fully organised congregations and 17 preaching stations, providing accommodation for 175,682 persons. Several churches are in course of rebuilding, and consequently their sittings cannot be given. A large number of fully equipped mission stations also exist in connection with town congregations, and these have an average attendance of about 12,000 persons. The number of ministers, including professors, is 359, with 28 ordained and 13 medical missionaries in the foreign field, besides 4 missionary teachers and 33 lady missionaries, 4 of whom are fully qualified doctors. There are also 21 licentiates, and about 22 theological students preparing for the ministry. The College was transferred from London to Cambridge in Oct. '99. Its new name is "Westminster College." Including the site, it cost nearly £50,000, and was opened free of debt.

The property of the Church is estimated at £2,434,260, exclusive of sundry investments for the endowment of the College and scholarships, and for the Sustentation Fund and other schemes of the Church, of the College itself, and of buildings for mission work abroad. The total income of the Church in 1905 was £304,612. The backbone of the Church finance is the Sustentation Fund, which since '78 has secured for the body of ministers, excluding a limited number under special arrangements, a minimum stipend of £200. Under this scheme 101 congregations were aid-receiving in 1905 to the amount of £6995, as against 103 in '78 to the amount of £6443 7s. 6d., the average amount of aid required being at this date £69 5s. 3d. per congregation, as against £62 10s. in '78. A permanent Church Building Fund has now been established. Offices of the Church, 7, East India Avenue, Leadenhall Street, E.C. Moderator (1906-7), Rev. J. B. Meharry, D.D., Crouch Hill, London, N. General Secretary, vacant; Financial Secretary, Mr. John Leggat; Foreign Missions Secretary, Rev. William Dale; Church Building Fund Secretary, Rev. J. H. Scott. Publications Office, 14, Paternoster Square, E.C., Mr. T. French Downie (Manager).

#### PRESBYTERIAN CHURCH IN IRELAND.

Presbyterianism arose in Ireland through the plantation of Ulster by Scottish settlers in the reign of James I. The colonists were at first received as members of the Established Church, which was Calvinistic in doctrine and recognised the validity of Presbyterian orders. After 1634, however, the Irish prelates endeavoured to depose all Presbyterian ministers who would not submit to episcopal ordination and follow the Anglican ritual. In self-defence the Presbyterians left the Established Church, and in 1642 they organised their first presbytery at Carrickfergus. During the protectorate of Cromwell the Presbyterians were kindly treated, but after the Restoration the severest pains and penalties were enforced against them for their nonconformity. At the Revolution of 1688 the gallant conduct of the Presbyterians in defending Londonderry and supporting William III. gained for them the *regium donum*, an annual bounty of £1200. During the reign of Queen Anne this bounty was withdrawn and Presbyterianism was proscribed, but with the accession of George I. toleration was granted and the *regium donum* restored. During the eighteenth century some of the ministers of the Irish Presbyterian Church adopted Arian views, but in 1828, chiefly through the influence of Dr. Cooke, the Church again declared its adherence to Trinitarian doctrine, and the Arians withdrew from its communion. Side by side with the Irish Presbyterian Church there sprang up congregations representing the various dissenting churches of Scotland, the majority being connected with the Secession Church; and in 1840 the seceders joined the older Church. By the Irish Church Act of 1869 the Church lost the *regium donum*, but the commutation granted by Government, supplemented by the gifts of the people, has more than compensated for the loss. — **Statistics.** Synods, 5; presbyteries, 36; churches, 569; ministers, 647; elders, 2138; missionaries, 35; communicants, 106,342; income, £292,265. Moderator, Rev. Wm. M'Kean,

D.D., Belfast; Assembly Clerk, Rev. W. J. Lowe, D.D., Londonderry. There are two theological halls, viz., Magee College, Londonderry, and the Assembly's College, Belfast. Vigorous foreign missions are conducted in India and China.

#### PRESBYTERIAN CHURCH OF WALES.

The Calvinistic Methodist (or Presbyterian) Church is the largest Nonconformist Church in Wales, and the only one of native origin. It began through a purely spiritual movement. In the middle of the eighteenth century a layman and two clergymen of the Established Church named Howell Harris, Daniel Rowlands, and Howell Davies, led the way in a great revival of religion in South Wales. They formed their converts into societies on Methodist lines, but as they rejected Wesley's Arminian doctrines, they leant more and more towards the practices of the Presbyterian Churches. In 1823 a Confession of Faith was adopted embodying the theological principles of the founders of the

Church. Since that date the Presbyterian system has been more fully adopted, and the Congregational element is very strong in the constitution of the Church. It is now a member of the Presbyterian Alliance, and is in federal union with the Presbyterian Church of England. Statistics: 2 Synods, and 1 General Assembly for North and South Wales; presbyteries, 24; churches, 1411; chapels and preaching stations, 1620; ministers, 895; unordained preachers, 353; deacons, 5946; communicants, 189,164; hearers, 343,757; missionaries, 28, and 16 ordained native ministers; income, £306,825 15s. 3d. Moderator, Rev. Dr. John Roberts; Secretaries, Revs. J. O. Thomas, M.A., Menai Bridge, and J. M. Saunders, M.A., Swansea; Statistical Secretaries, Revs. Joseph Evans, Denbigh, and T. J. Morgan, Garn, Bon Street, Cardiganshire. There are two theological colleges, one at Aberystwyth and one at Bala, two preparatory schools, one at Trevecca and one at Bala, and mission work is carried on in Brittany and India.

### FREE CHURCHES OF THE UNITED KINGDOM.

#### METHODIST CHURCHES.

Wesleyan Methodists are the followers of John and Charles Wesley. The first Society of the Methodist Church was formed in 1739. The official returns show that there are in Great Britain 2399 Wesleyan Methodist ministers and 536,612 Church members, 7547 Sunday-schools, 1,147,122 teachers and scholars, and 8475 preaching-places; in Ireland, 259 ministers and 29,376 members. There are 19,519 lay preachers, and 1926 on trial, and 600 in Ireland. The Foreign Missions of the Church employ 637 ministers, and number 129,302 members. (For foreign mission statistics see *Missionary Societies*.) The French Conference has 41 ministers and 1673 members; the South African Conference 235 ministers and 111,338 members; and the Australasian Conferences (at the last General Conference) 949 ministers and 145,805 members.

The Wesleyan Conference was held in July 1906 in Nottingham. The President is the Rev. Albert Clayton, Secretary of Connexional Funds, etc., and the Secretary the Rev. John Hornabrook. The President-elect for the London Conference of 1907 is the Rev. John S. Simon, Governor of Didsbury College.

The London Wesleyan Mission is the outcome of the interest aroused by "The Bitter Cry of Outcast London," issued in '85 by the Congregational Union. It has now 8 branches: East, Central, West, South, South-West, Grove, Deptford and Greenwich, Poplar and Bow, with 25 ministers, including Revs. Peter Thompson, Arthur Wood, B.A., T. Brain Castle, J. Gregory Mantle, Henry T. Meakin, C. Ensor Walters, Stephen J. Sullings, Trevor H. Davies, C. Copeland Smith, T. Naylor, B.A., with other well-known names. Forty buildings are in constant use on Sundays and weekdays. The congregations number over 25,000, and fully 12,000 are enrolled in Church fellowship. Over 70 "sisters," with 25 lay agents, are engaged from day to day in work amongst the people, and every possible agency is employed to "rescue the perishing." General Secretary, Rev. W. D. Walters, 58, Cromwell Avenue, Archway Road, London, N.

In 1797—six years after Mr. Wesley's death—the Methodist New Connexion was formed. Alexander Kilham had headed a movement which sought to place the governing power in the hands of the members instead of in the hands of ministers. In the heat of controversy he made statements respecting ministers which could not be sustained, and was expelled by the Conference of 1796. He was followed by 5000 seceders, who formed themselves into the new body. In numerical strength this Connexion now ranks third amongst the denominations that have sprung out of the parent body. It has 204 ministers at home and abroad, 1123 lay preachers, and 42,317 church members.

The case of the United Methodist Free Churches is remarkable. First, the Protestant Methodists united in '36 with the Wesleyan Association. The next year a small body in the Midlands (the Arminian Methodists) was absorbed, and in the following year the Independent Methodists of North Wales. In '57 these amalgamated bodies (with a membership of 21,000) were joined by 19,000 Reformers, and the name United Methodist Free Churches was adopted. The Reformers who refused to amalgamate became The Wesleyan Reform Union, the membership of which is now 8689; the membership of the Independent Methodists is 9147. With regard to the United Methodist Free Churches, a different denomination from the smaller body just named, it stands, with respect to numbers, next to the Primitive Methodists. At home and abroad there are 457 ministers and supernumeraries, with 3376 local preachers and 103,019 church members. The "foreign districts" are in China, East and West Africa, Jamaica, Australia, and Tasmania.

Primitive Methodism is sometimes referred to as a "growth" rather than a "secession," because the first "class" formed was composed of persons who had not previously belonged to any church. Mr. Hugh Bourne, who had been a local preacher amongst the Wesleyans, took charge of this class, and proceeded to form other classes. This was in Staffordshire in 1810. Two years before this, Mr. Bourne had been excluded from the

Methodist body because he would not conform to the regulations of Conference respecting Camp Meetings. The Conference of 1807 had decided against Camp Meetings; but Mr. Bourne, and afterwards William Clowes, refusing to be ruled on this question were excluded. The first Conference of this body was held in '20. It is now the largest of all the bodies that have sprung from the Methodists. It has missions in Southern, Western, and Central Africa; in South Australia, New Zealand, and Queensland. It has a training college for ministers at Manchester, and colleges for youths at York and Birmingham, also an orphanage at Alesford. It has, too, a training school for native evangelists in South Africa. **Latest statistics:** Members, 210,173; ministers, 1153; local preachers, 16,209; class leaders, 10,997; places of worship and rented rooms, etc., 4905; hearers, 607,682; value of Connexional property, £4,958,978; debt upon Connexional property, £1,155,708; Sabbath schools, 4209; teachers, 61,275; scholars, 477,114. **President of Conference,** Rev. G. Parkin; **Secretary,** Rev. J. Yearsley; **Missionary Sec.,** Rev. J. Pickett; **General Connexional Sec.,** Rev. J. Welford; **General Book Steward,** Rev. E. Dalton; **General Sunday School Secretary,** Rev. S. S. Henshaw; **Editor of the Monthly Magazine,** Rev. Joseph Ritson; **Principal of the Theological Institute,** Rev. W. Johnson; **Editor of the Quarterly Review,** Rev. H. B. Kendall, B.A.

The Bible Christians ("Bryanites") arose in 1815. William O'Bryan was a Cornish local preacher who threw himself into evangelistic work in such thoroughgoing fashion that he was declared to be "irregular." Upon this the new denomination was formed. The preachers at first did not take the title of "Reverend." They, however (like the Primitive Methodists), license women to preach as well as men. In England the denomination is strongest in Cornwall and in the Western counties. It has 218 ministers, 1541 lay preachers, and 34,378 members, ranking, in this particular, fourth amongst the minor bodies of Methodists. The Protestant Methodists were organised in 1829, when more than 1000 members separated from the Leeds societies, through the organ controversy at Brunswick Chapel.

Attempts at reunion have been numerous, and not without success. The suggestions that the Old Connexion should be absorbed into the Church of England have not led to the result desired, nor has the wish—often expressed—that the denominations which have sprung from the Old Body should reunite, been realised. In September '81, however, an Ecumenical Methodist Conference—intended to be the first of a series—was held in Wesley's Chapel, City Road, London. The Methodist Episcopal Church of the United States had made the suggestion. There were 400 delegates, representing 28 branches of Methodism and 5,000,000 Church members. Ten years later a second Conference was held in America, and in 1901 a third was held in Wesley's Chapel, City Road.

Attempts are being made to carry the union of churches still further by the amalgamation of several of the smaller Methodist churches. In Australasia the United Methodist Free Churches have joined with other branches of the Methodist family to form one church, with 949 ministers, 4446 lay

preachers, 145,805 members, 234,054 Sunday scholars, and 6106 churches. They are all at one with each other, and with the parent body, in doctrine. The differences refer almost entirely to the position of the ministers, and their relation to the laity in church government. In the old Wesleyan body the "Legal Conference" is supreme, and this "Hundred" must be composed of ministers. Its position was not altered by the admission of laymen in '77 to the Representative Conference. The Primitive Methodists, on the other hand, place power in a Conference in which there are two laymen to one minister. The New Connexion and the Bible Christians take a middle course—one layman to one minister—whilst the United Methodist Free Churches are unfettered in their choice of representatives. Another distinguishing feature in the government of the last-named Churches is their Circuit Independence. Their annual assembly has no power to revise the decisions of Circuit Courts in circuit matters. It is claimed for this denomination that its churches enjoy the freedom of Congregationalism whilst the whole body has the cohesion of Methodism.

The greatest development of Methodism has been in the United States of America, where it is now the leading denomination, numerically and financially. The Methodist Episcopal Church of the Northern States has a membership of 3,148,211, and 18,608 ministers. The Methodist Episcopal Church South has 1,593,836 members and 6438 ministers. Other Methodist bodies in America are the African Methodist Episcopal Church, with 786,125 members and 6510 ministers; the African Methodist Episcopal Zion Church, 560,790 members and 3401 ministers; the Methodist Protestant Church, 183,894 members and 1551 ministers; the Coloured Methodist Episcopal Church, 209,654 members and 2200 ministers; the Free Methodist Church, 29,658 members and 1015 ministers; and some few smaller churches with about 200,000 more members. In Canada the Methodist Church has 317,717 members and 2199 ministers. These figures being added to the number of Methodists in the United Kingdom and in the Colonies, give a total of 8,278,048 members, from which it is computed that the total number of persons attending Methodist churches throughout the world is about 30,000,000. Methodism has 6,876,630 Sunday scholars and 817,723 officers and teachers, 50,603 ministers, 98,483 lay preachers, and 95,783 preaching-places.

#### THE BAPTIST UNION.

The Baptists hold that the only Scriptural mode of baptism is by immersion, and that the proper subjects are "believers"—persons of an age to exercise belief. Any other baptism they consider to be contrary to the original institution, contrary to the example of Christ, and also opposed to the spiritual design of the ordinance. Historians, themselves not Baptists, have shown that through many centuries these views have been held amongst the Waldenses, the Albigenses, the Vaudois, the Lollards and Wycliffites. Formerly, on the Continent and in England, they were opprobriously called Anabaptists. In 1537 Henry VIII. issued a proclamation against their heresy, as persons who rebaptised themselves. As early as 1611, many Baptists, because of persecution, fled to America, and the feeble remnant in London published a *Confession of Faith*

(1611) to vindicate their orthodoxy. In 1620 they memorialised the king for liberty of worship. Confessions of Faith they published again in 1644 and 1646. In 1689 a **General Assembly** of Baptists in London published a Confession in thirty-two articles, and a Baptist Catechism, after the model of the Assembly's Catechism. The latest returns give, in the United Kingdom, 2934 churches, 3988 chapels, with 1,386,976 sittings, 2108 pastors, 5567 local preachers, 426,563 Church members, 581,861 Sunday scholars, 57,240 teachers. The colleges for training the rising ministry are: Bristol, founded 1770; Midland, 1797; Rawdon, 1804; Regent's Park, 1810; Pastor's, 1856; Manchester (Brighton Grove), 1866; Cardiff, 1807; North Wales, 1862; Scotland, Theological College, 1894; Ireland, Irish College, 1892. The Baptist Foreign Mission was originated in 1792 (see **Missionary Societies**, p. 484).

Baptist churches are congregational in government, holding to the order of pastors (bishops) and deacons. The interests of different counties are cared for by local associations and unions; and the wider affairs of the denomination are attended to by the **Baptist Union of Great Britain and Ireland**, formed in 1812—which Union, while it has no legislative authority, is adapted to secure united action throughout the whole country. In connection with the Union, the General Expenses, Literature, Home Work, Annuity, and Education Funds have been established. These societies represent the distribution of nearly £13,000 per annum by the Council of the Union, under one executive. The recent effort to raise £250,000 for church extension and other denominational objects by means of a Twentieth Century Fund was crowned with success.

Outside the Baptist Union there are the **Scotch Baptists**, with a plural eldership. In England there are some 300 **Hyper-Calvinistic** churches. It is computed that in the world at large there are 71,488 Baptist churches, 51,245 pastors and missionaries, and 6,976,788 Church members.

President, 1906-7, Rev. F. B. Meyer, B.A.; Vice-President, Rev. W. J. Henderson, B.A.; Secretary, Rev. J. H. Shakespeare, M.A. Offices, Baptist Church House, Southampton Row, W.C. Consult *The Baptist Hand-Book*.

## THE CONGREGATIONAL UNION OF ENGLAND AND WALES.

It is claimed for the Congregational system of church government that it is apostolic; that each congregation of believers gathered by the apostles was in itself a complete church; that each church was free from the control of other churches and of the State; and that every member of the church had the right to take part in its management. Usually each church has one minister or pastor, who is chosen by the free suffrages of the membership; but there is nothing to prevent there being more than one, and in fact such cases are not uncommon. In addition to the pastor or pastors, home missionaries and evangelists are sometimes appointed, whose work is distinct from, though subject to the supervision of, the regular pastorate. There are two orders of church officers only: bishops, elders, or pastors, who are the presidents or administrative rulers in the spiritual department of church life; and deacons, who have charge of its secular affairs.

The earliest Congregational churches were

formed in the latter part of the sixteenth century by clergymen like the Rev. Robert Browne, the Rev. Richard Clyfton and others, who had left the Church of England. Congregationalists were at first called "Brownists" and "Separatists," but afterwards Independents. The denomination was greatly strengthened by the Act of Uniformity, 1662, which drove out so many from the Established Church; but it did not escape the persecution in the time of the later Stuarts.

There are in the **British Isles** 4905 Congregational churches, branch churches and mission stations, with 3130 ministers, 1,774,480 sittings, 479,112 church members, 728,014 Sunday scholars (mission stations in Scotland not included), 68,216 teachers, 268 evangelists and lay pastors, and 5067 lay preachers. There are twelve colleges belonging to the denomination in the three kingdoms, with 58 professors and lecturers (beside three in the Colonies), in which 379 students are being trained for the regular ministry. The British Congregational churches raise for the support of religious worship, and for philanthropic purposes, in connection with their own organisations, upwards of £1,000,000 per annum. County or district associations exist for the purpose of upholding and extending evangelical religion, of promoting the spiritual intercommunion of the churches, strengthening their fraternal relations, facilitating co-operation in everything affecting their common interest, aiding weak churches, and carrying on mission work within their respective areas. The **Congregational Church Aid and Home Missionary Society**, founded 1819, works in co-operation with the county unions of England and Wales in aiding the weaker churches and sending the gospel into spiritually destitute places. Sec., Rev. J. Edward Flower, M.A., Memorial Hall, E.C. For foreign missions see **London Missionary Society**, p. 484.

Congregationalism is also a prominent form of church life in the **United States of America**, throughout the British dependencies, and in other parts of the world. Altogether it is estimated that there are 15,076 churches and stations, with a membership of 1,300,426, and 1,596,620 Sunday scholars.

The **Congregational Union of England and Wales** was formed in 1831, and reconstituted by a scheme adopted in 1904, which aimed at uniting Congregational churches more closely in regard to co-ordination of county unions with the Union, church aid, church extension, evangelisation, lay preaching, the securing of a common standard of admission to denominational privileges, and the safeguarding of Congregational trust property. Under the scheme the Union is a federation of those Congregational churches only that are associated with a county union, and consists of an Assembly, a Council and a Chairman. The Assembly includes all ministers and representatives of all qualified churches, with all the members of the Council. The Council consists of about 325 members elected by the county unions on a proportional basis, with committees created for departments of administration. The Council presents an annual report to the Assembly for confirmation. **Offices of the Union**, Memorial Hall, Farringdon Street, E.C. **Chairman** for 1907, Mr. J. Compton Rickett, D.L., M.P.; **Secretary**, Rev. R. J. Wells; **Chief Clerk**, Mr. C. Stancliff.

**London Congregational Union.** Formed March 1873. Embraces the area known as Greater London. About £2000 is expended annually in aiding churches to support their ministers and in extending and consolidating mission work. The Council consists of sixty members, thirty ministerial and thirty non-ministerial, elected by the Districts; and not more than twenty co-opted by the Council, together with the Chairman, ex-Chairmen, vice-Chairman, Treasurers, and Secretary. Each District Committee is entitled to nominate for the Council in the proportion of one member for every seven affiliated churches in the district. **Secretaries,** Rev. A. Mearns and Rev. R. J. Evans, M.A. **Offices,** Memorial Hall, Farringdon Street, E.C.

**Mansfield College, Oxford,** was established for the education of men for the Nonconformist ministry, but its classes are open to all persons possessed of the requisite academic qualifications. It is purely theological, and its students must, before entering on its distinctive studies, be graduates of some recognised university. It has two kinds of Scholarships: (1) Arts, value £60 a year, tenable by undergraduates, at any of the older colleges in Oxford. The men who hold these are scholars, but not students, of the College. They become the latter only after they have taken their degree. (2) Theological, value £60 a year, with tuition free, tenable during the course at Mansfield, which extends over three years. These can be held only by graduates in honours who have distinguished themselves in the entrance examination. The College buildings were opened Oct. 15th, '89. As to "Mansfield House," see UNIVERSITY AND OTHER SETTLEMENTS. **Principal,** Rev. A. M. Fairbairn, D.D.; **Professors,** Revs. J. V. Bartlet, M.A., D.D., G. B. Gray, M.A., D.D., and Mr. A. Souter, M.A., D.Litt.; **Tutors,** Revs. G. W. Thatcher, M.A., B.D., F. Lenwood, M.A., and T. M. Watt, M.A.; **Bursar,** Rev. N. H. Smith, M.A.

#### COUNTESS OF HUNTINGDON'S CONNEXION.

The Countess of Huntingdon (d. 1791) had been a member of the Established Church, but finding that the parochial system interfered with her intense desire to have the gospel preached in every place in England, she cast in her lot with the Nonconformists. The liturgy formed part of the religious worship in her chapels, and it is still used in some of them. During life her control was absolute. At her decease her work devolved on her devisees and their successors, who as trustees carried it on under two trust deeds dated 1807 and 1831 until Jan. 1st, 1899, when the present **Trust Deed**, sanctioned by the Court of Chancery, came into operation. This deed curtailed the absolute power of the Trustees in favour of a limited control by the congregations. At the present time the Trust comprises 44 churches and mission stations, superintended by 29 ordained pastors, with 2386 communicants. The funds raised by these churches for Church purposes in 1905 amounted to £8444. The endowment of the Trust produces about £1500 a year. There are many churches with similar Trusts, but outside the control of the central Trust. All ministers of the Connexion have to subscribe to the "Fifteen Doctrinal Articles" of the Connexion, as do the professors of Cheshunt College and the students, with a view of carrying out the Countess's idea—the continuance of an earnest evangelical ministry.

**Secretary,** Mr. E. Dolby Shelton, 38, Eldon Street House, London, E.C.

**Cheshunt College** is now established at Cambridge, and applications for entrance and for preaching supplies should be made to the Resident Tutor, Cheshunt House, Cambridge. Office of the College, 36, Memorial Hall, Farringdon Street, E.C.

#### FREE CHURCH OF ENGLAND.

A Protestant episcopal organisation, originated in 1844 (enrolled in Chancery 1863) as a counter-acting movement to the Oxford Tractarianism. Being free from State control, the Free Church claims the liberty to enter a parish where ritualistic practices prevail, and establish a liturgical service on the basis of the Evangelical party in the National Church, with which section it is in ritual practically identical. It is governed by Convocation and bishops, consecrated in the line of the Canterbury succession by the Rt. Rev. Bishop Cummins, of the American Protestant Episcopal Church, whose bishops were consecrated at Lambeth Palace 1877. The churches, although not numerous, are widely spread. **Convocation** held yearly (June). There is a Church Extension Fund, of which the Sec. is the Rev. T. S. Shafe, 20, Frinton Road, Stamford Hill, London, N.

**Bishop Primus,** Bishop Troughton, 13, Calton Terrace, Morecambe.

**Southern Diocesan Bishop,** Bishop Brook Lander, Christ Church House, Teddington.

**Registrar,** E. M. Dence, Esq., Fairhaven, Park Road, Teddington.

**Secretaries:** General, Rev. J. W. Hodgkinson, 227, Onslow Drive, Dennistoun, Glasgow; Finance, Joseph Calvert, Esq., 189, Manchester Road, Hollinwood, Lancs. **Missionary,** Rev. George Slater, Exeter. **S. Division,** Rev. W. E. Lewis, St. Thomas' Lodge, Evington Road, Leicester. **N. Division,** Rev. F. M. Chetwynd, M.A., Tollington, Bury, Lancs.

#### REFORMED EPISCOPAL CHURCH.

This Church was organised in the City of New York, in the year 1873, as a protest against the sacerdotal ritualism and exclusiveness manifested in the old Protestant Episcopal Church of America. Its first bishop was the Right Rev. George David Cummins, D.D., Assistant Bishop of Kentucky, through whom the episcopal succession from the See of Canterbury has been handed down to the new Church. The movement was introduced into England in '77, and organised as an independent General Synod, with the right of self-government, in '78. The Church is governed by the said General Synod, which at present meets annually, and consists of all the bishops and presbyters, together with two lay representatives, or synodsmen, from each organised congregation. The officers of the Synod are, the President, who is also Presiding Bishop, Registrar, Treasurer, and Secretary, and various standing committees. The Book of Common Prayer, revised, is used in public worship, and the laws and customs of the Church of England as evangelically understood, are generally observed. The Church is intended to afford refuge to distressed churchpeople in ritualistic parishes, or where an evangelical church service does not exist. There are some twenty organised congregations in different parts of England, while in America and Canada the churches are numerous. Presiding Bishop is

Great Britain, Right Rev. Philip X. Eldridge, D.D., Upper Tooting, S.W. General Secretary, Rev. T. Heath, Christ Church Parsonage, Hemel Hempstead, Herts.

### THE MORAVIAN CHURCH.

The Moravian Church is a body of Christians formed from among the followers of *Hus*; organised in 1457 as the "*Unitas Fratrum*," or "*The Unity of the Brethren*"; repressed in the beginning of the Thirty Years' War, 1621. Descendants of the Church survived in Moravia, and settled in 1722 at *Herrnhut* in Saxony, on the estate of Count Zinzendorf. In 1735, the Orders of the Moravian Church were resumed. It spread into Holland, Denmark, England, and America; developed extensive mission work to the heathen, and engaged in wide educational activity at home and abroad. The Church is composed of three "provinces," Germany, England, and America, each independent within its own sphere, and all constituting "*The Unity of the Brethren*." In constitution, ritual, and doctrine, the Church is one; foreign missions, leper mission at Jerusalem, mission in Bohemia and Moravia, are the joint responsibility of all. The orders of the ministry are those of Bishops, Presbyters, and Deacons. No formal creed is imposed as a test of faith, but the ancient motto of the Church is preserved: "*In essentials unity, in non-essentials liberty, in all things charity*." Elected General Synods held every ten years, representative of all the provinces and foreign missions. Governing Board of the Unity elected at these synods. Each province appoints its own executive at its provincial synods. See "*A Short History of the Moravian Church*," by J. E. Hutton, M.A. (price 2s. 10d., post free). Total constituency in 1906, including the so-called "*Diaspora*" on the continent of Europe, about 210,000. Pupils in day-schools and boarding-schools about 29,000; in Sunday-schools nearly 39,000. In the United Kingdom there are 52 ministers, and 43 congregations, 6230 church members, 5176 Sunday scholars, and 602 Sunday-school teachers. The Episcopacy is represented by Bishops Hassé (London), Sutcliffe (Yorkshire), and Ellis (Derby). The Directing Board for the United Kingdom meets in London. President, Bishop Hassé, 32, Fetter Lane, London, E.C.

### THE SOCIETY OF FRIENDS.

The Society of Friends, commonly called Quakers, was founded in the middle of the 17th century by George Fox. "Friends" are distinguished from other Christian bodies by the special stress they lay on the immediate teaching and guidance of the Holy Spirit, and their belief that no one should be paid or appointed by human authority for the exercise of the gift of the ministry. In obedience to this belief they hold their meetings without any prearranged service or sermon, and sometimes in total silence. The Friends believe that the sacraments of Baptism and the Lord's Supper are to be taken spiritually, and not in an outward form. Their protests against the use of oaths and against the exaction of tithes and church rates cost them much suffering and frequent imprisonment during the first fifty years of their existence. The simple form of dress maintained by Friends for two hundred years had, in the first half of the 19th century, become a matter of

very grave importance. It has, however, now been generally given up, as have the "testimony" against music and singing in its rigid application, and the peculiarities of speech, such as the use of "thee" and "thou" instead of "you" (though many Friends still retain this custom amongst themselves), and the avoidance of all flattering titles. Of late years there has been a very decided evangelical movement among Friends, under the influence of which the old quietism is dying out. As a result of this change the influence of the Society beyond its own borders, through home and foreign missions and adult First Day (Sunday) Schools, has developed to a remarkable extent. In this country Friends have recently been increasing in numbers. The latest statistics of the Society (1905) are as follows: meetings in Great Britain and Australia, 384; members, 18,466; meetings in Ireland, 37; members, 2528. Total membership, 20,994. "Recorded Ministers" in Great Britain, 388; in Ireland, 36. Attenders of meetings in Great Britain, Australia, and Ireland not in membership, and of associates, 9113; First-Day scholars — Adults, 46,996; Juniors, 24,895. There are probably about 93,000 in the United States and Canada, besides small numbers in other countries. There is also in America a numerous body of Friends called "*Hicksites*" (from their founder, Elias Hicks), who about seventy years ago separated from the orthodox community, and hold latitudinarian views. The Wilburite section are conspicuous in Pennsylvania by their adherence to the old-fashioned dress and the "plain language." Large numbers of persons who do not appear in the statistical returns attend the Mission meetings of the Society of Friends, and very large numbers come under the influence of their missionaries (about 130 in number) in the foreign mission field. Secretary of the Society in Great Britain, Isaac Sharp. Headquarters in Great Britain: Devonshire House, 12, Bishopsgate Without, London, E.C.; in Ireland, 6, Eustace Street, Dublin.

### THE SALVATION ARMY.

The Salvation Army is a home and foreign missionary society with a semi-military organisation, having its General, Chief of the staff, commissioners, colonels, brigadiers, majors, and other officers, both commissioned and non-commissioned, with large contingents of soldiers, after the model of the British army, scattered throughout the world. Originated in the year 1865 by the Rev. William Booth, previously a Methodist minister, the movement was called the Christian Mission until, in '78, the present name was adopted. Its objects are to reach, by means of adaptation, the great masses of the people, both at home and abroad, who are either too degraded or too indifferent to be reached by ordinary religious agencies. Its own supported and separated officers now number 16,522, and these proclaim the gospel in no less than 30 different languages and dialects. There are also 44,489 voluntary officials specially selected and appointed to take definite work, in addition to 18,739 bandmen. The Army publishes in the several countries, in the vernacular, 66 illustrated newspapers and magazines, with a total annual circulation of about 52,000,000, the sale of which is mostly entrusted to its own members. The above summary conveys a brief idea of one side of the Army's

work. The statements of accounts for the year ended Sept. 30th, 1905, referring to moneys received at and expended through the International Headquarters only, showed receipts of £51,616 on the General Account; of £8,817 on the Foreign Service General Fund; of £55,654 on the Foreign and Colonial Territories Fund; of £61,102 on the Rents and Interest Account; and of £89,578 on the Self-denial Fund. Another side is the Darkest England Social Scheme formulated by General Booth, which has for its object the immediate alleviation of the present misery of the outcast poor and their actual rescue from destitution, keeping always prominently in view likewise that reformation in character which, undoubtedly, is the true secret of permanent improvement. In this branch of the work the Salvation Army goes to the slums, and ministers to the workless, the homeless, the tramps, the starving, the waifs and stray children of the streets; and amongst the outcasts of society in every land, irrespective of creed or colour. For the accommodation of these this department has, in different parts of the world, 736 shelters, homes, labour factories, and other institutions in full operation, under the guidance of 2083 officers, men and women. The statement of accounts relating to the Darkest England scheme for the year ended Sept. 30th, 1905, showed receipts as follows:—Central Fund, £86,172; Farm Colony, £53,740; and the City Colonies, £158,556. The International Headquarters are at 101, Queen Victoria Street, London, E.C. The Training Homes are in Clapton, N.E. The International Trading and Publishing Headquarters and Book Room are at 79-81, Fortress Road, Kentish Town, N.W.; Printing Works at St. Albans. The offices of the Men's City Colony of the Social Scheme are at 20 and 22, Whitechapel Road, E. The Headquarters for Women's Social Work are at 259, Mare Street, Hackney, London, N.E. The British Farm Colony is at Hadleigh-on-Thames, Essex.

#### THE UNITARIAN ASSOCIATION.

Unitarians is the name commonly given to Christians who do not accept the doctrine of the Trinity, the Deity of Christ, the infallibility of the Bible, and other "orthodox" doctrines. Congregations and mission stations number 284 in England, 35 in Wales, 7 in Scotland, and 39 in Ireland, making 365 in all. The number of ministers is 362; number of Sunday-schools 327. The British and Foreign Unitarian Association is not directly representative of the churches, but consists of independent subscribers desirous of promoting "the principles of Unitarian Christianity." The writings of Dr. W. E. Channing, Theodore Parker, Dr. James Martineau, and others, have made Unitarian thought familiar to many outside the limits of the denomination. The only technically Unitarian College is the Unitarian Home Missionary College in Manchester. At Manchester College (*q.v.*), Oxford, many leading Unitarian ministers are trained. A Conference of non-subscribing congregations, which consists of Unitarians, is held triennially. An International Council of Unitarian and other Liberal Religious Thinkers and Workers, attended by representatives from Europe, America, Australia, India, and Japan, was held in London in 1901, Amsterdam in 1903, and Geneva in 1905; it will hold its next meeting at Boston, U.S.A., in September 1907. The

Unitarian congregations of the United States number 350; of these 232 are in New England, many of them being old Puritan foundations. The *Inquirer* and the *Christian Life* are both Unitarian weekly newspapers.

Office and Book Rooms of the Unitarian Association, Essex Hall, Essex Street, Strand, W.C. Secretary, Rev. W. Copeland Bowie; Treasurer, Mr. Oswald Nettlefold.

The Sunday School Association, founded in 1833, exists in connection with the Unitarian and Free Christian Churches. Its objects are the publication of suitable books for Sunday schools, and the promotion generally of Sunday-school education. Hon. Secretary, Mr. Ion Pritchard; Business Manager, Mr. B. C. Hare. Office, Essex Hall, Essex Street, Strand, W.C.

#### NEW CHURCH (SWEDENBORGIAN).

The members of the New Church are commonly called "Swedenborgians," because they accept the system of Scriptural interpretation contained in the writings of Emanuel Swedenborg (b. 1688; d. 1772), by whose instrumentality they believe the Lord has effected His Second Coming by unfolding the internal or spiritual sense of the Divine Word. The doctrines of this sense, together with the science of correspondences—which constitutes the key by which that sense may be unlocked—are set forth in Swedenborg's theological writings. The fundamental doctrines taught are, that the Lord Jesus Christ, in His glorified humanity, is the only God of heaven and earth, and that in Him is the Trinity of Father, Son and Holy Spirit, answering to the trinity in man of soul, body, and their operation together; and that in order to be saved it is necessary to believe in Him, and to keep the commandments by shunning the evils therein forbidden, as sins against Him. Swedenborg's writings were first extensively made known in this country by a clergyman of the Church of England, the Rev. John Clowes, rector of St. John's, Manchester, who translated a great number of them, including his greatest work, the "*Arcana Cœlestia*" (13 vols.). Another clergyman, the Rev. William Hill, translated the work second only in importance to it, the "*Apocalypse Explained*" (6 vols.). The Rev. Thomas Hartley, rector of Winwick, translated "*Heaven and Hell*." Very early, some drawn from the ranks of the Methodist preachers and other students of Swedenborg, formed a separate organisation for worship (1788), which has continued and increased. There are existing 79 societies, with 6737 registered members and 1100 junior members. They have Sunday-schools with 8318 children, and 671 teachers. There are 10 societies in London and its neighbourhood. The statistics, however, fail to tell the number of their adherents, who have always consisted of separatists and non-separatists—the latter sometimes from their isolation, but sometimes from principle, worshipping in the Established Church or with some of the other religious bodies. In America the number of the societies of the New Church is much greater; and in every foreign country, both in Europe and elsewhere, they possess zealous, if not numerous, adherents. The body in Great Britain is governed by a Conference, which meets annually, and consists of all the ministers and of from one to three representatives

from each society, according to the number of its members. The Swedenborg Society was founded in 1810 for translating, printing and circulating Swedenborg's works, which may be had in seventeen languages. The Church also possesses its own Orphanage, its College for training candidates for the ministry, its National Missionary Institution, Missionary Ministry Fund, and other associations formed to forward its propaganda. Office, 1, Bloomsbury Street, London, W.C.

### THE PECULIAR PEOPLE.

This body of Christians was founded, in 1838, by James Banyard, a native of Rochford, Essex, and a Methodist local preacher. One of the tenets of the Society is that "the Church and the Elders are the most suitable persons for God to heal the sick by, and Sisters in cases of childbirth." The Society hold that

God "can and does heal diseases, in answer to the prayer of faith, without the aid of doctors or physic." The religion of the Peculiar People regulates dress and other matters which are considered of indifference by the great majority of Christians. The title "Peculiar People" is self-chosen, and was suggested by such texts as, "The Lord hath chosen thee to be a peculiar people unto Himself" (Deut. xiv. 2). The government of the body is conducted by a committee, consisting of district representatives, three of whom are Bishops, viz., Bishops Heddle, Benton, and Chignell, and a council comprising elders from the churches. The bishops, elders, and deacons receive no salary or pay. At public worship the women sit on one side of the preacher and the men on the other. The denomination is strong in South Essex, and in some parts of Kent. Chairman, Bishop Heddle, Redland, Victoria Avenue, Southend.

### ROMAN CATHOLIC CHURCH.

The Roman Catholic Church is the name of that community of Christians who profess the same faith, partake of the same sacraments and sacrifice, and are united under one head, the Pope or Bishop of Rome and successor of St. Peter, and under the bishops subject to him. Its essential parts are the Pope, bishops, pastors—so far as they are priests—and laity. A distinctive characteristic of the Roman Catholic Church is the supremacy of the Papacy. Its doctrines, like those of the rest of Christendom, are chiefly found in the articles of the Nicene Creed. After the Council of Trent Pope Pius IV. added to the formal Profession of Faith the articles on transubstantiation, invocation of saints, and others which chiefly distinguish the Roman from other Christian communities. The Immaculate Conception of the Virgin Mary and Papal Infallibility were defined as articles of faith in 1854 and '70 respectively. One great and central object of faith and worship is the Mass, which is the mystical sacrifice of the body and blood of Christ, instituted by Himself at the Last Supper, and is essentially the same as the Sacrifice of the Cross. Scripture and tradition are appealed to in support of this and other doctrines—as the Seven Sacraments, the honour due to the Blessed Virgin, Purgatory, Invocation of Angels and Saints, etc. There is a great distinction between what is of doctrine and what of discipline; the former belonging to the deposit of faith taught by Christ and the Apostles, which is invariable, whilst the latter, founded on the decisions and canons of councils and the decrees of popes, is the Church's external policy as to government, and may vary according to times and circumstances.

The Sacred College of Cardinals—70 in number, after the 70 disciples—are the supreme council or senate of the Church and the advisers of the sovereign pontiff, and at the death of a pope they elect his successor. They are also the chief members of the Sacred Congregations, or permanent ecclesiastical commissions (about twenty in number), to which much of the business of the Holy See is entrusted. Among the best known of these congregations are the Propaganda, the Index, the Inquisition or Holy Office, and the Congregation of Rites. The

number of cardinals is hardly ever complete; in October 1906 there were 57. There are 10 patriarchates with 14 patriarchal sees, and 201 archiepiscopal and 798 episcopal *residential* sees. Besides these, there are 531 *titular* sees, most of which are assigned to archbishops and bishops appointed, either to apostolic delegations, vicariates, or prefectures, or to the office of coadjutor, auxiliary, or administrator of a diocese; and of these *titular* sees, 141 were last year vacant. There are also 10 apostolic delegations, 133 vicariates-apostolic, and 58 prefectures-apostolic. See PIUS X. for a biography of the present Pontiff; and BOURNE, MOST REV. FRANCIS, for a biography of the Archbishop of Westminster.

### Statistics.

The total number of Roman Catholics throughout the world, ruled by about 1200 archbishops and bishops, is estimated at 264,500,000. There are in Great Britain and Ireland about 5,750,000 (*i.e.*, about 3,300,000 in Ireland, and the remainder in Great Britain); and in the whole of Europe about 177,000,000. Ireland is divided into 4 ecclesiastical provinces, subdivided into 27 dioceses, ruled by 4 archbishops and 23 bishops (*v. infra*). The number of priests in Ireland was last year 3613, serving 2418 parochial and district churches, situated in 1103 parishes. The 26 archbishops and bishops of Great Britain (*v. infra*) consist of: 1st, for England and Wales, 1 archbishop (of Westminster), with 15 suffragans, 4 auxiliaries and 1 coadjutor; 2ndly, for Scotland, 2 archbishops (of St. Andrews and Edinburgh, and of Glasgow), with 4 suffragans. The number of priests in England and Wales in 1906 was 3414, with 1640 churches, chapels, and stations; in Scotland 525, with 373 churches, chapels, and stations. The United States has about 12,700,000 Roman Catholics, 15 archbishops and 90 bishops, about 14,500 priests, about 11,800 churches and chapels, and 1,240,000 pupils in Catholic schools. In the British possessions of North America there are about 2,650,000 Roman Catholics, 39 archbishops and bishops, about 3800 priests, 2600 churches, chapels and stations. From

statistics like these, which can be approximated to in all the other parts of the world by the bishops presiding over the different dioceses or vicariates, and are published occasionally, may be inferred how complete is the organisation of this Church, and how vigorously she exercises the forces at her command for the extension of the Roman Catholic faith.

Westminster Cathedral, a vast edifice in the Byzantine style, of which the exterior is now nearly completed, was permanently opened for Divine service in December 1903. Much has been done to the interior during the past year; but many years must pass before its completion, for which large funds are needed. Internally, the length is 342 ft., the width across nave and aisles and side chapels 150 ft., the width of nave 60 ft., and the height 112 ft.

### Roman Catholic Bishops.

The following is a list of the bishops in the United Kingdom, with their respective sees:—

#### England and Wales.

##### Province of Westminster.

NAME.	DIocese.
Most Rev. Francis Bourne (Archbishop) . . . . .	Westminster.
Rt. Rev. P. Fenton (Auxil.) . . . . .	
" " W. A. Johnson (do.) . . . . .	Birmingham.
" " Edward Ilsey . . . . .	
" " George A. Burton . . . . .	Clifton.
" " Thos. W. Wilkinson . . . . .	Hexham and
" " R. Collins (Auxil.) . . . . .	Newcastle.
" " William Gordon . . . . .	Leeds.
" " J. R. Cowgill (Coadj.) . . . . .	
" " Thomas Whiteside . . . . .	Liverpool.
" " Richard Lacy . . . . .	Middlesbrough.
" " John C. Hedley . . . . .	Newport.
" " Arthur Riddell . . . . .	Northampton.
" " Robert Brindle . . . . .	Nottingham.
" " Charles Graham . . . . .	Plymouth.
" " John Baptist Cahill . . . . .	Portsmouth.
" " W. T. Cotter (Auxil.) . . . . .	
" " Louis C. Casartelli . . . . .	Salford.
" " Samuel W. Allen . . . . .	Shrewsbury.
" " Peter Amigo . . . . .	Southwark.
" " Francis Mostyn . . . . .	Menevia in Wales.

#### Scotland.\*

NAME.	DIocese.
Most Rev. James A. Smith (Archbishop) . . . . .	St. Andrews and Edinb.
Most Rev. John Maguire (Archbishop) . . . . .	
Rt. Rev. Æneas Chisholm . . . . .	Glasgow.
" " John Smith . . . . .	Aberdeen.
" " Angus MacFarlane . . . . .	Argyll and the Isles.
" " William Turner . . . . .	Dunkeld.
	Galloway.

\* The four Bishops of Scotland are suffragans to the Archbishop of St. Andrews and Edinburgh. The Abp. of Glasgow has no suffragans.

#### Ireland.

##### Province of Armagh.

NAME.	DIocese.
His Eminence Cardinal Logue (Abp.), Primate of all Ireland	{ Armagh. Ardagh & Clon- macnoise.
Rt. Rev. Joseph Hoare . . . . .	
" " Richard Owens . . . . .	Clogher.
" " John Keys O'Doherty . . . . .	Derry.
" " Henry Henry . . . . .	{ Down and Connor.
" " Henry O'Neill . . . . .	
(Vacant)	Dromore.
" " Laurence Gaughran . . . . .	Kilmore.
" " Patrick O'Donnell . . . . .	Meath. Raphoe.

##### Province of Dublin.

NAME.	DIocese.
Most Rev. W. J. Walsh (Arch- bishop), Primate of Ireland	{ Dublin.
Rt. Rev. N. Donnelly (Auxil.) . . . . .	
" " James Browne . . . . .	Ferns.
" " Patrick Foley . . . . .	{ Kildare and Leighlin.
" " Abraham Brownrigg . . . . .	
	Ossory.

##### Province of Cashel.

Most Rev. Thomas Fennelly (Archbishop) . . . . .	{ Cashel.
Rt. Rev. Robert Browne . . . . .	
" " Thomas O'Callaghan . . . . .	Cloyne.
" " John Mangan . . . . .	Cork.
" " Michael Fogarty . . . . .	{ Kerry and Aghadoe.
" " Edward O'Dwyer . . . . .	
" " Denis Kelly . . . . .	Killaloe.
" " Richard Sheehan . . . . .	Limerick.
	Ross.
	{ Waterford and Lismore.

##### Province of Tuam.

Most Rev. John Healy (Arch- bishop) . . . . .	{ Tuam.
Rt. Rev. John Lyster . . . . .	
" " Thomas O'Dea . . . . .	Achonry.
" " John Clancy . . . . .	Clonfert.
" " Francis MacCormack . . . . .	Elphin.
" " John Conmy . . . . .	{ Galway and Kilmacduagh.
	Killala.

### OLD CATHOLICISM.

Old Catholic is the name appropriated to, and in most cases by, those Roman Catholics who, at any time subsequent to the Reformation of the sixteenth century, while claiming still to hold the Faith, have separated themselves from the obedience of the Holy See. There are many variants upon this title of Old Catholic, the chief among them being those of "Independent Catholic Church," "National Catholic Church," etc., the idea in every case, in the beginning, having been to convey the impression that these bodies, dissenting from the Roman Church, were Catholic in the sense that Roman Catholic meant Catholic prior to the period of disruption, which, with the exception of that of the Old Catholic Church of Holland, dates from the Œcumenical Vatican Council of 1870.

The main and essential difference between these bodies and the Protestant dissenters of the Reformation era is that the Old Catholics have, up to the present, valued and preserved the Seven Sacraments and a valid and unquestioned episcopate, and have maintained unaltered the form and matter of the rite immemorially used by the Catholic Church to continue and maintain its succession of bishops and priests. An Old Catholic may, therefore, be defined as one who is Roman Catholic by explicit or implicit acceptance of the Faith, and Protestant by rejection of communion with and obedience to the Holy See. Of these Old Catholic movements, short notices are given below. No work of reference has yet made record of their progress, and these remarks are necessarily brief and incomplete.

Foremost, by reason of its age, is the **Old Catholic Church of Holland**, which originated with the propositions of one Jansenius, a deacon, which the Holy See pronounced heretical. The Old Catholic Church of Holland of the present day is a loyal, though unrecognised, daughter of the Holy See. In 1723, Cornelius Steenhoven, of Utrecht, was consecrated the first bishop by Monsignor Vorlet. From him the present Church of Holland derives its valid and unquestioned succession. The following is the present hierarchy: The Most Rev. Mgr. Gul., Archbishop of Utrecht; The Right Rev. the Bishop of Haarlem; The Right Rev. the Bishop of Deventer.

The **Old Catholic Church of Switzerland** has only one bishop at present, the Right Rev. Mgr. Edward Hertzog, bishop of Berne. There is also resident in Geneva an unattached bishop of undoubted orders, the Right Rev. Mgr. Jules Ferette, titular Bishop of Iona, consecrated by a late Patriarch of Antioch.

An Old Catholic movement in Italy is led by the Most Rev. Paul Miraglia, Archbishop of Piacenza, who received his episcopal character from the Most Rev. Joseph Renatus Vilatte, of the Old Catholic movement in the United States. Mgr. Miraglia has undergone two sentences of imprisonment for so-called political offences committed in the pulpit.

The **Old Catholic Church of France** is presided over by the Right Rev. Mgr. Julio Houssey, who derives his succession from the Most Rev. Paul Miraglia, Archbishop of Piacenza.

In **Germany** the Old Catholic Church is still in its infancy, the presiding prelate being the Right Rev. Mgr. Weber, of Bonn.

In **Great Britain** there have been several efforts to establish an Old Catholic movement. They have mostly originated from within the Church of England, the design on the part of the promoters generally being to secure for this body an undoubted and unquestioned character for its bishops and priests by a process of infiltration from outside valid sources. The first such effort was that made in the middle of the last century by the **Rev. E. W. Morgan**, sometime curate of Mapledurham, Oxon, who was consecrated to the episcopate by the Right Rev. Jules Ferette. The movement died resultless prior to 1878. The second effort was that of the **Order of Corporate Reunion**, founded by the late Rev. Thomas Wimberley Mossman, the late Rev. Frederick George Lee, and others, in 1877. This Order possessed a valid episcopal succession. It has been dead for nearly a quarter of a century, although its episcopal succession has not been allowed to lapse. Another effort is now on foot, waiting the opportunity to gather together into a useful whole the scattered items of each previous effort. Full particulars can be obtained from the Rev. Father Alaquenda, 8, New Square, Lincoln's Inn, London.

The **Old Catholic Church of the United States**, from the point of view of numbers, both of laity, clergy, and hierarchy, is by far the most important of the Old Catholic bodies at present in existence. It originated with the Most Rev. Joseph Renatus Vilatte, who received the gift of the episcopate from the Most Rev. Mgr. Alvarez Julius I., in the Cathedral of Our Lady of Good Death, Colombo, Ceylon, on May 29th, '92. From him have derived most of the bishops at present acting in the United States. The hierarchy consists of: The Most Rev. Joseph Renatus Vilatte; The Right Rev. Mgr. Kozlowski, Bishop of Chicago; The Right Rev. Mgr. Kaminski, Bishop of Buffalo; The Right Rev. Mgr. Hodour, Bishop of Scranton; and the Right Rev. John Tichy, Bishop of Cleveland.

The **Old Catholic Church of the Philippines**, of which body and of the derivation of the episcopal character of its presiding prelate, the Right Rev. Mgr. Alipay, little is known, is reported to possess a large following of priests and laity.

## MISSIONARY SOCIETIES.

The earliest missionary operations in modern times were carried on by the Jesuits in Japan, where great progress was made; but their work was overthrown, and the missionaries expelled before the sixteenth century. They also carried on operations in China and India. The **Society for the Propagation of the Gospel in Foreign Parts**, was established by Act of Parliament in 1647, and work commenced amongst the North American Indians. Frederick IV. of Denmark founded a mission on the coast of Coromandel in the beginning of the eighteenth century. The **Moravian Church** was the first to begin missionary operations in its corporate character by establishing mission stations at the Cape of Good Hope, in the West Indies, Labrador, Greenland, and in many other parts of the world. The **Baptist Missionary Society** was founded in 1792, the **London Missionary Society** in 1795, the **Church Missionary Society**

at the commencement of the last century, and the **Wesleyan-Methodist Missionary Society** in 1814. The following details are extracted from the last published reports of each society.

The **Church Missionary Society**, which celebrated its centenary in April '99, labours in West Africa, Eastern Equatorial Africa, Palestine, India, Egypt, Persia, Ceylon, the Mauritius, China, Japan, New Zealand, North-west America, and the North Pacific. The summary of the work shows the following results: Stations, 534; Missionaries, etc., including European, Eurasian, and native clergymen, female teachers, and native Christian unordained teachers, 9608; native adherents baptised, 311,802; catechumens, 27,496; native communicants, 90,107; schools, 2492; scholars, 134,757. **Mission House**, Salisbury Square, Fleet Street, London, E.C.

**The London Missionary Society** was established in 1795. It is now maintained chiefly by Congregationalists. Income received in year 1905-6, £196,665 (including £31,051 from mission stations). Mission operations carried on in China, India, Madagascar, South Africa, Central Africa, Polynesia and New Guinea. A general summary shows that the Society has 277 European missionaries and 7155 native agents; 83,906 Church members and 292,945 native adherents, while they conduct 2147 native schools, with 89,106 scholars. **Mission House**, 16, New Bridge Street, E.C. See Advt.

**Baptist Missionary Society.** Received on behalf of the Society during 1905-6, £88,657 15s. 9d. Operations are carried on in Bengal, Chittagong Hill Tracts, South Lushai Hills, Orissa and North India, Ceylon, China, Africa (on the Lower and Upper Congo), and in Brittany and Italy. The statistics for 1905-6 summarised, excluding Jamaica and the West Indies, now independent of the Society, show the following results: missionaries, 152; missionaries' wives and lady helpers, 124; stations and sub-stations, 907; evangelists, 510; baptised, 1778; number of members, 17,269; day-school teachers, 1347; Sabbath-school teachers, 811; day-scholars, 21,207; Sabbath-scholars, 12,322. **Mission House**, 19, Fournival Street, Holborn, E.C. **General Secretary**, Rev. C. E. Wilson, B.A.; **Home Secretary**, Rev. J. B. Myers. See Advt.

**Moravian Missions, London Association in Aid of the.** Established 1817. There are over 212 stations. The annual expenditure is about £85,000, of which nearly two-thirds is raised in the Foreign field. The converts number over 100,000; day schools 266, with 25,000 scholars; 123 Sunday schools, with 18,000 scholars. **Secretary**, Rev. W. Wetton Cox. **Office**, 7, New Court, Lincoln's Inn, W.C. See Advt.

**Presbyterian Church of England Foreign Missions.** Founded 1847. Total income, 1905 (including £3700 raised on the mission field), £31,569; expenditure, £35,601. Operations are carried on in China, Formosa, Singapore, at Rampore Boalia, and Naugdon in Bengal, and (a mission to the Jews) at Aleppo, in Syria. (Jewish Mission: income £2031, expenditure £2023, not included in Foreign Mission figures.) Forty-eight European missionaries are engaged, of whom 15 are medical and 4 are lay teachers. There are also 33 lady missionaries, including 4 fully qualified lady doctors, besides 40 native pastors, 333 native evangelists and teachers, and 345 native students in colleges and hospitals. There were 9573 communicants at the end of 1905, being an increase of 568 during the year; and there were 5088 baptised children. **Secretary**, Rev. Wm. Dale, 7, East India Avenue, E.C.

**Primitive Methodist Missionary Society.** The total receipts of this Society for the year ending

Mar. 31st, 1906, were as follows: General Fund, £17,942 15s. 4d.; African Fund, £9614 16s. 10d.; making a total of £27,557 12s. 2d. **Secretary**, Rev. Jas. Pickett, 18, Ridge Road, Hornsey, N.

The "S.P.G." (Society for Propagation of the Gospel in Foreign Parts) is the oldest Missionary Society connected with the Church of England, being incorporated by royal charter in 1701. On the Society's list there are 788 ordained missionaries, including 10 bishops; and of these 262 are labouring in Asia, 245 in Africa, 36 in Australasia and the Pacific, 151 in North America, 62 in the West Indies and South America, and 32 (chaplains) in Europe—the number of languages in which the Gospel is preached being 54. In the Society's colleges there are about 3200 students; and 3000 lay teachers are employed in the various Missions; 40,000 children are receiving instruction in the Mission schools in Asia and Africa. The income for 1905 was £101,957. **Office**, 19, Delahay St., Westminster. **Secretary**, Right Rev. H. H. Montgomery, D.D.

**Universities' Mission to Central Africa.** Founded by David Livingstone, and commenced in 1861 by Bishop Mackenzie; now consists of 118 English members and 306 trained native teachers. There are four chief centres of work—at Zanzibar, Usambara, Rovuma, and on Lake Nyasa. **Office**, 9, Dartmouth Street, Westminster.

**Wesleyan Methodist Missionary Society.** The total sum received in 1905 from the Home districts amounted to £114,116 14s. 8d., Ireland £3752 16s. 10d., Foreign districts £16,214 5s. 7d., Mission House receipts £3505 15s. 1d., and miscellaneous receipts £32,523 12s. 3d., together making a total of £171,663 4s. 5d. The expenditure, including adverse balances from previous years, was £182,232 1s. 2d., to which add £5082 6s. reserved, making a total of £187,314 7s. 2d., leaving a deficiency on current account of £15,651 2s. 9d. at the close of 1905. The Foreign Missions of the Society fall under three heads: (1) Missions originated by the Society, but now entirely independent and under the direction of Colonial Conferences, in Canada, Australia, New Zealand, and the South Sea Islands; (2) Missions now under the immediate direction of local Conferences, but still aided by the Society, in Ireland, France, and South Africa; (3) Missions still under the immediate direction of the British Conference, in Europe, Ceylon, India, China, South and West Africa, and the Western Hemisphere. The summary of the year (not including affiliated Conferences) gives the following results: Circuits, 387; chapels and preaching-places, 3373; missionaries, 569; other paid agents, 4399; unpaid agents, 10,399; full Church members, 104,397; on trial for Church membership, 24,905; scholars, 145,303. **Centenary Hall**, 17, Bishopsgate St., Within, E.C.

## RELIGIOUS INSTITUTIONS AND SOCIETIES.

**Additional Curates Society.** Established 1837. Helps to maintain more than 1300 missionary clergy in poor and populous parishes in England and Wales. No party considerations influence the appropriation of the grants, in order to maintain which a sum of over £40,000 in voluntary contributions is needed each year. Expenditure, 1905, £58,043. **Secretary**, Rev. Canon Petit, M.A., 39, Victoria Street, Westminster.

**Church Army.** A working man's Church mission to working men, founded in 1882, directed by a committee acting under the Council, amongst whom are the archbishops and bishops. There are upwards of 800 trained workers, men and women, constantly at work throughout the Metropolis and the provinces. Officers and branches in India, Australia, United States, Canada, and West Indies. A sum of £250,000 is required annually. Nearly

the whole of the headquarters staff are honorary workers. The **Evangelistic Department** (Hon. Sec., Edward Clifford, Esq.) selects and trains working-men and working-women for spiritual work among the masses. There are 67 mission and colportage vans working all the year round in different dioceses. Church societies and parishes are furnished with trained evangelists and mission nurses. Suitable candidates are trained free. **Evangelists' Training Home**, 59, Bryanston Street, W.; **Publication Department**, 14, Edgware Road; **Mission Nurses' Training Home**, 61, Bryanston Street, W.; **Printing Works**, Oxford; **Training Home Mission Hall**, Cumberland Mews, W.; **Church Army West-end Church**, Upper Berkeley Street, W. The **Social Department** (Hon. Sec. Colin F. Campbell, Esq.) tries to raise the hopeless outcasts of society by labour, rescue, and lodging-homes, of which there are nearly a hundred and twenty in London and the provinces; by the **Emigration Test Farms** at Newdigate, Surrey, and Hempstead, Essex, and by emigration. **Headquarters**, 55, Bryanston Street, London, W.; **Hon. Chief Secretary**, Prebendary Carlile; **Hon. Treasurers**, W. F. Hamilton, Esq., K.C., and Lord Chylesmore. About 400,000 cases of men, women, and boys were dealt with in 1905; over 58 per cent. of all received turned out well. There are **Boys' Homes**, **Girls' Homes**, **First Offenders' Homes**, and **Inebriate Homes**. The Society is certified and registered by the Home Office as a **Discharged Prisoners' Aid Society** for the Convict Prisons. The **Houseless Poor Society** (founded in 1819) is now carried on by the Church Army, which also conducts "The King's Labour Tents" and "The Queen's Labour Depôts."

**Church Association, The.** Instituted in 1865, to maintain the principles and doctrines established at the Reformation, and to preserve the purity of Protestant worship in the Church of England; to resist all innovations in the order of the service as prescribed by the joint authority of the Church and State, all attempts to restore the use of the confessional, and every exercise of that priestly authority which was put down at the Reformation. The Association has formed a Protestant electoral organisation in more than half the Parliamentary boroughs and divisions in England. **Organ**, *The Church Intelligencer*. **Chairman**, Capt. Cobham; **Secretary**, Henry Miller. **Offices**, 13 and 14, Buckingham Street, Strand.

**Church Committee for Church Defence and Church Instruction** (£7262), T. Martin Tilby, Office, Church House, Dean's Yard, Westminster, S.W.

**Church Emigration Society.** Founded 1886. Besides promoting wise emigration, the Society introduces emigrants by means of commendatory letters to the Colonial clergy, and assists needy Church of England emigrants. **Hon. Sec.**, Miss Mary K. Grimes, Church House, Westminster.

**Church of England Soldiers' and Sailors' Institutes**, Church House, Westminster. **Sec.**, Col. E. Hughes, C.B., C.M.G.

**Church of England Sunday-School Institute** (founded 1843). There are 414 branch or local Sunday-school Associations. The Institute conducts a yearly examination of Sunday-school teachers in England and Wales, Scotland, Ireland, and the Colonies, and awards certificates of various grades and prizes to the successful candidates. **Secretary**, Rev. H.

Dawson, M.A.; **Offices**, 13, Serjeants' Inn, Fleet Street, E.C.

**Church House.** Originated early in '86. On Feb. 23rd, '88, a charter of incorporation was granted. There are spacious halls for the meetings of both Houses of Convocation, twelve rooms used as offices for Church Societies, and a great hall, capable of accommodating 1350 persons, which was opened Feb. 11th, '96. The west block contains the **Henry Hoare Memorial Hall** (House of Laymen) and twenty-nine other rooms available for offices and committee-rooms. The work of the Corporation is conducted at 9, 10, and 11, Dean's Yard. Here there are reading-rooms, library, writing-room, committee-rooms, offices, etc., for the use of members. **Membership** of the Corporation (open to all members of the Church of England) may be obtained by the annual subscription of one guinea. Life membership, £10 10s. **Secretary**, Mr. Sydney W. Flamank, Dean's Yard, Westminster, S.W.

**Church Lads' Brigade, The.** Founded in 1891, in order to promote a spirit of discipline and respect among the elder lads of a parish. It combines strict discipline with systematic religious education. **Secretary's address**, 13, Craven Street, Charing Cross, London, W.C.

**Churchmen's Union.** Founded '98, to maintain the right and duty of the Church to restate her belief from time to time as required by the progressive revelation of the Holy Spirit; to uphold the historic comprehensiveness and corporate life of the Church of England; to work for such changes in the formularies and practices of the Church of England as from time to time are made necessary by the needs and knowledge of the day, and to encourage friendly relations between the Church of England and all other Christian bodies. The membership embraces most of the Broad Churchmen within the Anglican Communion. **Organising Secretary**, Rev. W. Manning, M.A., S. Andrew's Vicarage, Leytonstone.

**Church Reform League.** Established '95. Its foundation principle is that Church reform should be carried out by the Church herself through her own assemblies. **General Sec.**, Alfred Holdsworth, Esq. **Office**, Church House, Dean's Yard, Westminster.

**Dissenting Deputies, The**, are laymen, and represent Churches—Presbyterian, Independent, or Baptist, in or near London—by whom they are elected. This body came into existence in Nov. 1732, in connection with the Test and Corporation Acts, and still exists to protect the rights of Dissenters. It had not the privilege of access to the throne, but under recent arrangements shares the privileges of of the "Three Denominations." **Vice-Chairman**, Alderman Evan Spicer, J.P.; **Sec.** Mr. A. J. Shephard, 6, Finsbury Circus, E.C.

**English Church Union.** Formed in 1859, after the Protestant riots at St. George's-in-the-East, for the purpose of uniting clergy and laity "in defence of the doctrine and discipline of the Church of England, and of the rights and liberties of her faithful children." Its members number 31 bishops, 4000 clergy and 34,000 lay communicants. Its main objects are to defend and maintain unimpaired the doctrine and discipline of the Church of England against Erastianism, Rationalism, and Puritanism, and to repel all

attacks on the Church's Marriage Law, and on religious education in elementary schools. The Union contends for the recognition of the Church's right to settle disputes concerning Spiritual questions in Courts of her own appointment. **Organ, *The Church Union Gazette*.** President, Visct. Halifax. Sec., H. W. Hill, Esq. **Offices, 35, Wellington Street, Strand.**

**Evangelical Alliance.** Founded 1845-6, to enable Evangelical Christians of different denominations, and of all countries, to manifest their true unity in the essential doctrines of the Gospel, for the defence of religious liberty and upholding of the Evangelical faith. A **Week of Universal Prayer** is observed in the early part of January each year throughout the whole world. **General Sec., H. Martyn Gooch. Office, 7, Adam Street, Strand, W.C.**

**Evangelical Continental Society.** Founded in 1845. Its object is to aid existing native Evangelical Churches and Missions in France, Belgium, Italy, Spain, Portugal, Russian Poland, Bohemia, Moravia, Hungary, and the city of Vienna; and it is the only Congregational Society at work on the Continent. **Sec., Rev. George H. Giddins. Offices: Memorial Hall, Farringdon Street, E.C.**

**Imperial Protestant Federation.** Founded in '96, by Mr. Walter Walsh, to federate Evangelical Protestant Churches and Societies within the British Empire. It is composed of 60 Protestant organisations. **Editorial Sec., Mr. Walter Walsh, F.R.Hist.S.; Organising Sec., Mr. James W. Walsh. Offices, Dudley House, 36-8, Southampton Street, Strand, London, W.C.**

**Metropolitan Free Church Federation.** Exists for the united action of Evangelical Free Churches on spiritual, moral, and social questions affecting Greater London. **President, Rev. George Hanson, D.D., M.A.; Treasurers, R.W. Perks, M.P., and E. Pascoe Williams, J.P.; Secretary, Rev. William Thomas. Office, 18A, Memorial Hall, Farringdon Street, E.C.**

**National Council of the Evangelical Free Churches.** Formed at the Fourth National Congress of the Evangelical Free Churches of England and Wales, held at Nottingham in March 1896. The denominations represented are Congregational, Baptist, Presbyterian, Methodist of all sections, the Society of Friends, the Free Episcopal Church of England, and various unattached Evangelical Missions. The constitution of the Council was settled at the Nottingham meeting in March '96, and the objects are stated as being: (1) To facilitate fraternal intercourse and co-operation among the Evangelical Free Churches; (2) To assist in the organisation of local Councils; (3) To encourage devotional fellowship and mutual counsel concerning the spiritual life and religious activities of the Churches; (4) To advocate the New Testament doctrine of the Church, and to defend the rights of the associated Churches; (5) To promote the application of the law of Christ in every relation of human life. The eleventh Annual Council was held at Birmingham in 1906, and about 900 councils and 50 district federations were there represented. The organs of the movement are the *Free Church Chronicle* and *The Free Churchman*, both published monthly, and the *Free Church Year-Book*, published annually, in April. **President, Rev. J. Scott Lidgett, M.A.; President-elect, Prof. J. Rendel Harris, M.A., D.Litt.; Treasurers, Mr. George Cadbury, Mr. R. W. Perks, M.P., Mr. J. Compton Rickett,**

**M.P.; Sec., Rev. Thomas Law. Office, Memorial Hall, Farringdon Street, London, E.C.**

**Protestant Reformation Society.** Established 1827. For the maintenance of the Religious Principles of the Reformation and of Church Missions to Roman Catholics in England. **Superintendent, Rev. Dr. C. H. H. Wright. Sec., Walter A. Limbrick, F.R.Hist.S. Offices, 57, Berners Street, London, W.**

**Queen Anne's Bounty** was established in 1704, to augment poor livings in the Church of England, and to assist the clergy, by loans on security of the revenues of benefices, to build, etc., residences and farmhouses, etc. The fund is managed by governors appointed by Royal Charter. Applications for grants can be made at any time, but no applications received after Feb. 1st can be considered during the current year. In 1905 the grants amounted to £27,212, in respect of 196 livings, and the benefactions received to £41,797. The capital fund, held by the Governors in money and stock for various benefices, amounted to upwards of £6,934,000. **Secretary and Treasurer, Mr. W. R. Le Fanu; Office, 3, Dean's Yard, Westminster.**

**Religious Tract Society,** instituted 1799, has for its object the circulation of religious books and treatises throughout the British dominions and foreign countries. It has published in 229 languages and dialects. The managing committee is elected annually, and consists of 4 ministers, 8 laymen, and 6 trustees, half the committee being Churchmen and half Nonconformists. **Offices, 56, Paternoster Row, E.C.**

**Simeon's Trust, The,** was founded early in the past century by Charles Simeon, incumbent of Holy Trinity, Cambridge, Fellow and Vice-Provost of King's, and a very prominent leader among the Evangelical Churchmen of that time, for the purpose of acquiring Church patronage and exercising it in favour of the Evangelical clergy. The Trust is still being administered, the present trustees being Canon Girdlestone; Prebendary Eardley-Wilmot, of St. Jude's, South Kensington; Prebendary Rogers, Rector of Walcot, Bath; Canon Wright, of Manchester; and Canon Barnes-Lawrence, of Blackheath. Simeon's Trustees have a number of livings in their gift, which include those of the parish churches of Bradford (Yorkshire), and Macclesfield; Bath Abbey; Walcot, Bath; and Holy Trinity, Tulse Hill. **Sec., Prebendary Eardley-Wilmot, St. Jude's, South Kensington.**

**Society for Promoting Christian Knowledge.** Founded in 1638. It is the Bible and Prayer Book Society of the Church; a Church of England Tract and Pure Literature Society; a Home Church Mission and Education Society; a Foreign and Colonial Missionary Society; and an Emigrants' Spiritual Aid Society. It maintains a training college for schoolmistresses at Tottenham, and a training college for lay workers in the East of London. It devotes a portion of its funds to **Medical Missions** and the training of medical missionaries, lay and clerical, in India and other parts of the world. Money and book grants, 1906, £41,797. **Secs., Revs. W. O. B. Allen, M.A., and E. McClure, M.A. Office, Northumberland Avenue, London, W.C.**

**Sons of the Clergy, Corporation of the.** Founded in 1655 to relieve distressed ministers ejected from their preferments during the

Rebellion; incorporated by Royal Charter 1678; assists necessitous clergymen, their widows and aged single daughters, and provides grants towards the education, apprenticeship and outfit of Clergy children. A donation of thirty guineas is the qualification of a Governor. Annual sum distributed about £25,000. Registrar, Sir Paget Bowman, Bart.; Office, Corporation House, Bloomsbury Place, London, W.C.

**Sunday School Union.** Founded in 1803. It aims at developing Sunday-school work in all its branches. It has a Teachers' Training College, with extension lectureships by expert educationists, and examinations both for teachers and scholars. It arranges library grants at reduced rates to Sunday-schools; gives aid to village schools; supports convalescent and holiday homes for Sunday scholars; supports 22 Sunday-school missionaries on the continent of Europe; and has two young people's missionaries in India. It issues varied literature for the Sunday-school. Its branches of work include the International Bible Reading Association, Boys' Life Brigades and Girls' Life Brigades, a young people's Home Missioner, the organisation of Primary Departments (i.e. among the infants and juniors), and the establishment of Sunday Institutes for senior scholars. *Organ, Sunday School Chronicle.* General Sec., Rev. Carey Bonner; Hon. Secs., W. H. Groser, B.Sc.,

Frank Clements, Jas. S. Crowther, and Thomas G. Ackland, F.I.A. Head Offices, 56, Old Bailey, E.C.; (Publishing and Retail Depts.), 57 and 59, Ludgate Hill, E.C.

**Three Denominations, The,** is the abbreviated designation of an association of Presbyterian, Independent, and Baptist ministers resident in or near London. The full title is "The General Body of Protestant Dissenting Ministers of the Three Denominations Resident in and about the Cities of London and Westminster." This association, which was first organised in 1727, enjoys the privilege of direct access to the throne and the kissing of hands. It is not a body which represents the Churches. It is composed solely of ministers, and admission must be through one or another of the three ministerial boards. The secretary is chosen triennially from each of the three bodies in succession, and the annual meeting is held at the Memorial Hall in March. *Chairman, 1906-7, Rev. Dr. David MacEwan; Sec., Rev. Alexander Jeffrey; Permanent Clerk, Mr. J. Minshull, Memorial Hall, E.C.*

**Young People's Society of Christian Endeavour.** Established in 1881 by the Rev. F. E. Clark, D.D., Portland, Maine, U.S.A. In 1905 there were 68,000 societies (8000 in the United Kingdom), with a membership of 3,750,000. Secretary, Rev. W. Knight Chaplin. Offices, 98, Hatton Garden, London, E.C.

## OTHER ORGANISATIONS.

### POSITIVISM.

The philosophical and religious system of Auguste Comte (1798-1857). The chief principles of the former side of the system are: (1) The classification of the sciences in hierarchical order, proceeding from the simpler to the more complex, as follows: mathematics, astronomy, physics, chemistry, biology, sociology, morals; and (2) The doctrine of the "three stages" through which the human mind has to pass in the investigation of phenomena: the theological or personifying, the metaphysical or abstract, and the positive or scientific. The religious side of Positivism consists in the *cultus* of Humanity considered as a corporate being in its past, present, and future. The "positive philosophy" is its theoretical or doctrinal basis, corresponding to the theology of the supernatural religions; but besides this it consists in a worship requiring for its full development an organised priesthood, temples, etc. Under the "life" or *régime* of positive religion Comte would include the political and social side of his system. The former involves the establishment of an international republic, consisting of the five great nations of Western Europe, which is ultimately destined to lead the whole world; the latter the reorganisation of society on the basis of a double direction—that of the temporal or material authority, and that of the spiritual or educating body. Positivism as a religion has achieved some success since Comte's death. In Paris it possesses a periodical, the *Revue Occidentale*, and Comte's apartments, at 10, Rue Monsieur le Prince, are kept as a place of meeting. Other groups exist in other cities of France, of the Continent, of America, both North and South, and in five or six cities in England. In London the principal places of meeting are Essex Hall, Essex Street, W.C.; and Chapel

Street, W.C. The *Positivist Review*, edited by S. H. Swinny, is issued monthly. Office of Positivist Society, 10, Clifford's Inn, E.C.

### CHRISTIAN SCIENCE.

Christian Science was founded by Mrs. Mary Baker Eddy, an American lady, in 1867. She affirms that her discovery of "the science of mind-healing" was a Divine revelation, though not in a mystical or supernatural sense. Her search therefor was prompted by her own recovery, in Feb. 1866, from an internal injury, the recovery having taken place, as she states, "in perfect scientific accord with Divine law." In '75, after much study and searching of the Scriptures, she published "*Science and Health with Key to the Scriptures*," which is the text-book of Christian Science, and which gives Mrs. Eddy's interpretation of the Bible. In it appears the following "brief exposition of the important points or religious tenets of Christian Science"—

1. As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal life.

2. We acknowledge and adore one supreme and infinite God;—we acknowledge His Son, one Christ; the Holy Ghost or divine Comforter; and man in His image and likeness.

3. We acknowledge God's forgiveness of sin in the destruction of sin, and the spiritual understanding that evil is unreal, hence not eternal. But the belief in sin is punished, so long as it lasts.

4. We acknowledge Jesus' atonement as the evidence of divine, efficacious Love, unfolding man's unity with God through Christ Jesus the Way-shower, and that man is saved through Christ, Truth, Life, and Love as demonstrated by the Galilean Prophet healing the sick and overcoming sin and death.

5. We acknowledge that the crucifixion of Jesus and His resurrection served to uplift faith and understanding to perceive eternal Life, even the allness of Spirit and the nothingness of matter.

6. And we solemnly promise to strive, watch and pray for that Mind to be in us which was also in Christ Jesus; to love one another; and to be meek, merciful, just, and pure."

The scientific element of the faith is indicated in the following passages from "Science and Health," by Mrs. Eddy: "The verity of Mind shows conclusively how it is that matter seemeth to be, but is not. Divine Science, rising above physical theories, excludes matter, resolves things into thoughts, and replaces the objects of material sense with spiritual ideas. . . . Christian Science sustains with immortal proof the impossibility of any material sense, and defines these so-called senses as mortal beliefs, whose testimony can neither be true of man nor of his Maker." It follows that disease and pain are merely "mortal beliefs," sensations without reality. In the practice of Christian Science, the understanding of the allness of immortal Truth or Spirit, which is God, leads to the disappearance of pain and disease.

Beginning with the first Christian Science organisation, formed at Boston in 1876, and made a church in '79, the movement has spread till, on August 1st, 1906, there were 691 Branch Churches, mostly in the United States, and 266 Societies. There are several churches in Canada, and churches also exist in London, Edinburgh, and Manchester, while services are held at Cambridge. There are several thousand Christian Scientists who give all their time exclusively to the practice of Christian Science. The number of full members of the First or Mother Church is 40,013, excluding those who merely attend the services. In Nov. 1902 Mrs. Eddy gave instructions that until public thought should become better acquainted with Christian Science, Christian Scientists should decline to doctor infectious and contagious diseases. A magazine, the *Christian Science Journal*, a weekly paper, *Christian Science Sentinel*, and *Der Herold der Christian Science*, are published by the Christian Science Publishing Society. Office of Publication Committee: Huntington Chambers, Boston, Mass., U.S.A.

### THEOSOPHY.

The chief agent in founding the Theosophical Society was Mme. H. P. Blavatsky, who, with Col. H. S. Olcott and others, established it in New York in 1875, the headquarters being in '79 transferred to Madras. There are now over 500 branches in Europe, India, America, and the Colonies, and a large literature. The Society has three declared objects—viz.: (1) To form a nucleus of the universal brotherhood of humanity, without distinction of race, creed, sex, caste, or colour; (2) to encourage the study of comparative religion, philosophy, and science; (3) to investigate unexplained laws of nature, and the powers latent in man. Some of the more important teachings of Theosophy will be found summarised in eds. '95 and '96. The chief books on Theosophy are: "The Secret Doctrine," "Isis Unveiled," "The Key to Theosophy," by H. P. Blavatsky; "Esoteric Buddhism," "The Occult World," and "The Growth of the Soul," by A. P. Sinnett; "Theo-

sophical Manuals" Nos. I., II., III., IV., and VII., "The Ancient Wisdom," "The Self and its Sheaths," "The Building of the Kosmos," "The Birth and Evolution of the Soul," "A Study in Consciousness," and "Esoteric Christianity," by Annie Besant; and "Light on the Path," by Mabel Collins. Information may be obtained from the secretaries at the addresses in the countries named: 59, Avenue de la Bourdonnais, Paris, France; 17, Motzstrasse, Berlin, Germany; 1, Corso Dogali, Genoa, Italy; 7, Engelbreksgatan, Stockholm, Sweden; 76, Amsteldijk, Amsterdam, Holland; 7, West Eighth Street, New York City, U.S.A.; Benares, India; 42, Margaret Street, Sydney, N.S.W.; His Majesty's Arcade, Queen Street, Auckland, New Zealand; Apartado 365, Habana, Cuba. Office for England, 28, Albemarle Street, W.

Reid, Whitelaw, U.S. Ambassador to Great Britain, was b. at Xenia, Ohio, Oct. 27th, 1837, and ed. at Miami Univ., Ohio; M.A. and LL.D. Miami, Princeton, Yale, and Cambridge. He chose journalism as his profession, and combined it with military service during the Civil War. Afterwards he was Clerk of the Military Committee '63, and Librarian of the House of Representatives '64-'66; became a cotton planter in Louisiana '66-'67, and joined the editorial staff of the *New York Tribune*, Mr. Greeley's paper, in '68. He re-created the paper, and became editor and chief proprietor in '72. U.S. Minister to France '89-'92, U.S. Commissioner in the peace negotiations with Spain '98, Special Ambassador to Great Britain at the Diamond Jubilee '97, and the Coronation 1902. He is a Republican in politics, and was the party nominee for the Vice-Presidency in '92. He is a Regent of the New York State Univ., and was appointed Chancellor in 1904. He took up his duties as successor to Mr. Choate on June 3rd, 1905. Embassy: 123, Victoria Street, S.W.

Réjane, Gabrielle, the great French actress, was b. at Paris in '57, and is the daughter of a manager. Educated at the Conservatoire, she made her début at the Paris Vaudeville in '75, and created a number of rôles on the boards of the Ambigu, the Palais Royal, the Odéon, etc. She has appeared at Brussels and in London. Her repeated visits to the English capital have made her a favourite with the British as well as the French public. Of her principal parts one may mention specially "Madame sans Gêne," "Sapho," "Lysistrata," "Divorçons." She is married to M. Paul Porel, director of the Vaudeville.

Reserve and Discharged Soldiers, National Association for Employment of. The object of this association is to introduce to employers of labour and others ex-soldiers of good character only, who have returned to civil life on completion of their service with the colours, as clerks, poor-law officers, indoor servants and valets, grooms and coachmen, attendants (asylum and hospital), messengers, caretakers, drill and gymnastic instructors, chauffeurs, night-watchmen, hall and light porters, porters, labourers, carmen and horsekeepers, mechanics and handymen, etc., etc. No fees are charged either to employers or employed. Secretary: Capt. H. F. Wilkinson. Office: 119, Victoria Street, Westminster, S.W.

Rice Statistics. According to the Year-book of the U.S.A. Department of Agriculture, the

production of rice has been as follows for the years named :—

	1900	1901	1902	1903	1904
Million lbs.	91,584	89,717	95,652	97,195	99,195

The chief producing countries and their produce in 1904 were: India, 49,682,900,000 lbs.; Japan, 18,658,700,000 lbs.; Java and Madura, 10,091,200,000 lbs.; French Indo-China, 8,500,000,000 lbs.; Siam, 4,600,000,000 lbs.; and Korea, 3,700,000,000 lbs. The largest producing country in Europe is Italy, with 1,644,700,000 lbs. The figures for China are not available.

**Richter, Hans**, M.V.O., was b. at Raab, in Hungary, April 4th, 1843, ed. in Vienna, and studied music at the Conservatoire there. In 1875 he was appointed Director of the Court Opera Theatre in Vienna, directed the Bayreuth Festival '76, and in '79 began the famous Richter Concerts in London. Hon. Mus. Doc. Oxon. 1886; Conductor Hallé Concerts Society 1900; M.V.O. 1904. The Firs, Bowdon, Cheshire.

**Roads Improvement Association, The**, was formed in '86 and incorporated in '98, to secure reform in the system of administering highways of the United Kingdom, and to obtain better, wider, and more numerous roads and footways. Its aggregate membership exceeds 125,000, and all the principal motor societies are represented on its Council. **Hon. Secretary**, W. Rees Jeffreys. **Offices**: 1, Albemarle Street, Piccadilly, W.

**Robinson, Very Rev. Joseph Armitage**, M.A., D.D., Dean of Westminster, was ed. at Christ's Coll., Cambridge (4th classic '81), ordained deacon at Ely in '81, priest in '82, was domestic chaplain to the Bishop of Durham '83-4, curate of Great St. Mary, Cambridge, '85-6, vicar of All Saints', Cambridge, '88-92, Prebendary of Wells Cathedral '94-9, Rector of St. Margaret's, Westminster, '99-1900, and Canon of Westminster '99-1902, being then appointed to the Deanery of Westminster. He was a Fellow of Christ's Coll., Camb. '81-99, Dean '84-90, Cambridge Whitehall Preacher '86-8, Norrisian Professor of Divinity at Cambridge '93-9, Select Preacher at Oxford '99, Chaplain-in-Ordinary to the King 1902; Hon. Fellow of Christ's Coll., Camb., 1905; Lord High Almoner to the King 1906. He holds the degrees, besides those above mentioned, of Hon. Ph.D. (Göttingen), Hon. D.Theol. (Halle), and is a Fellow of the British Academy. He has written several works: "The Philocalia of Origen," "Unity in Christ," "Commentary on the Epistle to the Ephesians," etc.

**Rodin, Auguste**, President of International Society of Painters, Sculptors, and Gravers, was b. in Paris of poor parents on Nov. 12th, 1840, and worked for an architect until he was 24, modelling plaster details. He produced the first of his famous series of sculptures in '64, though it was not till the eighties that he secured the recognition which has since so deservedly grown. He visited London in 1903, and had a great reception. Address: 182, Rue de l'Université, Paris.

## ROUMANIA.

### Ruler.

King Charles I. is a son of the late Prince Karl of Hohenzollern-Sigmaringen, and was b. April 20th, 1839. He ascended the throne after Prince Alexander John had been expelled ('66). In '81 the Roumanian representatives unanimously proclaimed him King instead of

Prince of Roumania. In '69 he married the Princess Pauline Attilie Louise of Wied, who is known in literary circles under the *nom de plume* of "Carmen Sylva." In Jan. '93 the Crown Prince Ferdinand, nephew of the King, and son of Prince Leopold of Hohenzollern-Sigmaringen (b. Aug. 24th, '65), was married to the Princess Marie of Edinburgh, and two sons, Carol and Nicholas, and two daughters have been born to them.

### Government and Army.

Moldavia and Wallachia, formerly autonomous provinces of the Ottoman empire, with Dobrogea, have since Dec. 23rd, 1861, formed an independent kingdom. The executive power is vested in the King, with a Cabinet of eight and the Prime Minister. The legislature is composed of a Senate of 120 members, indirectly elected for eight years by two colleges representing the propertied electors, and a Chamber of 183 members elected for four years by three electoral colleges or classes of voters. These three colleges consist of (1) electors possessed of property insuring an annual income of not less than £50; (2) those paying direct taxes of not less than 20 francs annually, or following a profession; and (3) all Roumanian subjects of full age, most of whom vote indirectly by choosing delegates who vote with the direct electors of the other colleges. The members of both houses are paid 25 francs a day while Parliament sits. The King has a veto on all measures passed by the two chambers.

The armed forces of Roumania consist of the **Regular Army**, the **Militia**, and the **Opoltenieni**. In peace time there only exist cadres for the regular army, which is divided into permanent and territorial troops. The period of service for the permanent troops is three years, and for the territorial troops five years for the infantry and four for the cavalry, but in this latter force the soldier at first only puts in three months of continuous service; he is then sent to his home and called up, in his turn, for one week each month. The recruit contingent annually is about 33,000. The effective of the army in war is as follows. **Infantry**: 8 rifle battalions; 34 infantry regiments (102 battalions; altogether 2250 officers, 126,000 men, and 4700 horses). **Cavalry**: 6 *Roshiori* regiments (24 squadrons, forming an independent division); 11 *Calarashi* regiments (44 squadrons): total, 530 officers, 13,200 men, 12,100 horses. **Artillery**: 12 regiments (75 batteries, 450 guns; 40 ammunition columns; 2 fortress artillery regiments: total, 930 officers, 26,900 men, 22,800 horses). **Engineers**: 12 sapper companies, 4 telegraph, 4 pontoon, and 4 railway companies: total, 140 officers, 6200 men, 1500 horses. **Grand total**, 2850 officers, 169,800 men, and 41,400 horses. If to these are added the transport, auxiliary troops, 32 militia regiments, etc., the numbers will amount to 7500 officers, 314,000 men, and 65,000 horses. The approximate war strength is stated to be 650,000.

### Statistics and Diplomatic.

For local government purposes the country is divided into 32 districts, each under a prefect, a receiver of taxes, and a civil tribunal. Education is free and compulsory, but still in a backward condition. The prevailing religion is that of the orthodox Greek Church. By the Berlin Treaty of '78 it was provided that there should be no discrimination against any resident of Roumania on account of religious belief, but the Jews have been harshly treated. Many

Roumanians are to be found in neighbouring countries, particularly in Hungary and Transylvania, where they have given some trouble.

Cereals, wines, and timber are the chief products, the large majority of the population being engaged in agricultural pursuits. Minerals are said to abound, but only coal and petroleum are worked. There are very large and valuable State forests, and salt-mining is a State monopoly. In 1901 the United Kingdom sent £2,257,040, and in 1904 £1,802,530; but Germany and Austria-Hungary have secured the greatest share of the trade. There were 2295 miles of State railways in 1904. The capital is Bucharest (pop. 282,071), and the chief ports are Braila (pop. 61,542), Kustendjie, and Sulina.

A Commercial Treaty with Great Britain, including the most-favoured-nation clause, was concluded and signed at Bucharest on Oct. 31st, 1905. Reduced rates of duty were accorded to British goods of various descriptions in accordance with a schedule. The treaty remains in force for four years from March 1st, 1906.

Area, 50,720 sq. m.; population, 1903, 6,151,628. Revenue, 1902-3, £9,938,223; expenditure, £8,645,198; imports, 1902, £11,333,782; 1903, £10,796,950; 1904, £12,454,806; exports, 1902, £14,992,768; 1903, £14,225,210; 1904, £10,474,806; debt, 1903, £55,755,585.

Ministry: Premier and Minister of the Interior, M. George Cantacuzene.—War, General Mano.—Finance, M. Take Janesco.—Foreign Affairs, General Lahovary.—Agriculture, Commerce and Industry, and Crown Lands, M. John Lahovary.—Public Works, M. John Gradis-teano.—Justice, M. Badarau.—Public Instruction, M. Nadesco.

Minister in London, M. Alex. Catargi, 6r, Warwick Square, S.W.—Attaché, M. Boéresco.—Consul-General in London, Count Reginald Ward, 68, Basinghall Street.

British Minister at Bucharest, Sir W. Conyngham Greene, K.C.B.

British Consul-General, Lt.-Col. Sir H. Trotter, K.C.M.G., C.B. (Galatz).

### Political Parties.

Questions of finance have more than anything else determined the fate of parties in recent years. During the years of prosperity which the country experienced from '59 to '99 the loan indebtedness of the country mounted rapidly. In spite of surpluses in many years there were deficits in others, and a large extraordinary expenditure was accounted for by public works and military outlay. In '99 the harvest, on which the country relies, failed, a commercial crisis naturally followed, and there was a heavy deficit amounting to about 35,500,000 lei. In the spring of '99, before the financial crisis occurred, M. Sturdza's administration was defeated, and M. Cantacuzene, the leader of the old Conservatives, formed a Cabinet. His Finance Minister, M. Jonesco, proposed to meet the situation by economies, new taxation, and the alienation of some of the State property; but his proposals met with much opposition, and eventually the old Conservative and the young Conservative or "Junimist" parties coalesced, M. Carp, the Junimist leader, becoming Premier and Finance Minister in July 1900. His proposals, particularly those imposing additional direct taxation, provoked the hostility of the old Conservatives, and he

eventually resigned Feb. 8th, 1901. The differences between the two Conservative parties proving to be irreconcilable, M. Sturdza was called upon by the King to form a Liberal administration, and succeeded on Feb. 27th, 1901. He at once set about a policy of severe retrenchment, and by his unflinching courage in carrying out a great scheme of economics he restored the country to its financial independence, receiving the expression of the King's gratitude in a special rescript issued by his Majesty in March 1903. Internal dissensions, and the hostility of officials affected by his reforms, however, brought about his fall, and a Conservative Cabinet under M. Cantacuzene was formed in January 1905.

### History, 1906.

For some time past relations between Greece and Roumania had been strained owing to the Roumanian patronage of the Vlachs movement in Macedonia. The Vlachs, according to a *Times* correspondent (June 23rd, 1906) in Macedonia, number from 200,000 to 250,000, speak a dialect of Roumanian, and also Greek, and were formerly considered as Greeks. When, therefore, they were recognised by the Porte, at the instance of Roumania, as of Roumanian nationality, the Greek bands in Macedonia persecuted them bitterly. This led to reprisals against the Greeks in Roumania, and finally to the rupture of diplomatic relations between the two countries, Russia taking charge of Greek interests in Roumania.

Rouvier, Maurice, was b. at Aix, April 17th, 1842, being the son of a grocer; ed. at Marseilles Lycee, and started life as corresponding clerk for a Greek firm in Marseilles. He then turned to law and journalism, and entered political life. His strong opposition of the Second Empire was recognised by his appointment as General Secretary of the Prefecture of the Bouches-du-Rhône in '70. He entered the National Assembly as a member of the Extreme Left '71, and was elected Deputy for Marseilles '76. In '81 he became Minister of Commerce in the Gambetta Cabinet, retaining the portfolio in the Ferry Administration of '84. In '87 he formed his own Cabinet, taking the portfolio of Finance, which he retained in successive Administrations; but he could not weather the storm of the Panama scandals, and resigned in '92, not returning to public life for 10 years. During this interval he increased his reputation as an economist and financier. In the Combes Cabinet of 1902 he again became Minister of Finance, and succeeded his chief as Premier in 1905, falling in 1906 on the Church and State question. M. Rouvier is now Senator for the Alpes-Maritimes. In politics he is an Opportunist. As a financier he made French Rentes go up 20 points from '80 to '92, and his Budget speeches have been compared to Gladstone's. Address, 8, Rue de Windsor, Neuilly St. James.

### ROYAL ACADEMY.

The Royal Academy, at Burlington House, Piccadilly, was founded in 1768 by George III., who gave it rooms in Somerset House. Thence it was removed to Trafalgar Square (1834), and to its present abode, the site of which it occupies rent-free (1869). The principal objects of the Royal Academy are (1) the establishment of a well-regulated school or academy of design for the gratuitous instruction of students,

and (2) the holding of an annual exhibition open to artists of distinguished merit, where they may offer their performances to public inspection, and acquire that degree of reputation and encouragement which they may be deemed to deserve. The Royal Academy is "a private society," supporting a school from its own resources without any grant of public money. The members are under the superintendence and control of the Sovereign, who confirms all appointments and bye-laws; and the Society itself consists of 40 Royal Academicians, and at least 30 Associates; there may also be not more than four engravers, of whom not more than two may be Academicians. The first president was Sir Joshua Reynolds, and the present occupant of the office is Sir E. J. Poynter (*q.v.*), elected Nov. 4th, '96. There is a council of 10 members, who succeed by rotation, five retiring every year, the President, the Keeper, and the Treasurer being *ex-officio* members.

Secretary.—Fred. A. Eaton

(to whom all communications should be addressed).

The premises of the Royal Academy at Burlington House comprise a grand gallery or range of thirteen halls, besides a central octagon for sculpture, a theatre, and a large room in which the annual banquet is held—the latter always an event of much interest to the artistic world. The basement is devoted to schools of art for male and female students. The total cost of the buildings was over £150,000, the whole of which was defrayed out of the funds of the Academy. The Royal Academy derives the whole of its funds from the holding of its annual exhibition of the pictures of living artists, which

opens on the first Monday in May and continues until the first Monday in August. No works which have previously been exhibited are accepted, and the Council has the right to reject any picture it may please. The Winter Exhibition of art treasures in connection with the Royal Academy was established in 1869, paintings being liberally lent by private individuals. The exhibition remains open from the first Monday in January for a period of ten weeks. The fine library and books of prints belonging to the Academy are open to students and artists who have been exhibitors at the Royal Academy, subject to such regulations as may be made from time to time by the Council, at certain hours. The Diploma and Gibson Galleries, reached by a staircase to the right of the entrance hall, contain the works presented by each member as a specimen of his ability on his election as a Royal Academician; the works of J. Gibson, R.A., bequeathed by him; several interesting pictures of old masters, and some fine pieces of sculpture.

**Royal Academy of Music.** Established in 1822, and incorporated by charter in 1830. Students of all branches of music are received, and find ample stimulus to exertion in the large number of scholarships and prizes which are offered for competition. Associates are entitled to the use of the initials A.R.A.M. Fellows (the number is limited to 100) are elected by the Directors after leaving the Academy. They are solely entitled to use the initials F.R.A.M. Honorary members are entitled to the initials R.A.M. with the prefix Hon. Musical composers, performers, and teachers, who have not studied at the Academy, can become Licentiates of the Institution by passing a qualifying examination held twice a year—viz., in September and in the Christmas vacation—successful candidates at which are entitled to the use of the initials L.R.A.M. Principal, Sir A. C. Mackenzie, Mus. D. LL.D.; Secretary, F. W. Renaud. The Academy is situated in Tenterden Street, Hanover Square.

**Royal Asiatic Society,** 22, Albemarle St., London, W., Sec., Miss Hughes.

**Royal Cambrian Academy of Art.** Plas Mawr, Conway. The next exhibition will open at Whitsuntide 1907, in oil and water colour. Open to all artists. Hon. Sec., W. J. Slater.

**Royal College of Music.** Founded 1883. The pupils are of both sexes, and consist of scholars, exhibitors and students. The Open Free Scholarships are 54 in number; are gained by competition, and entitle the holder to a thorough and systematic free education at the College in theoretical and practical music. There are also eleven Close Free Scholarships, for the benefit of persons residing in certain specified localities, as well as various Exhibitions and Prizes. Students (or paying pupils) are admitted on payment of an entrance fee of £2 2s. and a tuition fee of £12 12s. per term, and must remain for three terms. Associates need not necessarily be pupils or ex-pupils of the College; they have to pass a qualifying examination, which entitles them to use the initials A.R.C.M. (fee £5 5s.). A Junior Department has been opened for students under 16 years of age whose time is also occupied by the necessities of their general education. Fee, £6 6s. per term, with an entrance fee of £1 1s. Patron, H.M. the King; President, H.R.H. the Prince of Wales, K.G.; Director, Sir C. H. H. Parry, Bart., C.V.O.; Hon. Secretary, Mr. Charles

Morley; Registrar, Mr. Frank Pownall, Prince Consort Road, South Kensington.

**Royal Colonial Institute.** Founded in 1868, and incorporated by royal charter in '82. The objects are thus officially set forth:—"To provide a place of meeting for all gentlemen connected with the Colonies and British India and others taking an interest in Colonial and Indian affairs; to establish a reading-room and library, in which recent and authentic intelligence upon Colonial and Indian subjects may be constantly available, and a museum for the collection and exhibition of Colonial and Indian productions; to facilitate interchange of experiences amongst persons representing all the Dependencies of Great Britain; to afford opportunities for the reading of papers and for holding discussions upon Colonial and Indian subjects generally; and to undertake scientific, literary and statistical investigations in connection with the British Empire. But no paper shall be read, nor any discussion be permitted to take place, tending to give the Institute a party character." Evening meetings are, as a rule, held on the second Tuesday in each month, from November to June, and afternoon meetings are also held from time to time. The monthly *Journal* and *Proceedings* give the papers read during the year, which are always of a valuable and very interesting description. On Sept. 30th, 1906, there were 1458 resident and 3042 non-resident Fellows. The Library contains over 62,000 volumes and pamphlets relating to the Colonies and India. Office, Northumberland Avenue. Secretary, J. S. O'Halloran, C.M.G.; Librarian, James R. Boosé; Chief Clerk, William Chamberlain.

### ROYAL COMMISSIONS.

The following Royal Commissions have been appointed, and are now (Nov. 1906) sitting. The dates of their appointment are given:

Canals and Waterways . . .	March 1906
Care of Feeble-minded . . .	Aug. 1904
Coast Erosion . . .	July 1906
Health and Safety of Miners .	May "
Lighthouse Administration .	Aug. "
Poor Laws and Relief of Distress . . .	June "
Registration of Title in Scot and . . .	May "
Ritual Report . . .	July 3rd, 1906
Shipping Rings or Conferences . . .	Nov. 1906
Trinity College, Dublin . . .	June "
Vice-Regal Commission on Irish Railways . . .	July 13th, 1906
Vivisection . . .	Sept. 1906
Welsh Church . . .	June "

**Royal Drawing Society** (Incorporated 1902), 50, Queen Anne's Gate, S.W. Hon. Sec., T. R. Ablett.

**Royal Historical Society**, 6 and 7, South Square, Gray's Inn, W.C. Hon. Sec., H. E. Malden, M.A.

**Royal Humane Society**. Secretary, Major F. A. C. Cloughton, 4, Trafalgar Square, W.C.

**Royal Institute of Painters in Water Colours.** This Society was founded in 1831, and formerly held its exhibitions in Pall Mall, but in the spring of '83 moved to more commodious galleries at 195, Piccadilly. There is an annual exhibition of water-colour paintings, commencing the second week in March. The walls are open to artists whose works are approved,

and members are elected according to the merit which their productions display. President, E. J. Gregory, R.A.; Vice-President, Yeend King; Secretary, W. T. Blackmore. Office, 195, Piccadilly, W.

**Royal Institute of Public Health.** Founded in 1886 to provide a central institution in London for the training of medical practitioners desirous of obtaining the diploma in Public Health; to provide the means whereby municipal and other authorities can obtain reliable bacteriological and chemical analysis, and to aid the theoretical and practical investigation and study of all branches of preventive medicine. The official organ of the Institute is the *Journal of Preventive Medicine*, published monthly. Principal, Prof. W. R. Smith, M.D., D.Sc., F.R.S. Edin.; Hon. Sec., James Cantlie, Esq., M.A., M.B., F.R.C.S. Office, 37, Russell Square, W.C.

**Royal Life Saving Society.** The objects of this Society, which was founded in 1891, are to promote technical education in life saving and resuscitation of the apparently drowned; and to stimulate public opinion by lectures, demonstrations and competitions, in favour of the general adoption of swimming and life saving as a branch of instruction in schools, colleges, etc. President, H.R.H. the Prince of Wales; Hon. Secretary, Mr. William Henry. Offices, 8, Bayley Street, Bedford Square, London, W.C.

**Royal Literary Fund.** The principle of the Fund is to administer assistance to authors of genius and learning, reduced to distress by unavoidable calamities, or deprived, by enfeebled faculties or declining life, of the power of literary exertion; and this assistance is extended at the death of an author to his widow and children, or mother, or sister. The Fund has £57,910 invested, producing an income of £1,800, besides rents and other receipts. Patron, H.M. the King; President, Lord Tennyson; Secretary, A. Llewelyn Roberts, Esq., B.A.

**Royal Medical and Chirurgical Society**, instituted 1805, incorporated by royal charter '34. The meetings of the Society are held on the second and fourth Tuesdays in the month, from the fourth Tuesday in October to the second Tuesday in June (with the exception of the fourth Tuesday in December), at 8.30 precisely. The elections are by ballot. President, J. Warrington Haward, F.R.C.S.; Hon. Secs., Howard H. Tooth, M.D., C.M.G., and S. Paget, F.R.C.S.; Sec. and Consulting Librarian, J. Y. W. MacAlister, F.S.A.; Librarian, A. L. Clarke.

**Royal Military Academy, Woolwich**, is for candidates for commissions in the Royal Artillery and Royal Engineers. Admission is by open competitive examinations held each year in June and November. Some commissions in the Royal Marine Artillery are also usually offered on the results of these examinations. Three trials are allowed. The age for admission is between 18 and 19½. Candidates must be within these limits on Dec. 1st for the winter examination, and on June 1st for the summer examination. A candidate pays £150 per annum while at the Academy. Reductions are, however, made in the case of sons of officers, etc. The charge for uniform, books, etc., for each cadet other than a King's cadet, on first joining is £35, and £15 at the beginning of the 3rd term, and each candidate receives a mess allowance of 3s. per day. Medical examination

takes place after the competitive examination, and no candidate is accepted unless recommended as physically fit for H.M. service. The Governor and Commandant is Major-Gen. R. H. Jelf, C.M.G., Royal Engineers (retired); Assistant Commandant and Secretary, Col. A. M. Murray, R.A. (retired).

**Royal Military College, Sandhurst**, is maintained for the purpose of affording a special military education to candidates for commissions in the Cavalry, Infantry, Indian Army and West Indian Regiments. Admission is by open competitive examinations held in June and November. Some commissions in the Royal Marine Light Infantry are also usually offered on the result of these examinations. Three trials are allowed. The age for admission is between 18 and 19½. Candidates must be within these limits on Dec. 1st for the winter examination, and on July 1st for the summer examination. Candidates for commissions in the West Indian Regiment may be admitted up to the age of 21. The son of a civilian pays £150 per annum while at the College, but reductions are made in the case of officers' sons. The charge for uniform on first joining is £35. Each candidate receives a mess allowance of 3s. per day. The medical examination follows the competitive examination for admission. King's Cadets, honorary King's Cadets, Indian Cadets, and Pages of Honour are admitted after a qualifying examination. The length of a course of instruction is one year, divided into two terms. A candidate for a commission must be in good mental and bodily health, and free from any physical defect likely to interfere with the efficient performance of military duty. Governor and Commandant, Colonel Kitson.

**Royal Normal College and Academy of Music for the Blind**, Upper Norwood, London. Established March 2nd, 1872. Patrons, Their Most Gracious Majesties the King and Queen. The College embraces a Preparatory School, a Grammar and High School, a Technical School, a Training College, and an Academy of Music. The work is in need of increased support, especially in the shape of annual subscriptions. Donations and subscriptions can be paid to the Principal at the College, or to the Bankers, Messrs. Barclay & Co., Ltd., 1, Pall Mall East, S.W. Treasurer, Rt. Hon. Lord Stalbridge; Principal, F. J. Campbell, Esq., LL.D. Lady Superintendent, Mrs. F. J. Campbell.

### ROYAL OBSERVATORY, EDINBURGH.

The Observatory was built by an association of scientific gentlemen, who founded in 1811 the Astronomical Institution of Edinburgh. Amongst the first members were Prof. Playfair, Prof. Leslie, and Sir David Brewster. They were assisted by the Town Council of Edinburgh, who put them in possession of an old Gothic tower and adjacent grounds on the Calton Hill. The erection of the Observatory was approaching completion when George IV. visited Scotland in 1822, and, in response to an address presented by the President and members, His Majesty granted them the title "Royal Observatory of King George IV." In 1834 the Observatory was made over to the Crown, and in the same year the first Astronomer Royal for Scotland was appointed in the person of Thomas Henderson. He was succeeded in '45

by Charles Piazza Smyth, who retained the post till his retirement in '88.

In '89 the whole equipment of Lord Crawford's Observatory at Dunecht, Aberdeenshire, became the property of the Crown by the gift of the owner, and was added to the existing Royal Observatory, larger buildings and a new site at Blackford Hill being provided by H.M. Government. The new Observatory was formally opened in '96. It consists of a T-shaped building, the principal portion of which, running east and west, is surmounted at each end by a copper dome, the larger of which, at the east end, covers a 15-inch equatorial refractor. The smaller one covers a Newtonian, with a mirror of 24 inches aperture. The meridian house farther west in the same line is provided with a transit circle having a telescope of 8½ inches aperture.

To the south of the main buildings is the library, containing the whole of the valuable collection of astronomical books and manuscripts brought together by Lord Crawford at Dunecht, the library of the late Charles Babbage, the Comet library, which is specially rich, and the collection of old books and manuscripts of historic interest. The optical room, 60 feet long, is provided with a Foucault siderostat, with mirror 16 inches in diameter. Besides the chief instruments already mentioned, the Observatory has a 12-inch Browning reflector, a Zöllner's photometer, three 6-inch refractors, and the physical apparatus—the latter including a very powerful electro-magnet.

The Observatory is under the official control of the Scottish Office, to the chief of which Department, the Secretary for Scotland, a report on the work of the Observatory is presented annually by the Astronomer Royal for Scotland.

The scientific staff of the Observatory consists of the Director, Mr. F. W. Dyson, who is the Astronomer Royal for Scotland, and three assistants.

### ROYAL OBSERVATORY, GREENWICH.

The great increase in British maritime trade in the 17th century rendered the determination of longitude at sea a pressing necessity. The subject was brought to the notice of King Charles II., who, on understanding that the first requisite was a more accurate knowledge of the positions of the moon and principal stars, founded the Royal Observatory at Greenwich in 1675, on the hill which was formerly the site of a castle built in 1437 by Humphrey, Duke of Gloucester. The first observation was made on Sept. 19th, 1675. The Observatory is under the official control of the Admiralty, and the Director is, styled the Astronomer Royal, who receives his appointment directly from the Prime Minister, and holds office by warrant under the Royal sign manual. It has been the good fortune of the Observatory to have at its head such men as Flamsteed, Halley, Bradley, Maskelyne, Pond, and Airy. The present Director is Sir W. H. M. Christie, K.C.B., D.Sc., F.R.S. (q.v.).

The meridian observations of sun, moon, planets and stars, which constitute the fundamental work, are made with a fine transit-circle of 8 inches aperture. An altazimuth on a new principle with telescope of 8 inches aperture has been constructed to supplement the observations with the transit circle. The largest instrument is a 28-inch refractor. Another fine

instrument is the **astrographic equatorial** designed for work in connection with the "Photographic Chart of the Heavens." It consists of two telescope tubes rigidly connected and parallel, one carrying a 10-inch telescope lens, the other a 13-inch photographic lens by which the star images are imprinted on the photographic plate. The **Thompson equatorial**, presented to the Observatory by the late Sir Henry Thompson, has on one side of the declination axis a telescope with a lens corrected for photographic rays of 26 inches aperture, and on the other side a telescope with a mirror of 30 inches diameter. A photographic spectroscope is mounted on the reflector. There are several smaller refractors used for observing comets, occultations of stars by the moon, Jupiter's satellites, etc. Photographs of the sun are taken on every available day, and after being measured are carefully stored for reference. Magnetic and meteorological observations, made continuously, form an important branch of the work. The **chronometers** used in the Navy are purchased after "trial" at the Observatory. The average number being tested daily is about 600. Hourly and daily time-signals are sent out from the Observatory through the Post Office telegraphs, giving Greenwich time to all parts of the country.

By the influence of Sir Isaac Newton a **Board of Visitors** was instituted in 1710 to visit the Observatory and receive the Astronomer Royal's report of the work of the past year. This Board, which is recruited from our leading scientists, meets at the Observatory each year on the 1st Saturday in June. Persons desirous of visiting the Observatory must satisfy the Astronomer Royal that they are interested in astronomy. **Secretary, H. Outhwaite.** Office hours 9 to 4.30.

**Royal Opera House, Covent Garden.** The building was taken over by new owners in March 1899, and upwards of £10,000 has been spent on electrical improvements, and over £25,000 in structural alterations and stage equipment. The stage has been recently reconstructed on modern principles, with large electrical lifts and other similar appliances. **Owners, The Grand Opera Syndicate, Ltd. Directors, Earl de Grey, Viscount Esher, H. V. Higgins. Musical Director, André Messager. Secretary, Neil Forsyth.**

**Royal Patriotic Fund.** The **Royal Patriotic Fund Reorganisation Act, 1903**, dissolved the Patriotic Fund Commission, and transferred its property, rights, duties, and liabilities to the **Royal Patriotic Fund Corporation**. The property of this Corporation is, subject to any special trust relating to any part thereof, to be administered by the Corporation for the benefit of the widows, children, and dependants of officers and men of the naval and military forces of the Crown. Total invested funds, Dec. 31st, 1905, £1,178,336. Numbers on books of various funds at that date, 4298 widows, 4583 children, 213 "other dependants." Total expenditure for the year 1905, £72,394; total income, £43,394. Excess of expenditure over income provided by sales of invested funds. **President, H.R.H. The Duke of Connaught, K.G.; Chairman and Vice-President of Council, Earl of Dartmouth, K.C.V.O. Office, 53, Charing Cross.**

**Royal Sanitary Institute.** Founded in 1876 and incorporated in '88, "to promote the advancement of Sanitary Science in all or any

of its branches, and to diffuse knowledge relating thereto." Examinations are held, and certificates of competency in sanitary knowledge granted in London and also in provincial centres, the Commonwealth of Australia, British South Africa, Hong Kong, and the Dominion of Canada, and as at present arranged are adapted for inspectors of nuisances and for meat inspectors. Examinations are also held in Sanitary Science as applied to buildings and public works, and in Hygiene in its bearing on school life. The *Journal of the Institute* is published monthly. The **Parkes Museum**, which is maintained by the Institute, and is open daily from 9.30 a.m. to 5.30 p.m., and on Mondays to 8 p.m., contains a great variety of the most approved forms of apparatus and appliances relating to health and domestic comfort. There is a large library of sanitary literature. **Secretary, E. White Wallis, F.S.S. Offices, 72, Margaret Street, London, W.**

**Royal Scottish Academy**, instituted in 1826, incorporated in '38, consists of Academicians, Associates, honorary members and honorary retired members. A supplementary charter was granted in '01, by which the Academicians were empowered to add to the number of Associates, certain privileges being also granted the latter class. Each member is entitled to exhibit in the annual exhibition three works. **President, Sir James Guthrie; Secretary, George Hay; Treasurer, John Hutchison; Librarian, W. D. McKay; Clerk, James Hastings.**

**Royal Society of Painter-Etchers and Engravers, The**, was founded in 1881 by Sir Francis Seymour Haden. **Annual Exhibitions** of the work of members only are held by the Society at the Gallery, 5A, Pall Mall East, in the early spring of each year. All forms of engraving on metal, whether by the burin, the etching needle, by mezzotint or aquatint, or by whatever other process, are eligible for exhibition. **Secretary, W. P. D. Stebbing, 5A, Pall Mall East, S.W.**

**Royal Society of Painters in Water Colours.** Founded in 1804. The Summer Exhibition is opened to the public in April, and the Winter Exhibition in November. The number of members is forty, while the number of associates is not limited. **President, Sir Ernest Waterlow, R.A.; Secretary and Curator, F. W. Hayward Butt.** Attached to the Society is an "R.W.S. Art Club," established '84, for the purpose of holding a series of *Conversazioni* to which members are invited to send works of art for exhibition. **President, H. M. Marshall, R.W.S. Office, 5A, Pall Mall East, S.W.**

**Royal Society of St. George, 241, Shaftesbury Avenue, Bloomsbury.** **President, H.R.H. the Prince of Wales, K.G.; Hon. Sec., Howard Ruff.**

**Royal Statistical Society.** Founded in 1834, and incorporated by royal charter in '87. It has accumulated an extensive library (amounting at the present time to upwards of forty thousand volumes), bearing on statistical and economic subjects. Throughout the session papers on statistical subjects are read and discussed at its monthly meetings. Two medals, the Guy and the Howard, are usually offered each year for competition. The *Quarterly Journal* contains a valuable record of the progress of statistical science. **President, Sir Richard Biddulph Martin, Bart.; Hon. Secs., Sir J. A. Baines, C.S.I., R. H. Rew, and A.**

Wilson Fox, C.B. Office, 9, Adelphi Terrace, W.C.

**Royal United Service Institution, Whitehall, S.W.** Established in 1831, for the promotion of naval and military art, science, and literature. The **Museum**, which occupies the old Banqueting House of the once famous Palace of Whitehall, contains, besides Rubens' celebrated ceiling, the famous models of Trafalgar and Waterloo, interesting naval and military relics and trophies, models of ancient and modern war-vessels, ordnance, and small arms. Admission 6d. daily: April to September, 11 to 6; October to March, 11 to 4. President, H.R.H. the Duke of Connaught. Chairman of Council, Lord Roberts. Secretary, Lieut.-Col. A. Leatham.

### RUBBER INDUSTRY.

Though the rubber industry is not a new one, the advent of motors has so changed the trade as to make it practically a modern enterprise. Up to 1875, or thereabouts, about 11,000,000 lb. of caoutchouc sufficed for the world's requirements, and this moderate quantity was manipulated and turned into the manufactured article by a hundred and fifty rubber factories in Europe and America. The raw material came chiefly from South America, where it was collected from the native forests, and the idea of supplementing the quantity by cultivated rubber existed in the minds of few people. The estimated consumption of rubber for 1906-7, owing to the introduction of motor and cycle tyres, is at least 70,000 tons, and to meet that demand the rubber tree is being planted in every part of the tropical world suitable for its culture, as rapidly as can be done. Public companies to acquire and develop rubber estates in Ceylon, Java, Samoa, the Malay States, the Straits Settlements, and Africa are registered every week, and capitalists are attracted to the new investment by the sanguine estimates of profit held out by promoters, while rubber manufactories are springing into existence all over the country. In '76 seedlings from South American plants were procured and brought to Kew. Only about 10 per cent. of these survived, but from them have sprung the majority of the Para rubber trees now in cultivation in the Middle East. The industry, so far as growers of plantation, or cultivated, rubber are concerned, is still in its infancy, and there is little doubt that, as accurate statistics of results become available, improvements will be made in the methods of cultivation and collection, which will render the cost of putting rubber on the market much less, and will bring it to a higher perfection.

It was thought, for instance, up to a few years ago that the tree could not be tapped without injury before it had reached its tenth year, but it is now common knowledge that four or five years after planting is not too soon to begin collection of the latex. This is done by making spiral, or, as some planters do, V-shaped wounds in the trunk from which the milk drops into a receptacle placed underneath. Tapping is carried on, according to the season, either monthly or in alternate months. The trees do not appear to suffer in their growth, and the bark quickly grows over the incised portion again. A different part of the trunk is taken at each operation. The pure latex is then subjected to various processes, in order

to bring about coagulation and drying, after which the finished product finds its way to the market. There it fetches as much as from 5s. 10d. to 6s. 3d. per lb., and as the growers' expenses in planting, labour, transport, etc., do not amount to more than 1s. 6d. per lb., the profits are such as to attract investors. No substitute for the natural rubber is likely to be invented, which can be applied equally well to all the purposes for which rubber is used, but in any case the margin of profit is large enough to allow of a diminution of price and yet attract capital. The various forms of rubber made are sheet, biscuit, crêpe, worm, lace, flake, and scrap rubber, with prices ranging from 6s. 3d. for sheet and biscuit to 3s. for scrap.

Rubber is used in the manufacture of motors, road pavings, cycles, waterproofs, overshoes, feeding-bottles, and a large variety of articles in which the different qualities are introduced. There is likely also to be a large trade as time goes on in products from the rubber-seed. At present the seed is too valuable for planting, to be used in any other way; but cattle foods, oil, etc., may be made from it when no longer needed for reproduction.

**Rural Labourers' League.** Established in May '82. Objects: to assist in putting into operation the Allotment Acts of '82, '87, and '90, and Small Holdings Act, '92; to secure a more direct connection of the agricultural population with the soil; to assist in the promotion of a practical scheme, either by old-age pensions or some other means, by which the agricultural labourer may be relieved of the necessity of ending his days in the workhouse. Secretary, Mr. J. L. Green. Offices, 110, 111, Strand, W.C.

**Ruskin College, Oxford (Incorporated).** Founded in 1899 in St. Giles'. The College, which is situated at the corner of Worcester Place and Walton Street, is intended for working men who are desirous of taking part in public and social work, and the subjects taught bear principally upon social and industrial questions—viz., political economy, industrial history, history of social movements, citizenship, local government, sociology, and logic. The work is carried on in two ways—(1) by residence at the College, and (2) by means of a Correspondence School, which enables those who cannot leave their work to learn the same subjects through the post. The fees for residence at Ruskin College are £52 per annum, including board, lodging, and tuition. The fees for membership of the Correspondence School are 1s. entrance fee and 1s. per month. The movement is under the control of a Council. Principal, Dennis Hird, M.A.; Vice-Principal, H. B. Lees Smith, M.A.; General Secretary, Bertram Wilson.

### RUSSIA.

#### Ruler.

Nicholas II., who on Nov. 1st, '94, succeeded Alexander III. as "Emperor of All the Russias," was b. at St. Petersburg on May 18th, '68, his mother being the Princess Dagmar, a daughter of the late King Christian IX. of Denmark, and sister to Queen Alexandra, the Duchess of Cumberland, and the King of Greece. During the famine of '91 he was, at his own request, made President of the Committee of Succour, and worked hard in the organisation of relief. As Czarevitch he held several military commands in his own country—in the

famous Préobrajensky regiment among others—and in England he had conferred upon him in '93 the Order of the Garter. He married the Princess Alix of Hesse-Darmstadt in Nov. '94, and a son and four daughters have since been born to them. The four daughters came first, but a son was born on Aug. 12th, 1904, and was named Alexis. The coronation of the Czar took place with impressive ceremonial at Moscow in May '96, and in August of the same year he commenced a tour which included visits to the Emperor of Austria and Germany, to the King of Denmark, to Queen Victoria, and to the President of France. The visit to Paris was taken advantage of to accentuate the friendly understanding or alliance, as it may now be called, between France and Russia. This alliance was definitely announced on the occasion of the visit of President Faure to St. Petersburg in '97. The famous peace proposals which he made to the Powers during '98 led to the Peace Conference at The Hague in '99, and the establishment of the Permanent Court of Arbitration there. He enjoys the revenue from the Russian Crown domains, covering over 1,000,000 sq. m., including gold and other mines in Siberia. He is gifted with the linguistic facility of most of his countrymen, and fluently speaks French, German, Italian, and especially English, of whose literature he has a thorough knowledge. The Czar must belong to the Orthodox Greek Church, and his consent is necessary to the marriage of any prince or princess of the Imperial family.

### Government.

The Government is an autocracy, the Czar being the supreme ruler and legislator, and the only source of power in the body politic. This still appears to be true, although on Aug. 19th, 1905, the Czar issued a Manifesto announcing the formation of a representative body called the Duma "to take a constant and active part in the elaboration of laws"; and on Oct. 30th, 1905, signed a Constitution, the operative parts of which were thus given by Reuter's correspondent at St. Petersburg:—

"I. To grant the population the immutable foundations of civic liberty, based on real inviolability of the person, and freedom of conscience, speech, union, and association.

"II. Without deferring the elections to the State Duma already ordered, to call to participation in the Duma, as far as is possible in view of the shortness of the time before the Duma is to assemble, those classes of the population now completely deprived of electoral rights, leaving the ultimate development of the principle of the electoral right in general to the newly established legislative order of things.

"III. To establish it as an immutable rule that no law can come into force without the approval of the State Duma, and that it shall be possible for the elected of the people to exercise a real participation in the supervision of the legality of the acts of the authorities appointed by us."

On March 6th, 1906, an Imperial Manifesto, together with Imperial Ukases, announced the reorganisation of the Council of the Empire as a Second Chamber in conjunction with the Duma as the First Chamber. The Council of the Empire consists of an equal number of elected members and members nominated by the Czar. The elected members are chosen, 1 each by

the Zemstvos, 6 by the Synod, 6 by the representatives of the Academy of Sciences and the Universities, 12 by the representatives of the bourses of commerce and industry, 18 by the representatives of the nobility, and 6 by the representatives of the landed proprietors of Poland. They are elected for 9 years, a third retiring every 3 years; they must be over 40, and have a degree; and they receive £2 10s. per day during the session. The President and Vice-President are appointed by the Czar. The members of the Duma (the number of whom was given in the *Times* of May 12th, 1906, as 503, including 412 from European Russia, 36 from Poland, 29 from the Caucasus, 14 from Siberia, 10 from the Steppes, and 2 from Turkestan) hold office for five years, unless it is dissolved by the Czar. They elect their President and Vice-President annually. Members receive £1 per day and travelling expenses. The competence of the Duma extends to all questions relating to new laws and the modification, etc., of existing laws, to the departmental, Ministerial and National Budgets, to the construction of railways by the State, and to matters submitted to it by Imperial Decree. It is provided, however, that "the fundamental laws of the Imperial Administration shall not be touched. The Council and the Duma have equal legislative powers and can both initiate measures. All measures must be passed by both bodies before being submitted for the Imperial sanction, and bills rejected by one of the legislative bodies cannot be brought forward again without the Imperial consent.

There are also three chief Councils, known respectively as (1) the Ruling Senate, which is a partly deliberative and partly executive body, and promulgates all laws, also supervises the general administration of the empire, superintends courts of law, and is the high court of justice for the empire; (2) the Holy Synod, which is composed of the Metropolitan Bishops of St. Petersburg, Moscow, and Kieff, the Archbishop of the Caucasus and other bishops, and which superintends religious matters, the President being the Metropolitan of St. Petersburg, and the Procurator Prince Obolensky; and (3) the Council of Ministers, which was reorganised by a decree issued Nov. 1st, 1905.

### Provincial and Local Government.

For purposes of local government the empire is divided into the nine General Governments of Finland, Poland, Wilna, Kieff, Moscow, the Caucasus, Turkestan, the Steppes, and Irkutsk, each under a Governor-General with full civil and military powers. In Siberia the Governors-General are assisted by deliberative Councils. There are subdivisions of the General Governments into 78 Governments (49 in European Russia, 10 in Poland, 8 in Finland, 7 in the Caucasus, and 4 in Siberia), each under a Civil Governor with a Council; and into 16 Provinces (11 in European Russia, 4 in the Caucasus, 9 in Central Asia, 4 in Siberia, 2 each under a Military Governor). The Governments are divided into districts, with their own administrative institutions, and special Governors are placed over the large towns. In European Russia the country is divided into communes, groups of which are united to form cantons. Communal and cantonal affairs are decided by communal and cantonal assemblies. The administration of the districts is to some extent, and in some governments (though great extensions of the

system were ordained in 1905), entrusted to elective district assemblies, called *Zemstvos*, in which the landowning nobles have great power. These assemblies were founded in 1864 by Alexander II., and are of two kinds, the smaller being elected to deal with the affairs of a single district, while the larger are elected by the *Zemstvos* of all the districts in a Province or Government, and form Provincial *Zemstvos* to deal with the affairs common to the districts in that Government. District *Zemstvos* are indirectly elected, and consist of from 60 to 65 persons, about half being nobles, and the remainder chiefly peasants, including 3 or 4 representative merchants from the towns. The *Zemstvo* sits once a year for about 15 days, and has a standing committee of paid officials appointed for 3 years. Provincial *Zemstvos* consist chiefly of noblemen or members of the aristocracy. The Governor of the Province has a veto on all resolutions of both bodies. The rate levied must not exceed 3 per cent. of the annual value of the real property in the district. There are also elective administrative bodies in most towns and cities.

### The Army.

In time of peace the Russian army may be said to consist of several armies: the European, the Caucasian, the Turkestan, and the Amur force; the first of these organised like other European armies, and the constitution of the others varying in conformity with local requirements. Moreover, the strength of each has varied according to the necessities of the situation, the troops being on the ordinary peace footing, on the higher peace establishment as in the frontier districts, or on the war footing as in Asiatic Russia. There are 13 greater Military Districts, the Transcasian District, and the territorial region of the Don Cossacks. There were 25 army corps in Europe and the Caucasus and 2 cavalry corps, 2 in Turkestan, and 3 in the Amur district. Large bodies of troops are usually massed on the western frontier; they are rather thinly dispersed in Middle Russia, and they have had great strength in Turkestan and Eastern Siberia.

There are four classes of obligatory service: (a) for the Russians proper; (b) the Cossack service; (c) special arrangements for Finland; (d) the service of native races under Russian rule.

The peace strength has been given as follows:

	Europe and the Caucasus.	Asiatic Russia.
Infantry . . .	627,000 men.	83,000 men.
Cavalry . . .	116,000 "	14,000 "
Artillery . . .	138,000 "	15,000 "
Engineers . . .	34,000 "	8,000 "
Army Services .	34,000 "	5,000 "
Total . . .	949,000 "	124,000 "

Of these forces the active army numbered 731,000 in Europe and the Caucasus, and 87,000 in Asiatic Russia. Baron von Tettau, in a volume on the Russian Army (1902), gives the peace strength, including Cossacks and Frontier Guards, as 1,100,000.

In the Russian Empire considerably over a million men annually attain the age for joining the army, and usually some 315,000 men are actually embodied in the standing army. Seventy per cent. of the men so entered are illiterates. About 5000 enlist annually as volunteers, and 16,000 join the Cossacks. The

period of liability to personal service lasts from the 21st to the 43rd year of age. Those who join the Standing Army spend five years with the colours (four in the Infantry), thirteen in the Reserve, and the remainder in the *Opoltschenié*, or Militia. In some instances, however, the War Minister has power to retain men for a longer period with the colours; whilst, on the other hand, this period is shortened by one, two, three, or four years for those possessing a superior education. The *Opoltschenié*, which has been developed from a simple militia into a first reserve formation, now embraces two different classes: (1) Men between 21 and 43 years of age, who have never served, to the number of about 220,000 annually, who cannot be embodied with the active army; (2) men who have completed 5 years' service with the colours and 13 years in the reserve. The ages of the men vary between 39 and 43 years.

The Finnish Military Service Law, whereby the Finnish army lost the independence guaranteed by treaty, was promulgated on Aug. 1st, 1901, but was repealed in 1905.

The Cossack forces have a special constitution. Every Cossack becomes liable to serve as soon as he has completed his eighteenth year. For the first three years, which are looked on as "preparatory," his service is, however, purely local; but for the next twelve years he is considered as belonging to the "front" category. This category consists of three bans, the first of which is formed of men actually serving, and the two others of men who have been granted unlimited leave. The last five years are spent in the Reserve category. There is, however, a still further category, for which no limit of age is fixed: this comprises all able-bodied Cossacks not otherwise classified. These have to supply and maintain their own horses, besides providing their own clothing and equipment. The peace effective of the Cossacks is stated to be 65,930, with 52,400 horses, but it is probable that not more than 58,000 are permanently with the colours. The war strength is given as 182,065, including 4275 officers, and there are 173,150 horses. This gives a percentage of 13·2 to the male population liable to Cossack service.

The war strength of the Russian forces consists of about 56,500 officers and 2,855,000 men, including 1,792,000 Infantry and 196,000 Cavalry. These form the Active Army of all classes, but are not available in any one part of the empire. To these figures must be added the available Reserve, estimated at 1,064,000; Frontier battalions, 41,000; Cossacks, 142,000. There are besides these the Territorial Reserve, some 2,000,000 men, and the *Opoltschenié*, 1,300,000. General Redigers, a well-known authority, estimates the trained reserve to be 2,700,000. A recent high English authority gives the following figures: Peace footing, 1,000,000; Reserves, 2,900,000; Militias, 1,200,000; other Services, 100,000; total, 5,400,000. It was expected that under new organisation the *Opoltschenié*, or Militia, in time of war would form 40 Infantry divisions, 640 battalions; 20 regiments of Cavalry, 80 squadrons; 80 batteries of Artillery, and 20 battalions of Sappers; but owing to the vast distances to be covered, and the want of railway accommodation, the mobilisation of this great force would be neither easy nor rapid. It contributed, however, a large force

to Manchuria. In regard to the embodiment of the reserve force in the event of war great advances have been made by the establishment of brigade commands and the organisation of reserve brigades.

### The Navy.

The Emperor is in supreme command of the naval forces, but he exercises his authority through the **General Admiral** or **Commander-in-Chief of the Navy**, an official who is almost invariably a member of the Imperial family. An officer selected by the Emperor from the list of vice-admirals acts as **Minister of Marine**, and exercises a control over the twelve departments charged with the business of naval administration. The **Admiralty Council**, which is responsible for the Estimates, consists of the General Admiral, the Minister of Marine and ten flag-officers. Assisted by the Technical Committee and the other departments, this Council decides upon the allocation of the total sum provided for the Navy over the various items in the Estimates. The head of the **Naval Headquarters Staff** is responsible for the training, organisation and efficiency of the personnel, and assigns the various ships which compose the fleets and squadrons. This is the executive branch of his department. The other branch deals with Naval Intelligence, the collection and codification of information concerning foreign navies, the preparation of schemes of mobilisation and of proposed plans of action in case of war. Similarly the **Department of Construction** and the **Technical Committee** deal with the matériel, the former being responsible for the execution of the shipbuilding programme and the maintenance of a proper supply of stores, while the latter marks the improvements made in ships, machinery and engines of war, and suggests plans and specifications for new ships, etc. By an edict of the Emperor in 1874 military service was rendered obligatory for all classes, and the number of men annually needed for the Navy is fixed by law. The men are recruited by conscription, and while on the active list are not allowed to marry.

The Admiralty is thus constituted:—

**General Admiral**, H.I.H. The Grand Duke Alexis.

**Minister of Marine**, Vice-Admiral Birileff.

**Members**.—Admirals of the Fleet, K. Pilkin, Ul. Schmidt, N. Kaznakoff; Vice-Admirals, Ul. Verhovskiy, J. Dikoff; Lieutenants-General, A. Kolokoltzoff, Soulieff.

The original estimates for 1906 totalled £11,000,000 sterling, but this was curtailed by £3,000,000, and the exact sum to be spent is uncertain.

There were 2200 officers on the effective list of the Russian Navy, exclusive of naval cadets, and the number of all ranks in 1905 was 69,200, with a Reserve fixed at 30,000. As a result of the war and other troubles the personnel is in a chaotic condition.

The strength of the Russian Navy in ships built, building and projected, on Nov. 30th was:—

	Built.	Building.
Battleships, 1st class . . .	8	4
do. 2nd class . . .	3	—
do. 3rd class . . .	1	—
Coast defence ships . . .	6	—
Armoured cruisers . . .	3	4
Protected cruisers, 1st class	6	1

	Built.	Building.
Protected cruisers, 2nd class	2	—
do. do. 3rd class	1	—
Unprotected cruisers . . .	3	—
Torpedo vessels . . .	7	—
Torpedo-boat destroyers . .	68	29
Torpedo boats . . .	172	—
Submarines . . .	13	15

The principal Russian dockyards are situated as follows:—

**Kronstadt**: one large dock; three smaller. **Libau**: two large docks. **Sevastopol**: two large docks.

A moderate amount of naval construction is in progress. The battleship *Andrei Pervosvanni*, of an improved *Cesarvitch* type, was launched on Oct. 20th at St. Petersburg. The vessel was laid down in 1903 and will be completed in 1908. Several changes have been introduced in conformity with the lessons of the war. These include a complete armour belt, heavy deck armour, and a reduction of the small armament. The *Andrei Pervosvanni* will carry 4 12 in. and 12 8 in. guns, all in turrets. The dimensions as now given are—displacement, 17,400 tons; length, 460 ft.; beam, 80 ft.; depth, 27 ft. She is fitted with 25 Belleville boilers to develop 17,600 h.p., giving a speed of 18 knots. A sister vessel, *Imperator Pavel*, is to be completed in 1908. The *St. Eustace*, battleship, of 12,845 tons, was launched at Nikolaieff on Nov. 3rd. The armoured cruiser *Rurik*, of 18,000 tons, was launched at Vickers' yard at Barrow on Nov. 17th, and the *Admiral Makharoff*, of 8000 tons, was launched in April 1906 at La Seyne. These vessels are to be completed in 1907. The following ships returned from the Far East: the *Gromoboi*, *Rossia*, *Oleg*, and *Bogatyr*, and are to be repaired. Two battleships of 19,800 tons each are reported (Oct. 1906) to be projected. The battery of each vessel will be four 12 in., twelve 10 in., and twenty 4.7 in. guns; speed 18 knots; coal supply 1200 tons.

### Religion and Education.

The State religion is Græco-Russian, called the Orthodox Catholic Faith. The Emperor is the head of the Church, but the Holy Synod is the board of government, and the Procurator has very large powers. The orthodox number over 87,000,000; Dissenters about 2,000,000, Roman Catholics 11,500,000, Protestants and other Christians 5,030,000, Jews 5,000,000, Mahometans 13,890,000. All religions are professedly tolerated, but the Jews are generally and severely oppressed, and some other dissenters have at times suffered greatly. In 1905 a decree conceding liberty of worship was issued (see also **History** below). An Imperial Ukase was issued in Aug. 1903 ordering the restitution to the Armenians of the property of Armenian churches and schools in the Caucasus, of which they had been deprived by the Government in 1903.

In educational matters Russia is perhaps the most backward country in Europe. There were 84,316 primary schools in 1902, with about 4,700,000 pupils, though the lack of official information on the subject may make matters seem worse than they are. There are also secondary, technical and special schools, and about 20,000 students in the 9 Universities. The administration of justice, though nominally reformed in '64, is still much in need of reform and reorganisation.

**Industries, Railways, etc.**

The great majority of the population are engaged in agriculture. Grain, eggs, butter, and other agricultural products, timber, mineral oils, flax, linseed, and hemp are among the chief products of the country. There are immense forest areas, the State owning the largest part of them, and timber is largely exported. Coal, iron, and other minerals exist in large quantities, and the mining industry is increasing. There is a rapidly growing petroleum industry in the Baku district. The manufacturing industries have recently been in a depressed and stagnant condition. The railways of the Empire have a total length (1905) of 38,243 miles, and most of them belong to the State. There are in European Russia, exclusive of Finland, 50,000 miles of navigable rivers, canals, and lakes. Over 50 towns and cities are lighted by electricity, and electric tramways are numerous, while projects for the use of electric motive power are under way, and all the machine-works in the country have adopted it. By an Imperial Ukase, issued Nov. 26th, '97, the currency was established on a gold basis, and the relative value of silver and paper roubles in gold was permanently fixed.

**Statistics and Diplomatic.**

Russia is one of the largest of the military powers of the world. It has a European area of 2,095,616 sq. miles, with a population of about 106,265,000, and the total area of the Empire, including the Asiatic possessions, is 8,660,395 sq. miles. The total population in 1904 was estimated at 143,000,000. The fifty governments of European Russia, excluding Poland and Finland, contain 94,215,415 people, the Vistula Province (Poland) 9,455,943, and Finland 2,750,000. The governments and provinces in Asiatic Russia contain 22,697,469 people, including the Caucasus 9,248,695, Siberia 5,727,090, and Central Asian possessions 7,721,684. The Slavs, including the Poles, constitute about 73 per cent. of the population, Turco-Tartars about 9 per cent., Finns about 5 per cent., and Jews about 4 per cent.; the rest of the population being made up of Lithuanians, Germans, Armenians, and a variety of Asiatic peoples. The population of the capital, St. Petersburg, was (1903) 1,534,000. Moscow has 1,173,427 inhabitants, Warsaw 771,382 (1904) and Odessa 450,000. In Asiatic Russia the largest towns are Tiflis (pop. 160,000), and Baku (pop. 179,250) in the Caucasus; Tashkent (pop. 156,500) in Turkestan; Tomsk (pop. 63,500), and Irkutsk (pop. 51,500) in Siberia.

Revenue, ordinary, 1905, £202,455,845; extraordinary, £79,351,519; expenditure, ordinary, £192,517,604; extraordinary, £137,957,686. The deficit was met from the surplus remaining from the 1904 Budget and the 5 per cent. loan of 1906. The revenue and expenditure for 1906 were estimated to balance at £251,000,000 with a deficit of £48,000,000 to be provided by loan. The total expenditure on the war was estimated to have amounted to over £220,000,000. Imports, 1904, £58,360,000, including food-stuffs, £9,266,000; raw materials, etc., £33,280,000; manufactured goods, £15,670,000; exports, 1904, £95,500,000, including raw materials, £30,080,000; food-stuffs, £61,490,000; and manufactures, £2,320,000. Imports from United Kingdom to Russia, 1904, £15,285,157; exports to United Kingdom from Russia, £31,402,838, of which cereals amounted to £13,996,153; public debt,

1906, over £830,000,000, including more than £250,000,000 incurred in respect of railways. A Five-per-Cent. Loan of £89,325,000 (2,250,000,000 fr.) was issued in April 1906, and was taken up in Paris, London, St. Petersburg, Vienna, Budapest, and Amsterdam, London's share of the issue being £13,101,000 at 89. The loan is irredeemable for 10 years, after which it may be redeemed by annual payments going on to 1956.

**Ministry:** *Premier and Minister of the Interior*, M. Stolypin.—*Finance*, M. Kokovtsoff.—*Education*, M. v. Kauffmann.—*Agriculture*, Prince Vassiltchikoff.—*Commerce*, M. Filossoff.—*Ways and Communications*, Major-Gen. Schaffhausen.—*Schönberg-Schaufuss*.—*Controller*, M. Schwannebach.—*Marine*, Admiral Birileff.—*War*, General Rödiger.—*Foreign Affairs*, M. Isvolsky.—*Justice*, M. Shtcheglovitoff.—*Imperial Household*, Baron Fredericks.

**Council of the Empire:** *President*, Count Solsky.—*Vice-President*, M. Frisch.

**President of First Duma**, M. Muromtseff.—*Vice-Presidents*, Prince Dolgoroukoff and Professor Gredeskul.

**Procurator of the Holy Synod**, M. Isvolsky.

**Ambassador in London**, Count de Benckendorff, Chesham House, Chesham Place, S.W.—*Consul-General*, Baron R. U. Sternberg, 17, Great Winchester Street, E.C.

**British Ambassador, St. Petersburg**, Rt. Hon. Sir Arthur Nicolson, Bart., G.C.M.G., G.C.V.O., K.C.B., K.C.I.E.—*Councillor*, H. O'Beirne, Esq., C.B.

**British Commercial Agent:** H. A. Cooke, 7, Malaia Dmitrovka, Moscow.

**British Consuls.** *Consuls-General:* C. S. Smith (Odessa), A. P. Murray (Warsaw). *Consuls:* P. Stevens (Batoûm), H. M. Grove (Moscow), A. Woodhouse (Riga), A. F. Medhurst (Rostov), H. P. Smith (Kieff), O. Wardrop (St. Petersburg), C. J. Cooke (Helsingfors).

**History, 1906.**

The 1906 ed. carried the record of events up to Nov. 30th, 1905, when the postal and telegraph service of the Empire was disorganised by a strike, owing to a Government order forbidding the employés to form a union. Some of the post and telegraph offices were reopened (Dec. 5th), and foreign mails again began to be delivered, the Government consenting to reinstate those who had been dismissed for forming a union.

The Zemstvo Congress presented to Count Witte (6th) a Memorandum reviewing the desperate state of the country, and urging the Government to take prompt action, in accordance with the resolutions passed at Moscow in November, in order to avoid civil war. The Government promulgated a provisional law dealing with the Press, but to the general indignation it was found to revive in the worst form the system of arbitrary restrictions and punishments (qth). A number of repressive measures were also announced, which distinctly placed the Ministry in opposition to the progressive elements in the country. A state of siege was proclaimed in the Baltic Provinces, and sanguinary collisions with the troops followed at Riga, where the cutting of all communications left the town dependent for its food on supplies sent by sea. The Socialist parties, the Labour leaders, and the Union of Unions issued a joint appeal in St. Petersburg (14th) urging the people to

help overthrow the Government by refusing to pay taxes, and calling on the army to rise in defence of the people's rights. The Government then ordered the dissolution of the railway men's union, and arrested the executive committees of the Labour Unions, the Peasants' Congress, and the Postal and Telegraph Unions (17th). Warrants were also issued against the editors of all the papers which published the appeal. The reply of the various organisations was to declare a general political strike, which began at Moscow (20th) and at St. Petersburg (21st). It was on a very extensive scale. Moscow was left in darkness. The railways and the principal factories were deserted by the workmen, and over 125,000 men were out on strike in St. Petersburg alone. The Government made wholesale arrests of strike leaders, and at Moscow serious fighting occurred, the authorities using artillery to clear the streets. A pitched battle was fought in the Red Square (24th), and the Governor reported that 15,000 people had been killed or wounded. In the Baltic provinces the Government were quite unable to check the revolutionary movement, and another outbreak of fighting between the Tartars and Armenians was reported from the Caucasus. At Kharkoff barricades were erected, and fighting took place, and from all points of the Empire similar troubles were reported. Odessa and many other places were put under martial law, as was the whole of Poland, and gradually the strike broke down, work was resumed, and the disturbances took a less violent form.

An Imperial Ukase was issued (26th) ordering the elections to the Duma to be immediately proceeded with, the electoral law being an extension of the Bulguine system, based on class representation, and conferring the franchise on the following classes: (1) Owners of real property subject to taxation, provided they had been in possession of such property for at least one year; (2) owners of industrial concerns paying taxes; (3) persons paying inhabited house duty; (4) persons paying a trade tax; (5) persons possessing dwellings in their own names; (6) persons in receipt of salaries from the State, the zemstvos, the communal authorities, or the railway administration. The decree further provided for the proportionate representation among the electoral delegates of workmen employed in different factories. Factories employing 50 men and up to 1000 could depute one workman delegate, and those employing over 1000 depute one delegate for every 1000 workmen. The drawing up of the electoral lists was entrusted to the zemstvos and municipalities. There was considerable difference of opinion amongst the reformers whether they should participate in the election of a body which they contended would not give really national representation. The Constitutional Democrats met in congress at St. Petersburg (Jan. 10th), however, resolved to take part in the elections, and made preparations accordingly. The Marshals of Nobility assembled in congress at Moscow sent a deputation to the Czar to urge that the Duma be hastened and the date of its convocation fixed. The Government, however, seemed to have made up its mind to a reactionary and repressive policy, and from all parts of the Empire came stories of oppression and arbitrary injustice, accompanied by disorders and revolutionary outbreaks. Freedom of speech, of the Press,

of meeting, of association, and of the person, were mere empty words, and the prisons everywhere were filled to overflowing. The serious nature of the agrarian question was marked by a report published in February by the committee appointed to appraise the sum due to indemnify the landlords for the damage done in the agrarian riots. They put the amount at £3,400,000, and the cause of the riots was almost everywhere attributed to the peasants' lack of land, aided by the political unrest. Another estimate put the amount at £6,000,000. It was also stated that during the month ended Feb. 7th, 78 newspapers were suspended, a state of siege was proclaimed in 62 places, a minor state of siege in 34, 1400 people were summarily executed (excluding Moscow), 10,000 arrests were made, and temporary prisons were opened in 17 towns!

The elections for the Duma began in the province of St. Petersburg (March 4th), and as they proceeded there were many reports of undue police influence and of the continuance of a policy of repression. Nevertheless the Constitutional Democrats scored victory after victory in the towns, and secured many seats in the rural districts. There were over 200 Constitutional Democrats returned, 125 Independents, mostly peasants, and a number of National Democrats from Poland. Out of the whole number of members only 20 could be regarded as Conservatives, or members of the Right, and 33 as belonging to the Centre, mostly composed of Octobrists, or adherents of the manifesto of Oct. 30th, 1905. When the reactionary party saw their failure to control the elections an attempt was made to cripple the Duma beforehand by promulgating new organic laws before it could meet. This was understood to be Count Witte's plan, and on its being rejected he resigned (May 2nd). Nevertheless new organic laws were promulgated (8th), though the objectionable features attributed to Count Witte had been eliminated from them. The Constitutional Democratic Congress, which was sitting at the time, denounced this act as a violation of the rights granted in the manifesto of Oct. 30th, 1905.

The Duma and the Council of the Empire assembled in the Hall of St. George, at the Winter Palace (May 10th), to hear the Emperor's speech from the throne. The coldness of the reception accorded him by the newly elected members of the Duma was most marked. The Speech contained the following passages:—"I, for my part, will unswervingly uphold the institutions which I have granted, in the firm conviction that you will devote all your powers to the self-sacrificing service of the Fatherland, to a clear presentation of the needs of the peasants, which lie so close to my heart, to the enlightenment of the people, and to the development of its well-being. You must realise that for the great welfare of the State not only is liberty necessary, but also order, as the basis of laws. May my ardent wishes be fulfilled; may I see my people happy, and be able to bequeath to my son as his inheritance a firmly-established, well-ordered, and enlightened State. May God bless me, in conjunction with the Council of Empire and the Duma, in the work before us, and may this day prove the rejuvenation of Russia's moral outlook and the reincarnation of her best powers."

The Duma then began its sessions at the Tauris Palace, over 430 deputies being present.

M. Frisch, Vice-President of the Council of the Empire, presided, and the members signed a declaration of loyalty. **M. Mouroutseff**, the senior deputy for Moscow, was elected President. He called on M. Petrankevitch to speak first, and his first words were a demand for an amnesty. "All the prisons are filled," he said, adding "freedom must have no more victims." The President declared that their mission was based on respect for a constitutional monarchy, and that the Duma must have the right of initiative in legislation. On the other hand Count Solsky, in addressing the Council of the Empire, which opened its sittings (11th), referred significantly to the "supreme autocratic power." A resolution calling on the Czar to proclaim a full amnesty in all cases of religious, agrarian or political offences was carried (12th). The Address in reply to the Czar's speech was prepared by a committee, and read to the House (15th). It expressed the Duma's conviction that the Emperor intended the Duma to work on a constitutional basis, declared the necessity for universal suffrage and the abolition of the old forms of government, severely censured the period of repression that had followed the manifesto of Oct. 30th, 1905, and urged that a Ministry chosen by the Duma must be appointed. The existing state of siege throughout the land should be cancelled, and the Council of the Empire in its present form abolished. A programme of legislation was then laid down, which included laws guaranteeing the freedom and equality of all classes before the law and the abolition of all privileges based on class, religion or race, and the abolition of capital punishment. As to the agrarian question, the needs of the peasants should be met by devoting to this purpose the lands of the State, and by the compulsory expropriation of certain classes of private landed property at a fair price, the lands thus obtained being converted into a State reserve for distribution amongst the peasants as required, under the supervision of local committees. Other points were the necessity of labour legislation, free education, economy of expenditure, redistribution of the burden of taxation, the widest measure of local government, and satisfaction of the just claims of the various races and nationalities inhabiting the Empire; and, lastly, an eloquent appeal was made for a full amnesty. The amendments carried during the debate were in favour of women's suffrage, the rights of petition, of controlling loans, and of dealing with taxation; and the Address was then voted unanimously (18th).

The Ministerial declaration on the Address was read by the Premier, M. Goremykin, to the Duma (27th). It stated that amnesty was an Imperial prerogative, but Ministers were of opinion that to amnesty persons implicated in murder and acts of violence would not be beneficial to society. The proposed solution of the agrarian questions was quite inadmissible. Other laws referred to by the Duma would involve a radical alteration in the fundamental laws, which were beyond the province of the Duma, as was the proposed abolition of exceptional laws and of the arbitrary acts of officials. The Ministry announced that they were prepared to introduce legislation to deal with the agrarian question by abolishing restrictions on the ownership of land, and creating an Agrarian Bank, to establish universal elementary education, and reform secondary and

higher education, to establish local courts of justice, and to deal with income tax, death duties and other matters. Finally, the Ministry said they intended to exercise their power inflexibly. The Duma, by an almost unanimous vote of want of confidence, condemned this declaration, and recorded its view that the Ministry was unfit to remain in office. A fresh outbreak of disorders throughout the Empire followed, and a terrible massacre of the Jews was reported at Bialystok (June 14th), the authorities being undoubtedly privy to the affair. Disaffection began to appear in the Army, and two artillery battalions at Sevastopol mutinied and were disbanded, while other outbreaks were reported from Krasnoyarsk, Riazan, Tamboff, and Odessa. The 1st Battalion of the Preobrazhensky Regt. was ordered to Medved on account of its mutinous spirit, and deprived of the privileges appertaining to regiments of the Guard. A motion for the abrogation of capital punishment was unanimously carried (July 2nd), and a committee was appointed to prepare a Bill, which was presented and passed the same day. The Ministry strongly opposed the Bill.

The Ministry, acting on the instructions of the Tsar, introduced in the Duma a resolution with regard to the agrarian question. They proposed to hand over all arable Crown lands to the peasants on terms favourable to them, and, in cases where these lands were not sufficiently extensive to meet the requirements of the applicants, to purchase private properties, and to resell them to the peasants. The Government also proposed to support migration of the peasantry, to simplify the formalities in connection with land purchase, and to promote emigration to Siberia and Central Asia.

The Duma, however, resolved to issue a statement to the country, rejecting and condemning the Government's proposals, and appealing to the peasants to await calmly the carrying out of the Duma's scheme, which included the expropriation of landowners (20th). A number of newspapers were confiscated, and the offices closed (20th), and a Ukase was published dissolving the Duma (22nd). At the same time M. Goremykin was replaced by M. Stolypin as Premier, and M. Stichinsky, Minister of Agriculture, resigned. Troops were poured into St. Petersburg in anticipation of the popular resentment at this suppression of the Duma. The Council of the Empire was prorogued (23rd) until March 5th, 1907, at which date a new Duma was ordered to assemble. In his Manifesto the Czar said: "A cruel disappointment has befallen our expectations. The representatives of the nation, instead of applying themselves to the work of productive legislation, have strayed into spheres beyond their competence, and have been making inquiries into the acts of local authorities established by ourselves, and have been making comments upon the imperfections of the fundamental laws, which can only be modified by our Imperial will. In short, the representatives of the nation have undertaken really illegal acts, such as the appeal to the nation by the Duma. The peasants, disturbed by such anomalies, and seeing no hope of the amelioration of their lot, have resorted in a number of districts to open pillage and the destruction of other people's property. . . . We shall not allow arbitrary or illegal acts, and

we shall impose our Imperial will on the disobe-  
dient by all the force of the power of the  
State."

The ex-Deputies of the Duma assembled at  
Viborg in Finland, and issued a manifesto signed  
by over 200 of their number (23rd), urging the  
people to stand up for the trampled rights of  
popular representation, and advising them to  
give neither money nor soldiers during the  
period of suspension of the Duma. Loans con-  
tracted by the Government, they declared, would  
be invalid without the consent of the popular  
representatives. The Premier sent a telegram  
to all the authorities of the country ordering  
them to put down disturbances and revolu-  
tionary movements firmly and by all legal  
means. A mutiny broke out at Sveaborg (30th),  
but was soon suppressed, and so was a pre-  
mature rising at Kronstadt (Aug. 1st). The  
Social Democratic committee in St. Petersburg  
proclaimed a general strike, but it soon col-  
lapsed. The condition of the country, however,  
became worse than ever, and an attempt was  
made to murder the Premier by a bomb explosion  
at his house while he was holding a reception  
(Aug. 25th). The Government issued a declara-  
tion of policy (Sept. 6th), declaring that the  
campaign of terror entered upon by the revolu-  
tionists and indicated by the murders of and  
attacks on high officials must be suppressed,  
and the Government would meet violence by  
force. Provision was therefore made for sum-  
mary courts-martial in districts placed under  
martial law or in a state of extraordinary pro-  
tection. At the same time all the efforts of the  
State would be directed towards establishing a  
new régime, based upon law and reasonable  
liberty. Local agrarian committees would im-  
mediately devote their attention to ameliorating  
the lot of the peasants where there was a  
scarcity of land. Measures would be taken to  
remove the disabilities of the "Old Believers,"  
and to free Jews from those restrictions which  
produced irritation. A number of bills would  
be placed before the Duma, the reform of local  
self-government was promised, the introduc-  
tion of zemstvos and municipalities in Poland,  
the reform of the police, and the summoning of  
a national Church Council. The next news of  
importance published was of the massacre  
of Jews at Siedlce (11th), an outbreak similar  
to that at Bialystok.

The Stolypin Government, however, gradu-  
ally strengthened its position, and the state  
of the country undoubtedly improved in the  
autumn. One important factor which con-  
tributed to this result was the Agrarian programme  
of the Government, which proposed (1) the  
removal of peasant disabilities and the giving  
of power to the communes to buy out any  
member wishing to start individual farming;  
(2) the sale to the peasants through the Land  
Bank of 15,000,000 acres belonging to the State  
and the appanages and about 8,000,000 acres of  
private lands which had been offered to the  
peasants' banks; (3) a wide scheme of emigra-  
tion to Siberia, and the sale at nominal prices of  
55,000,000 acres belonging to the Crown in the  
Altai region, besides other enormous tracts.  
Further, the Government opened mixed land  
settlement committees in 167 districts of  
European Russia, to 139 of which the peasants  
sent delegates. The Imperial Peasants' Land  
Bank, established earlier in the year, also  
sanctioned the purchase of considerable areas  
of land by the peasants. On the anniversary

of the Constitutional Government Manifesto  
(Oct. 30th) the *Times* correspondent at St. Peters-  
burg paid a tribute to the honesty and sincerity  
of the Government, which he said had restored  
calm and confidence to the country. The Czar  
signed a Ukase removing all restrictions on the  
Old Believers, who number about 11,000,000. In  
November an unpleasant impression was pro-  
duced by the action of the Senate in directing  
that many of the peasants should be deprived  
of the franchise; but the Government promptly  
issued orders to the contrary, stating that the  
Senate's "interpretation" had been misunder-  
stood. At the same time the policy of severe  
repression was continued unabated, and  
strengthened the popular hostility to the  
Government.

### Provinces and Dependencies.

**Bokhara** is a feudatory Central Asian State  
attached to Turkestan, and lying between it  
and Afghanistan. It was conquered in '68. It  
is the most populous khanate of Turkestan,  
while Bokhara (75,000) is the principal  
trade centre of the region. Area, 92,000  
sq. m., pop. 1,250,000. The Ameer, Sayid  
Abdul Ahad (b. March 26th, 1859), succeeded  
'85; heir Sayid Mir Alim Khan (b. Jan. 3rd,  
'80), is allowed to maintain an army of 11,000  
troops for administrative purposes, and these  
are drilled by Russian instructors. The pro-  
ducts of the country are fruit, tobacco, cotton,  
corn, silk, and hemp, and the trade is almost  
entirely in the hands of the Russians. There  
is a considerable trade with Afghanistan.

The Grand Duchy of Finland was ceded  
to Russia in 1809. The Czar is the Grand  
Duke, and has a right of veto. There is a  
Senate nominated by the Crown, presided  
over by the Governor-General, which sits at  
Helsingfors, and is the chief administrative  
body. By various decrees from '99 to 1903 the  
powers of local self-government which Finland  
possessed under its old constitution were  
taken away, but in 1905 the Czar restored  
the independence of the Finnish army, re-  
established the irremovability of the judges,  
and granted the demand of the people for the  
restoration of its legislative independence. By  
the manifesto of Nov. 4th, 1905, a Diet or  
National Assembly was established, the old con-  
stitutional powers of the Senate were restored,  
and the responsibility of the Secretary of State  
to the Diet was admitted. The members of  
the National Assembly are elected by universal  
suffrage for three years, and women can vote  
and are eligible for election. The chief products  
are timber, farm produce, etc. Forests cover  
32,296,000 acres, or about 35 per cent. of the  
area of the Grand Duchy. There is a large  
class of small peasant proprietors. Railways  
exist, with a total length of about 2106 miles,  
all but 200 miles of which belong to the Finnish  
Government. Chief town, Helsingfors (pop.,  
including Sveaborg and the troops, 130,000).  
Area, 144,255 sq. miles: pop., 1902, 2,781,017.  
Revenue, 1906, £4,309,812; expenditure, £3,881,620.  
Imports, 1905, £10,719,840; exports, 1905,  
£9,710,760.

Governor-General, M. Gerhard.

British Consul, C. J. Cooke (Helsingfors).

**Khiva.** A state in Central Asia lying to the  
south of the Sea of Aral, and bounded on the  
east by the Oxus and on the south and west  
by Transcaspia. It has been subject to Russia  
for about two hundred years, but in '72 it became

definitely a Russian vassal state. The reigning Khan is Seyd Mahomed Rahim, who succeeded in '65, and his third son, Asfendiar, is the heir apparent. The inhabitants are Mohammedan Sunnis. Area, 22,320 sq. m.; pop. 800,000. The chief products are silk and cotton.

**Poland** includes ten provinces, with a total area of 49,159 sq. miles, and a population in 1903 of 11,759,642. The population increases very rapidly, and of the above total about 1,320,000 are Jews and 500,000 Germans. The country had a separate constitution 1815-30, and a separate government '30-64; but in the latter year it was deprived of its administrative independence, and in '68 it was incorporated as an integral part of Russia, trial by jury was abolished, and the official use of the Polish language was prohibited. The majority of the inhabitants are Roman Catholics. There are two main parties, one the Nationalist party and the other the Socialist party. The National Democrats, who advocate a policy of autonomy, secured a large majority of the seats in the elections for the Duma in 1906. About 76 per cent. of the population live in the rural districts, and the peasants own about 43 per cent. of the land; but of the total rural population of 7,000,000, about 3,000,000 own no land, and are dependent on hiring themselves out as labourers. Russian Poland is one of the largest pig-producing countries in Europe. Industrial development is proceeding rapidly. Capital, Warsaw; pop. 771,382.

**Siberia** is a Russian province, larger than Europe, which is only separated from the rest of the empire by the low-lying Ural Hills, a slender barrier which has now been broken down by the extension of the Russian railway system into Siberia, and by incorporating the West Siberian governments with the European Russian administrative system. The Zemstvo system was extended to the province in April 1905. A uniform system of public justice was instituted in July '97 by order of the Czar, in place of the existing arbitrary administration of autocratic officials. Trial by jury was not conceded, but justices of the peace are appointed by the Crown, and they also act as *juges d'instruction*. The higher tribunals consist of eight circuit Courts in the towns of Tomsk, Tobolsk, Chita, Krasnoyarsk, Irkutsk, Yakutsk, Blagovestchensk, and Vladivostok, and a Court of Appeal or Palace of Justice above these at Irkutsk, the capital. Area, 4,833,496 sq. m.; pop., 1904, 5,784,382. Valuable goldfields have been discovered in the Government of Yeniseisk, and in the basins of the Obi, Lena and Amur rivers, 50,000 men being employed in mining. Of recent years thousands of Russian peasants have emigrated hither, and nearly all the fertile soil free of forest and outside the steppes has been occupied. A new sea route through the Kara Sea to Siberia has been opened up, chiefly by English enterprise.

The railway connection between Russia and Siberia forms the greatest railway undertaking in the world. The first sod was cut at Vladivostok, on May 24th, '91, and the line was laid in three parts: (1) running from the European frontier in the Ural, eastward; (2) from Vladivostok, on the Pacific, running west; (3) the middle section, near Lake Baikal, formed to join the other two. On Dec. 28th, '99, the last rails were laid on the Trans-Baikal section,

thus establishing steam and boat communication between Western Europe and the Pacific coast. The Trans-Siberian line bifurcates into two branches at Stretensk—one going south to Port Arthur and Peking and the other eastward to Vladivostok. The total distance from St. Petersburg to Vladivostok is 9781 versts, or 6521 miles, and to Port Arthur 5913 miles. On October 10th, 1905, it was reported that the Trans-Siberian Railway was to be double-tracked without delay; according to a St. Petersburg telegram of July 3rd, 1906, the Minister of Ways and Communications had submitted a bill for the purpose.

**Transcaspia** is a Russian province in Central Asia, including the Turkoman region between the Caspian and the Oxus. Area, 214,237 sq. m.; pop. 377,000. The administrative centre is Askabad. In this province is Merv, an oasis situated almost midway between Meshed and Bokhara, and Herat and Khiva. It has an area of 1600 square miles, and a population of a quarter of a million Turkomans. There is no town of Merv—the thickly packed prosperous settlements spread over the oasis constituting what is recognised under that name. About 10,000 Russian troops are maintained in the oasis, which is distant 200 miles from Herat.

**Turkestan** is another province in Central Asia. It comprises the khanates and deserts annexed by Generals Tcherniaeff and Kaufmann between 1860 and 1875, and now known as the provinces of Samarcand, Fergana, and Syr-Daria. Area about 400,000 square miles, with 4,900,000 inhabitants. The principal towns are Tashkent, pop. 156,500; Kokand, pop. 86,704; and Samarcand, pop. 58,194.

The Orenburg-Tashkent Railway, according to a St. Petersburg telegram of Oct. 13th, 1904, was finished by that date, the length being given at nearly 1900 kilometres. A special article in the *Times* of Oct. 27th enlarged on the strategic importance of the railway as an advanced Russian base in Asia. The writer said that if the new railway is destined to achieve but small economical results, its value as a strategical factor must not be underrated. Hitherto Tashkent has been a comfortable garrison for 10,000 men. Henceforth it will become the storehouse and advanced base of the Russians in Asia. On Aug. 8th, 1905, the northern section of the Orenburg-Tashkent Railway was thrown open to local traffic. Reservoirs have had to be constructed in parts of the general route, owing to the waterless nature of the country. A telegram from Simla, Sept. 20th, reported that the Russians were bridging the Oxus between Karki and Khwajasalar, presumably in connection with a railway from Samarkand to the river. According to the *Times* of Oct. 3rd, the prospect "appears to be that the Volga and the Oxus will ultimately be linked by way of Samarkand, Tashkent, and Orenburg, with a line having the same gauge throughout, and possessing great strategical value." On June 28th, 1906, the Russian Central Asian railway system was brought into direct communication with the European portion of the Empire. From St. Petersburg, July 3rd, it was reported that a special commission had been appointed to proceed to Turkestan and to consider, *inter alia*, the question of connecting the Trans-Caspian lines with the Siberian Railway.

## S

**St. Andrews.** The Most Rev. George Howard Wilkinson, D.D., Bishop of, and Primus of the Episcopal Church in Scotland, is the son of George Wilkinson, Oswald House, Durham, and was b. 1833 and ed. at Durham School and Oriel Coll., Oxford. After holding minor appointments he became Vicar of St. Peter's, Eaton Square, '70-'83, was Select Preacher at Oxford '79-'81, and appointed Bishop of Truro '83-'91. In '93 he was appointed Bishop of St. Andrews, Dunkeld and Dunblane, and in 1904 Primus of the Scottish Episcopal Church. He has published several devotional books, "Instructions in the Devotional Life," etc. Feu House, Perth, Scotland.

**St. Deiniol's Library, Hawarden,** of the foundation of William Ewart Gladstone. The main design of the institution, as declared by the founder, is the promotion of Divine learning. All students, whether clerical or lay, and without restriction of communion or religion, are welcome to the opportunities it offers. The Library includes the whole of Mr. Gladstone's personal collection, and amounts to more than 35,000 volumes. There is a residence with accommodation for 20 students. Board and lodging are here provided at 27s. 6d. per week. Warden, Rev. Gilbert C. Joyce.

**St. John Ambulance Association.** Established in 1877, by the Order of St. John of Jerusalem. A course of instruction is given to students, and considerably over 500,000 certificates have been awarded to persons of both sexes. An Invalid Transport Corps has also been formed. The work has been extended all over the world. President, H.R.H. the Prince of Wales, K.G.; Chief Secretary, Col. Sir Herbert C. Perrott, Bart., C.B. Head Offices, St. John's Gate, Clerkenwell, London, E.C.

**Saint-Saëns, Charles Camille,** composer, organist, and pianist, was b. at Paris, Oct. 9th, 1835. He distinguished himself at the Conservatoire under Benoist, and was appointed organist of St. Méry, Paris, '53, and of the Madeleine '58-'77. He first appeared in London (as a pianist) in '71; since then his visits have been frequent. He has composed several symphonies, symphonic poems, cantatas, sacred and secular, much chamber music, and many songs. His operas include "Samson et Dalila," first heard at Weimar in '77, and brought to Covent Garden Promenade Concerts, Sept. '93, and "Henri VIII." (Paris '83 and London '98). One of his earliest successes in this country was the quaint "Danse Macabre." He received the Mus. Doc. degree at Cambridge in '94.

**Saionji, Marquis,** Japanese Premier, belongs to an illustrious family which in the past has had marriage connections with the Imperial family. B. at Kioto in 1849, as a youth of eighteen he gathered volunteers and fought for the Emperor in the revolution. He then went to Paris, was a student in the Latin Quarter, and returned to Japan in his thirty-third year. He at once started a daily paper at Tokio, and proclaimed himself a Liberal of the European type. His formidable attacks upon the then Government exerted a beneficial influence generally. Subsequently the Marquis became Minister to Austria-Hungary and then

to Germany. On his return to Japan he joined the first Ito Cabinet as Minister of Education, a post which he again occupied in the second Ito Cabinet, having been Minister of Foreign Affairs in the interval. A great friend of Marquis Ito, Marquis Saionji assisted him to form the Constitutionalist Association (1900). At three difficult crises the Mikado has called Marquis Saionji to be Prime Minister *pro tem.* G.C.M.G. May 1906.

## SALVADOR.

Salvador became an independent republic of Central America on the dissolution of the Central American Federation (which included Costa Rica, Guatemala, Honduras, Nicaragua, and Salvador) in 1839. It is bounded on the south by the Pacific and on the north by Guatemala and Honduras. It is governed by a President and a Congress of seventy Deputies, elected respectively for four years and one year, by universal suffrage. Education is free and obligatory. The army numbers only 4000 men, but there is a militia of about 25,000. The bulk of the population is engaged in agricultural pursuits. The chief products are coffee, indigo, sugar, rubber, and tobacco. Cotton growing now receives State encouragement. There is some mining done also, chiefly gold mining. Trade is carried on chiefly with the United States, the United Kingdom, France, and Germany.

Following on fighting which broke out in July 1906, a treaty of peace was signed by the representatives of San Salvador, Guatemala, and Honduras (July 20th). See GUATEMALA.

Area, 7225 sq. m.; pop. 1,006,848, of whom about 75 per cent. are of mixed race and 25 per cent. Indians. Capital, San Salvador, pop. 60,000. Revenue, 1903, £638,468; 1904, £703,540; 1905, £812,535; expenditure, 1903, £616,380; 1904, £697,790; 1905, £753,113. Imports, 1905, £2,441,308; exports, 1905, £2,700,000. External debt, estimated at £726,500, was in '99 taken over by the Salvador Railway Co., Ltd., in consideration of the transfer to it of the railways and other concessions formerly held by the Central American Public Works Co. Amount outstanding, Jan. 1st, 1905, £665,133.

President, Señor Escalon (assumed office March 1st, 1904); Vice-President, Señor Velado.

Chargé d'Affaires in London, Señor Santiago Perez Triana, 29, Elsham Road, Kensington.

Consul-General in Great Britain, Mr. M. J. Kelly, 8, Idol Lane, London, E.C.

British Minister (at Guatemala), Lionel Carden, Esq.

British Consul, W. E. Coldwell (San Salvador).

## SAN DOMINGO.

San Domingo is the republic which occupies the eastern end of the island of Hayti (q.v.), and was founded in 1844 after a revolution which overthrew the Spanish rule. It is divided into six states or provinces, and six maritime districts, and is governed by a President, chosen by an electoral college for a term of four years, and a National Congress of twenty-four members elected for two years. Capital, San Domingo, pop. 20,000. The inhabitants of the island are composed chiefly

of mulattoes, and the Spanish language is that which is chiefly spoken. The State religion is Roman Catholic. Education is free and compulsory. There is said to be now some progress, and the country is being opened up by railways. Exports consist of valuable timbers, coffee, tobacco, cocoa, bananas, and sugar. Cotton is now being grown. Mining is largely in the hands of Americans. The customs duties are the main source of revenue. By an agreement between the United States and the Dominican Government signed Feb. 7th, 1905, the United States Government undertook to collect the Customs' receipts, to hand over 45 per cent. to the Dominican Government and to apply 55 per cent. to the service of the foreign debt. The arrangement was put into force in April 1905, though it had not been sanctioned by the United States Senate. In Sept. 1906, however, it was stated that Senor Velasquez, Dominican Finance Minister, had suggested a new arrangement, under which the United States would still collect the Customs and create a sinking fund for the liquidation of the foreign debt, but would not itself make the payments.

Area, 18,045 sq. m.; estimated pop. 650,000.

Revenue, 1900-1, £478,000; expenditure (no returns); public debt, 1905, about £6,456,000; imports, 1901, £646,635; exports, £1,201,175.

President, Ramon Caceres (appointed Dec. 2nd, 1905).

Consul-General in London, M. Miguel Ventura, 17, Coleman Street, E.C.

British Consuls, A. G. Vansittart (Port-au-Prince, Hayti).

**San Giuliano, Marquis di**, Italian Ambassador to Great Britain. The descendant of a very old Norman-Sicilian family, he was b. in 1833, and was destined for politics from early manhood. For a long time a Sicilian Deputy, he acquired in the Italian Chamber a brilliant reputation by his oratorical gifts, and was soon remarked as one of the most promising of the young Conservatives. Highly cultured, he has travelled much and devoted considerable time to the study of foreign politics. He was defeated at the general elections of 1904, and then made a Senator by Signor Giolitti. He was Postmaster-General in '99, and Minister of Foreign Affairs in 1900. Marquis di San Giuliano is a warm friend of England, knows English, is

a student of Dante, and President of the Italian Geographical Society.

**San Marino** is an independent republic in the north-east of and under the protection of Italy, surrounded by Italian territory, and governed by a Great Council of 60 members, two of whom are appointed every six months to act as Regents. Area, 33 sq. miles; pop. 11,002. Exports, wine, cattle, and stone.

British Consul, Major W. P. Chapman, residing at Florence.

**Santos Dumont, M.**, is a Brazilian of means and leisure, whose ambition it is to establish that an airship for aerial navigation "is not a mere plaything but a practical invention, capable of being applied in a thoroughly useful fashion." He won the Deutsch prize, offered to the first aeronaut who should go to and return from the Eiffel Tower, the Aërostatic Park, in Paris, being the starting-point, on Oct. 19th, 1901. In November 1901 the Brazilian Congress voted him £5000 in recognition of his great services to aërostatic science. Chevalier of the Legion of Honour 1904. He is now devoting himself to flying machines. See AERIAL NAVIGATION.

**Savings Banks (Trustee)** were founded early in the nineteenth century. Regulated originally by Acts 57 Geo. III., cc. 105 & 130; now by the Act 26-7 Vict., c. 87, and amending Acts, and by regulations framed by the Lords' Commissioners of H.M. Treasury. Funds invested in banks of England and Ireland in names of Commissioners for reduction of the National Debt. In the year 1905 they were 224 in number, with 123 Branch Banks and funds amounting in the aggregate to £62,304,000, including "special investments"—i.e. moneys invested independently of the Government. They are very successful in promoting thrift and in fostering habits of saving, especially in large towns and in Scotland, where they were formerly known as National Security Savings Banks. In '91 a Statutory Committee was appointed to exercise certain limited powers of supervision and control over them, inspecting them periodically and reporting annually to Parliament. This Committee is known as the Trustee Savings Banks Inspection Committee, whose Chairman is Sir Albert K. Rollit, LL.D. Secretary, W. S. Cameron. Offices, 9, Serle Street, W.C.

## SCIENTIFIC PROGRESS, 1906.

### BRITISH ASSOCIATION MEETING, 1906.

Founded at York in 1831, at the suggestion of Sir D. Brewster, for the purpose of stimulating scientific inquiry and for promoting the intercourse of scientific men. The Association meets annually for a session of one week, in some large provincial town, but never in London. An annual volume is issued, containing not only the addresses and abstracts of papers communicated to the several sections, but also reports on the state of science, prepared by committees specially appointed, and often assisted by grants of money for conducting researches. Within the period 1834-94, a sum of £68,300 had been allotted by way of grants.

The 1906 meeting, held in South Africa, has been suitably commemorated by the foundation of a bronze medal intended for South African research students, the annual award of which is vested in the South African Association for

the Advancement of Science. Sufficient subscriptions were forthcoming also to establish a fund, out of which there will be paid annually a sum of money to the recipient of the medal. The latter was designed by Mr. F. Bowcher.

The 1906 meeting was held at York, with an attendance of 1959. In the presidential address Prof. E. Ray Lankester offered a retrospect of scientific progress during the 25 years that had elapsed since the Association last met at York. The new facts discovered, and the ripening of fresh ideas and conceptions, were severally passed in review, their effect on the interests of society at large being discussed. In the President's opinion there had been continuity and healthy evolution in the realm of "natural knowledge." Science had not come to the end of her work—had, indeed, only as yet given mankind a foretaste of what she has in store for it; her methods and her accomplished results were sound and trustworthy, serving

with perfect adaptability for the increase of true discovery and the expansion and development of those general conceptions of the processes of nature at which she aims. A highly valuable section of the address related to *Metschnikoff's* work on disease germs and immunity, especially with reference to those corpuscles of the living body known as *phagocytes*.

In the *Mathematical and Physical Section*, the President, Principal E. H. Griffiths, F.R.S., discoursed upon recent inquiries respecting the physical constitution of the earth. The importance of a study of what was termed the natural history of the elements was urged, involving the assistance of the practical engineer, the geologist, the metallurgist, and the chemist. Discussions on the evolution (transmutation) of the elements, radio-activity, and the internal structure of the earth, opened respectively by Mr. F. Soddy and the Hon. R. J. Strutt, evoked strong interest, and will certainly carry historical value. A noteworthy sequel was a correspondence in the *Times*, in which Lord Kelvin traversed various statements that had been advanced. See *Chemistry and Physics*, p. 509.

In the *Chemical Section* the President, Prof. Wyndham Dunstan, F.R.S., dealt with the chemical problems that await solution in connection with the utilisation of the raw materials and economic products of the nation's colonies and tropical possessions. *Agricultural chemistry* received a large measure of attention, and there was a discussion on the subject of diet values. Reports on the chemistry of rubber and gums, and on the hydrolysis of sugar, were features of the proceedings.

In the *Geological Section* the President, Mr. G. W. Lamplugh, F.R.S., discussed at some length the subject of British drifts and the interglacial problem. The author's field-work had led to the view that no proof of mild interglacial epochs, or even of one such epoch, was to be met with in certain typically glaciated districts in England, Ireland, and the Isle of Man.

In the *Zoological Section* the President, Mr. J. J. Lister, F.R.S., entitled his address "The Life-history of the Foraminifera." Among papers read was one giving an account of the third Tanganyika expedition.

In the *Geographical Section* the President, Sir George I. Goldie, K.C.M.G., discoursed generally on geographical advance. There was a discussion on coast erosion, arising from a paper by Mr. Clement-Reid, F.R.S.

In the *Economic Science and Statistics Section* the President, Mr. A. L. Bowley, gave an address on the importance of scientific method in statistical research.

In the *Engineering Section* the President, Prof. J. A. Ewing, F.R.S., dealt with the inner structure of metals, and the manner in which they yield under strain. Mr. G. Stoney supplied a paper on recent advances in steam turbines, land and marine; and Sir J. Wolfe Barry on standardisation in British engineering practice.

In the *Anthropological Section* the President, Mr. E. Sidney Hartland, gave an address on the origin and relations of religion and magic. Valuable reports were presented respecting British anthropometric observations.

In the *Physiological Section* Prof. Francis Gotch, F.R.S., the President, discoursed upon various aspects of living processes. The discus-

sions that took place in this section were highly informing, especially those on the minimum proteid value in diet, and on the physiological value of rest.

In the *Botanical Section* the President, Prof. F. W. Oliver, F.R.S., entitled his address "The Seed, a Chapter in Evolution."

In the *Educational Science Section* Prof. M. E. Sadler dwelt upon school reform. Many valuable papers were read on various branches of educational work and kindred subjects. Sir Lauder Brunton urged the medical inspection of schools.

The Association is to meet at Leicester on July 30th, 1907, under the presidency of Sir David Gill, K.C.B., F.R.S.; at Dublin in 1908; and at Winnipeg, Canada, in 1909.

President, Prof. E. Ray Lankester, F.R.S.; General Secretaries, Major P. A. MacMahon, F.R.S.; Prof. W. A. Herdman, F.R.S. Assistant Secretary, A. Silva White. Offices, Burlington House, W.

### ANTHROPOLOGY, 1906.

The Anthropological Institute has published some coloured *Pigmentation Charts* of the British Islands and of Central Europe in illustration of Dr. Beddoe's Huxley lecture on *Colour and Race*. Systematic observations on the colour of hair and eyes have been carried on by this anthropologist for upwards of half a century, and notwithstanding objections based on its mutability he still holds that colour is a valuable element in ethnical classification. The maps indicate a distinct darkening in passing across Britain from N.E. to S.W.—that is, from the colder to the warmer parts, or from a region of dryness to one of moisture and mildness. The changes in pigmentation are, however, mainly explicable by racial movement rather than by environment. Dr. Beddoe marks the diminution of the old blond lympho-sanguine stock, which is yielding to a darker and more mobile type, representing the proletariat and better adapted to the atmosphere of our great cities.

It is of first importance that all anthropological observers should take measurements of the human body on the same plan, so that the results may be strictly comparable. A standard method of measurement has consequently been drawn up by a committee of the British Association, accompanied by illustrations of the adult male human figure, showing the points between which the dimensions should be taken. Many persons willing to take measurements find it difficult to determine the exact points of reference, and hence these figures, on which they are clearly marked, and which are due to Prof. D. J. Cunningham, will be extremely helpful.

At the triennial meeting of the International Congress of Prehistoric Anthropology, held at Monaco, the interest centred in the exploration of the limestone caves of Mentone. Some of these, investigated by the Prince of Monaco, have yielded interesting results, which form the subject of memoirs now in preparation. Dr. Verneau describes, under the name of *l'Homme de Grimaldi*, a type represented by human remains from the cavern of Grimaldi, near Mentone, apparently similar to a neolithic negroid type found in Brittany. The skull is negroid, with prognathous jaws; the fore-arm is long, and the projection of the heel enormous. Human figures occur in the remarkable paintings on the walls of the long tortuous cave of

Combarelles, in the Dordogne. These paintings, and those from the Font de Gaume and some other caves, have been copied by the Abbé Breuil, whose work will probably be published by the Prince of Monaco. It is believed that the cave-paintings of animals were not generally for decorative purposes, but must have had some magical significance.

The glacial terraces of the Pyrenees have been studied by M. Obermaier in their relation to prehistoric man. He divides the last interglacial period into two phases—an earlier, correlated with the Chellean period, when man was contemporary with the straight-tusked elephant and the hippopotamus, and a later, colder phase, corresponding to the Acheulean period, when man coexisted with the mammoth and woolly rhinoceros. With the last glacial invasion he brings into relationship the Mousterian period, which was followed by the Solutrean and finally the Magdalenian period, an age when the glaciers had disappeared but the reindeer still lived in France.

Dr. W. H. Rivers has written a work on the Todas, an isolated pastoral people, inhabiting a lofty plain in the Nilgiri Hills of southern India, with whom polyandry is a universal custom. Mr. Edgar Thurston, the Superintendent of Ethnography at Madras, who has been engaged for years in bringing together the scattered information on the manners and customs of the natives of southern India, has published a volume of "Ethnographic Notes," of much value to the student of sociological questions as well as of general ethnography.

An important work on the Pagan Races of the Malay Peninsula has been written by Messrs. W. W. Skeat and C. O. Blagden, containing the result of much personal observation during official residence in the peninsula.

Sir Harry Johnston, in his great work on "Liberia," devotes much space to anthropology. His classification of the indigenous population roughly groups them as Mandingo, Kpwezi and Kru.

In Dr. H. B. Guppy's "Observations of a Naturalist in the Pacific" there is an important chapter on the Plants of the Polynesians, in which the author shows that, in addition to the plants now cultivated, there exists in Polynesia another group of food-plants, used only in times of scarcity, and probably representing the food of a pre-Polynesian people.

A National Maori Museum is in course of formation in New Zealand, as described by Mr. A. Hamilton in the *Bulletin* of the Colonial Museum. The exportation of Maori relics is now restricted by legislation, and the Museum will seek to secure everything illustrative of the race, and especially of their art.

The Huxley Lecture of the Anthropological Institute was delivered by Prof. Flinders Petrie, who devoted his discourse to the subject of "Migrations," and traced the many changes in the people of Egypt during the 10,000 years of its civilisation, as revealed mainly by skull-measurement.

#### ASTRONOMY, 1906.

The sun-spots of 1906 were closely characteristic of the period which marks the last stage of sun-spot *maxima*. In 1905 the frequency of spots visible to the naked eye was most marked. Such spots were rare in 1906, the three chief examples being the great groups of Jan. 21st to 30th, March 16th to 27th,

and July 28th to Aug. 5th. The large spot of July and August is especially interesting, as it was formed suddenly on the visible hemisphere of the sun, and developed with such rapidity that on July 31st its area was  $\frac{1}{16}$ th of the sun's visible surface, and thus easily visible to the eye. Though such spots have been rare, there has been a marked tendency to the formation of numerous spots of moderate size, following one another at short intervals along a parallel of latitude, and so forming long processions stretching across the sun's disc. The most remarkable of these extended groups were observed in Nov. 1905 and in March and July 1906. The spot activity showed a steady decline during the months of August, September and October 1906. So marked was this decline that during October there were no less than five days upon which the sun was almost entirely free from spots.

Prof. Ceraski, by comparing the light of the Sun with that of Venus in the daytime, and that of Venus with Polaris, Procyon, and Sirius at night, finds the stellar magnitude of the sun 26.59.

Mr. Cowell, of the Greenwich Observatory, has been engaged for the last three years in an endeavour to improve the tables of the moon. His first step was to discuss the Greenwich Meridian observations of the moon extending over 150 years, in order to determine what are technically termed inequalities of short period—i.e. deviations from the mean motion which occur in cycles of a few months or years. The determination of terms of longer periods, technically called secular terms, necessarily requires observations extending over centuries. These, however, are not available, the only observations recorded being those of eclipses. Could we say with certainty that an eclipse was observed at a specified place on a particular date, we should have the means of computing the moon's place very accurately, by reason that eclipses can only happen under certain relative positions of the sun, moon, and the earth. Of course, these ancient observations would be rough, but fortunately this would be compensated by the great interval elapsed. The difficulties lie more in the direction of interpretation of the historical records, and in particular in deciding the spot on which the observation was made. Naturally, ancient Greek and Roman records have been discussed before by Hansen, Newcomb, and others; but their attempts only led to the belief that ancient historians had described these phenomena with hopeless inaccuracy. Mr. Cowell, however, has attacked them in such a manner that he has been able to reconcile many such eclipses with computations derived from his improvement to the tables—thus showing that his corrections rest on good foundation. Put briefly, Mr. Cowell's new method differs from that of previous investigators in that he recognised the possibility that the mean motion of both sun and moon might be changing, while previous researches assumed variability in the moon alone. Mr. Cowell therefore says that we must accept "certain definite rates of diminution in the length of the month and year as measured in days"; that the ratio  $\frac{\text{day}}{\text{year}}$  increases one part

in 16,000,000 in the space of a century. Consequently, if it is the day changing, it is increasing by '005" in a century; if it is the year changing, it (the year) decreases by 2" in one century.

The total eclipse of the moon on Feb. 8th was well observed, the most marked feature being the strong copper colour of the eclipsed surface.

Of the large number of minor planets discovered in 1906, that found by Wolff on Feb. 2nd, and known as T.G., is of great interest, owing to its remarkable orbit. Its mean distance is practically the same as that of Jupiter, and its period is 12 years. It is 13th magnitude.

Comet Finlay (1886, vii), whose period is 6½ years, was not seen at its last return in 1899, but was found this year on July 16th by Kopff. It shows very faint on a photograph secured at Greenwich. Comet Holmes, discovered in '92, another periodic comet of 6·8-year period, was due in the spring, but was not seen until Aug. 28th (by Wolff). The new comets are: (1) One of 7th mag., discovered on Nov. 17th, 1905, by Schaer (Geneva), which passed within 4° of the North Pole, and is known as 1905 b; (2) an 8th mag., discovered Dec. 6th, 1905, by Giacobini (Nice), and known as 1905 c. On a photograph taken at Greenwich early in January the comet is bright, and has a tail 2° in length; (3) Comet 1906 a was found by Brooks (Geneva, U.S.A.) on Jan. 6th, 1906; (4) Comet 1906 b was found by photography by Kopff on March 3rd; (5) Comet 1906 c, discovered by Ross (Melbourne) on March 18th; and finally (6) 1906 d, found by Kopff on Aug. 22nd. These comets were all faint.

The San Francisco Earthquake did no direct damage to the Lick Observatory, but crippled its income through damage done to property belonging to the State and to the University. By the death of Mr. C. T. Yerkes the Yerkes Observatory received \$100,000. The medal of the Royal Astronomical Society was awarded to Prof. W. W. Campbell for his researches in spectroscopic stellar motions.

Books, catalogues, etc., published during the year were: Porter, "Catalogue of 4280 Stars"; Bossert, "Catalogue of 3799 Stars"; Lewis, "Memoir on Struve's Double Stars"; Clerke, "Modern Cosmogonies"; Campbell, "First Catalogue of Spectroscopic Binaries."

Future Events.—The total solar eclipse of Jan. 13th, 1907, will pass over the N. end of the Caspian Sea, the S. end of the Sea of Aral, between Tashkent and Samarcand, Turkestan, Mongolia, and end at sunset on the mainland N.W. off Saghalien. The duration at Tashkent and Samarcand is 2 mins., but the transport difficulties are great. The International Conference for co-operation in Solar Research will meet at Meudon, Sept. 1907.

### BIOLOGY, 1906.

The Mediterranean Fever Commission (see ed. 1906) definitely ascertained that the disease known as Malta fever, due to a microbe, *Micrococcus melitensis*, is propagated in the main by the medium of the milk of infected goats, 41 per cent. of the animals on the island falling within this category. The Commission, having induced the authorities to ensure strict precautions in the use of goats' milk, the number of fever cases rapidly diminished. During the months of July, August and September, 1905, no fewer than 258 soldiers were under treatment for the disease, whereas during the corresponding months of 1906 there were only 26 detentions in hospital. An article by Major Ronald Ross, F.R.S., in the *University Review*,

summed up conveniently the beneficent value of discoveries of this kind when properly utilised by persons in authority. Consult Reports of the Commission, Parts iv. and v.

As regards sleeping sickness (see ed. 1906), the investigation has entered on a new phase. The protozoan origin and the manner of dissemination of the disease are considered by the Royal Society's Tropical Diseases Committee to have been determined beyond question, and efforts are now to be directed towards finding some therapeutic treatment which shall cope with it. Prof. A. R. Cushny, of University College, London, has been appointed as a special investigator of possible specifics, and is working on the subject at the Lister Institute. Prof. E. A. Minchin, returned from Entebbe, Uganda, after carrying out much useful work, published a statement of the results obtained with reference to the relation of the tsetse-fly, *Glossina palpalis*, to the trypanosome of sleeping sickness, *Trypanosoma gambiense*, and to other species of trypanosomes which the fly carries. Associated with him in this work was the late Lieut. Tulloch, R.A.M.C., who, through mischance in the laboratory at Entebbe, contracted sleeping sickness himself, and succumbed to the disease (June 20th). Consult Reports of the Sleeping Sickness Commission, Nos. vii., viii. The drug atoxyl has been used in the treatment of trypanosomiasis with apparent success. (Thomas and Breinl, *Proc. Roy. Soc. v. 76.*)

The inauguration of a Chair of Protozoology in the University of London, with Prof. Minchin as the first occupant, was of special significance as showing that the question of the causation of tropical diseases, together with allied studies, will henceforth constitute part of the established scientific curricula of the University.

The annual Croonian Lecture of the Royal Society, delivered by Prof. J. N. Langley, F.R.S., was entitled "On Nerve Endings and on Special Excitable Substances in Cells." The Society's Gold Royal Medal was awarded to Dr. D. H. Scott, F.R.S., for investigations and discoveries in connection with the structure and relationship of fossil plants; the Copley medal to Prof. Elias Metschnikoff for eminent services to zoology and pathology; the Darwin medal to Prof. Hugo de Vries, of Amsterdam, on account of the significance and extent of his experimental investigations in heredity and variation. The Linnean Society's gold medal was awarded to the Rev. Canon Norman, F.R.S.

In the 1906 edition reference was made to certain views of Mr. J. Butler Burke concerning so-called radiobes; and in the "Origin of Life," published during the year, he further explained his position. But a paper by Mr. Douglas Rudge, communicated to the Royal Society by Prof. J. J. Thomson, F.R.S., of the Cavendish Laboratory, Cambridge, entitled "The Action of Radium and certain other Salts on Gelatin," supplied results, coupled with photographic evidence, which were in no degree confirmatory of Mr. Burke's interpretations. That radiobes may be "missing links between the animate and inanimate" can hardly be regarded otherwise than as being a proposition of an essentially untenable character.

M. René Quinton is the enunciator of certain biological views of heterodox tendency. The French Institute heard a discourse thereon. Consult the *Revue des Idées*.

Biometrical inquiry, so fruitful in the hands of

Mr. Francis Galton, Prof. Karl Pearson, and the late Prof. Weldon, is just now, along one line, directed towards the collection of data from which it is hoped to determine in some measure the inter-relationship of disease, temperament, and success in life. Prof. Pearson desires to obtain at least 1000 family records before the task of reduction is begun.

The holding of the **Third International Conference on Hybridisation and Plant-breeding**, under the auspices of the Royal Horticultural Society, should here be mentioned. The President, Mr. W. Bateson, F.R.S., the champion of "Mendelism," suggests in its place the term genetics, as applicable to researches into the phenomena of heredity and variation. Mr. J. J. Lister's suave sarcasm (Presidential Address, British Association, section Zoology) concerning those who "prophecy from the biometric side of the church," brought Prof. Pearson into the arena with protest and challenge. The rejoinder by Mr. Lister, which subsequently appeared, served at any rate to denote and emphasise existing diversities of opinion respecting various conclusions of biometry. Consult *Nature*, Sept. 6th, Oct. 11th and 18th.

The retirement of Prof. E. Ray Lankester from the directorship of the Natural History Department of the British Museum elicited a striking statement from him regarding his position with H.M. Treasury, which appeared in the *Times* (Aug. 8th, 1906).

Some scientific publications of special interest to biologists and zoologists, the outcome of much disinterested labour, are on the eve of publication. Foremost among these are the reports of the results in Natural History obtained by the **National Antarctic Expedition**, proceeding from the Trustees of the British Museum. The final monograph of Prof. Herdman's Report on the Pearl Oyster Fisheries and Marine Biology of Ceylon is due, and will deal with pearl production and pearl parasites. Consult, in connection, *Proc. Linn. Soc.*, Oct. 1906. The results of Mr. Stanley Gardiner's biological exploring expedition to the western part of the Indian Ocean are, too, in course of publication by the Linnean Society. Undoubtedly substantial additions to knowledge will accrue from the foregoing series.

The obituary of the year included two distinct losses to biological and botanical science respectively in the deaths of Prof. W. F. R. Weldon, F.R.S., and Prof. H. Marshall Ward, F.R.S.

## CHEMISTRY AND PHYSICS, 1906.

The theory of the element radium, its changes, interactions, and other characteristics, continues to attract the attention of physicists in unabated measure. At the British Association Prof. F. Soddy opened a discussion on radio-activity, introducing some bold generalisations in connection with the discovery (Ramsay and Soddy) of the production (generation) of helium from the radium emanation. The latter term, according to the authorities, is that used to denote one definite product of radium of peculiarly definite material nature. It is a gas; may be condensed to a liquid at the temperature of liquid air ( $-180^{\circ}\text{C}.$ ); possesses intense radio-activity; and has been shown by experimental measurement (Soddy) to generate spontaneously in every second of time as much heat as the same volume of a mixture of hydrogen and oxygen

when exploded to form water. Lord Kelvin (*Times*, Aug. 9th), referring to the above discussion, entered an emphatic protest against the hypothesis that the heat of the sun or earth, or other bodies in the universe, is due to radium. He held that it is mainly due to gravitation; and further, that the experimental results on which the radium hypothesis has been built give no foundation on which it can rest. An interesting correspondence followed this statement, in which several eminent men of science took part—in particular Sir Oliver Lodge. Dr. H. L. Bronson, in some recent experiments on one aspect of the general inquiry, has endeavoured to determine more definitely than had previously been done the effect of temperature on the activity of radium and its transformation products. He used radium sealed in a quartz tube; the latter was heated in a small electric furnace, an electroscope being suitably placed above the furnace. The temperature of the furnace was raised to over  $1600^{\circ}\text{C}.$ , yet no evidence was forthcoming of any change in the activity. As a converse experiment he submitted the tube to the extreme cold of liquid air, but as before with negative results. Consult, in connection, W. Makower, *Proc. Roy. Soc.*, March 1906.

Current investigations by the Hon. R. J. Strutt with reference to the distribution of radium in the earth's crust, and on the earth's internal heat, form the subject of much discussion by the physicists of to-day. His work has lain in an estimation of the average amount of radium in the crust of the earth, and to this end he has examined a large number of igneous as well as sedimentary rocks. Astonishing as it may seem, radium can easily be detected in all igneous rocks, granites indicating most, basic rocks least radium. And this distribution is uniform enough to enable a fair estimate to be made of the total quantity in each mile of depth of the crust. He assigns the crust a depth of about forty-five miles; the maximum temperature at the bottom of the crust is in the neighbourhood of  $1530^{\circ}\text{C}.$ , or  $2700^{\circ}\text{F}.$  This, it may be noted, is considerably below the melting point of platinum, which, according to a recent determination by Dr. Harker, is  $1710^{\circ}\text{C}.$  To quote Prof. E. H. Griffiths (Presidential Address, British Association, Section A), "we have indications that, with the exception of a comparatively thin crust, the earth consists of a non-radio-active substance with a rigidity approaching that of steel, with an average temperature in the neighbourhood of  $1500^{\circ}\text{C}.$ , and a density at that temperature of about  $5.6\text{ g./cc.}$ " (see art. *Earthquakes*).

In the *Philosophical Magazine* (June 1906) Prof. J. J. Thomson discussed methods for determining the number of corpuscles in an atom of an elementary substance, all of which lead to the conclusion that their number is of the same order as the atomic weight of the substance. The scope and implications of the electronic theory may be conveniently followed in two comprehensive articles which appeared in the *Athenæum*, June 23rd and 30th, where due credit is given to Prof. H. A. Lorentz for its inception. Consult also "The Electron Theory: a popular introduction to the new Theory of Electricity and Magnetism," by E. E. Fournier d'Albe (Longmans, 1906).

Sir James Dewar's ingenious method for the absorption of gases by the use of charcoal cooled in liquid air, underwent extension at the hands

of Prof. E. Rutherford, with unexpected issue. Having occasion to pass the emanation of radium through a tube filled with cocoanut charcoal, he found that complete absorption had taken place, and further, that it could be effected without any initial cooling down of the charcoal. In laboratories where radium is kept in solution, charcoal may in future be usefully employed as an ally to retain the emanation, and Prof. Rutherford has shown how this may be done (*Nature*, Oct. 25th, 1906). It is also applicable to the emanations of thorium and of actinium. Experiments are in progress to test whether this property of charcoal can be utilised to determine quantitatively the amount of radium emanation existing in the air, and also the amount of emanation diffusing to the atmosphere from the soil. Sir J. Dewar's method led to greatly improved means of obtaining very high vacua. Lately, experimental evidence has been forthcoming from Prof. Soddy indicating that calcium heated to between  $700^{\circ}$  and  $800^{\circ}$  C. under suitable conditions is capable of rapidly and completely absorbing all the known gases except those of the argon group, and that the high vacua readily produced by the absorption of residual gases by calcium are at least equal to the highest attained by any other process. Prof. Soddy is of opinion that the apparent ease with which high vacua are obtained by the use of cooled charcoal is misleading, for the atmospheric helium and neon, although not conducting the discharge, remain unabsorbed. The principle is the subject of patent specification.

Prof. Rutherford (*Phil. Mag.*, Oct. 1906) contributed some noteworthy data in regard to the age of radio-active minerals. Calculating the rate of production of a certain quantity of helium gas per year per gram of uranium, he gives an estimate of about 400,000,000 years as the age of the mineral. Limits of this character imply, in even further degree, that the old restrictions on geological time must undergo modification.

The process of the rusting of iron has from time to time occasioned much theorising. Dr. G. T. Moody has done good service in showing that it is due to chemical changes involving acid action—that, in fact, the presence of oxygen and water alone induces no change in pure iron. A specimen of soft Swedish iron was kept in contact with air and water—both completely freed from carbonic acid—for some weeks, with the result that the example remained perfectly bright after the exposure.

The Annual Report of the Principal Chemist of the Government Laboratories referred to the examination of no fewer than 106,779 samples. Statistics as to the adulteration of commercial products may be studied therein. The use of duty-free alcohol for research purposes showed a substantial increase, affording testimony that this privilege is valued.

The Sir Humphry Davy medal of the Royal Society was awarded to Prof. Fittig, of Strasbourg, for his researches in organic chemistry. The Hughes medal was awarded to Mrs. Hertha Ayrton for her experimental researches on the behaviour and laws of the electric arc. The latter gift aroused a considerable amount of public interest, since it involved the definite recognition of women's partnerships in science by an authoritative tribunal. In connection, the appointment of Mme Curie to the professorship in the University of Paris rendered vacant

by the death of M. Pierre Curie is chronicled. The Society's Rumford medal was awarded to Prof. H. L. Callendar for his experimental work on heat, especially in one of its branches, the temperature conditions in the cylinder of the petrol motor.

The sixth International Congress of Applied Chemistry, held at Rome, under the immediate patronage of the King of Italy, was an unqualified success. About thirty British delegates attended. Of papers read, not least in importance was one by Dr. Franck detailing his process for the electric production of nitrates from the atmosphere. The first raw material obtained is calcium cyanamide, and this is used as a nitrogenous manure. Developments of high industrial value are promised through this and allied synthetic processes. It is gratifying to record that a pressing invitation to the Congress to meet in London in 1909 was accepted.

In 1856 W. H. Perkin produced mauve, the first coal-tar colour; and the jubilee of this notable discovery, referred to by Prof. Armstrong as "an incomparable distinction for English science," was celebrated by a special assemblage of British and foreign men of science, who met at the Royal Institution and accorded the inventor ample honours. American chemists held a separate celebration in New York. It remains to add that a knighthood was conferred upon the investigator in recognition of his achievements.

The obituary includes the illustrious M. Curie, joint discoverer with his wife of radium. On April 10th, whilst crossing a street in Paris, he was knocked down by a cab and fatally injured.

## EARTHQUAKES.

The development of systematic inquiry into the probable mode of origin, the times, the propagation, and the distribution in space of earthquakes, is one of the most prominent features of the scientific effort of the past twenty years, and, in particular, of this last decade. The new seismology is an established branch of science, one in regard to which the mathematician, physicist, and geologist are each interested from their respective lines of work. Japan has taken a leading part along the whole path of investigation—stimulated in the first instance, however, by the researches set on foot, and strenuously promoted, by a small band of English scientists resident in that country in the early eighties, amongst whom were Perry, Ayrton, Milne, and Knott. In 1830 the Seismological Society of Japan was founded; in 1886 a chair of Seismology was established at the Imperial University; and since 1892 a Seismological Investigation Committee has laboured with such purpose that it has already issued 70 quarto volumes detailing results. At the Tokyo Central Meteorological Observatory records are received from nearly 1500 observing centres. International co-operation in observational work, involving the seismic survey of the whole world, is the outcome of this activity. Through the exertions of Prof. J. Milne a service of 40 observing stations, of which he is Director, has been organised since 1895 in various parts of the world, under the

auspices and with the financial assistance of the British Association. Prof. Milne's own observing station is situate at Shide, Newport, Isle of Wight. Later, international organisation has received further extension in the foundation of an **International Seismological Association**, whose headquarters are at Strasbourg. Director of the Central Bureau, Prof. Gerland.

The fresh chapter in science which these developments have furnished is of profound interest and significance. It arrests popular attention, and secures study as often as new convulsions of the earth occur. Briefly, we may notice some of the latest views of science in regard to seismic phenomena.

Earthquakes, as we know from geological considerations, are due to the strain generated by the fracturing of the rocky materials composing the earth's crust. A weak point reaches its limit sooner or later, and disturbance and rupture ensues. As an accompaniment, **earth-waves** of varying degrees of amplitude are set up, and these may be propagated over the entire surface of the globe, and extend over three or four hours. Finally, the earth's crust settles once again into a state of comparative equilibrium. The delicate instruments, **seismographs**, permit of the registration of such wave motions, even though an earthquake may have occurred in a region some thousands of miles distant, and though no sensible vibration of the earth is felt at the observing station. They record what Prof. Milne terms the "unfelt breathings" of our globe. Further, such motions are capable of analysis, so that, in recording far-off shocks, seismologists discriminate **preliminary tremors** of small amplitude and **main-shock waves** of larger amplitude. The seismographical record, too, enables the time of occurrence of a distant earthquake at its source to be approximately calculated. Yearly 30,000 to 40,000 earthquakes occur; of these Japan registers about 1200, Great Britain about 6. But of the grand total only 60 fall within the category known as "world-shaking." Modern inquiry suggests that the preliminary tremors are waves speeding straight through the earth with an average velocity of about 10 kilometers per second. On the other hand, the later phase of motion is held to make a circuit around the earth's periphery with a velocity of about 6 kilometers per second. The **probable thickness of the earth's crust** is one deduction arising from earthquake study. Prof. J. Milne (Bakerian Lecture, *Proc. Roy. Soc.*, April 30th, 1906) suggests that at 30 miles' depth we reach a maximum limit, where we should expect rocky materials possessing similar properties to those on the earth's surface. The interesting conclusions of the **Hon. R. J. Strutt**, made in connection with researches on the distribution of radium in the earth's crust, and on the earth's internal heat, allow a depth of 45 miles (*Proc. Roy. Soc.*, May 14th, 1906). "I was inclined at first," he remarks, "to think it incredible that the earth's crust could have so small a thickness as 45 miles, and was therefore much interested to learn that Prof. Milne had come to a substantially identical conclusion from a study of the velocity of propagation of earthquakes through the earth's interior." Prof. Milne has mapped out 13 "**world-shaking**" earthquake regions; and their geographical positions have important bearing, it now appears, respecting

certain mathematical considerations of the **shape of the earth**, put forward a year or two ago by Profs. Jeans and Sollas. They assign a **pear-shape** to our planet. Under the stress of gravitation the tendency is to reach the spheroidal form—"the pear is being crushed into a sphere by its own attraction, and the result is a series of earthquakes" (H. H. Turner, F.R.S.). Space only permits mere allusion to this new aspect of seismological inquiry, but the reader will find the subject discussed at length in Sollas' "Age of the Earth," chap. ii.

During 1906 the earth's crust was shaken by two notable earthquakes, each of which exhibited a high degree of intensity, though not in equal measure. Both occurred on the west coast of the continent of America. The first took place on April 18th, in the State of California, the city of San Francisco lying within what is termed the "epicentral" area. As regards the relative magnitude of the earthquake, competent authority assigned it a place which, though inferior to the Lisbon and Indian earthquakes of 1755 and 1897, gave it the same rank as the Neapolitan, the Japanese, and the Indian earthquakes of 1857, 1891, and 1905, respectively. It was destructive on a narrow belt extending along the coast from near Eureka in the north to Salinas in the south—a distance of about 400 miles in length and 50 miles in width. But, in considering this magnitude, and its connection with material damage, it should be remembered that the area comprising maximum dislocation of strata was coincident with the presence of a populous town. The initial shock at San Francisco occurred at 5.13 a.m., Pacific time (= Greenwich mean time 1.13 p.m.). In Great Britain, at the Shide (Isle of Wight), Birmingham, Bidston, and Edinburgh stations, seismographs began, after an interval of some fifteen minutes, to record the travelling earth-waves appertaining to this phase of the movement, and, similarly, instruments at various other European stations, and at Cape Town and Tokio. Dr. C. Davison recorded the arrival of the first series of preliminary tremors at Birmingham as at 1h. 25m. 3s., these being followed at 1h. 35m. 7s. by the second series of preliminary tremors, and at 1h. 45m. 13s. there commenced the wave undulations constituting the principal movement. In Tokio the time of commencement was observed by seismographs at 5h. 24m. 35s. a.m. (Pacific time), the total duration of motion being five hours (Prof. Omori). At San Francisco a State Commission was promptly instituted to inquire into and report upon the scientific aspects of the earthquake (secretary, Prof. A. O. Leuschner, University of California). A main fact, established early, was that the earthquake was due to very extensive **motion of strata along a well-known geological fault**, or line of dislocation, that runs near the coast-line of the State. The great length of the rift along which movement occurred rendered this earthquake unique. Much satisfaction was felt by astronomers that the shocks had caused no damage to the world-famed Lick Observatory on Mount Hamilton, and the Solar Observatory of the Carnegie Institution on Mount Wilson.

On August 17th news came of a severe earthquake that had occurred the evening before, between 7 and 8 p.m., at Valparaiso, the commercial capital of Chili, the event being followed

after a brief interval by disastrous fires due to much the same causes as at San Francisco. These occasioned the partial destruction of the town, as well as heavy damage at Santiago, 70 miles distant, and in neighbouring Chilian towns and hamlets.

In general review of the foregoing it may be mentioned that Prof. F. Omori, referring to the Pacific coast of America, regarded the earthquake of April 18th as having completed the continuity of manifestation of greater seismic activity along this part of the world. Even in the case of a future earthquake, after the lapse of a number of years, the intensity of motion would not be so violent. The rendering of architectural and engineering works earthquake proof would, for San Francisco, be an "easy task." Whether the subsequent visitation at Valparaiso will tend to modify this opinion remains to be seen. His prediction of a fair equilibrium in place of marked instability may need no revision.

Other earthquake shocks recorded in 1906 were:—

- Jan. 31st. In the city and province of Esmeraldas, Ecuador, shocks continuing till Feb. 6th. The shocks were also felt in Colombia.
  - Feb. 16th. In Dominica, St. Vincent, and St. Lucia, West Indies.
  - Feb. 21st. In Colombia: Tumaco and Buenaventura chiefly affected.
  - March 18th. At Kagi, in Formosa; 1228 killed and 2329 injured.
  - March 28th. The small island of Ustica (Italy), which was abandoned.
  - April 14th. In South Formosa.
  - April 19th. In Bosnia.
  - May 30th. At Fez, in Morocco.
  - June 27th. In South Wales. The field of disturbance was about 280 miles in diameter and 60,000 sq. miles in area.
  - Aug. 19th and 20th. In Martinique.
  - Sept. 27th. In Porto Rico.
  - Nov. 13th. In Jamaica—the heaviest experienced in Kingston for some years.
- Consult, in general, "Earthquakes in the Light of the New Seismology" (Dutton); "A Study of Recent Earthquakes" (Davison); *The Times*, April 24th, 1906 (article by Turner); "Philosophical Transactions, Roy. Soc.," 1903 (Jeans).

## ELECTRICAL PROGRESS, 1906.

See also WIRELESS TELEGRAPHY.

As regards electrical manufactures, probably the most important factor during 1906 was the extraordinary high prices of raw materials in general, and particularly of metals. The price of electrolytic bar copper rose from £74 10s. per ton in August 1905 to £88 per ton in December. In Sept. 1906 it was £90, and by the end of October £107 per ton. During the same period English lead rose from nearly £15 to £20 per ton, and foreign tin from £148 10s. to £199 5s. per ton, and English from £149 10s. to £199. Most of the private stocks were depleted, and large buyers were purchasing from hand to mouth. Consequently there is little prospect in the near future of there being any considerable drop in the prices unless new sources are discovered. The result was that electrical cables and machinery rose very considerably in price, the former to the extent of 25 per cent. The demand for electricity, however, throughout

the year was very great, and nearly all the supply undertakings had to make considerable extensions to meet it.

Great stress is now laid upon the necessity of organising an advertisement department in conjunction with all electrical undertakings. Many stations throughout the kingdom have organised publicity departments, which issue descriptive pamphlets, rectify consumers' complaints, and generally take steps to procure additional business. Some undertakings have opened show rooms, and many have obtained powers for hiring out and selling lamps, motors, heating apparatus, etc. A great number of luminous electric heat radiators are being daily connected up all over the country, and they have become so popular with the general public that they bid fair to entirely supersede the gas and even the domestic coal fire.

Of the metallic filament lamps mentioned in the 1906 ed., the Tantalum lamp has survived, and is giving very good results on continuous current circuits; it is found, however, that on alternating current circuits its life is too short to warrant the additional expense. Owing to its fragility, the Osmium lamp has not found much favour; but a modification of this lamp is now being introduced, and it is claimed that it has all the excellent properties of the former without its fragility. Another lamp has a filament made of zirconium, and it is claimed to have a consumption of only 1·2 watts per candle, a life of 500 hours, and a very small drop in candle-power as it ages. This lamp is at present only made to run on a pressure of 37 volts, but lamps to run on 110-volt circuits can be produced.

The mercury vapour lamp has, owing to the almost entire absence of red rays in its light constituency, found little favour in this country. It is, however, an extremely efficient illuminant, casts practically no shadow, and in situations where colour is no object, such as workshops, yards, drawing offices, etc., it should prove very useful. On the other hand, the flame arc lamp is in demand everywhere, and has proved itself to be the very best method for outdoor lighting. It is being very largely used for external shop-window lighting.

## English Provisional Orders.

The following table gives the latest obtainable data respecting the number and state of progress of the English Provisional Orders granted up to and including 1906:—

	Local Authorities.		Companies.		Total.	
	Orders.	Under-takings.	Orders.	Under-takings.	Orders.	Under-takings.
1. Works in operation .	301	258	234	144	535	402
2. Works in course of construction	74	73	43	39	117	112
3. Works not yet decided upon	103	—	24	—	127	—
Total . .	478	331	301	183	779	514

from one central body, and consequently stated that it would be inadvisable to consider any other bills for the purpose of electricity supply to London and district until the L.C.C. had had an opportunity of bringing forward another scheme. The Bill of the Additional Electric Supply Company of London, down for second reading in the House of Commons in April, was rejected.

The following table shows the state of progress of the various Electrical Power Supply Acts :—

LL

It will be seen that very little progress was made in 1906. The North Wales Power and Traction Co., Ltd., however, constructed a hydro-electric power station in the Nant Gwynant Valley, below Snowdon. On the east side of Snowdon there are two lakes, the lower of which is 1400 feet above sea level, which is tapped by means of a tunnel and connected to the power-house by 1100 feet of surface pipe line running down the Nant Gwynant Valley. The resultant water pressure is about 495 lb. to the square inch, and the power is converted by means of four turbines, each equipped with two Pelton wheels, direct coupled to 1500 k.w. 3-phase alternators, generating at 10,000 volts and 50 cycles per second. The power is only at present used by three quarries—at Festiniog, Nantlle, and Llanberis—conveyed from the power-house by means of overhead transmission lines, the total length of which is about 22 miles, the greatest distance from the power-house being 13½ miles.

### Tramways.

The Tramways recently inaugurated include an inter-urban line connecting Broughty Ferry and Monifieth. The route mileage is 5½ miles with 4½ miles double track. The power house is at Dighty Water, and contains two 200-kilowatt generating sets. The Leith Corporation are reconstructing the horse tramways in the Burgh purchased from the Edinburgh Street Tramways Co. in 1904 with extensions of about a mile of track. There are six route miles in all, practically all double track. The Cavenhill and Whitewell Tramway was opened on Feb. 13th, 1906. It begins at the termination of the Chichester Park line of the City of Belfast tramways, and has a total route mileage of 3½ miles, all single track, with 16 turn-outs. Power is supplied to the Cavenhill and Whitewell Co. by the Belfast Corporation from a sub-station near Chichester Park. On March 1st sundry extensions to the London United Tramways were completed connecting their system in Kingston with Surbiton and Thames Ditton. The total length of track opened for traffic was 7 miles, and includes the crossing of Kingston Bridge, the first of the Thames bridges to carry tramways. Power is supplied from the power station at Chelsea of the Underground Electric Railways Co. of London, and is transmitted by means of two extra high-tension feeders at 11,000 volts three phase at 33½ cycles per second to a sub-station at Kingston which is equipped with two 500-kilowatt rotary converter sets.

As to tramways generally and the overwhelming extent to which electric traction is now used, see TRAMWAYS article. See also LONDON ELECTRIC LINES. The development in electricity supply for the last ten years is shown by the following figures as to the total capital expenditure on electricity supply and traction:—

	1896.	1906.
Municipalities . . .	1,967,000	66,863,093
Companies . . .	11,915,745	124,732,609
Total . . .	13,882,745	191,595,702

On May 26th, 1906, the London County Council opened a large power house at Greenwich for the supply of electrical energy to the Council's

tramways. It may ultimately be used for the supply of electricity in bulk if the Council obtain the powers they are seeking. It is designed in two portions, the first being now complete and the second in hand, and the ultimate capacity is to be 52,000 h.-p. There are at present four 3500 k.w. generators coupled to four 7500 h.-p. slow-speed engines. Electricity is generated at 6600 volts at 25 cycles per second. There are 24 water-tube boilers, each having an evaporative capacity of 16,300 lbs. of water per hour at 200 lbs. per sq. in. pressure, and in addition each boiler is fitted with a superheater capable of raising the temperature of the steam to 500° F. Unfortunately the station was placed on the Meridian due north of the Greenwich Observatory, and it is found that the smoke and vapour arising very seriously interfere with the observations; also, the vibration from the heavy slow-speed engines very considerably affects the delicate instruments at the Observatory; and it is very probable that the whole station will have to be either very materially modified or removed altogether.

### Single Phase Traction.

See Electric Traction under RAILWAYS article, p. 463.

As regards single-phase traction generally, there are no suggestions for any further conversions in this country, but the following is a list, with particulars, of some of the railways operated or in course of construction abroad, those actually in operation being marked with an asterisk:—

Line.	Total Capacity H.P.	Miles.
*Indianapolis and Cincinnati Traction Co. . . . .	6,000	57
*Fort Wayne and Springfield Railway Co. . . . .	1,200	18
*Warren and Jamestown Street Railway . . . . .	800	22
*Atlanta Interurban Railway Keeling and Ridge Railway Co. . . . .	1,200	22
*Interworks Electric Railway, Pittsburgh . . . . .	800	5½
*Locomotive for Swedish State Railway . . . . .	2,200	5
Villejo, Benicia and Napa Valley Traction Co. . . . .	300	
*Long Island Railway . . . . .	130	10
*Rome—Civita Castellana Railway . . . . .	600	
Bergamo—Valle Brembana Railway . . . . .	1,200	32
New York, New Haven and Hartford Railway . . . . .	1,500	19
*Spokane and Inland Railway Sarnia Tunnel . . . . .	35,000	25
	8,800	33
	4,500	5

### Progress Abroad.

Germany added 147 supply stations, bringing the total up to 1175, of which 670 have a capacity of less than 100 k.w., 359 between 100 and 500 k.w. and 53 stations over 2000 k.w. The total generating capacity is 517,500 k.w. There are 630 stations steam-driven, 125 entirely water-driven, 124 gas-driven, 219 water-driven with steam in reserve, and 1 driven by windmill. There are 9,000,000 8-c.p. lamps, 122,000 10-

ampère arcs, and 310,000 h.p. of electric motors. Apropos of the present discussion relative to the London electricity supply, it is interesting to note that Berlin settled the question by giving the whole of the works to one large company. This company erected two large stations at Oberspree and Moabit, and used the old in-town stations for distributing purposes. The out-town stations generate at 6000 volts three-phase. The price charged for lighting is 4½d. per unit, and for power 2d. to 1½d., and the dividend is 8 per cent.

Paris is in a worse predicament than London. The city is at present supplied by six companies, and owing to the fact that their concessions lapse in less than two years and nothing has as yet been decided as to the ultimate policy of the authorities, the companies are not carrying out any extensions, and the prices charged for current are very high.

A three-phase line, said to be the first on the American continent, was opened between London and Port Stanley in Canada. It is an inter-urban line, 27 miles long, divided into two sections of 18 and 9 miles respectively, the two sections being divided by one of 2 miles long belonging to the St. Thomas Railway, which is really a tramway operated at 500 volts continuous current. The motors on the inter-urban cars therefore had to be arranged to run on either 1000 volts three-phase or 500 volts continuous, and were provided with a two-phase winding, commutator and four slip-rings. The motor cars are provided with motors having an aggregate horse-power of 130; the maximum speed is 30 miles an hour. The transmission voltage is 10,000.

## GEOGRAPHICAL PROGRESS, 1906.

**In Asia.**—Dr. Sven Hedin, whose work is already monumental, started from Teheran on Jan. 1st to explore the desert region of Eastern Persia. The Dashtikivar was three times crossed, and a vast amount of information collected. Dr. Hedin then crossed the Himalayas into Southern Tibet to examine the sources of the Indus and Brahmaputra. In September he was near the Yeshil Kul, a lake in the White Desert. Mr. Ellsworth Huntington, who with Mr. Barrett had been in Central Asia since 1905, made a careful examination of the desert region between Khotan and Lob Nor, where were found many indications of the drying up of rivers and lakes. In the vicinity of Lob Nor, Mr. Huntington crossed two old lake beds covered respectively with salt and gypsum. An expedition to Central Asia, to which it is proposed to devote two years, has been undertaken by Dr. M. A. Stein. He reached Sarhad, in Walkhan, on May 19th, and hopes to explore the Mustagh-ata and the western section of the Kuen Lun range. The Russian geologist, M. Obrinsheff, exploring in the Tarbagatai range, found that it was not directly connected, as had been supposed, with the Saur range, but separated by a deep cleft; and in the latter range traces of former extensive glaciation were observed. Dr. Tafel explored north-western China and the Kuku Nor region, and hoped to continue his journey through north-eastern Tibet. Count de Lesdain and his wife crossed the Gobi on a journey from China to India, passing a succession of lakes on the

approach to Tengri Nor. Belated reports of the Indian Survey afford details of valuable work, including a map of Nepal, by Captain Wood, R.E., the only topographical one of that country yet published, in which is shown the true position of Mount Everest, the group to which it belongs being distinct from the Central Himalayas. In pleasing contrast to many mountains, as to which closer acquaintance has necessitated the reduction of the height assigned to them, it is believed that 140 ft. will have to be added to the 29,000 with which it is already credited; while Kanchinjanga may be found to rank second, thus taking precedence of Godwin Austen (K<sup>2</sup>). Notable climbing was accomplished in the Nun Kun Mountains, in Kashmir, by Dr. and Mrs. Workman, a camp occupied by the party for two nights at 21,300 ft. being the highest on record. Russian exploration in the Khatanga region discovered several errors in the mapping of that river and of the lakes in its basin. Dr. von Lecoq, a Prussian Government scientist, was reported (Nov. 29th) to have arrived at Srinagar, after a journey through Central Asia, with a quantity of paintings on stucco, and a number of MSS. in ten languages, including one unknown tongue.

**In Africa.**—Captain Tilho, formerly a member of the Anglo-French boundary commission, produced a map of Lake Chad, in which are combined the results of all the surveys hitherto accomplished. Lieut. Audoin, one of his associates, investigated (1905) the channels and islands of the eastern side, and Lieut. Marquardsen explored the west and south-west parts in the German sphere. An important expedition, under Commandant Lenfant, left Bordeaux on Aug. 25th for the French Congo, the objective being the Laka country between the Tuburi depression and the Upper Logone, to ascertain if navigable connection can be established between the basins of the Logone and Sanga. Ruwenzori was the goal of successive expeditions; but, notwithstanding various ascents of one or other of its five peaks, it can scarcely be said that their identity and relative position have been clearly established. In January Dr. Gauer with two companions ascended a small peak; between January and April several attempts were made by Messrs. Wollaston, Woosnam, Carruthers, and Dent, members of a Zoological Expedition sent out by the British Museum; the summits of the two most prominent peaks in the east, Dunwoni and Kiyanja, were attained, and the heights given respectively as 16,200 and 15,800 ft., but a still higher one was estimated at 17,300 ft. Later, the Duke of the Abruzzi accomplished the ascent of Kiyanja and Dunwoni, the reported heights being, respectively, about 18,000 and 19,680 ft. (5500 and 6000 mètr.). The mountain is generally shrouded in mist, and Lieut. Behrens, who spent nine months in the vicinity, only saw the summit seven times, when the cloud lifted after sunrise. Exploration of another mountain, Merwu (about 15,000 ft.), was undertaken by Prof. Carl Uhlig. It is a volcano still emitting vapours, the crater having a gap on one side, through which a stream of lava had poured, probably not more than a hundred years ago. At the base lies a plain with fourteen small lakes.

**In North America** an expedition organised by Dr. F. A. Cook, and accompanied by Prof. Herschel Parker, succeeded during the summer

in attaining the summit of Mount McKinley. In South America the travels of Baron Erland Nordenskiöld on the borders of Bolivia and Peru in 1904-5 were described in a paper read before the Royal Geographical Society in February. The glaciation of the Andes of Bolivia and Peru was investigated by Dr. Rudolf Hauthal.

**Europe.**—Col. Maunsell collected much information with regard to the Rhodope Balkans. In the Steiner Alps, Dr. Romana Lucerne searched for traces of glaciers in the Ice Age. Prof. Garwood continued his bathymetrical survey of Alpine lakes in Ticino. The survey of the Scotch lochs made good progress under the direction of Sir John Murray. A marked feature of many of the lochs is their great depth, several exceeding 500 ft., and Loch Maree 1000 ft.

In the Arctic region the outstanding event was the completion of the North-west Passage by Captain Amundsen in the *Gjøa*, the first vessel to accomplish the voyage, for, although McClure discovered the Passage in 1851, he had to abandon his vessel. Captain Amundsen carried on continuous observations in the vicinity of the North Magnetic Pole, King William's Land, from Nov. 2nd, 1903, to June 1st, 1905. Magnetic deviation was found to range between  $10^{\circ}$  W. and  $10^{\circ}$  E. and even more, being most frequently about  $5^{\circ}$  W., the inclination being about  $80^{\circ} 20'$ . In June 1905 the vessel left Gjøa Harbour, wintered 1905-6 at King Point,  $137^{\circ} 45'$  W., and reached San Francisco on Oct. 19th. A group of islands (about a hundred) between King William's Land and Victoria Land, was surveyed, as also certain stretches of coast.

**Commander Peary** in the *Roosevelt* arrived at Hebron, Labrador, on Oct. 13th, and Sydney, Cape Breton, Nov. 23rd. On Sept. 5th, 1905, the vessel was ice-bound at Cape Sheridan. On Feb. 21st, 1906, Peary started in the direction of the Pole. He reached  $87^{\circ} 6'$  N. on April 21st, thus passing by about 30 miles the Duke of Abruzzi's farthest north, 1900. Supplies being almost exhausted, and communication with the relief parties cut off by the ice opening, he was obliged to return. The north coast of Grant Land was afterwards traced, and new land discovered in about  $100^{\circ}$  W. A Danish expedition led by Mr. Mylius Ericksen sailed from Copenhagen, June 24th. It is proposed to examine the coast between Cape Bismarck and Independence Bay, and to make a push for the Pole early in 1907. Another expedition, called the *Anglo-American*, led by Mr. Einar Mikkelsen, started for two or three years' work in the Arctic region on May 20th, in the *Duchess of Bedford*. Adverse conditions hindered progress, the vessel only reaching Port Barrow on Aug. 15th. Capt. Bernier in the *Arctic*, wintering at Pond's Inlet, Baffin Land, reports having discovered 65 miles of channel, and taken possession of 8 islands for the Dominion Government. Mr. Alfred H. Harrison, who left Athabasca Landing last year for the mouth of the Mackenzie in a boat, which he was obliged to abandon, made his way on foot to Herschel Island, and during the summer visited Banks Land. He hopes next year to explore Beaufort Sea. The Prince of Monaco sailed in the *Princess Alice* in June for Spitsbergen, on his third Arctic expedition, accompanied by Mr. W. S. Bruce. A balloon and kites were used in the investigation of the upper air. The Wellman Polar expedition reached Danes Island, and there established a station in  $79^{\circ} 40'$  W. The pro-

jected balloon voyage to the Pole was, however, postponed till 1907, owing to defects in the airship.

The Antarctic was not made the object of any important attempt in 1906, but one or two schemes are contemplated. Lieut. Barne, R.N., who took part in the British Antarctic Expedition, desires to organise a small party to supplement the work already done; while a more ambitious scheme is outlined by Dr. Charcot, who proposes an attempt to reach the South Pole "with the combined assistance of a ship, a balloon, and a motor sledge." The French Government has undertaken the publication of the results of Dr. Charcot's previous expedition. The Argentine Government is showing commendable enterprise in the establishment of Antarctic Meteorological Stations. It maintains that in the South Orkneys, founded by the Scottish Expedition, and has founded two others, one on Wandel Island, Graham's Land, in charge of Mr. A. Rankin, the other on South Georgia, in charge of Mr. R. H. MacDougall. At a conference held at Brussels in September it was agreed to form an International Commission for the study of the Polar Regions, the principal objects being to bring into closer association those engaged in polar exploration and to co-ordinate the methods of observation.

Oceanographical work has been actively prosecuted in different directions. In the Indian Ocean H.M.S. *Sealark*, Commander Somerville, with Mr. Percy Gardiner as leader of the scientific staff, continued the work begun in 1905, and the Chagos and other islands were carefully examined. In the North Pacific the U.S. *Nero*, surveying between Guam and the Midway Islands, found an extensive submarine plain at about 3000 fathoms, traversed by what seemed to be a mountain range with peaks rising to within 720 fathoms of the surface. Four soundings were taken below 5000 fathoms, one of 5269 fathoms being the deepest yet recorded, and only 65 ft. less than 6 statute miles. It was found in  $12^{\circ} 43' 15''$  N. and  $145^{\circ} 49'$  E. This abysmal tract has been named the "Nero Deep." The German *Planet* has also been surveying in the Pacific, and the magnetic survey of the same ocean has been continued by the *Galike*, under the auspices of the Carnegie Institution. Investigation of the tides and currents off the coast of British Columbia was undertaken by the Canadian Survey. The International Exploration of the North Sea continues to yield good results. An Oceanographical Institution is to be established in Paris by the munificence of the Prince of Monaco.

## GEOLOGY, 1906.

Geologists were much occupied with the discussion of questions bearing on the probable nature of the interior of the earth in relation to recent earthquakes and volcanic phenomena. The Hon. J. R. Strutt showed that radium exists in the rocks of the earth's crust, both igneous and stratified, in quantity which he estimated to be more than sufficient to account for all the internal heat of the earth. Major C. E. Dutton, of the Geological Survey of the United States, suggests that volcanic heat is due to radio-activity in limited underground tracts at depths less than four miles from the surface. The seat of the lava-supply is very

shallow—probably in most cases, according to him, only a mile or two in depth. By radio-activity the rocks are melted, and, if they rise in a molten state, may produce an eruption. After the reservoir is exhausted it closes for a time; but in due course more rocks may be fused and another supply of lava produced. The mass of the earth is, on this hypothesis, in a solid condition, as required by physicists.

Prof. T. C. Chamberlin and Dr. F. R. Moulton, of Chicago, elaborated their ingenious *Planetesimal Hypothesis of the Origin of the Earth*. This assumes that our planet was formed by the coalescence of innumerable minute cosmical bodies, or planetesimals, rotating in orbits around a common centre, and probably derived from a nuclear knot in a spiral nebula. The earth's internal heat, according to this view, is due chiefly to central compression by gravity, following the growth of the earth by accretion of planetesimals. The globe is consequently solid, with some of the rocks fused locally, and this molten matter rises as liquid tongues, bringing up occluded gases which are responsible for most of the explosive phenomena of volcanoes, only a small part being due to the access of surface water to the heated rocks. Sir Oliver Lodge suggested that a very profound boring should be put down, for the purpose of determining experimentally the nature of the interior of the earth at great depths.

Prof. J. Milne, in his Bakerian lecture at the Royal Society, expressed the opinion, based on seismological data, that the crust of the earth is about thirty miles thick, or at least down to that depth the materials of which the earth is composed possess physical characters similar to those at the surface. The Rev. O. Fisher pointed out that if the earth's internal heat be due to radium, the rate of outflow as measured by the rise of temperature in descending proves that the radium must be confined to a comparatively thin crust. Mr. R. D. Oldham, from a study of earthquake waves propagated through the earth, believes that beneath the outer crust there is no great change in the physical condition of the earth's interior until a depth of about 2,400 miles is reached, when a rather rapid passage occurs to a central core, having different physical and perhaps chemical characters.

In studying the distribution of earthquakes, the Comte de Montessus de Ballore maintains that he has traced the existence of two great circles of maximum seismic instability on the earth's surface, intersecting at an angle of about 69°, one being the Circum-Pacific and the other the Alpino-Himalayan zone, as described in his work on *Seismic Geography*. Mr. J. H. Jeans, who regards the figure of the earth as slightly pear-shaped, holds that the principal earthquakes have a tendency to proceed from points on a great circle which is the equator of the pear—this being a region of instability, since the earth is tending to pass from the pear-shape to a stable spherical form. Prof. Milne seeks to establish a relation between the occurrence of earthquakes and the secular movement of the earth's poles from their mean position.

The great Californian earthquake of April 18th was undoubtedly due to movement along a great line of fracture known as the Portala-Tomales fault, or the San Andreas fault, an axis of disturbance notoriously unstable, and

termed locally the "earthquake crack." The Coast Ranges of California are indeed traversed obliquely by a series of fractures, with much displacement of the rocks, both vertical and horizontal. The earthquake which destroyed San Francisco probably had its origin beneath the sea, and the rift entered the land above Point Arena, running along the axis of an old fault. According to Prof. D. S. Jordan, of San Francisco, the development of this crack may have been connected with the volcanic disturbance which produced a new island in Behring Sea. Here a volcanic island known as Bogosloff appeared after a submarine eruption in 1796; a second, termed New Bogosloff, was thrown up in 1883; and another, said to be larger than either of the others, made its appearance in 1906, and is known as Bogosloff No. 3.

The Valparaiso earthquake of Aug. 16th seems to have been of submarine origin, and extraordinary sea-waves appeared as far away as the Sandwich Islands. On the coast of Chile the earthquake produced disastrous effects, from Iquique in the north to Talca in the south, a distance of about 250 miles.

The earthquakes in Britain continue to be studied by Dr. C. Davison. The South Wales earthquake of June 27th was undoubtedly due to movement along those east-and-west lines of disturbance which are so marked in the structure of the coal-basin of South Wales, and belong to the Armorian system of crust folding. See *Earthquakes*, pp. 510-12.

The eruption of Vesuvius in April 1906 was studied by Prof. Giuseppe de Lorenzo, Dr. Johnston-Lavis, and other geologists. According to Lorenzo, it was greater than any recorded eruptions of the volcano, except those of 79 and 1631. The outburst was characterised by the enormous amount of ash that was ejected, thus burying Ottajano and San Giuseppe, whilst lava flowed as far as Torre Annunziata. Prof. Lacroix showed that the ash was of the same composition from beginning to end of the disturbance, and that the lava was a leucite-tephrite of the normal Vesuvian type. The great ash-slides on the sides of the volcanic cone were a feature of this eruption. Prof. Marcellin Boule suggests that the volcanoes of Central France, which were responsible for the prehistoric eruptions in Auvergne, may still be capable of recrudescence, so that France may once more become the theatre of igneous activity. It is notable that the West Indian volcanoes, so formidable in 1902, showed renewed activity in 1906.

Mrs. Maria Gordon, formerly Miss Ogilvie, has continued her researches on the structure of the Alps. Whilst it is generally known that this chain of mountains has been subject to enormous horizontal compression in a north-and-south direction, this geologist proves that they have also, suffered greatly from stresses acting in an east-and-west direction, giving rise to much cross deformation.

Among the works on geology published in 1906 special reference should be made to the two volumes on *Earth History* by Profs. Chamberlin and Salisbury, of Chicago, completing their important treatise on geology. Mr. A. W. Clayden has written a work on *Devonshire Scenery*, in which he traces the geological history of the county.

The centenary of the foundation of the Geological Society of London will be celebrated in the autumn of 1907.

## SCIENTIFIC SOCIETIES AND INSTITUTIONS.

Below will be found particulars of the more important and active Societies and Institutions. The list does not pretend to be exhaustive.

**Analysts, Society of Public,** 8 Duke St., Aldgate, E.C. Hon. Secs., A. C. Chapman, P. A. Ellis Richards.

**Anthropological Institute of Great Britain and Ireland.** The Institute publishes a monthly periodical entitled *Man*. Hon. Sec., T. A. Joyce, M.A.; Treasurer, J. Gray, B.Sc.; Assistant Sec., H. S. Kingsford, M.A. Offices, 3, Hanover Square, W.

**Australasian Association for the Advancement of Science.** Formed in '86. Elaborate and most valuable reports of its proceedings are published by the Association. The eleventh session will be held at Adelaide in Jan. 1907. Permanent Hon. Sec., Prof. A. Liveridge, M.A., LL.D., F.R.S.; The Chemical Laboratory, The University, Sydney, N.S.W.

**Biologists, Association of Economic,** founded to promote and advance the economic side of biological science. Hon. Sec., W. E. Collinge, The University Department of Economic Zoology, 55, Newhall Street, Birmingham.

**British Astronomical Association,** founded Oct. '90. There are upwards of 1000 members, twelve "Observing Sections," and branches in Glasgow, Sydney, N.S.W., and Melbourne, Victoria. Subscription 10s. 6d. per annum; entrance fee 5s. President, Mr. F. W. Levander, F.R.A.S. Secs., Mr. J. G. Petrie, F.R.A.S., and Mr. J. A. Hardcastle, F.R.A.S. Assist. Sec., Mr. T. F. Maunders, F.S.A.A. Office, 85, Gracechurch Street, E.C.

**British Numismatic Society.** President, Mr. P. Carlyn-Britton, F.S.A. Ordinary members limited to 500. Office, 43, Bedford Square, W.C.

**British Science Guild,** formed in 1904, to bring before the Government the scientific aspects of all matters affecting the national welfare; to promote the application of scientific principles to industrial and general purposes, and to promote scientific education. President, Rt. Hon. R. B. Haldane, K.C., M.P. Hon. Treasurer, Lord Avebury. Hon. Assistant Treasurer, Lady Lockyer, 16, Pen-y-Wern Road, S.W.

**Chemical Society,** Burlington House, W. President, Prof. Raphael Meldola, F.R.S.; Treasurer, Dr. Alexander Scott, F.R.S.; Hon. Secs., Dr. M. O. Forster, F.R.S., and Prof. A. W. Crossley, D.Sc., Ph.D.; Foreign Sec., Sir William Ramsay, K.C.B., F.R.S. Assist. Sec., Stanley E. Carr, F.C.I.S.; Librarian, F. W. Clifford.

**Chemical Industry, Society of.** Founded 1881. Membership 4500. The London section holds monthly meetings at Burlington House, W. Other sections exist at Liverpool, Manchester, Newcastle, Nottingham, Birmingham, Canada, New England, New York, Scotland, Sydney, N.S.W., and Yorkshire. Meets at Birmingham in 1907. President, Eustace Carey; Secretary, C. G. Cresswell, 9, Bridge Street, S.W.

**Chemistry, Institute of, of Great Britain and Ireland,** 30, Bloomsbury Square, W.C. President, Prof. Percy F. Frankland, LL.D., F.R.S. Resident Registrar and Sec., R. B. Pilcher, F.C.I.S.

**Civil and Mechanical Engineers' Society.** Established in 1859. Meetings are held in Caxton Hall, Caxton Street, Westminster, S.W., on the first Thursday in each month from October to May. President, Mr. W. B. Esson, M.I.C.E., M.I.E.E., A.M.I.C.E.; Hon. Sec., Mr. A. S. E. Ackermann, B.Sc. (Engineering) Lond., A.C.G.I., A.M.I.C.E., M.R.S.I. Offices, 25, Victoria Street, Westminster, S.W. Tel. 244, Victoria.

**Civil Engineers, Institution of.** Founded Jan. 2nd, 1818, incorporated '28, supplemental charters '87 and '96. Members 2287, associate members 4259, honorary members 20, associates 266, and students 1264: total 8096. Candidates for associate membership and studenthip are subject to examination, the subjects being general education and scientific knowledge befitting the profession of a civil engineer. It has a library of upwards of 50,000 volumes, including 750 of rare tracts, the number of which cannot be much less than 10,500. President, Sir Alexander B. W. Kennedy, LL.D., F.R.S. Secretary, Dr. J. H. T. Tudsbury. Offices, Great George Street, Westminster, S.W.

**Clinical Society,** 20, Hanover Square, E.C., W. G. Spencer, M.S., and A. E. Garrod, M.D.

**Entomological Society,** 11, Chandos Street, Cavendish Square. Hon. Secs., H. Rowland Brown, M.A., and Commander J. J. Walker, R.N.

**Ethological Society.** The object is the study of human nature, in order to arrive at a knowledge of the intellect and character of man and the laws which govern their manifestation, and to apply it to the preservation of the mental health of the individual, to education, moral reform, and the solution of various sociological problems. President, Dr. B. Hollander; Hon. Sec., A. F. Brady, 35A, Welbeck Street, Cavendish Square, W.

**Geological Society of London.** Issues a quarterly journal. Secs., Prof. W. W. Watts and Prof. E. J. Garwood; Burlington House.

**Geologists' Association** meets at University College, Gower Street. President, R. S. Herries, M.A., F.G.S.; Secretary, G. W. Young, F.G.S., 34, Glenthorne Road, Hammersmith, W.

**Institution of Electrical Engineers,** 92, Victoria Street, Westminster, S.W. Secretary, G. C. Lloyd; Assist. Sec., P. F. Rowell.

**Institution of Mechanical Engineers.** Instituted in 1847 to promote the science and practice of mechanical engineering. There are upwards of 4800 members. Monthly meetings are held, October to April. President, Edward P. Martin; Secretary, Edgar Worthington, B.Sc., Storey's Gate, St. James's Park, S.W.

**Institution of Mining and Metallurgy.** Founded 1892 to promote the general advancement of mining and metallurgical science. The constitution embraces members, associates, and students. Ordinary meetings are held monthly, October to May; the annual general meeting in March. The Institution's gold medal is awarded periodically. President, Arthur C. Claudet; Secretary, C. McDermid, Salisbury House, E.C.

**Iron and Steel Institute,** 28, Victoria Street, S.W. Secretary, Bennett H. Brough.

**Kew Observatory,** Old Deer Park, Richmond, Surrey. Now the Observatory Department of the National Physical Laboratory (*q.v.*), and as

such superintended by Mr. C. Chree, Sc.D., F.R.S. It possesses a valuable collection of verifying apparatus and standard instruments, many of which have been purchased by grants made by the Royal Society and the British Association. In addition to its observational work in magnetism, electricity and meteorology, the observatory has attained a high reputation at home and abroad for the trustworthiness of its verifications and for its many services to experimenters. It is subsidised as the central station of the Meteorological Office for self-recording observations; it serves as a place where instruments can be tested, and as a school where intending observers can be practically trained, and as an experimental laboratory where the efficiency of new designs of meteorological instruments may be thoroughly tried. A large number of thermometers, barometers, magnetic instruments, sextants, watches, chronometers, telescopes, and a variety of other forms of apparatus, are tested annually, suitable fees being charged to defray the cost of the examination.

**Linnean Society of London**, Burlington House, W. Gen. Sec., B. D. Jackson.

**Mining Engineers, Institution of**. Founded July 1st, 1889, for the advancement of the sciences of geology, mining, and metallurgy. The Institution now comprises seven affiliated societies. Hon. members, 57; members, 2344; associate members, 159; associates, 273; students, 146; subscribers, 55; total, 3034. President, Maurice Deacon; Sec., M. Walton Brown; Offices, Neville Hall, Newcastle-upon-Tyne.

**Museums Association**. Founded in 1890 under the auspices of the late Sir W. H. Flower to promote the educational and scientific work of museums. Annual congresses are held. Secretary, E. Howarth, Museum, Sheffield. Organ, *Museums Journal*.

**National Physical Laboratory**. Opened 1902 as a public institution for standardising and verifying instruments, for testing materials, and for the determination of physical constants. Under the ultimate control of the Royal Society, the Laboratory is managed by an Executive Committee and a General Board. The Government provides £5500 a year towards the working expenses, and an additional sum of about £2500 a year is received in subscriptions from various institutions and individuals. The Laboratory also receives the proceeds of the Gassiot Endowment, amounting to £450 a year, and has an income of £5000 derived from standardising fees. The **Physics Department** of the Laboratory is located at Bushy House, Teddington; the **Engineering Department** is in an adjacent building, and a new building for electro-technical work was opened in 1906, while buildings for Metrology, Metallurgical Chemistry, and an extension of the Engineering Department are in course of erection. In the **Observatory Department** of the Laboratory at Richmond, previously known as Kew Observatory (*q.v.*), the work formerly carried out there is still continued. In the **Physics Department** at Bushy House are included sections for thermometry, electrical measurements, electrotechnics, verifications of electrical standards, photometry, optics, measurements of length, standardisation of glass vessels and weights, and metallurgy; with a chemical laboratory. Tidal predictions are also undertaken. The engineering laboratory is equipped

for carrying out mechanical and other tests. The results of research work are published in the "Collected Researches of the National Physical Laboratory." Director, R. T. Glazebrook, D.Sc., M.A., F.R.S. Superintendent Observatory Department, Charles Chree, Sc.D., F.R.S. Superintendent Engineering Department, T.E. Stanton, D.Sc. Address: National Physical Laboratory, Bushy House, Teddington.

**Palæontographical Society**, a publishing body established in 1847 for the issue of figures and descriptions of British fossils. President, Dr. H. Woodward, F.R.S. Secretary, Dr. A. Smith Woodward, F.R.S., British Museum (Nat. Hist.), Cromwell Road, S.W.

**Pathological Society**, 20, Hanover Square, W. Gen. Sec., S. G. Shattock, F.R.C.S.

**Percy Sladen Memorial Fund**, to assist research in natural science, more especially in zoology, geology, and anthropology, will doubtless materially aid many departments of biology. Clerk, A. W. Kappel. Office, Linnean Society, Burlington House, Piccadilly, W.

**Royal Astronomical Society**, Burlington House. President, W. H. Maw; Secretaries, Thomas Lewis and S. A. Saunders, M.A.; Assist. Sec., W. H. Wesley; Foreign Secretary, Sir William Huggins, K.C.B.

**Royal Botanic Society**, incorporated 1839. The Gardens, in the Inner Circle, Regent's Park, are about 20 acres in extent. The Society is composed of Fellows and members. A School of Practical Gardening has also been established, and is officially recognised by the Technical Education Boards of the London and Middlesex County Councils. The public are admitted on Saturdays and Mondays at a charge of 1s. (Bank Holidays, 6d.). Musical promenades are held in the season on Wednesdays (admission 2s. 6d.). The public are now admitted, by payment, to the exhibitions and fêtes held in the spring and summer. President, H.S.H. The Duke of Teck; Secretary, J. B. Sowerby, F.L.S.; Library and Office, Inner Circle, Regent's Park, N.W.

**Royal College of Science, London**. Is primarily intended for the instruction of teachers, and of students of the industrial classes selected by competition in the examinations of the Board of Education, but other students are admitted so far as there may be accommodation for them, on the payment of fees. The **Royal School of Mines** is incorporated with the **Royal College of Science**. Students entering for the Associateship of the **Royal School of Mines** obtain their general scientific training in the **Royal College of Science**. The course of instruction lasts for three years, and is the same for all the divisions during the first year, after which it is specialised according to the particular division in which the student is working for the Associateship. The Associateship of the **Royal College of Science** is given in one or more of the following divisions: mechanics, physics, chemistry, biology, and geology; and the Associateship of the **Royal School of Mines** in metallurgy and mining. A student obtains the Associateship who passes in all the subjects of the first year, and in the second and third year those subjects prescribed as necessary for the division in which he seeks to obtain his Associateship. Occasional students in one or more special branches of science may be admitted, providing they possess some preliminary knowledge of the subject they propose studying, and so far as there is room. Application for

admission to the College must be made on a form obtainable from the Registrar, and be sent before the middle of June for admission in the following October. The fees of students entering for the Associateship course amount to a total of from £105 to £115 in the three years. A certain number of royal exhibitions, national scholarships, and free studentships tenable at the College are awarded by competition at the examinations of the Board of Education. Particulars respecting these will be found in the Regulations of the Board of Education. Dean, Prof. W. A. Tilden, D.Sc., F.R.S. Registrar and Superintendent of Discipline, Francis Fladgate, Royal College of Science, South Kensington, S.W. Clerk and Librarian, A. Tillott.

**Royal Dublin Society.** Founded in 1731 for the advancement of Agriculture and other branches of industry, and of Science and Art. The papers read at the Society's meetings are published in the Society's "Scientific Transactions and Proceedings" and "Economic Proceedings." Hon. Secs., J. Joly, F.R.S., J. L. Riall, D.L.; Editor and Librarian, A. H. Foord, Ph.D.; Registrar and Chemical Analyst, R. J. Moss, F.I.C. Office, Leinster House, Dublin.

**Royal Geographical Society.** (1, Savile Row, W.), was founded in 1830. It annually awards three medals and other honours to distinguished workers in the cause of geography, and distributes prizes among University extension students for proficiency in this science. It contributes to the maintenance of Schools of geography in Oxford and Cambridge. It subsidises exploring expeditions. It also gives instruction to and lends instruments to travellers in various parts of the world. There is free admission for the public to the map room. In 1906 the Founder's medal was given to M. Alfred Grandidini, the Patron's medal to Dr. Robert Bell, and the Victoria Research medal to Prof. W. M. Ramsay. During the year 238 Fellows and 3 Honorary Corresponding Fellows were elected, and in May 1906 there was a total of 4376 Fellows. The published *Journal* is valuable, as tracing the progress of explorations and discoveries. The annual report presented at the anniversary meeting (May 22nd) showed that the income of the Society during 1905 had been £11,692, and the expenditure £12,066, while the total assets amounted to £60,027. President, Rt. Hon. Sir George Taubman Goldie, K.C.M.G., F.R.S., D.C.L.; Hon. Secretaries, Major L. Darwin and J. F. Hughes, Esq.; Secretary, J. Scott Keltie, LL.D.

**Royal Horticultural Society.** Gardens, Wisley, Surrey. Exhibition Hall and Offices, Vincent Square, Westminster. President, Sir Trevor Lawrence, Bart.; Sec., Rev. W. Wilks, M.A.

**Royal Institution of Great Britain.** Founded 1799, incorporated 1800, and enlarged in 1810. Chief objects: To prosecute scientific and literary research; to illustrate and diffuse the principles of inductive and experimental science; to promote social intercourse among lovers of science, and to afford to them opportunities for collective and individual study. The Institution includes Laboratories for the promotion of chemical and physical science. In the Laboratories the researches of Thomas Young, Humphry Davy, William Thomas Brande, Michael Faraday, John Tyndall, Edward Frankland, William Odling, John Hall Gladstone, James Dewar, and Lord Rayleigh have been conducted. It gives public lectures,

holds weekly meetings (on Friday evenings) of its members, and supports a model-room and a reading-room. The entrance fee is £10 10s., which includes the first year's annual subscription of £5 5s.; or a life composition of 60 guineas may be paid. The library contains about 60,000 volumes. House, 21, Albemarle Street, Piccadilly; President, The Duke of Northumberland, K.G., D.C.L., F.R.S., Treasurer, Sir James Crichton-Browne, M.D., LL.D., F.R.S., V.P.; Hon. Secretary, Sir William Crookes, D.Sc., F.R.S., V.P.; Hon. Professor of Natural Philosophy, The Right Hon. Lord Rayleigh, O.M., M.A., D.C.L., LL.D., Sc.D., F.R.S.; Professor of Natural Philosophy, Prof. J. J. Thomson, LL.D., D.Sc., F.R.S.; Fullerian Professor of Chemistry, Sir James Dewar, M.A., LL.D., D.Sc., F.R.S.; Fullerian Professor of Physiology, William Stirling, M.D., LL.D., D.Sc.; Assistant Secretary and Librarian, Henry Young; Assistant Librarian, R. Cory.

**Royal Irish Academy.** A scientific and literary society, meeting in Dublin, incorporated by royal charter of George III., 1786, and having 400 members. The Academy publishes "Transactions" and "Proceedings," containing papers on Science and Polite Literature and Antiquities. President, Francis A. Trelle, LL.D., Sc.D.; Secretary, John A. McClelland, M.A.; Resident Secretary, R. Macalister, LL.D., 19, Dawson Street, Dublin.

**Royal Meteorological Society,** 70, Victoria Street, S.W. Sec., W. Marriott.

**Royal Microscopical Society,** 20, Hanover Square, W. President, Dukinfield H. Scott, Ph.D., F.R.S.; Secs., Rev. W. H. Dallinger, F.R.M.S., F.R.S.; R. G. Hebb, M.A., M.D., F.R.C.P.

**Royal Numismatic Society,** 22, Albemarle Street, W. Secs., H. A. Grueber, F.S.A., and F. A. Walters, F.S.A.

**Royal Scottish Geographical Society.** Founded '84; 1900 members, including 170 ladies. Meetings are held in Edinburgh and Glasgow, in Dundee and Aberdeen, and the *Scottish Geographical Magazine* is published monthly. President, Prof. J. Geikie, D.C.L., LL.D., F.R.S.S.L. & E.; Editor, Miss M. I. Newbigin, D.Sc.; Secretary, Major W. Lachlan Forbes (late R.F.); Chief Clerk, Geo. Walker. Headquarters, National Portrait Gallery, Queen Street, Edinburgh.

**Royal Society, Burlington House.** A society, formed in 1660 for the pursuit of science, now famous throughout the world. Charles II. in 1662 granted the Society a charter of incorporation. This was followed by a second in 1663, giving further privileges. By that the Society was named "The President, Council, and Fellows of the Royal Society of London, for Improving Natural Knowledge." Meetings for reading and discussing scientific papers are held weekly on Thursday afternoons at 4.30 p.m. from November to June. The Society awards the Copley, Rumford, two Royal, Davy, Darwin, Buchanan, Sylvester and Hughes medals, each annually, with the exception of the Rumford and Darwin, which are given biennially, the Sylvester, which is given triennially, and the Buchanan, which is given quinquennially. The Copley is the most highly prized, and may be awarded to Englishmen or foreigners, but only goes to distinguished savants. There are upwards of 450 Fellows and 50 Foreign Members. Fellows elected, 1906: Charles William Andrews, Geo. Thomas Beilby, Frederick Frost

Blackman, Thomas John I'Anson Bromwich, Philip Herbert Cowell, Walter Heape, James Hopwood Jeans, Charles Herbert Lees, Capt. R. E. Henry George Lyons, Archibald B. Macallum, James Ernest Marsh, Peter Chalmers Mitchell, James Swinburne, Harold A. Wilson, Almoth Edward Wright. The rooms of the Society are enriched with busts and paintings, while the library contains 60,000 volumes, and there is a unique collection of relics, many of which relate to Sir Isaac Newton. **President**, Lord Rayleigh, O.M., M.A., D.C.L. **Treasurer**, A. B. Kempe, M.A. **Secretaries**, Prof. J. Larmor, D.C.L., D.Sc., and Sir Archibald Geikie, D.C.L., Sc.D. **Foreign Sec.**, Francis Darwin, M.A. **Assist. Sec.**, Robert Harrison, Burlington House, Piccadilly, W.

**Selborne Society.** Formed in 1885 to perpetuate the memory of Gilbert White, and promote the study of natural history, etc. **President**, Lord Avebury; **Hon. Sec.**, Wilfred Mark Webb, F.L.S., 20, Hanover Square, W.

**South African Association for the Advancement of Science.** Founded 1902. Head quarters Cape Town. Membership (1906) 1302. There are 4 sections constituted. The 1907 meeting will be held in Natal. **Hon. Gen. Secs.**, J. D. F. Gilchrist, M.A., Ph.D., D.Sc., Cape Town; W. Cullen, Johannesburg. **Assist. Gen. Secs.**, E. Hope Jones, S. African Museum Buildings, Cape Town; F. Rowland, Johannesburg.

**Victoria Institute.** Founded in 1869 to associate together men of science and all interested and qualified persons, in investigating "impartially and fully the most important questions of philosophy and science, especially those that bear upon the great truths revealed in Holy Scripture"; "to examine and discuss all supposed scientific results with reference to final causes, and the more comprehensive and fundamental principles of philosophy proper, based upon faith in the existence of one Eternal God"; and to bring together the results of such labours in the printed transactions of the Society. The number of members and associates is nearly 900, about one-third of whom reside abroad and in the colonies. **President**, The Rt. Hon. the Earl of Halsbury, F.R.S.; **Secretary**, Prof. Edward Hull, LL.D., F.R.S., 8, Adelphi Terrace, W.C.

**Zoological Society of London.** Founded 1826. The number of Fellows on Jan. 1st, 1906, was 3702. The Gardens in Regent's Park are open from 9 a.m. till sunset, and the Offices and Library from 10 a.m. till 5 p.m., Saturday, 10 a.m. till 2 p.m. Admission to the Gardens 6d. on Monday, 1s. the rest of the week, children 6d. all days. Reduced prices to parties of 50 and upwards. On Sundays the Gardens are only open to Fellows and their friends. **President**, The Duke of Bedford, K.G.; **Secretary**, P. Chalmers Mitchell, M.A., D.Sc., F.R.S. **Superintendent of Gardens**, R. I. Pocock. **Offices**, 3, Hanover Square, W.

### SCOTLAND.

Scotland has an area of 29,785 square miles, and a population, according to the 1901 Census, of 4,472,103. In July 1906 it was estimated to be 4,726,070. The proportion of males to females was 2,173,755 males to 2,298,348 females, giving an excess of 124,593 females, as against a similar excess in '91 of 140,213. The percentage rate of increase from '91 to 1901 was the highest recorded since '21-31, except the period '71-81, when it was 11.18. The increase was very

unequally distributed, 18 counties showing an increase and 15 a decrease. The highest rates of increase were Linlithgow 24.4 per cent., Lanark 21.1 per cent., Stirling 20.5 per cent.; and the greatest decreases were Caithness 8.9 per cent., Wigton 9.36 per cent., and Selkirk 15.78 per cent. The town districts with a population of 2000 and upwards showed an average increase of 18.58 per cent. over '91; the villages with a population of from 300 to 2000 showed an increase of .05 per cent., and the rural districts a decrease of 4.60 per cent. The number of inhabited houses was 926,914, as against 817,568 in '91. The number of families was 967,200 in 1901, as against 876,089 in '91. There were 28,106 inhabitants who spoke Gaelic only. Of the total population 1,982,812, or 44.56 per cent., were returned as following some occupation. Male workers numbered 1,391,188, or 64 per cent. of the total male population; female workers 591,624, or 25 per cent. of the total female population.

**Secretary for Scotland**, Rt. Hon. Marquis of Linlithgow, K.T.

**Permanent Under-Secretary**, Reginald MacLeod, C.B.

**Lord Advocate**, Rt. Hon. C. Scott Dickson, K.C., M.P.

**Solicitor-General**, Mr. James A. Clyde, K.C.

### The Scotch Police.

H.M. Inspector of Constabulary for Scotland (Major Arthur G. Ferguson), appointed under the County and Burghs Police Act, '57, submits a report annually. According to that for the year ended Dec. 31st, 1905, the authorised strength of the force was 5363, of which 1903 belonged to county forces and 3460 to city and burgh forces. There are also 229 additional police who are privately employed. If these are added, the total in counties will be 1973 and in cities and burghs 3619, giving a grand total of 5592 policemen in Scotland, excluding the Orkney and Shetland Islands. There is a detective staff of 193 officers in 13 county and in 18 city and burgh forces. The staff in the former is 31 and in the latter 162. In addition to these detectives constables in plain clothes frequently assist them. The total amount expended for the last financial year for pay and clothing for the whole authorised force was £455,830 11s. 3d. The aggregate cost of the police, excluding the additional police, privately employed and paid for, was £571,587 11s., which includes rent, taxes, buildings, and all other expenses connected with the police.

### Local Government Board.

The Board consists of the following **ex-officio Members**: The Secretary for Scotland, **President**; The Solicitor-General for Scotland; and the Permanent Under-Secretary for Scotland; and the following **Appointed Members**: Mr. James Patten MacDougall, C.B., M.A., **Vice-President**; Mr. E. F. Macpherson, **Legal Member**; and Mr. W. Leslie Mackenzie, M.A., M.D., **Medical Member**. The **Secretary** is Mr. G. Falconar Stewart; the **Medical Officer** under the Public Health Act is Prof. Sir Henry Littlejohn, M.D., LL.D. **Offices**, 125, George Street, Edinburgh.

The powers of the Board, though not so extensive, are somewhat similar to those of the English Local Government Board, and involve a complete control of poor law ad-

ministration and the poor law authorities, and a supervision of the local government and public health authorities; but the Secretary for Scotland exercises certain of the powers which in England belong to the Local Government Board. The poor law authorities are the Parish Councils, who also exercise many other powers. The other local authorities are the Burghal or Urban Authorities and the County Councils. See ed. 1906. The Local Government Board collects and publishes statistics as to sickness and mortality.

The Annual Report of the Local Government Board for the year ended Dec. 31st, 1905, shows that on May 15th, 1905, there were 108,643 poor persons in receipt of relief, of whom 72,148 were paupers and 36,495 their dependants. Of the paupers 14,616 were lunatics. Of the sane poor, 80,619 received outdoor and 13,255 indoor relief, and 153 were vagrants. Of the sane paupers about 39 per cent. were 65 years of age or upwards and 48 per cent. between the ages of 14 and 65. The total number of persons in receipt of relief amounted to 23 per 1000 of the population.

#### Local Taxation Statistics.

The receipts of the Parish Councils for the year ended May 15th, 1905, for poor law purposes amounted to £1,379,922, and the expenditure to £1,402,354. Of the receipts, £1,073,560 came from rates, £244,516 from Local Taxation contributions, and £61,846 from other sources. The average annual cost of maintenance of outdoor paupers was £6 13s. 10d. per head, and of indoor paupers £10 5s. 5d.

Taking all the local authorities together, their revenue for the year 1903-4, excluding receipts from loans, amounted to £13,652,872, made up as follows:—

Rates . . . . .	£5,790,788
Imperial subventions and payments . . . . .	2,269,774
Revenue-producing takings . . . . .	4,879,855
Other sources . . . . .	712,455
	<u>£13,652,872</u>

The total expenditure, not defrayed out of loans, amounted to £13,579,292. It was expended as follows:—

Revenue-producing takings . . . . .	£5,367,445
"Common Good" . . . . .	195,857
Poor relief . . . . .	1,452,982
Education . . . . .	2,654,536
Sanitation . . . . .	1,129,848
Roads . . . . .	1,029,590
Watching, etc. . . . .	652,299
Other services . . . . .	1,096,735
	<u>£13,579,292</u>

The total of the outstanding debts of local authorities amounted to £59,314,968, of which £54,779,983 was in respect of outstanding loans and £4,534,985 perpetual annuities. During the year there was an increase of £2,842,448 in the total debt. Of the outstanding loans, £11,120,545 had been incurred on account of harbours and ports, £12,348,269 for water supply, £6,096,639 for gas supply, and £5,474,225 for education. Burghal authorities were responsible for £50,112,822.

The amount paid into the Local Taxation

Account for Scotland during the year ended Lady Day, 1906, from Imperial sources was £1,133,911. It was made up as follows:—

Death Duty grant . . . . .	£315,401
Local Taxation License Duties . . . . .	383,934
Beer and Spirit Duties . . . . .	154,163
Agricultural and congested districts grant . . . . .	182,475
Additional grant from Consolidated Fund . . . . .	97,938
	<u>£1,133,911</u>

In the preceding year the amount paid into the Account was £1,119,786. During the year ended Lady Day 1905 £1,133,727 was distributed by the Secretary for Scotland in aid of local expenditure.

The Report of the Royal Commission on Local Taxation, issued in 1902 as regards Scotland ran on similar lines to that on England and Wales. It suggested that further relief should be given to the local rates from Imperial sources, and that grants should be given in aid of the following National services: viz., 1. Poor Relief, including lunatic asylums; 2. Police; 3. Education; 4. Main Roads; and 5. Sanitary Inspection. It is suggested that the amount of the grant should be about one-half of the expenditure on these National services.

Under the Agricultural Rates, etc., Scotland, Act, '96, occupiers of "agricultural lands and heritages" are liable to pay only three-eighths of the rate in the £ on rates levied by County Councils and Parish Councils. The deficiency in respect of the remaining five-eighths is met by grants paid by the Secretary for Scotland to those Councils out of the Local Taxation (Scotland) Account. The moneys come from Estate Duty in Scotland and a grant from the Consolidated Fund. The grants amount to about £180,000. The total value of agricultural lands and heritages fell from £5,827,462 in '96 to £5,634,559 in 1900, while the total valuation of all property in Scotland increased from £25,161,668 in '96 to £27,748,562 in 1900. The Scottish Act was passed for a period of five years, and, like the English Act, has been continued till March 31st, 1910.

#### County Councils.

**Aberdeen.**—Convener, Alex. M. Gordon, of Newton; Clerk, William Murison; Office, County Buildings, Aberdeen; Chief Constable, Major D. F. Gordon; County Medical Officer, Dr. James P. Watt.

**Argyll.**—Convener, John Campbell of Kilberry, Tarbert; Clerk, M. Sinclair; Office, Lochgilphead; Chief Constable, James Fraser.

**Ayr.**—Convener, R. A. Oswald; Clerk, J. E. Shaw; Office, County Buildings, Ayr; Chief Constable, Capt. Hardy McHardy, R.N.

**Banff.**—Convener, James Campbell, LL.D., Old Cullen, Cullen; Clerk, Francis George, Solicitor, Banff; Chief Constable, William Hope, Banff; Medical Officer, Dr. Cameron, Nairn; Sanitary Inspector, James MacKintosh, Banff.

**Berwick.**—Convener, Sir George Houstoun Boswall, Bart.; Clerk, Joseph Wilson; Office, County Buildings, Newtown Street, Duns; Chief Constable, Alexander Porter.

**Bute.**—Convener, The Marquis of Bute; Clerk, Robert D. Whyte; Office, County Office, Rothesay; Chief Constable, Charles Harding; Surveyors, William McIntyre and Peter Jenkins,

**Caithness.**—Convener, D. P. Henderson; Clerk, James Young, Thurso; Chief Constable, Thomas Sinclair, Wick; Surveyor, J. Harrison, Wick.

**Clackmannan.**—Convener, George Younger; Clerk, James W. Moir; Office, County Buildings, Alloa; Chief Constable, John Scott, Alloa; Surveyor, Mr. J. C. Alford, Alloa. Medical Officer, Dr. T. G. Nasmith, Cupar Fife.

**Dumfries.**—Convener, A. Johnstone Douglas, Comlongon Castle, Ruthwell; Clerk, John Robson, County Buildings, Dumfries; Chief Constable, William Gordon; Medical Officer, Dr. J. Maxwell Ross; Sanitary Inspector, Christopher Osselson.

**Dunbarton.**—Convener, Lord Overtoun, of Overtoun, Dunbarton; Clerk, William Craig, County Buildings, Dunbarton; Chief Constable, Charles Andrew McHardy; Surveyor, Archibald Wilson.

**Elgin.**—Convener, Thomas Yool; Clerk, E. D. Jameson; Office, Elgin; Chief Constable, J. B. Mair; Surveyor, Alexander Hogg.

**Fife.**—Convener, Sir Ralph W. Anstruther, Bart., Balcaskie, Pittenweem; Clerk, William D. Patrick; Office, County Buildings, Cupar; Chief Constable, J. Tennent Gordon, Cupar.

**Forfar.**—Convener, The Right Hon. the Earl of Camperdown; Clerk, R. Freer Myles; Office, National Bank Buildings, Forfar; Chief Constable, R. T. Birnie; Assessor, D. J. Carnegie.

**Haddingtonshire.**—Convener, Sir Archibald Buchan-Hepburn, Bart.; Clerk, John D. Watson; Office, Haddington; Chief Constable, Lieut.-Col. Borthwick; Surveyors, Thomas Callen and Peter Clarke, C.E.; Sanitary Inspector, G. Reid.

**Inverness.**—Convener, Donald Cameron of Lochiel; Clerks, Messrs. Anderson & Shaw, Solicitors, Inverness; Office, 15, High Street, Inverness; Chief Constable, Alexander McHardy, Castle, Inverness; Surveyors, Robert Black, C.E., and C. R. Manners, C.E., both of Inverness.

**Kincardine.**—Convener, Sir Thomas Burnett, Bart., of Leys, Crathes Castle, Banchory, N.B.; Clerk, Arthur Wellesley Kinnear; Office of County Clerk, County Buildings, Stonehaven, N.B.; Chief Constable, Charles George, Stonehaven.

**Kinross.**—Convener, Sir Charles E. Adam, Bart.; Clerk, W. K. Falconer; Office, County Buildings, Kinross; Chief Constable, J. T. Gordon; Surveyor, James Edwards.

**Kirkcudbright.**—Convener, W. J. Herries Maxwell; Clerk and Treasurer, Adam Brown; Office, Kirkcudbright; Chief Constable, Alexander Davidson; Road Surveyors, J. D. Smith, Robert Grant, jun., and John Howie; Medical Officer, Dr. James Dawson, Newton-Stewart; Sanitary Inspector, George Wintrup.

**Lanarkshire.**—Convener, A. G. Barnes Graham, of Lymekilns; Clerks, W. Alston Dykes and Thomas Munro; Office, County Offices, Hamilton; Chief Constable, Captain Despard; County Medical Officer, Dr. John T. Wilson, M.D., D.P.H.

**Linlithgow.**—Convener, Thomas Hope of Bridgecastle; Clerk, John George Barron Henderson, Linlithgow; Chief Constable, Lieut.-Col. A. Borthwick; Surveyors, A. Forbes, Linlithgow, and T. Y. Ramsay, Bathgate.

**Mid-Lothian.**—Convener, Lieut.-Col. Robert Dundas, Younger of Arniston; Clerk, A. G. G. Asher, W.S.; Office, County Rooms, Edinburgh; Chief Constable, Lieut.-Col. A. Borthwick; County Road Surveyor, John Robb.

**Nairn.**—Convener, J. S. Robertson, Constabulary Gardens, Nairn; Clerk, H. T. Donaldson, British Linen Bank Buildings; Chief Constable, John Bruce; Surveyor, P. McFarlane Cram.

**Orkney.**—Convener, Colonel James William Balfour of Balfour and Trenabie; Clerk and Collector, Duncan J. Robertson, 50, Albert Street, Kirkwall; Chief Constable, Richard Atkin, Superintendent of Orkney Police Force; Surveyor, Malcolm Heddle; Treasurer, W. P. Drever, Albert Street, Kirkwall; Medical Officer, G. R. C. Russell, M.B., C.M.; Sanitary and Veterinary Inspector, George Stevenson, M.R.C.V.S.

**Peebles.**—Clerk, John Ramsay Smith, Solicitor, 37, High Street, Peebles; Chief Constable, Col. Alexander Borthwick; Surveyor, Robert S. Anderson, C.E.; Medical Officer, William J. Brock, D.Sc., Edinburgh; Veterinary Inspector, John C. Johnston, M.R.C.V.S.; Peebles.

**Perth.**—Convener, Col. Home Drummond of Blairdrummond; Clerk, David Marshall; Office of Clerk, County Buildings, Perth; Chief Constable, John Macpherson.

**Renfrew.**—Convener, Robert King of Leverholme; Clerk and Treasurer, James Caldwell; Office, County Buildings, Paisley; Chief Constable, Charles Harding; Road Surveyors, Robert Drummond, P. D. Alexander, and James Gibson. Medical Officer, Dr. A. Campbell Munro.

**Ross and Cromarty.**—County Convener, Sir Hector Munro of Foulis, Bart., Foulis Castle, Evanton; Vice-Convener, J. Douglas Fletcher, Esq., of Rosehaugh, Rosehaugh House, Avoch; Clerk, W. J. Duncan; Office, County Buildings, Dingwall; Lord-Lieutenant, Sir Hector Munro; Medical Officer of Health, W. Bruce, M.D., LL.D., Dingwall; Sanitary Inspector, W. Mackenzie, County Buildings, Dingwall; Chief Constable, Capt. Duncan Finlayson, Police Buildings, Dingwall.

**Roxburgh.**—Convener, Lord Polwarth, Merctoun House, St. Boswells; Joint County Clerks, J. P. Stormonth and J. Stormonth Darling, Kelso; Chief Constable, Alexander Porter; County Constabulary Office, Jedburgh.

**Selkirk.** No returns.

**Shetland.**—Convener, John Bruce of Sumburgh; Clerk, Archibald Sutherland, County Buildings, Lerwick; Chief Constable, Gifford Gray; Surveyor of Roads, John McDonald, Lerwick; Medical Officer, R. Mortimer Yule, M.D., Lerwick; Sanitary Inspector, Archibald Macfarlane, Lerwick; Assessor, J. J. Brown, Lerwick.

**Stirling.**—Convener, A. P. Waddell; Clerk, P. Welsh; Office, County Buildings, Stirling; Chief Constable, J. D. Sempill.

**Sutherland.**—Convener, Donald McLean, J.P., Bhives, Golspie; Clerk, Archibald Argo, Solicitor, Golspie; Office, Golspie; Chief Constable, M. Macdonald, Dornoch; Surveyor, John Baxter, C.E., Brora.

**Wigtown.**—Convener, James Drew, of Craigenallie; Clerk, C. A. McLean, Wigtown; Chief Constable, B. S. Cunliffe; Surveyors, W. K. Gibson, Stranraer; D. H. Robb, Wigtown.

### Royal Commission on Registration of Title.

In May 1906 the King, upon the recommendation of the Secretary for Scotland, appointed a Royal Commission to inquire and report upon the expediency of instituting in Scotland a system of registration of title. The Com-

mission is thus constituted: Lord Dunedin of Stenton, Lord President of the Court of Session (chairman); Sir Samuel Chisholm, Bart., C. Fortescue Brickdale, Esq., J. Smith Clark, Esq., S.S.C., W. J. Dundas, Esq., W.S., R. C. Munro Ferguson, Esq., M.P., J. Hope Finlay, Esq., W.S., Professor Neil Kennedy, Advocate, LL.D.

**Scottish Rights of Way and Recreation Society, The, Ltd.**, Edinburgh, is the society for Scotland which performs the same kind of work as the Commons and Footpaths Preservation Society of England. Hon. Sec., Mr. C. E. W. Macpherson, C.A., 6 North St. David Street, Edinburgh.

### SEA FISHERIES, UNITED KINGDOM.

The Sea Fisheries of England and Wales are under the control of the Board of Agriculture and Fisheries (see pp. 4-5). In Scotland the Fishery Board is the authority. Its offices are at Edinburgh. In Ireland the industry is controlled by inspectors under the Department of Agriculture and Technical Instruction.

The Annual Report on Sea Fisheries in 1905, issued by the Board of Agriculture and Fisheries, gave the following figures as to the number of fishermen in the United Kingdom in 1905:

	Regular Fishermen employed.	Fishermen occasionally employed.	Total.
England and Wales	34,318	8,132	42,450
Scotland .. ..	20,064	10,487	39,551
Ireland .. ..	8,744	17,079	25,823
Isle of Man .. ..	637	240	877
Channel Islands ..	530	193	723
Total .. ..	73,293	36,131	109,424

These figures do not include the large number of persons engaged in secondary occupations connected with the fishing industry, such as coopers, packers, curers, net makers, etc.

The number and net tonnage of fishing boats in England and Wales on Dec. 31st, 1905, were:

	No.	Tonnage.
1st class .. ..	3,283	140,236
2nd „ .. ..	4,202	24,611
3rd „ .. ..	1,556	2,652
	<u>9,131</u>	<u>167,499</u>

In Scotland the figures for 1905 were:

	No.	Tonnage.
Steam Trawlers .. ..	266	11,715
„ Liners and Drifters	209	5,177
Sailing boats and vessels	10,106	119,493
	<u>10,581</u>	<u>136,385</u>

In Ireland the figures for 1904 (the tonnage is not given in the returns) were:

1st class .. ..	379
2nd „ .. ..	2,998
3rd „ .. ..	2,596
Unclassed .. ..	248
	<u>6,221</u>

### The Quantities and Value of Fish landed : England and Wales, 1905.

	cwt.	£
Fish, exclusive of shell fish	11,309,760	7,200,644
Shell fish .. ..	—	302,124
		<u>7,502,768</u>

These figures were thus made up:

	cwt.	£
East Coast .. ..	9,058,534	6,059,414
South „ .. ..	1,030,574	576,047
West „ .. ..	1,220,652	867,307

#### Scotland, 1905.

	cwt.	£
Fish, excluding shell fish ..	7,856,310	2,649,148
Shell fish .. ..	—	70,662
		<u>2,719,810</u>

These figures were thus made up:

	cwt.	£
East Coast .. ..	4,526,187	1,734,001
Orkney and Shetland	2,537,556	651,897
West Coast .. ..	792,567	263,160

#### Ireland, 1904.

	cwt.	£
North Coast .. ..	138,315	44,750

South „ .. ..	322,787	89,791
West „ .. ..	318,971	111,207

	951,836	344,154
Shell fish .. ..	—	49,476
		<u>393,630</u>

The following figures show the quantities and value of fish of all kinds imported into and exported from the United Kingdom.

Imports, 1905.	Quantity.	Value.
	cwt.	£
Herrings .. ..	602,422	205,530
Other Fresh Fish ..	279,502	416,120
Oysters for Food ..	73,390	64,380
Other Shell Fish ..	78,407	44,496
Cured, Salted, or Canned Fish .. ..	1,157,682	2,493,876
Total .. ..	<u>2,191,403</u>	<u>3,224,402</u>

Exports of British Fish, 1905.	Quantity.	Value.
	cwt.	£
Herrings .. Barrels	2,644,188	3,133,880
Salmon .. Cwts.	6,799	52,050
Pilchards .. Hhds.	31,244	88,165
Fish, unenumerated ..	—	890,765
Total .. ..	—	<u>4,164,869</u>

**Secretaries, Chartered Institute of.** Founded 1891. Royal charter granted 1902. Membership over 3300. Secretaries of public companies, societies, institutions, etc., are eligible as fellows, and assistant secretaries, registrars, or clerks as associates. Examinations for membership—preliminary (educational), intermediate (Associates), and final (Fellows)—are held in June and December. An Employment Register is kept. *Organ, The Secretary*, monthly. Sec., Mr. Russell Day, B.A., LL.M. Offices, 65, London Wall, E.C.

## SERVIA.

### Ruler.

King Peter Karageorgewitch I., who succeeded Alexander I. on the murder of the latter, June 11th, 1903, was b. in 1844, and is a grandson of George Czerny, surnamed Karageorge or Black George, who was the first chief of the Servian insurrection against the Turks in the beginning of the last century. He was joined by Milosch, who added to his name that of his mother, Obrens. These two chiefs founded the rival families of Karageorgewitch and Obrenowitch. On the death of Alexander I., together with his consort, Queen Draga, the officers who perpetrated the murder invited the present King to the throne. King Peter married in '83 a daughter of the Prince of Montenegro, Princess Zorka, who died in '90. He has two sons (Prince George, born '87, Prince Alexander, born '88) and a daughter (Princess Helène, born '84), and a brother, Prince Arsenius.

### Government and Army.

The independence of Servia, which was formerly an autonomous province of Turkey, was established by the Treaty of Berlin, 1878. The constitution, voted by the National Assembly of 1889, was abrogated by the King in May '94, and an older constitution of '69 temporarily revived; but in 1903 the 1889 constitution was restored. The executive is vested in the King and his ministers, and the legislative authority in the King in conjunction with the National Assembly or Narodna-Skuptschina and a State Council. The former consists of 130 deputies elected by universal suffrage for 4 years; the latter of 16 members, 8 nominated by the King and 8 elected by the Assembly.

The three political parties in the country are the Radicals, including the bulk of the peasants, who look to Russia for guidance; the Liberals, consisting chiefly of the town population, who are also Russophil; and the Progressives, who look to Austria for support. A general election took place in June 1906, and 84 Moderate Radicals, 40 Extreme Radicals, 14 Nationalists, 3 Progressives, and 1 Socialist were returned. For local purposes the country is divided into 16 departments and these into 1290 communes.

The military forces consist of the **National Army** and the **Militia** (Opoltschenié). The former is divided into three levies: 1st, men from 20 to 30 years of age, and containing permanent cadres and a reserve; 2nd, men from 31 to 37 years of age; and 3rd, men from 38 to 45 years, with no constituted cadres in peace time. The **Militia** consists of men from 17 to 50 years of age not in the National Army. No substitution or buying off is allowed. The annual contingent is usually about 20,500 conscripts, of whom 6000 are generally unfit for service. The peace effective is difficult to calculate, because, for economic reasons, it is usual to send men down before their proper date for release. The units are strongest in the spring, and from then gradually dwindle away until a company barely consists of more than 10 or 15 men. The army is a species of semi-militia. The strength probably varies between 12,000 and 24,000 men, though the maximum strength is said to be 27,000 officers and men. The war effective, according to official tables, the accuracy of which must be accepted with caution, amounts to 8110 officers, 331,900 men, 420 guns, and 39,070 horses. The number of actual com-

batants would be about 228,000, but a very large proportion are of the 2nd and 3rd levies, with little or no training.

### Industries, Statistics, and Diplomatic.

State religion is Greek Orthodox, but others are tolerated. Education is backward, but progressing. It is compulsory and free. Agriculture is practically the only industry, and almost every peasant cultivates his own freehold. The chief source of wealth for the peasants is animals, and particularly swine. Pauperism is practically unknown. The chief exports are agricultural produce, animals, and animal produce, fruits, etc. The chief imports are cotton, hemp, flax, wool, metals, hides and leather, machinery, haberdashery, etc. There are about 370 miles of railways. The capital is Belgrade, with about 70,000 inhabitants.

Area, 18,630 sq. m.; pop. 2,576,989. Revenue, 1902, £3,111,585; estimated 1906, £3,665,911; expenditure, 1902, £3,050,370; estimated 1906, £3,601,000; public debt, 1906, £18,439,613; imports, 1902, £1,792,830; 1903, £2,329,410; 1904, £2,437,056; exports, 1902, £2,884,946; 1903, £2,398,695; 1904, £2,486,242.

Ministry: *Premier and Minister for Foreign Affairs*, M. Nikolas Pasitch.—*Public Instruction*, M. Nikolitch.—*War*, General Putnik.—*Public Works*, M. Staukovi.ch.—*Interior*, M. Protitch.—*Finance*, M. Patchu.—*Justice*, Dr. Vessnitch.—*Agriculture and Commerce*, M. Kosta Stojanowitch.

Minister in London, Dr. Militchetch, 17, Nevcrn Square, W.

Consul-General in London, Alexander Tucker, Esq., 17, Seymour House, Waterloo Place, S.W.

British Minister at Belgrade, B. Whitehead, Esq.

British Vice-Consul at Belgrade, Hon. W. G. Thesiger, D.S.O.

### History, 1906.

One of the chief events of the year was the settlement of the regicides difficulty. The Gruitch Ministry tried to arrange the matter in April, and failing, resigned, M. Pasitch succeeding as Premier. On May 30th the King signed a decree placing the principal regicides on the retired list, and soon afterwards arrangements were made for the resumption of diplomatic relations with Great Britain. Mr. J. B. Whitehead, the new Minister, was received by the King on Aug. 20th.

The principal other feature of the year was the Convention with Bulgaria (see BULGARIA for details) and the dispute with Austria-Hungary to which it led. Austria-Hungary took umbrage at its terms, and threatened to break off the negotiations then pending for a commercial treaty with Servia, unless various stipulations were complied with. The Hungarian frontier was actually closed against Servian live stock in January. The existing commercial treaty lapsed on Feb. 28th, and negotiations went on until July 7th, when again the frontier was closed and a tariff was begun. Austria-Hungary aimed at getting her products into Servia on favourable terms, and particularly at securing an order for artillery which Servia had to place. The Stojanowitch Cabinet was overthrown on this question in March, and the Pasitch Ministry was not able to arrange it later in the year, when the relations with Austria-Hungary became very strained.

## THE SESSION OF PARLIAMENT, 1906.

[1] This article gives an outline of the principal business transacted and legislation accomplished during the first portion of the Parliamentary Session of 1906, from Feb. 13th to Aug. 4th, with the progress of the chief Bills in both Houses during the Autumn Session up to Nov. 30th.

As in previous editions, Military and Naval matters are dealt with under ARMIES and NAVIES in the body of the work, though some allusions to the Parliamentary proceedings regarding them will be found in Part I. of this article.

The Budget proposals are given in the article headed FINANCE OF THE UNITED KINGDOM (p. 154). See also Finance Act (sect. 35).

Under PARLIAMENT (p. 329) will be found biographical lists of Lords (p. 336) and M.P.s (p. 377), and matters of party policy are referred to under the heading Political Parties (p. 427) in the same article.

For convenience of reference the subjoined article is broken up into numbered sections, and divided into two parts:—

- I., containing the King's Speech, and having reference to a number of miscellaneous matters of interest; and
- II., being devoted to proceedings on Bills and an analysis of some of the principal Acts passed.

### I. KING'S SPEECH AND MISCELLANEOUS.

[2] The 1st session of the 28th Parliament of the United Kingdom and the second of H.M. King Edward VII. was opened by commission on Feb. 13th. The Lord Chancellor read the commission for opening and holding Parliament, afterwards directing the Commons "to proceed to the choice of a Speaker." On Feb. 14th the Right Hon. James William Lowther was presented, and approved by the Lords Commissioners by command of His Majesty.

On Feb. 19th King Edward opened the new Parliament in person. The Message from the Throne, besides the usual references to foreign affairs, announced that responsible government would be established in the Transvaal; that directions had been given that no further licences should be issued for the importation of Chinese coolies; that a constitution granting responsible government would also be framed for the Orange River Colony; that the Colonial Conference had been postponed until the early part of 1907, with the concurrence of the Colonial Governments concerned; that plans were under consideration for improving and effecting economies in the system of government in Ireland, and for introducing into it means for associating the people with the conduct of Irish affairs; that it was His Majesty's wish that the government of the country, in reliance upon the ordinary law, should be carried on, so far as existing circumstances permitted, in a spirit regardful of the wishes and sentiments of the Irish people; that the social and economic conditions of the rural districts in Great Britain required careful consideration; and that inquiries were proceeding as to the means by which a larger number of the population might be attracted to and retained on the soil.

Bills were promised for amending the existing law with regard to Education in England and Wales; for dealing with the law regulating trade disputes, for amending the Workmen's Compensation Acts, for the further equalisation of rates in the Metropolis, and for amending the Unemployed Workmen Act. Attention would also be called to measures dealing with the merchant shipping law, for amending and extending the Crofters' Holdings (Scotland) Act, for amending the Labourers (Ireland) Act, for checking commercial corruption, for improving the law regarding certain colonial marriages, for abolishing the property qualification required

of county justices in England, and for the prevention of plural voting in Parliamentary elections.

The Address in answer to the Royal Message was moved and seconded in the House of Peers by the Marquis of Northampton and Lord Herschell, and in the Commons by Mr. Dickinson and Mr. Acland.

[3] Aliens Act.—Mr. Trevelyan (March 5th) drew attention to the administration of the Aliens Act, and referred to statements made in the press that the Immigration Boards had exhibited considerable prejudice, if they had not been guilty of actual illegality. Mr. Gladstone replied that hard cases no doubt had occurred, but he was quite sure the Immigration Boards were trying to do their duty. So far as the criminal side of the Act was concerned, the country had already got rid of many notorious pests. In a further reply (12th) Mr. Gladstone said that a communication had been forwarded to all immigration officers directing that immigrants alleging that they are flying from religious or political persecution shall, where any doubt exists as to the truth of the allegation, have the benefit of the doubt, and be allowed to land. Sir W. Evans-Gordon (14th) called attention to the instructions issued by the Home Secretary, and complained that they amounted to a repeal of the main provisions of the Act. In reply, Mr. Gladstone pointed out that he had endeavoured to remedy certain grievances and to prevent great hardships, not considerable in number, but at the same time such as the whole country would resent. Sir E. Carson said he could see no justification for the allegation that the orders and regulations as altered by the Home Secretary were contrary to the actual expressions of the Act.

### [4] Army Subjects.

Introducing the Army Estimates on March 8th, Mr. Haldane said that it had been impossible to effect a saving of more than £17,000 over the estimates of the previous year. He referred to the increase of expenditure in recent years, and attributed it mainly to the additional personnel. He did not profess to be able to put before the House any large or far-reaching plan to effect a reduction. Parliament asked for more efficiency for less money. Before this could be attained, it was necessary to form a clear idea of the purposes for which the Army existed. They accepted the view that the Navy

at its present strength was capable of defending these shores from invasion, and said that as the Army was wanted for oversea service it must be of necessity of high quality, and ought to be of strictly limited dimensions. The size of the force depended upon our foreign relations, which might either necessitate an increase or permit of a substantial reduction. He did not think the striking force could ever be satisfactorily reduced unless provision were made for some power of expansion behind it in this country. He would like to see far more men voluntarily taking upon themselves to acquire the elements of military training in time of peace. Anything like conscription would defeat its own purpose. He touched upon the position of the Volunteers and the Militia, and upon the relations of the War Office with labour, and favoured the university education of officers.

On July 12th Mr. Haldane expounded his scheme of Army reorganisation, which is described in the article on the ARMY, p. 19.

Mr. Arnold-Forster rejoiced at the economy foreshadowed, but regretted the way by which it was to be brought about. If the Government were going to create a new Auxiliary Army, they had better complete its organisation before reducing the Regular Forces. Mr. Balfour said that the chief fault he found with the scheme was that it disclosed no practical scheme for expansion. Surely they ought to supply effective machinery for the expansion of the Army in war, before they proceeded to reduce its regular units.

Lord Roberts (July 10th) called attention to the unpreparedness of the nation for war, and to the necessity for action being taken in accordance with the recommendation of the Elgin Commission, which declared that the true lesson of the Boer War was that no military system could be considered satisfactory which did not contain powers of expansion outside the limit of the regular forces of the Crown, whatever the limit might be. He declared that the military forces of the Crown must be constituted, organised, and trained in such a way as would ensure their being able to take their full share in the defence of the Empire. Our predominance at sea, he said, was chiefly the result of military events on the Continent, besides which we had never fought without allies. It seemed to him that, with few exceptions, not the slightest attention was given to the question whether our military forces were fit to carry out their duties. The lessons of the late war seemed to have been forgotten, and the danger of unpreparedness was not recognised. Seven years had passed since the war broke out, but the experience had borne no fruit. He impressed upon the House the necessity of being prepared for any great national emergency, and therefore advocated a strong reserve in readiness to give their services to that event. Lord Milner censured the policy of brushing aside the whole question by setting up the bogey of conscription. No proper definition of conscription had yet been afforded, but if it meant that it was one of the primary duties of citizenship to defend the Empire, and that it was a corollary of that duty that the citizen should be trained, then he was in favour of it. In conclusion Lord Milner depicted the great physical and other advantages which had resulted in Germany from universal compulsory military service.

[5] China and Tibet.—Lord Fitzmaurice

(May 1st) announced that China had given its adhesion to the Convention established with Tibet in 1904.

### [6] Chinese Labour.

See Transvaal, p. 63.

Sir Henry Campbell-Bannerman (Feb. 19th) replying to a question by Mr. Chamberlain as to the Government's intentions regarding Chinese Labour, said there was no doubt that the conditions imposed under the Ordinances were servile and either cruel or such as might lead to cruelty. The question of the employment of Chinese labour was to be decided by the Colony itself when it had received full responsible government. In the Debate on the Address, Mr. Forster (Feb. 22nd) moved an amendment: "But we humbly regret that your Majesty's Ministers should have brought the reputation of this country into contempt by describing the employment of Chinese indentured labour as slavery, whilst it is manifest from the tenour of your Majesty's gracious Speech that they are contemplating no effectual method for bringing it to an end." He complained of Ministers applying the expression "slavery" to the conditions under which the coolies worked, and denied that it was a correct description. If the Government really believed that the conditions amounted to slavery, they should deal with the matter at once. Mr. Churchill said that the indenture system could not, in the opinion of the Government, be classified as slavery, in the extreme acceptance of the word, without some risk of terminological inexactitude, but it should not be readily assumed that the contract was a proper one. The Government could not suddenly deport the coolies without bringing about a collapse in the Transvaal. Under the new system introduced by the Government any coolie who wished to leave would be provided with the necessary funds out of the British Exchequer. Lord R. Cecil asked how the Government could excuse themselves for not instantly withdrawing the Ordinance and repatriating the Chinese if the representations made throughout the country as to the effect of the Ordinance were justifiable. Mr. Birrell defended the literature issued by the Liberal Publication Department on the question of Chinese Labour. On the resumption of the debate, Mr. Asquith (Feb. 23rd) claimed that he had never called the system slavery, although he was unconquerably opposed to it. It was their intention that the Transvaal should have responsible government in the fullest sense of the term, and it would be left to that country to decide whether or not it would retain Chinese labour. The home Government would reserve the right to consider the conditions under which such labour should be continued, and any legislation corresponding with the present Ordinance and inconsistent with British traditions would unquestionably be vetoed. The amendment was negatived by 416 to 91, majority 325.

On the report of the vote on account of the Civil Service Estimates, Major Seely (Mar. 14th) called attention to the Anglo-Chinese Convention of 1904, and complained that the British Consuls were assisting in the Chinese labour traffic. Mr. Churchill explained that the Consular officers had delegated their authority in the supervision of the contracts to the emigration agents of the Transvaal Government, and it

was intended to instruct these Consular officers to resume their authority in the matter, and not to further exercise it. Thus the whole Chinese Ordinance would be instantly put out of gear. Whether it would again be revived depended upon the Transvaal Assembly. **Sir Edward Grey** was of opinion that the only right and dignified position for the Imperial Government to assume was that the Imperial diplomatic machinery should not be allowed to be used in any part of the Empire for an improper purpose.

**Mr. Churchill** (June 9th), replying to criticisms from both sides of the House on the question of the Government's policy in regard to the Chinese, denied that there was any basis for the suggestion that the Government had departed from the policy which was accepted by Parliament with an overwhelming majority at the beginning of the Session. Regarding the question of repatriation, he was not prepared to admit that that policy was a failure because only twelve coolies had applied to be returned; but it was impossible to resist the conclusion that there was no general desire on the part of the coolies to leave their work and return to China. The Government would trust to a freely constituted Transvaal Legislature to deal with the matter, and if it could be shown by experiment that the mines could be worked by Kaffirs with a considerable proportion of white labour, he believed the Transvaal Legislature would put an end to Chinese indentured labour. For flogging of Chinese Coolies see under **Milner, Lord** [15].

[7] **Colonial Conference.** **Mr. Churchill** (May 7th), replying to **Mr. Lonsdale**, said that the next Colonial Conference would meet on April 15th, 1907.

[8] **Compulsory Vaccination.** **Mr. Lupton** (April 25th) moved, and **Mr. J. M. Robertson** seconded, "That, in the opinion of this House, vaccination ought no longer to be obligatory on those who regard it as useless or dangerous." **Mr. Burns** said that the difficulty with regard to the exemption from vaccination of the children of conscientious objectors was mainly administrative, there being a lack of uniformity in the administration of the law. He was considering what alteration should be made in existing procedure for securing certificates of exemption, and there would be an inquiry into the present statutory law. The motion was by leave withdrawn.

[9] **Female Suffrage.** **Mr. K. Hardie** (April 25th) moved, and **Mr. E. Wason** seconded, "That, in the opinion of this House, it is desirable that sex should cease to be a bar to the exercise of the Parliamentary franchise." **Mr. Long** was of opinion that no argument had been advanced to justify so great a change in the political system. **Mr. Gladstone** said he should vote for the motion. **Mr. Evans** was opposing the motion when a disturbance took place in the ladies' gallery, and the Speaker ordered the gallery to be cleared. On the resumption of the discussion, **Mr. Evans** was speaking when the debate stood adjourned.

See separate article, **WOMEN'S SUFFRAGE.**

#### [10] **Fiscal Question.**

**Sir J. Kitson** (March 12th) moved, "That this House, recognising that in the recent General Election the people of the United Kingdom have demonstrated their unqualified fidelity to the principles and practice of free trade, deems it right to record its determination to resist

any proposal, whether by way of taxation upon foreign corn or of the creation of a general tariff upon foreign goods, to create in this country a system of protection." **Mr. Balfour** said the motion was a vote of censure on the Opposition, with which the Government had deliberately associated themselves. He reminded them that there were at the present time two import taxes not actually balanced by any excise—the tobacco and the cocoa duties. Did the Government intend to modify that system? He then referred to protection in its technical sense, and asked if the resolution was intended to cover the question of protection of labour, and to abolish the duties which were considered protective in India. **Mr. Chamberlain** endorsed the view that the resolution was intended as a vote of censure. Was it a declaration against protection in any form, or against a particular form of protection? He asked for an answer from the Government, and no answer being given he moved the adjournment of the debate. **Mr. Dalziel** having spoken, **Mr. Balfour** claimed that the House could not reasonably discuss the resolution without knowing the interpretation which the Government put upon it. **Sir H. Campbell-Bannerman** said the two principal courses of policy, the establishment of a general tariff and the taxation of foreign corn, had been selected because they were the main features of the policy urged during the General Election. He had no direct answer to give to the points raised: they were utterly futile, nonsensical, and misleading. The motion for the adjournment was negatived by 405 to 115. **Mr. Lloyd-George** charged the Opposition with not being prepared to suggest any definite and clear scheme. **Sir E. Clarke** said that the returns at the General Election constituted, in his opinion, an emphatic and final decision against a tax on corn and meat. **Mr. Stuart-Wortley** (March 13th) moved an amendment to omit the words "recognising that in the recent General Election the people of the United Kingdom have demonstrated their unqualified fidelity to the principles and practice of free trade," which was negatived by 445 votes to 118—majority 327. **Mr. Wyndham** then moved an amendment to omit all the words after the word "proposal," and to insert the words "involving artificial protection against legitimate competition, but, with that reservation, is prepared to consider any scheme framed to secure more equal terms of competition for British trade and closer commercial union with the colonies, or for purposes of revenue." **Sir Henry Campbell-Bannerman** then moved the closure, which was carried by 471 to 123—majority 348; and on the main question being put it was carried by 474 to 98—majority 376.

#### [11] **Irish Affairs.**

In the debate on the Address, **Colonel Sanderson** moved the following amendment: "But we humbly represent to your Majesty that large numbers of your Majesty's loyal subjects in Ireland view with alarm the statement that your Majesty's Ministers have under consideration proposals to effect changes in the system of government in Ireland, believing that your Majesty's present advisers by their past declarations have committed themselves to a policy which will endanger the liberties and property of the loyalist minority, promote discord and civil strife, and impair the integrity of the United Kingdom." **Mr. Bryce** said there

wss nothing in the reference in the Speech to which loyalists in Ireland could take exception. The name of **Home Rule** had no terrors for him: he was a Home Ruler before 1886, and he had not departed in the smallest degree from the principles laid down by Mr. Gladstone in that year and in 1893. Therefore he approached the subject with a conviction that a material change was necessary in the government of Ireland. He believed the policy of the Government would be to the advantage of Great Britain no less than to Ireland. **Mr. Long** claimed that they were entitled to know whether the Government intended to adopt a policy of Home Rule by instalments. The amendment was negatived by 406 to 88, majority 318.

On the motion for the adjournment for Easter, **Mr. Long** (April 11th) raised the question of the determination of the engagement of five temporary assistant Land Commissioners and the appointment in their places of other commissioners, and claimed that the Irish Executive had acted arbitrarily, unjustly, and cruelly. **Mr. J. Redmond** also found fault with the action of the Executive because they had not taken advantage of the opportunity to remove from the Land Commission the adherents of the landlords with whom it was packed, and to appoint in their places men who would have acted fairly between landlord and tenant. **Mr. Bryce** justified the appointment, and said that among the new candidates there were some with considerably better qualifications than were possessed by their predecessors. **Mr. Redmond** (May 3rd) complained that when the Chief Secretary was appointed, twenty-seven officials of the Land Commission were nearing the end of their term of office and ought not to have been reappointed. He called upon the Government to make up now for the delay that had occurred. **Mr. Bryce** justified the reappointment on the ground of competency. Special inspectors had been selected to deal with the evicted tenants problem, and he believed that it would now be possible to accelerate matters with regard to land purchase. With respect to the relief of evicted tenants, the old regulations had been cancelled by the present Government, thereby accelerating the Estates Commissioners' work. The question of the restoration of evicted tenants would, he hoped, be settled satisfactorily shortly.

**Mr. Redmond** (May 1st) called attention to the question of taxation in Ireland, and reminded the Government that the findings of the Financial Relations Commission, which were to the effect that Ireland had been overtaxed, were accepted by the Liberal party generally, and the Chancellor of the Exchequer in particular. He maintained that while Ireland still bore an excessive share of the burdens of the Empire, the relief it would get under the Budget would be almost inappreciable. **Mr. Asquith** promised that in educational matters particularly, where, he thought, Ireland had a real grievance, Irish funds should not be unduly encroached upon. The Government also meant to inquire how far it was possible to readjust, on a fairer basis, the unsatisfactory and inequitable financial relations between the two countries. **Mr. Dillon**, on behalf of the Nationalists, said they were perfectly willing to give the Chancellor of the Exchequer time to consider the matter.

[12] Local Option.—**Mr. Ieif Jones** (April 10th)

moved "That this House notes with satisfaction the successful working of the local option laws in the Colonies, and approves the principle on which these laws are based—namely, that the people ought to possess the power through a vote of the local electors to protect themselves against the admitted evils of the liquor traffic." **Sir Henry Campbell-Bannerman** said he had always been a supporter of the principle that in regard to the creation of new licences or retaining old licences in a locality, the people in that locality ought to have the controlling power; but whether that power should be given to a simple majority on an open vote, or whether it should be given to an elected body, was a question which would have to be considered carefully. The motion was carried by 271 to 44—majority 227.

[13] Local Taxation.—**The Earl of Denbigh** (May 8th) called attention to the present system of local taxation, whereby the greater part of the accumulated wealth of the country contributes comparatively little to local charges, and to the system of compounding, whereby a large number of those who elect the local authorities are insufficiently informed as to their share in the growing burdens imposed upon ratepayers. **Lord Lansdowne** said that the Opposition regarded the question not as a party one, but as one concerning very closely the welfare of the people. **The Marquis of Ripon** said the whole question was under the consideration of the Government.

[14] Macedonia.—**Mr. Lynch** (May 23rd) moved: "That this House considers that further reforms are urgently required in Macedonia in the interest alike of the Christian and Mahomedan population, and is prepared to support His Majesty's Government in taking whatever steps are necessary to secure that end." **Sir Edward Grey** said it was not a matter in which this country could separate itself from the other Powers, however strong their views were as to larger reforms. The Government would, however, do what they could to get the Powers to join them in improving the state of affairs, and would carry on the policy of Lord Lansdowne as strenuously as they could. The motion was agreed to. **Lord Newton** (July 10th) asked whether any representations had been addressed to the Greek Government with reference to recent incursions of Greek bands into Macedonia. **Lord Fitzmaurice** said that the action of these bands was one of the greatest sources of difficulty with which the Powers had to deal. On July 3rd a joint verbal representation was made to the Greek Foreign Minister by the representatives of the six Powers at Athens, and it was hoped that the Greek Government would spare no efforts in putting an end to this dangerous condition of affairs.

[15] *Milner, Lord.*

**Mr. Byles** (March 21st) moved: "That this House expresses its disapproval of the conduct of Lord Milner as High Commissioner of South Africa and Governor of the Transvaal, in authorising the flogging of Chinese labourers in breach of the law, in violation of treaty obligations, and without the knowledge or sanction of His Majesty's Secretary of State for the Colonies." **Mr. Chamberlain** claimed that to condemn the late High Commissioner for this error, which he had frankly acknowledged, and for which he had expressed regret,

would be most ungenerous. He ridiculed the notion that Lord Milner deserved censure. Mr. Churchill said that there was no dispute about the facts, but questioned the utility of placing a formal censure of Lord Milner on the journals of the House. The Government had reason to believe that the motion, if accepted, would aggravate social and racial animosity in the colony, and would not secure in return any substantial advantage. He moved, as an amendment, "That this House, while recording its condemnation of the flogging of Chinese coolies in breach of the law, desires, in the interests of peace and conciliation in South Africa, to refrain from passing censure upon individuals." The original motion was negatived without a division, and the amendment was carried by 355 to 135.

In the House of Lords, on March 29th, Viscount Halifax moved: "That this House desires to place on record its high appreciation of the services rendered by Lord Milner in South Africa to the Crown and the Empire." The Earl of Elgin, in moving "the previous question," said that it was impossible to discuss the motion without going into the question of the policy of the late Government." Earl Roberts said that Lord Milner had undergone an ordeal which would have broken down many men. The Marquis of Ripon said that the motion would render the duties of the Colonial Secretary more difficult than they were now. The "previous question" was negatived by 170 to 35, and the motion was agreed to without further division.

#### [16] Navy Matters.

The Estimates for 1906-7 amounted to £31,869,500, as compared with £33,389,500 for 1905-6. Mr. E. Robertson (March 1st) asked the House to recollect that these were Estimates prepared during the existence of the last Government, and that a new naval policy had already been initiated when the change of Government took place. The Sea Lords who were on the Board of Admiralty last year were still in the Department. His Majesty's Government had accepted the Estimates of their predecessors, but a few changes had been made in matters of detail. See p. 310.

On the vote for ship-building, etc. (July 27th) Mr. Robertson made a statement regarding the intentions of the Government. Under the new programme of the last Government, embodied in the 1906 Estimates, it was proposed to begin building 4 armoured vessels of the *Dreadnought* type, 5 ocean-going destroyers, 12 coastal destroyers, and 12 submarines. To this programme the Admiralty had given the most anxious consideration during the five months which had elapsed since the subject was first brought before the House, and it had decided unanimously that the programme could be modified with safety. Accordingly, 3 *Dreadnoughts* were to be laid down instead of 4, 2 ocean-going destroyers instead of 5, and 8 submarines instead of 12. The total pecuniary liability involved in the original new programme was about £9,300,000. Under the revised programme it would be £6,800,000. There would thus be a saving of £2,500,000. Referring to the coming International Conference at The Hague, and to the movement in favour of a reduction of armaments, he declared the prospect justified his lifting the veil to some extent, and disclosing the intentions of

the Admiralty in 1907-8. In the Estimates for that year the provision for new shipbuilding would be limited to two armoured ships, it being understood, however, that more armoured vessels could be laid down if the Hague proposals for reduction of armaments proved abortive. The amount taken for the armoured ships in 1907-8 would be limited to a small sum. This would prevent their being begun till late in the financial year, so the good faith of the British Government, and its desire to bring about a reduction of naval armaments, would be emphasised. He assured the Committee that the Board of Admiralty was satisfied that these modifications of the programme could be carried out without impairing the naval supremacy of the country. He laid stress on the fact that this revision of the original programme was recommended by his naval colleagues at the Admiralty, who were the authors of the original programme. He also said there was reason to believe that there had not been such progress with foreign naval programmes as the Admiralty expected when its first proposals were made.

[17] Old Age Pensions.—Replying to Mr. Bottomley (Feb. 26th) Mr. Asquith said that the number of persons above 65 years of age enumerated in the 1901 census was 2,018,716, and to provide them with a pension of 5s. a week, over £26,225,000 would be required. Mr. O'Grady (March 14th) moved: "That, in the opinion of this House, a measure is urgently needed in order that out of funds provided by taxation provision can be made for the payment of a pension to all the aged subjects of His Majesty in the United Kingdom." Mr. Asquith expressed his sympathy with the purport of the motion, and regretted that he was not at present in a position to provide the necessary funds. Mr. Burns was of opinion that the fairest scheme would be one of allowing every one 5s. a week at 60 years of age, but this would be the costliest. The cheaper plan would be to exclude those who already received Army, Navy, Civil Service and municipal pensions. The time for action had arrived, and it was the intention of the Government to do something in the matter if they had the means and the opportunity. The motion was agreed to.

[18] Payment of Members.—Mr. W. H. Lever moved (March 7th): "That, in the opinion of this House, the time has now arrived when it is urgently required, in order to give to every constituency an equal, free, and unhampered selection of Parliamentary representatives, that all Members of Parliament should be paid by the State a sum at the rate of £300 per annum." The Prime Minister said the Government was in accord with the principle of the motion, but it did not follow that it was on all occasions opportune to carry it into effect. He had neither the time nor the money to carry out the proposal, and the policy upon which the Government had taken office was that of retrenchment. The resolution was carried by 348 to 110.

#### [19] South African Affairs.

Mr. J. R. Macdonald (April 2nd) moved the adjournment of the House to call attention to the way in which martial law in Natal was being applied, and the imminent dangers to the native subjects of the Crown involved in its administration. He complained that the Court which had condemned the twelve Natal natives accused of murder (see NATAL, p. 62) was

composed exclusively of militiamen, and was therefore likely to be biased. The natives might have been tried in the civil courts. **Mr. Churchill** replied that the policy of the Government throughout the Natal troubles had been to trust and support the Colonial Governor. If they had been informed from day to day of the discussion which was in progress between **Sir H. McCallum** and his Ministers, they would never have reached the position they so abruptly reached on March 28th, when the telegram announcing the impending execution of the natives was received. The further communications from the colony having satisfied the Government that the trial was fair, they told the Governor of Natal that the matter would have to be settled locally. The resignation of the Natal Government had in it an element of precipitancy, and the policy of the British Government had not been affected by that resignation. The debate was adjourned at midnight.

**Sir G. Parker** (April 11th) raised the question of land settlement in South Africa, and suggested that the £3,000,000 already allocated to land settlement should be kept for that purpose in perpetuity. He also suggested the reserving of Crown land when constitutional government was given. **Mr. Churchill** could not agree with the suggestion for reserving Crown lands, and said the Government was fully alive to the importance of the question of land settlement generally. **Sir J. Dickson-Poynder** (June 8th) urged the Government to deal vigorously with the question of land settlement, and emphasised the importance of cultivating the large tracts of waste lands. In reply, **Mr. Churchill** said they would all like to see a large tenant-farmer proprietary in South Africa, and a population with interests based on more stable foundations than gold mines and speculative finance. Up to the present only 1300 persons had been settled in the new colonies since the war, at a cost of £2,400,000, or about £1800 per settler. The credit of the two colonies was behind the £3,000,000 set apart for land settlement, and therefore the subject could not altogether be removed from their purview. Any arbitrary action on the part of this country might easily provoke antagonism. He did not think that any advantage would be gained by committing the Government to a policy of land settlement which might be reversed by the action of the local authority. As to the Transvaal Constitution and War Contribution, see TRANSVAAL, p. 63.

[20] **Sugar Convention.**—**Mr. A. H. Scott** (March 27th) moved: "That, in the opinion of this House, it is expedient to withdraw from the Sugar Convention." **Mr. Mitchell-Thomson** appealed to the Government to entreat the hon. member not to persist in his motion at the present time, and not to place a bar against the prosperity and future hope of the West Indies. **Sir J. Dickson-Poynder** moved as an amendment: "That, inasmuch as the Brussels Convention is binding on the contracting parties for a period of five years, and as any notice on behalf of a contracting State to withdraw is subject to twelve months' notice, to be given in Sept. 1907, it is inexpedient for this House to announce any decision at this moment." **Mr. Lloyd-George** said that to announce now that we intended to withdraw from the Convention would needlessly embarrass our delegates under the Convention. The fluctuations in the price of sugar had been

considerable since the Convention was signed, and the price did not go down with good harvests. He denied that the West Indies had derived any advantage from the Convention. He appealed to the mover and seconder of the motion to be satisfied with having called attention to the subject. The motion and the amendment were withdrawn.

[21] **Unemployed Workmen.**—In Committee of Supply on the Civil Service Estimates, **Mr. Burns** (July 19th) explained the steps which the Government proposed taking to grapple with the problem of unemployment the following winter. They had decided to make a grant out of the Consolidated Fund not exceeding £200,000, which would be distributed among existing Distress Committees. He estimated that with this grant and other sums that might be raised by rates and voluntary contributions, there would be £300,000 or perhaps £400,000 available for the winter. The Government would, to a large extent, rely on legislation ameliorating the social condition of the poor for the final solution of the problem. The Government were considering legislation for the extension of small holdings and allotments. In the East of London the difficulty was always great on account of the casual nature of dock labour. The Government proposals were interim proposals, pending the social measures of reform which would be submitted to Parliament in the course of the next few years.

[22] **Yarmouth Election Petition.**—**Mr. MacNeill** (July 6th) moved: "That this House do resolve itself into a committee of the whole House to consider the report of the proceedings on the trial of the election petition for Yarmouth, and the complaints that have been made of the partisan and political character of the conduct during the trial of that petition of **Mr. Justice Grantham**." The Attorney-General opposed the motion. He questioned whether the charge of partiality had been established, and he did not believe that the utterances of the learned judge had affected the ultimate decision. He regarded the conduct of the judge as most unfortunate. **Sir Henry Campbell-Bannerman** said that censure had now been passed on the judge's language and action, and he thought that that should suffice. The motion was withdrawn.

## II. ACTS AND BILLS.

[23] Subjoined is a list of the public Acts passed during the session of 1906, up to the end of November:—

- Alkali, etc., Works Regulation (ch. 14).
- Appropriation (ch. 26).
- Army (Annual) (ch. 2).
- Bills of Exchange (Crossed Cheques) (ch. 17).
- Charitable Loan Societies (Ireland) (ch. 23).
- Colonial Marriages (Deceased Wife's Sister) (ch. 30).
- Consolidation Fund (No. 1) (ch. 1).
- Crown Lands (ch. 28).
- Deanery of Manchester (ch. 19).
- Dogs (ch. 32).
- Education of Defective Children (Scotland) (ch. 10).
- Extradition (ch. 15).
- Fatal Accidents and Sudden Deaths Inquiry (Scotland) (ch. 35).
- Fertilisers and Feeding Stuffs (ch. 27).
- Finance (ch. 8).
- Ground Game (Amendment) (ch. 21).
- Indian Railways Act Amendment (ch. 9).

Isle of Man (Customs) (ch. 18).  
 Justices of the Peace (ch. 16).  
 Labourers (Ireland) (ch. 37).  
 Local Authorities (Treasury Powers) (ch. 33).  
 Local Government (Ireland) Act, 1898, Amendment (ch. 31).  
 Marriage with Foreigners.  
 Metropolitan Police Commission (ch. 6).  
 Municipal Corporations (Amendment) (ch. 12).  
 Musical Copyright (ch. 36).  
 Open Spaces (ch. 25).  
 Post Office (Literature for the Blind) (ch. 22).  
 Post Office (Money Orders) (ch. 4).  
 Police (Superannuation) (ch. 7).  
 Prevention of Corruption (ch. 34).  
 Public Works Loans (ch. 29).  
 Reserve Forces (ch. 11).  
 Revenue (ch. 20).  
 Sale of Intoxicating Liquors (Ireland) Act.  
 Seaman's and Soldier's False Characters (ch. 5).  
 Seed Potatoes Supply (Ireland) (ch. 3).  
 Solicitors (ch. 24).  
 Statute Law Revision (Scotland) (ch. 38).  
 Wireless Telegraphy (ch. 13).

The above list does not include the local acts passed.

The measures which were either introduced or afforded facilities by the Government have an asterisk prefixed to their titles (\*).

Where a bill was withdrawn or dropped it is so stated.

The date on which the royal assent was signified is accompanied by the letters r.a.; and the day on which the Act came or is to come into operation is also given, though in the absence of such intimation it must be understood to have commenced immediately after receiving royal assent.

The letter "A" signifies that the proceedings on a measure were adjourned to the Autumn Session, and that the measure had not again come before the House up to the end of November.

[24] **Aliens Bill**, to amend the Aliens Act, 1905, presented by Mr. O'Grady (March 21st), the object being to prevent foreign labour being brought into the United Kingdom under contract to take the place of workmen during a trade dispute. The bill passed through the Commons, and was read a third time May 8th. In the Lords, on second reading, Viscount Ridley moved the rejection of the measure, on the ground that they had a right to know the views of the Government concerning it. Earl Beauchamp said the Government did not propose to take part on the one side or on the other. The Marquis of Lansdowne declared that if the Government would make themselves responsible for the bill it might be allowed to pass this stage with a view to further consideration, but if not there was no other course than to reject it. The motion for the second reading was negatived by 96 to 24 (May 17th). In the Commons (May 17th) Mr. Keir Hardie asked what action, if any, the Government intended to take in connection with the rejection of the measure in another place. Mr. Whitely said it was a private member's bill, and it was not the business or the custom of the Government to take up such a bill as a Government measure in another place.

[25] \* **Army (Annual) Act** (6 Edw. VII., ch. 2—r.a. March 30th) makes the usual provision during twelve months for the discipline and regulation of the Army. On the motion for second reading, Mr. Haldane said that, with

the full assent of the Army Council, flogging would be abolished in the Army.

[26] \* **Census of Production Bill**.—Mr. Lloyd-George (May 16th), in asking leave to introduce the bill under the ten-minutes rule, said that no trustworthy statistics respecting the home trade of the country were in existence. Consequently those engaged in recent controversy had been considerably handicapped, and there had been random conjectures, more or less biassed, on both sides. If trade was going back, or was at a standstill, the sooner it was known the better. The census proposed would be taken in 1908, under the supervision of the Board of Trade. Particulars would be demanded in regard to output, materials used, the days and hours of employment, the wages of employes, the plant and machinery, and other matters. The census would be compulsory. The question as to whether the census should be quinquennial or biennial could be decided afterwards. The particulars divulged by manufacturers would be kept secret. Mr. Chamberlain said he would support the measure. Whatever their differences of opinion on the subject of fiscal reform might be, they all wanted correct statistics. Bill read second time Aug. 1st, committed to Standing Committee on Trade Aug. 2nd. Reported with amendments Nov. 8th.

[27] **Colonial Marriages (Deceased Wife's Sister) Act**, 1906 (6 Edw. VII., ch. 30—r.a. Aug. 4th), presented by Lord Elgin, declares that where a man has, whether before or after the passing of this Act, married his deceased wife's sister, and at the date of the marriage each of the parties was domiciled in a part of the British possessions in which at that date such a marriage was legal, the marriage if legal in other respects shall be, and shall be deemed always to have been legal for all purposes, including the right of succession to real property and to honours and dignities, within the United Kingdom, unless either party to the marriage has subsequently, during the life of the other, but before the passing of this Act, lawfully married another.

[28] \* **Criminal Appeal Bill**, to amend the law respecting appeals in criminal cases. Presented by the Lord Chancellor (March 22nd). In moving the second reading (27th) the Lord Chancellor said that the effect of the bill would be to allow an unrestricted right of appeal on all points to a Court of Criminal Appeal, which would have authority to entertain appeals on all questions of law, of fact, and of sentence. On the motion to go into committee, the Lord Chancellor defended the provisions of the measure generally, but was prepared to accept the amendment of Viscount Cross that an appeal should be allowed only when the judge at the trial or the Court of Criminal Appeal thought there ought to be an appeal. The bill, with further amendments, was read a third time (July 12th) and sent to the Commons. Read a first time July 18th. (A.)

[29] \* **Dangerous Performances Bill**, to consolidate and amend the law relating to the employment of girls, boys, or women in dangerous performances. Presented by Mr. H. Samuel (June 25th). The order for second reading was read and discharged, and the bill was withdrawn, July 25th.

[30] \* **Dogs Act**, 1906 (6 Edw. VII., ch. 32—r.a. Aug. 4th) amends the law relating to dogs, making the owner of a dog liable in damages

for injury done to any cattle by that dog. It also gives power to the Board of Agriculture and Fisheries to make orders concerning the wearing of collars by dogs and preventing dogs from straying. Further, where a police officer has reason to believe that any dog is a stray, he may seize the dog and detain it until the owner has claimed it and paid all expenses incurred by its detention. Where the address of the owner of the dog is known, the chief officer of police shall serve on the owner a notice stating that the dog has been seized and will be liable to be sold or destroyed if not claimed within seven clear days after the service of notice. Any person taking possession of a stray dog shall either return the dog to its owner or give notice to the police. This Act comes into operation on Jan. 1st, 1907.

### [31] THE EDUCATION BILL.

#### I. THE BILL IN THE COMMONS.

\* Education (England and Wales) Bill, to make further provision with respect to education in England and Wales. Mr. Birrell (April 9th), in moving for leave to introduce this bill, said that Clause 1 provided that on and after Jan. 1st, 1908, no school would be recognised as a public elementary school unless it was a school provided by the local education authority; therefore no elementary school would receive a penny of public money, either from rates or taxes, unless it became a provided school within the meaning of the Education Act. Voluntary schools receiving rates and grants would at once become provided schools, and consequently would receive the same kind of religious instruction as was now given in the provided schools. No catechism or distinctive religious formularies would be taught, and they would be subject to the conscience clause. Simple religious exercises and simple biblical instruction would be given. The appointment of teachers would be in the hands of the local educational authorities, and religious tests would disappear. Clause 2 authorised local education authorities, for the purpose of continuing any existing voluntary school as a provided school, to make, with the consent of the Board of Education, any arrangement they thought fit with the owner of the schoolhouse for having such use of it as was required for carrying it on as a public elementary school. This, he explained, was subject to the condition that the educational authority must, during the continuance of the agreement, assume the whole responsibility of maintaining the fabric. There was to be no contracting out of public control or out of the obligation to maintain the fabric, and the owners were to have exclusive possession in the evenings and on Saturdays and Sundays. Clause 3 provided that if the affording of facilities under this section had been made a condition of any arrangement for the use by the local educational authority of the schoolhouse of a transferred voluntary school, that authority should afford those facilities by enabling children whose parents wished them to receive religious instruction of that special character to receive that instruction on not more than two mornings a week, and that no part of the expenses of giving religious instruction of a special character should be paid by the local educational authority. The bill also provided that no parent was to be under any obligation to cause his child to attend in the schoolhouse

except during the hours for exclusively secular instruction. The teachers on the regular staff would not give denominational teaching; it would be given by the teachers of the body desiring it. The local educational authority would in populous places have the power to grant extended opportunities for denominational teaching. With regard to facilities for religious instruction of a special character, these were to be supplied in any transferred voluntary school in an urban area, on condition that the parents of at least three-fourths of the children in the school wished for such instruction. As to the non provided schools which did not come to terms with the local authorities, he said that those which were privately owned and those which were held on trusts admitting of a non-educational use could either be kept open without assistance of public funds or could be closed. But schools which were dedicated in perpetuity to educational purposes and were under the law affecting charities would either be kept open or appropriated to such uses as the law might decide, for which purpose a commission of three persons would be appointed. There was a clause in the bill for exempting teachers from giving religious instruction, and another which ensured that when schools were transferred their occupation was to continue. With regard to finance, he said that in addition to the existing grants there would be a further annual grant of £1,000,000, which would be distributed in aid of the local education rate, and would probably be in excess of the additional charges thrown upon the local authorities. Other provisions of the bill dealt with educational endowments, various administrative reforms, including a power of devolution, and special provisions regarding a council for Wales. He also said that a consolidation measure had been prepared, and would, he hoped, be referred to a Select Committee. The bill was presented and read a first time (April 9th). On the second reading, Mr. Wyndham (May 7th) moved its rejection. Replying on the debate, Mr. Birrell justified the first clause, and said the Government expected that denominational teaching would be given in future in Church schools on two days a week. The strongest criticisms which had been levelled against the bill had been directed for the most part against the very clauses which were meant to prevent hardship. The bill neither sanctioned a new religion nor did the County Council syllabuses for religious instruction contain novel elements. Examining the alternatives to the Government scheme, he said that the people did not want and would not pay for pandenominationalism. He doubted whether a merely secular system was practicable. With regard to the four-fifths clause, it was to be real and not illusory, and was confined to urban areas because the bill was meant to be a charter of freedom for the village Nonconformist. The amendment was negatived by 410 to 204, and the bill read a second time (May 10th).

On the order for going into Committee, Mr. Stuart Wortley (May 21st) moved an instruction to the Committee to make a separate bill of Part IV. (Council for Wales), which was negatived by 388 to 102. Mr. S. Roberts moved an instruction to the Committee to divide the bill into two parts, one dealing with elementary education and the other with endowments and other educational purposes. The instruction was supported by Sir W. Anson, Lord R.

Cecil, Mr. Balfour and others, and was opposed by Mr. Birrell and Mr. Dillon. The instruction was rejected by 353 to 107. Ten other instructions were ruled out of order, and the House went into Committee.

#### In Committee in the Commons.

Sir H. Craik (May 22nd) moved an amendment the object of which was to provide that a school, although it might withdraw itself from the local education authority, dispensing at the same time with rate aid, might preserve its independence and yet be eligible for Parliamentary grants, so long as it was approved by the Board of Education, and shown to be doing efficient work and complying with the conditions attached to the Parliamentary grant. Mr. Birrell could not accept the proposal, which would have the effect of setting up two kinds of schools, and Mr. Balfour could not support it in the absence of suggested machinery to attain the object in view. The amendment was negatived without a division.

Mr. Maddison then moved an amendment to add to Clause I. ("On and after January 1st, 1908, a school shall not be recognised as a public elementary school unless it is a school provided by the local education authority")—"and unless provision is made that religious instruction shall not be given therein during school hours nor at the public expense." Mr. Lough said that the Government could not agree that the amendment was the only method of securing full public control and the absence of religious tests. Mr. Chamberlain moved an amendment to the amendment to omit the words "during school hours nor." If his amendment were carried he should vote for the original amendment as amended. If his amendment were rejected, he should vote against the amendment, on the ground that there would then be no security for religious education. Mr. Birrell considered that the amendment would deal a heavy blow at the religious instruction of the children, while the amendment to the amendment might have the effect of bringing children under sectarian influences of which their parents disapproved. The amendment to the amendment was negatived by 367 to 172, and the amendment was then rejected by 477 to 63.

An amendment moved by Sir W. Anson to add the following clause: "And unless provision is made, by by-law or otherwise, for the religious instruction during school hours of the children attending the school, in accordance, as far as possible, with the wishes of their parents, whether such instruction be or be not permitted under section 14 of the Elementary Education Act, 1870," was described by Mr. Birrell as pan-denominational, and he considered that the difficulties it would raise would be insuperable. The amendment was negatived by 367 to 176. After further discussion, Mr. Asquith moved the closure, which was carried by 358 to 109. Clause I. was then carried by 365 to 162. (May 28th).

On Clause II.—arrangements with respect to schoolhouses of existing voluntary schools—Major Seely (June 12th) moved an amendment to the effect that the owners of voluntary schools should have a right of appeal to the Board of Education against the decisions of local authorities who should, without good and sufficient reason, refuse to arrange for the

continuance of the schools. Dr. Macnamara said he was not prejudiced against denominational schools as such, but he objected to compelling any local authority to take over ill-adapted buildings. Mr. Birrell assured the Committee that he was prepared to consider the amendment, but if local authorities were to be compelled to acquire the voluntary schools, a corresponding obligation ought to be thrown on the owners to transfer them when that was thought desirable. He announced that a new clause or amendment bearing on the subject would be brought up at the report stage. After further discussion, the amendment was negatived by 330 to 104.

Mr. Lough (June 19th), on behalf of Mr. Birrell, moved a new subsection to Clause II.: "Nothing in this section shall prevent the granting or requiring of facilities for special religious instruction in accordance with this Act, or prevent a local education authority, as a condition of an arrangement made under this section with respect to the use of the school-house of an existing voluntary school, from giving an undertaking to give religious instruction which does not conflict with section 14 of the Elementary Education Act, 1870, in the school." This was agreed to, and Clause II. as amended was carried by 424 to 109 (June 19th).

On Clause III.—ordinary facilities for special religious instruction—Mr. Birrell (June 20th) stated that the Government would be willing, when Clause VI. was reached, to consider the proposal that the children should be required to attend the school during the hours for religious teaching. An amendment on the subject would probably be moved by the Government. Mr. Balfour welcomed the concession with regard to religious instruction in school hours, and asked whether Ministers had withdrawn from the promise that local authorities would be compelled to take over voluntary schools when the school buildings were structurally efficient. Mr. Birrell said he was perfectly ready to make it plain that if the authorities wished to take over a school, and the trustees should desire religious facilities, such facilities there should be. Clause III. was agreed to (June 20th).

On Clause IV. Mr. E. Cecil (June 25th) moved an amendment to make it mandatory. The clause, as drafted, proposed that a local authority might afford extended facilities for denominational instruction in any transferred school in an urban area when the parents of four-fifths of the children attending the school so desired. In support of his demand the hon. member argued that if the application of the clause were left optional, different denominations would not receive equal treatment, for some local authorities would be sure to refuse to grant the special facilities asked for. What, for example, was likely to occur in Wales if the clause were not made compulsory? Mr. Birrell (June 26th) said the Government were determined to adhere to the clause as it stood. The proposal to give a mandatory character to it would not work satisfactorily, and would render the grant of a mandamus practically impossible. The Government had decided that, in order to make the clause workable in as many cases as possible, the appeal to the Board of Education was much simpler, and in the last resort the Board could have recourse to a mandamus. The Board would always regard with dislike the necessity of depriving a denominational school of rate aid. Sir Henry

Campbell-Bannerman, after dealing with the case of the Roman Catholic schools, and declaring that they might fare worse than would be possible under the bill, said that it was an undenominational bill, and it was therefore unlikely that any denomination would regard it with favour. The Government thought that the common principles of Christianity should be taught in the schools, but they had nevertheless made provision for the teaching of special doctrines in order to meet the desires of the Church of England. Mr. Balfour doubted whether the Prime Minister realised the depth of opposition to the bill in the Church of England. The result of passing the bill in its present form would be to leave the Church of England, the Church of Rome, and the Jews with a grievance wholly undressed, and to leave the grievance of the passive resisters just where it was. The division on Mr. Cecil's amendment was taken, and it was negatived by 340 to 237. An amendment by Mr. Cave, that the benefits of the clause should not be confined to schools in urban areas having a population exceeding 5000, but should be extended to transferred voluntary schools in all rural districts where there were alternative schools, was negatived by 344 to 186.

Mr. Birrell (June 27th) moved the first of the Government's amendments to Clause IV. It provided that the wishes of the parents as to the continuance of denominational teaching should be ascertained by ballot, conducted in accordance with regulations made by the Board of Education. The amendment was agreed to. Additional subsections were then carried, having for their object—(1) the prevention of improper refusal of facilities by giving those interested a right of appeal to the Board of Education, and empowering the latter to make an order, if it think fit, requiring extended facilities to be afforded, or, if it think expedient, to allow the school to continue as a state-aided school. (2) to enable the parents of at least 20 children attending a transferred voluntary school, if aggrieved by the manner in which extended facilities are afforded by the local education authorities, to appeal to the Board of Education, and empowering the latter, if satisfied that there are reasonable grounds for appeal, to make an order continuing the school as a state-aided school; (3) to enable the Board of Education, when a school is continued as a state-aided school, to pay to the school, although not provided by the local educational authorities, the parliamentary grants which would be payable if it were a provided school; and (4) no child shall be reckoned as a child attending a school unless the child has attended with due regularity for at least six months, and the Board of Education shall decide any question arising as to whether a child is attending a school. Clause IV., as amended, was then added to the bill by 415 to 138 (June 27th).

Clause V.—application of provisions as to facilities to future elementary schools—was also agreed to (June 27th).

On Clause VI., which provided that the attendance of a child shall not be required during the time set apart for religious instruction in a public elementary school, Mr. Walters (July 2nd), moved an amendment having for its object to secure the attendance of the children during the whole time devoted to instruction, religious as well as secular, but for children whose

parents wished to withdraw them from religious observances, or instructions, secular teaching should be provided by the local education authority. Mr. Birrell, after renewing the intimation already made that the Government would not bring party pressure to bear on their supporters to induce them to vote for the clause as it stood, explained in detail the existing law as to the attendance of children during the time set apart for religious instruction. Under a by-law issued when Sir W. Anson was at the Board of Education, it rested with the local authority to decide whether attendance should be compulsory. Were Clause VI. deleted from the bill, matters would be left in that position. He proceeded to say that he was for passing the clause, which was the only effective means of making the conscience clause a reality. The amendment was negatived by 283 to 267, and Clause VI. was passed by 204 to 247.

Clause VII.—Provisions affecting teachers. Mr. Hicks Beach (July 3rd), moved to omit the subsection in which it was laid down that a teacher in an ordinary transferred voluntary school shall not be at liberty to give denominational instruction. Mr. Birrell described the amendment as one that would knock the bottom out of the bill, and said that if this change were made it would be difficult to show the people that they were getting any tangible return for the expenditure of a million a year. The object of the bill was to establish, at any rate in rural districts, an undenominational form of religious teaching. From the speeches that had been made, one would think that the teachers would never have opportunities for enforcing the great precepts of religion in the minds of their pupils. Cowper-Temple religion, as it was called, was to be given by the ordinary teacher. It was the canonical duty of the clergy to teach denominational religion. It was not a duty which should be imposed on State-paid elementary teachers. The Solicitor-General explained the purpose of the subsection to be to prohibit the teacher who had become a State servant from devoting his time to the interests of a particular denomination. The amendment was negatived by 318 to 191. Clause VII. was carried by 364 to 183 (July 3rd).

Clause VIII. proposed to give local education authorities power to obtain schemes for the transfer of voluntary school buildings held under trust, and proposed to set up a Commission to which the duty of framing such schemes should be entrusted. Mr. Birrell (July 4th) announced the names of the three Commissioners who were to be appointed to frame schemes under the clause. They were Sir Arthur Wilson, Sir Hugh Owen, and Mr. Worsley-Taylor, K.C. They would have to decide whether a school, in order that the trust might be carried out in the best way, ought to be transferred to the local authority. In the subsection providing that when the Commissioners were of opinion that the use of the schoolhouse by the local authority was the best mode of giving effect to the trusts, they might by their scheme make provision for the purpose, subject to conditions as to payment and other matters, Sir W. Anson (July 9th) moved to insert words directing the Commissioners to require the local authority to comply with such conditions as to rent as might be thought just. Mr. Birrell conceded the point, but suggested some modifications in the amendment which were not contested. After a number of other amendments had been moved and re-

jected, **Clause VIII.**, as amended, was passed by 311 to 145.

**Clause IX.**, dealing with the appointment of the three Commissioners, was passed without opposition (July 10th).

**Clause X.** gave local education authorities the right to use temporarily, without payment, voluntary school buildings held under trusts, during a period of 12 months from Jan. 1st, 1908, but at the suggestion of Mr. Clough the period was extended to 1910. In the discussion as to the position of teachers in these schools, which were to become for a time provided schools, Mr. Birrell (July 10th) stated that when vacancies occurred teachers would be appointed to fill them by the managers selected by the local authority. The appointments would be consistent with the terms of the trusts, and the head teachers would certainly be denominational. It would be the duty of managers representing the local authority to take care that the teachers chosen were qualified to give the specified religious instruction. He then moved an amendment giving effect to these views. The amendment was energetically opposed by Mr. Perks, who protested against the concessions to the representatives of sectarian schools. On a division the amendment was carried by 369 to 51. After further amendments had been rejected, **Clause X.**, as amended, was passed.

On **Clause XI.**—temporary restriction on closing of voluntary schools—Mr. Ashley (July 10th) moved an amendment to exclude privately owned schools from the operation of the clause, which would prevent owners from closing their schools before the local authorities had time to decide whether or not they should be taken over. The amendment was negatived by 390 to 107, and **Clause XI.** was agreed to.

**Clauses XII.**—providing for the Parliamentary grant of £1,000,000 mentioned by Mr. Birrell—and **XIII.**—definitions—were passed, and this ended Part I. Mr. Birrell's motion to leave out Part II. of the bill—dealing with educational endowments—was agreed to (July 10th).

### Part III. of the Bill.

Upon **Clause XXVI.** there was a long discussion upon the topic of delegation. The clause provided that if the council of any urban or rural district, or of any parish, were to require the county council to delegate to it powers for the management of elementary schools other than powers relating to the engagement, dismissal, and salaries of teachers, the demand might be acceded to. The discussion disclosed a very general agreement as to the expediency of some form of devolution in order to stimulate local interest in education, but there was not the same unanimity in regard to the bodies which should exercise the delegated powers, or in regard to the particular powers which should be conferred upon them. Mr. Adkins contended that there should be a system of devolution, under which every county council would be allowed to draw up a scheme suited to its own needs. Mr. Birrell said he assumed from the discussion that the Committee desired that there should be some delegation to bodies varying possibly in their character, but including an elective element. The county council, he held, should have the nomination of a fraction of the members on these bodies, in order to secure that women should be represented upon them. The conclusion to which he had come was not to proceed with the clause

in the bill. A provision based on the lines which he had indicated would be substituted for it.

**Clause XXVII.**, containing provisions as to the purchase and appropriation of land, was amended and passed without a division.

**Clause XXVIII.**, which extended to 60 years the period for the repayment of money borrowed for the purposes of education by a county council, was carried by 309 to 72.

**Clause XXIX.** proposed to abolish the rate-limit of 2d. for secondary education; and Mr. Harold Cox objected to the policy of sanctioning further local expenditure on the higher forms of education. He asked the Government to agree to an amendment providing that, before exceeding the limit of 2d., a county council should obtain the sanction of the ratepayers whose money was involved. The amendment was rejected by 389 to 90. The clause was then passed.

The special closure resolution then came into operation, and **Clauses XXX. to XXXIII.**—dealing with the apportionment of capital expenditure to the parishes served, audit of accounts of Joint Education Committees, borrowing from Public Works Loan Commissioners, and the reference of certain educational questions to the Board of Education—were passed with amendments moved by Mr. Birrell. **Clause XXXIV.** (power to require conditions from students entering training colleges) was withdrawn.

**Clause XXXVI.** proposed to confer powers on a local authority to provide vacation schools, classes, or means of recreation in schoolhouses in holiday time, and to make such arrangements as might be sanctioned by the Board of Education for attending to the health and physical condition of the children in elementary schools. An amendment, moved by Mr. Tennant, to secure the compulsory medical examination of children attending the schools, was withdrawn on Mr. Birrell stating that he would put down for the report stage an amendment making medical inspection obligatory for every child on its application for admission to a public elementary school, and on such other occasion as the Board of Education might direct or the local education authority might think fit. Mr. R. Macdonald moved an amendment to the effect that local authorities should have power to give scholarships or bursaries, in order to enable scholars to remain in elementary schools beyond the ordinary time. Mr. Birrell said he could not accept the amendment as it stood, but if modified he would agree to it. At Sir W. Anson's suggestion, it was resolved that the period during which the scholarships might be given should be between the ages of 12 and 15, and the amendment so altered was carried by 391 to 86. **Clause XXXVI.** was then passed.

### Central Council for Wales.

In introducing **Clause XXXVII.** or Part IV. of the measure, which provided for the establishment by Order in Council of a central education authority for Wales, Mr. Lloyd-George (July 17th) announced that the Government had decided to amend the clause, in order to render it more acceptable to the Opposition. He disclaimed on the part of those who had moved in the matter any intention of manufacturing a kind of infernal machine for the purpose of destroying the last vestiges of denominational education in the Principality. He was quite ready

to meet the demand that Parliament should have complete and substantial control over the acts of the new council, and accordingly he proposed to move for the appointment of a **Minister responsible to Parliament** for what the council did with its delegated powers. The control, he thought, should not be exercised by the Board of Education, but by a special Minister with a special staff. He was also prepared to accept the substance of an amendment standing in the name of Mr. Ashley, and to require the new Minister to lay before Parliament annually, a statement as to the sums to be distributed in grants. Appeals, when facilities for religious instruction were refused by local authorities, would be dealt with by the Board of Education, for the Government recognised that in matters of that kind the supporters of the voluntary schools would not be satisfied with the decisions of a council representing local opinion. Mr. Lloyd-George moved that the Order in Council establishing the Welsh Council should provide for the appointment of a Member of Parliament, whether holding office under the Crown or not, who should be responsible to Parliament for anything done by the council in the exercise of the powers delegated to it. He explained that the official responsible for the new department might either be a member holding office under the Crown, or he might be an ordinary member, who would represent the department in the same manner as the Charity Commission was represented. The amendment was carried by 279 to 50. Mr. Lloyd-George subsequently moved an amendment providing that the Board of Education should deal with appeals as to the interpretation of the provisions of the Act, and should have the regulation and control of State-aided schools. It also provided that the Board should retain all its powers and duties under the Charitable Trusts Act and the Endowed Schools Act. The amendment was carried by 387 to 105, and Clause XXXVII. as amended was passed by 395 to 107 (July 18th).

#### New Government Clauses.

Clauses XXXVIII, XXXIX, and XL, were passed, and the first of several new clauses which the Minister for Education had put down upon the paper was considered. The purpose of this new provision was to fill up "the gap" between the second clause and the clauses immediately following. It proposed to enact that where a local authority and the owners of a schoolhouse failed to come to an agreement as to the use of the premises, either party might appeal to the Board of Education. The Department, if it should consider that the school was required for the purpose of providing sufficient school accommodation, and if the schoolhouse were structurally suitable, was to have the power to step in and make an order for the use of the building. Mr. Birrell said he had consented to exercise compulsion on the county councils on the condition that a corresponding obligation to transfer their schools should be imposed on owners and trustees. There was to be a bilateral obligation. The clause which had been drawn up to carry out this undertaking was not one which he proposed to force upon the Opposition. If his proposal were not approved of by them, he should call "No" when the question was put from the chair that the clause be read a second time.

Mr. Balfour repudiated the responsibility

which the President of the Board of Education was seeking to cast on the Opposition. It was the business of the Government to make up their minds as to the course to be taken. On a division being taken, the figures were: for the clause, 78; against, 327.

Mr. Birrell then moved a new clause, imposing on county councils the duty of preparing, within two years after the passing of the Act, schemes for the delegation of some of their powers to representative bodies. The bodies to which powers were to be delegated might be specially elected, and women would be eligible to serve. They might, however, be constituted in other ways. After various criticisms, the clause was read a second time. On a division being taken that the clause stand part of the bill, the figures were: for, 365; against, 95.

Ministerial clauses giving local education authorities a power to require the use of schoolhouses for educational purposes out of school hours, and providing for allowances to teachers losing employment in consequence of the Act, were also passed after divisions.

#### Report Stage in the Commons.

Finally, the measure passed through Committee by 303 to 141 (July 18th). On the Report stage (July 23rd) Lord R. Cecil moved the recommitment of the bill in respect of Clauses 4 and 25, which was negatived by 279 to 146, after Mr. Birrell had announced the abandonment of the proposal to appoint a Minister of Education for Wales. Mr. Birrell then moved to add to the subsection of Clause 2 relating to the repair of a schoolhouse by the local authority, the words, "subject to the right of the owner of a schoolhouse which is not held under any charitable trust himself to carry out, if he wishes it, any alterations or improvements so required, and to recover from the local education authority any expenses which, in the opinion of the authority, or, in case of dispute, in the opinion of the Board of Education, are reasonably incurred for the purpose." This was agreed to. On Clause 2, Mr. Birrell's amendment was carried providing that the owner of a schoolhouse of any existing voluntary school may use the schoolhouse or permit it to be used, either in consideration of a payment or free of charge, for any purposes they think fit, subject to any statutory provisions under which the use of the schoolhouse may be required for public purposes. A further amendment was also carried providing that the schoolhouse is to be used for any purposes "of public or social utility." Mr. Birrell moved another amendment to the effect that the mornings on which religious instruction could be given in a school should be the same mornings in the week for all the children attending, unless the authority, on account of the accommodation in the building or the number of classes, considered that the instruction could not be given efficiently on the same mornings. This was carried by 318 to 54. Further amendments to Clause 4 proposed by Mr. Birrell were agreed to without a division. An amendment with regard to extended facilities, that the children to be reckoned as in attendance must have been so attending for at least six months, was carried.

The new financial provisions relating to the Council for Wales were agreed to, and an amendment providing that the stoppage of proceedings on any draft Order in Council against which an address was presented by

both Houses of Parliament should be without prejudice to the making of any new draft, was carried by 362 to 88.

A new subsection to Clause 26, enabling conditions to be attached to the award of allowances to teachers, was agreed to, and the bill was ordered for third reading (July 25th).

## II. THE BILL IN THE LORDS.

Lord Crewe (July 30th) moved the first reading of the bill, which was carried without debate; and the second reading, which was carried (Aug. 3rd) after a debate in which large and drastic amendment was foreshadowed by the Archbishop of Canterbury and other speakers.

### *In Committee in the Lords.*

[As the numbering of the clauses differed from the numbering when the Bill was before the Commons, the nature of each clause is indicated below.]

On Clause I., Lord Heneage (Oct. 29th) moved that as a condition of a school being recognised as a public elementary school, some portion of the school hours every day should be set apart for the purposes of religious instruction. The question before the Committee, he said, was whether the poorest children of the country were or were not to remain Christian. It was absolutely essential that the instruction should be given in school hours, and, in order that discipline might be maintained, that it should be taught by the teachers who, as a general rule, were popular with the children. The Archbishop of Canterbury, who had a somewhat similar amendment on the paper, said they had many assurances that there was nothing in the bill hostile to religious teaching, but he could not accept them, seeing that it was provided that religious teaching should not be given in school hours, that no teacher need give religious teaching unless he liked, and that no child need attend that teaching unless it liked. He wished to see placed in the forefront of the bill some declaration recognising the fact that there was to be religious teaching. The Earl of Crewe objected that there was nothing in the amendment to prevent the religion taught in elementary schools from being Mohammedan or Buddhist. What was the religious instruction going to be? There was no accepted definition of religious instruction. Was the Board of Education to decide on the subject, or were the Courts to be applied to for a *mandamus*? Lord Lansdowne contended that what they wanted was to keep the door open for religious instruction. If the Government refused to concede this, then they would know what confidence to repose in their declarations that religious instruction ought to be an essential part of the education of the country. After further discussion, a division was taken, and the amendment was carried by 256 to 56. Clause I. as amended was added to the Bill (Oct. 30th).

On Clause II. (arrangements as to the school-houses of existing voluntary schools), the Archbishop of Canterbury (Oct. 31st) moved an amendment to make it obligatory on the local education authority if required, under certain circumstances, by the owners of a voluntary school, to continue it as a provided school. This was carried by 200 to 47. Lord St. Aldwyn suggested as a proviso that words should be inserted in the clause declaring that where an

existing voluntary school was not to be continued it should be incumbent on the local authority, on the requisition of the owners of the schoolhouse, to afford facilities for special religious instruction, hitherto given in the discontinued school, in some other school accessible to the children. The noble lord had also a proviso to the effect that the local authority might appeal to the Board of Education for the closing of a school on the ground that the school was not required, as well as on the ground that it was structurally defective. The Bishop of Southwark impressed upon the Committee that the Board should have regard to the interests of secular education, to the wishes of the parents as to the religious education of their children, and to the economy of the rates. Lord Lansdowne approved of the words suggested by the Bishop of Southwark, and moved that they be added to the proviso. On a division, the amended proviso was carried by 197 to 52. The discussion on the larger proviso, affording facilities for religious instruction after a particular school was closed, was postponed until the third clause. Clause II. as amended was agreed to.

On Clause III. (ordinary facilities for special religious instruction), Lord Balfour (Oct. 31st) moved an amendment providing that in the case of any public elementary school in which extended facilities are not afforded, parents of not less than twenty children may demand facilities for religious education. Lord Reay held that the amendment would lead to endless disputes on the religious question, and that the privilege was not asked for by the parents. He ridiculed the idea of applying such a scheme in the large board schools, and argued that if it were applied the result would be disastrous. The Duke of Devonshire said he could not support the amendment, and Lord Portsmouth also opposed it. Lord Crewe argued that if the amendment passed, the effect would be in rural districts that the local authority would have to pay for denominational teaching given by a church teacher; and what, he asked, would be the use of facilities to a few Methodist children? Lord Ripon promised that the amendments on the paper would be carefully considered, and on that the amendment was withdrawn. An amendment by the Bishop of Hereford (Nov. 1st) providing that in any parish in a rural area where there was only one elementary school, and the parents of a reasonable number of children required special facilities for religious instruction, those facilities should be afforded, was passed, after an amendment to this amendment, by Lord Salisbury, substituting the word "district" for "rural area," was withdrawn. The Archbishop of Canterbury (Nov. 5th) moved a new subsection declaring in effect that when any question arose between persons supplying religious instruction and the local authority, it should be decided by the Board of Education. Lord Crewe deprecated continual appeals to the Board in matters of this kind, but he did not propose to divide the House. The amendment was agreed to. After further discussion Clause III. was agreed to.

On Clause IV. (extended facilities for special religious instruction), Lord Heneage (Nov. 5th) moved an amendment making the clause mandatory. Lord Salisbury said that hitherto the religious spirit remained alone in the voluntary schools, and it was of vast importance

to know what the future of those schools was to be when they were taken over by the local authority. Apart from all denominational considerations whatever, they must make sure that the teacher was penetrated by the religious spirit; and to the owners of the school and the parents it was of the utmost importance that they should ascertain that the teacher was a religious man. Lord St. Aldwyn pointed out that Clause III. was mandatory, and asked why this should not apply to Clause IV., which dealt not with ordinary but extended facilities. The Bishop of London also supported the amendment. Lord Crewe held that the permissive principle was necessary in this clause, but the special facilities would invariably be given when the conditions laid down were fulfilled. On a division, the amendment was carried by 157 to 46. An amendment was then moved by Lord Jersey, providing that the extended facilities should not be confined to "urban areas" as set out in the clause. He argued that the facilities were as necessary in rural as in urban areas—in fact, wherever the parents of the children resided. The Bishop of Hereford also supported the amendment, on the ground that the clause imposed an arbitrary distinction. Lord Crewe insisted that there was a great difference between the circumstances in urban and in rural districts, and observed that the minority in country districts were not so well able to defend themselves, when they differed on political and religious matters from the majority and the better-off classes, as the people in the towns. Lord Ripon having defended the clause as an essential part of the Government scheme, the amendment was carried by 180 to 44. In regard to the four-fifths majority, Lord Cadwor (Nov. 6th) moved an amendment leaving out the words "as the result of a ballot taken previously to the inquiry as to the wishes of the parents in accordance with this section," but the amendment was not pressed. Lord Jersey then moved an amendment providing that if a majority of the parents of the children attending the school desired extended facilities, they should be granted. On a division this was passed by 196 to 48. Lord Camperdown holding that the amendment was too sweeping, moved to insert words providing that it should be a majority of "two-thirds," as against a bare majority and against, as in the Bill, a majority of four-fifths. The two-thirds proposal was defeated by 133 to 83. A further amendment by Lord Cadwor, proposing to insert words providing that any child, whose parent declared his desire for some other form of religious instruction than that for which facilities were offered, should be provided for, was carried by 152 to 42. An amendment by Lord Cadogan providing for some form of religious instruction other than that for which extended facilities had been obtained being given to the minority in a school with the authority of the Board of Education, was opposed by Lord Crewe, the Bishop of Southwark, Lord Belper and others. After considerable discussion Lord Cadogan offered to withdraw his amendment, but Lord Crewe objected, and on a division it was rejected. The Bishop of Hereford (Nov. 7th) moved an amendment providing that where extended facilities were afforded the local education authority shall (instead of "may") if they think fit, permit the teachers employed in the school to give the instruction desired, but not at the

expense of the authority. The amendment was passed by 195 to 47. Lord Clifford of Chudleigh then moved two amendments. The first was to the effect that a prior right of admission to an extended facilities school should be secured to children residing within the area for which the school was available. This was passed. The second amendment provided that the parents of children attending a school should elect four persons to be known as "the parents' committee," who should be responsible for the religious instruction to be given, in accordance with the trust deed relating to the school. The part of the amendment regarding the appointment of the parents' committee was passed. Another part referring to the appointment of teachers in connection with the committee was allowed by general consent to stand over. After further debate, Clause IV. as amended was added to the bill.

On Clause V., which dealt with appeals to the Board of Education as respects extended facilities, Lord Ashbourne (Nov. 8th) moved an amendment providing that where the owners of a schoolhouse were dissatisfied with the action of the local education authority as to the mode in which extended facilities were afforded they might appeal to the Board of Education, who should have power to take such action in the matter as it thought right and proper, requiring extended facilities to be afforded. This amendment was agreed to.

After some discussion on Clause VI. (application of the provisions as to facilities to future elementary schools) Lord Salisbury moved that the clause be struck out, which was carried by 120 to 34. The Bishop of Oxford then moved to insert in its place a new clause providing that if it was considered that a new elementary school, with facilities for religious instruction of some special character not permitted under the Act of 1870, was required in a district, the persons concerned might give public notice of their intention to provide a schoolhouse; that when such notice had been given, the Board of Education should determine, after inquiry, whether the proposed school was required, and that, if it was determined that it was required, an arrangement should be made in respect of the schoolhouse as soon as it was ready for occupation, as though it were the schoolhouse of an existing voluntary school. This clause was agreed to without a division.

On Clause VII., which provided that attendance during the time of religious instruction shall not be required, Lord Amptill (Nov. 8th) moved its omission; which, he thought, was inevitable after the changes which had been made in the bill. Lord Lansdowne said the Opposition were entirely opposed to putting anything like compulsion on parents in respect to religious instruction, but this clause was not one putting on compulsion, but one which offered a distinct inducement to parents to withhold their children from religious instruction. On a division, the clause was struck out by 143 to 31. Lord Llandaff (Nov. 12th) moved to insert in place of Clause VII. words providing that a child shall be required, with certain reservations, to attend at the schoolhouse during the hours allotted to instruction in religious subjects. The Bishop of Hereford moved an amendment providing that in all schools in which extended facilities for special religious instruction had not been given, Biblical instruction, as provided by the Act of 1870, should be given to all children whose

parents did not make application for their withdrawal from such instruction. After a long discussion, Lord Llandaff's amendment was carried by 151 to 43. Lord Llandaff then moved an addition to the clause providing that the appointment of teachers shall be made by the local education authority upon the nomination of the parents' committee, who, he argued, should have a voice in the appointment of the teachers. This proposal, however, was challenged and postponed, and the new Clause VII. was added to the bill.

On Clause VIII., which provided that a teacher shall not give any religious instruction of a special character, not permitted under the Act of 1870, in any school in which facilities for that instruction are afforded under the bill, except where permitted to do so by the local education authority in cases where extended facilities are so afforded, Lord Monkswell (Nov. 12th) moved an amendment to the effect that the clause shall only apply to teachers appointed after the passing of the bill. Lord Crewe was of opinion that the great majority of teachers were in favour of the clause as it stood in the bill; he would not, however, divide the Committee on the amendment. Lord Cawdor then moved an amendment which proposed to establish the absolute right of the teacher to give religious instruction, explaining that the sole object of the amendment was to see that the teachers were not subjected to unreserved restrictions. The Committee ultimately divided on the amendment to strike out "not" from the clause, thus providing that the teacher shall be permitted by the local education authority to give religious instruction of a special character not allowed under the Act of 1870. This amendment was carried by 147 to 46. Several minor amendments were then withdrawn, after which the Archbishop of Canterbury moved one providing that it shall be the duty of the local education authority to satisfy themselves as to the qualification of any teacher to whom was assigned the giving of religious instruction, and that the selection committee shall consist of five persons, one to be selected by the persons supplying the instruction, three by the parents, and one by the local education authority. He held that the most careful inquiry ought to be made into the qualification of the teacher. While they rightly abolished tests, were they to be debarred from inquiry as to the personal qualifications of a teacher to give religious instruction? Lord Crewe expressed sympathy with the object of the Archbishop, and proposed alternative words, providing that nothing in the bill should prevent the local education authority from finding out the capacity of a teacher to give religious instruction in accordance with the Act of 1870. The words of Lord Crewe were then substituted for the first part of the amendment by the Primate. The Archbishop of Canterbury (Nov. 15th) moved the addition of a new subsection to clause 8, providing that in every elementary school in which extended facilities were afforded, the consent of the selection committee should be required to the appointment of teachers, but that consent should not be withheld except on grounds connected with the giving of religious instruction. Viscount St. Aldwyn thought it would be difficult to enforce the amendment as it stood, and suggested that some such proposal should be accepted by the Government as the following:

"That in every public elementary school in which extended facilities are afforded under the Act, the local education authority shall consult with the parents' committee as to the appointment of teachers, and shall satisfy themselves that the persons so appointed are competent and willing to give the religious instruction for which the extended facilities are afforded." These words were added to the Archbishop's amendment, which, as amended, was then added to the clause. After some further discussion, Clause VIII. as amended was added to the bill.

On Clause IX., which gave power to obtain schemes with respect to voluntary school buildings held under trust, Viscount Llandaff moved the omission of subsection 2, which directs that the Commission shall not treat a proposal to carry on an elementary school as a proper mode of giving effect to the trusts unless sufficient guarantee is given for the effective continuance of the school for at least five years. On a division the subsection was struck out by 91 to 30. After further discussion Clause IX was agreed to.

Clause X. (appointment of three Commissioners) was passed without alteration, Nov. 19th.

Clause XI. (temporary use of voluntary school buildings by the local education authority) was passed without amendment, as was Clause XII., which provides that existing voluntary schools should not be closed except with the sanction of the Board of Education. Clauses XII., XIII. and XIV. were added to the bill. On Clause XV., which stated that "the council of every county shall, subject to the provisions of this section, within two years after the passing of this Act, prepare a scheme for the purpose of delegating throughout their county to representative bodies, as defined by this section, some of their powers and duties with respect to elementary education," an amendment by Lord Belper to delete the words "representative bodies as defined by this section" and to insert "local education committees" was carried by 99 to 31. A motion to delete subsection 3, which states that the provisions of the scheme as to the powers and duties delegated and as to the charging of expenses should be uniform as respected all delegation areas in a county, was agreed to without division. Clause XV. as amended was added to the bill, and also Clause XVI. Clause XVII., which extended the period for the payment of money borrowed by county councils, was after some discussion passed, Nov. 21st. Clauses XVIII. to XXIII. were also added to the bill. On Clause XXIV., which gave the local authority power to provide for children attending public elementary schools means of recreation and amusement, the Earl of Jersey (Nov. 21st) moved an amendment enabling the authority to encourage and assist the continuance of voluntary agencies which devote themselves to work of this character, which was agreed to. The clause as amended was passed.

A new clause, moved by Lord Belper, was passed. It provides that "when a local education authority provides means of conveyance for a child between a reasonable distance of its home and a public elementary school, it shall not be a reasonable excuse, for the purposes of section 74 of the Elementary Education Act, 1870, that there is no public elementary school open which such child can attend within three miles of its residence."

A long debate took place on a motion by Earl Cawdor to omit Clause XXVI., which provided that power should be given by Order in Council to establish a central education authority for Wales to be called the Council for Wales. The motion was eventually carried by 109 to 44.

Clauses XXVII., XXVIII. and XXIX. having been passed, a new clause was added providing that section 16 of the Education Act 1902 shall apply to any failure of a local education authority to fulfil any of their duties under this Act.

The Committee stage was then finished (Nov. 22nd). By arrangement amendments to the schedule were deferred until after the completion of the report stage. The schedule was then agreed to, and the preamble and title being passed, the Earl of Onslow reported the bill as amended to the House. The Report stage began Nov. 20th.

[32] **Education of Defective Children (Scotland) Act, 1906** (6 Edw. VII., ch. 10—r.a. July 20th) makes it lawful for a school board in Scotland, if they think fit, to make special provision for the education, medical inspection, and, where required, for the conveyance to and from school of epileptic or crippled or defective children between the ages of 5 and 16, and to defray the cost out of the school fund.

[33] **\*Extradition Act, 1906** (6 Edw. VII., ch. 15—r.a. Aug. 4th), presented by the Lord Chancellor, is an Act to include bribery amongst extradition crimes. Owing to a convention between His Majesty and the President of the United States, which included in the list of crimes on account of which extradition may be granted certain offences, and amongst others bribery, it became necessary to add bribery to the list of crimes in the Extradition Act of 1870.

[35] **\*Fertilisers and Feeding Stuffs Act, 1906** (6 Edw. VII., ch. 27—r.a. Aug. 4th) states the law with respect to the sale of agricultural fertilisers and feeding stuffs, and repeals the act of 1893. It enacts that every person who sells for use as a fertiliser of the soil any article which has been subjected to any artificial process shall give to the purchaser an invoice stating the name of the article and the respective percentages of nitrogen, soluble and insoluble phosphates and potash contained in the article, and the invoice shall have effect as a warranty by the seller. The same thing applies to food intended for the use of cattle or poultry which has been artificially prepared: the invoice must state the percentage of oil and albuminoids, and it shall have effect as a warranty by the seller. Where fertilisers or feeding stuffs consist of ingredients mixed at the request of the purchaser, the invoice shall state this and give the percentage of the ingredients before mixture. The Act also gives power to the Board of Agriculture and Fisheries to appoint a chief agricultural analyst, and to county and borough councils to appoint an official agricultural analyst and one or more official samplers for their county or borough, subject to the approval of the Board of Agriculture and Fisheries. Every purchaser of fertilisers or feeding stuffs, on payment of the required fee, may have a sample analysed, provided the sample has been taken within ten days after delivery of the article to him. Also, the Act fixes penalties for breach of duty by the seller, tampering with article or sample, and obstructing official sampler. To come into force Jan. 1st, 1907.

[35] **\*Finance Act, 1906** (6 Edw. VII., ch. 8—r.a. June 22nd) gives effect to the Budget, enacting a Tea Duty at 5d. per pound from May 14th, 1906, until May 14th, 1907, substituting 1d. per pound for 3d. per pound as the increase of duty in the case of stripped tobacco, abolishing the duty on coal from Nov. 1st, 1906, and continuing the additional customs duties on tobacco, beer and spirits, and the additional excise duties on beer and spirits imposed in 1900. Income tax remains at 1s. The amount of the permanent annual charge for the National Debt is raised from £28,000,000 to £28,500,000. In Committee, Mr. Courthope moved to reduce the tea duty to 4d. The Chancellor of the Exchequer urged in reply that if he had granted a remission of 2d, it would have been impossible to make anything like adequate provision for the reduction of the Debt and at the same time to abolish the coal duty. The amendment was negatived by 255 to 150. In a discussion on the coal duty, the Chancellor of the Exchequer defended the abolition of the duty on the grounds, amongst others, that it was the solitary export duty in our fiscal system, and its incidence was harsh and exceptional. The third reading was carried (June 13th), and the bill was returned by the Lords (June 21st) without amendment.

[36] **\*Irish Education (Afflicted Children Bill)**, to make better provision for the elementary education of afflicted children in Ireland; presented by Mr. Bryce (May 17th) and supported by the Attorney-General for Ireland. The bill was read a second time May 21st. (A).

[37] **\*Judicature (Ireland) Bill**, to provide for the abolition of two judgeships of the High Court of Ireland, and to reduce the salary of the Lord Chancellor of Ireland; presented by Mr. Bryce (May 28th) and supported by the Attorney-General for Ireland. (A).

[38] **\*Justices of the Peace Act, 1906** (6 Edw. VII., ch. 16—r.a. Aug. 4th), presented by the Solicitor-General, abolishes the qualification by estate required in the case of a justice of the peace, and allows of his appointment as justice of the peace for any county notwithstanding that he does not reside in the county, if he resides within seven miles of it. The Act also contains clauses dealing with the appointment of solicitors as justices of the peace, and with *ex-officio* justices.

[39] **\*Land Tax Commissioners Bill**, to appoint additional commissioners for executing the Acts granting a land tax and other rates and taxes, and to remove the qualification by estate required in the case of all such commissioners, whether appointed under this or any previous Act; presented by Mr. McKenna (May 23rd). The bill was read a second time July 20th. (A).

#### [40] **\*Land Tenure Bill.**

This bill to amend the law relating to the tenure of land was presented by Mr. Agar-Robartes (Feb. 22nd), and read a first time. In moving the second reading, Mr. Agar-Robartes (March 9th) explained that the bill was based on the principle that the capital of a tenant-farmer should not be liable to confiscation. The measure extended, cheapened and simplified the law of compensation for tenants' improvements. It gave a tenant, on the determination of his tenancy, a right to claim compensation for additions to the agricultural value of the holding, and abolished the condition requiring that the landlord's consent should be obtained

before buildings were repaired, permanent pastures laid down, or orchards planted. A claim to compensation for damage to crops by game which the tenants had not the lawful right to kill; and unreasonable disturbance was also to be ground for claiming compensation. This would give tenants reasonable security against arbitrary dismissals on account of political or religious disputes with their landlords. It would also deter landlords from raising rents on their tenants' improvements. The bill proposed to effect other amendments of the Agricultural Holdings Acts, and was directed, not against good landlords, but against the bad.

After considerable discussion the bill was read a second time by 334 to 81, and committed to the Standing Committee on Trade (March 9th), reported with amendments May 14th.

On consideration as amended, Col. Kenyon-Slaney (June 22nd), moved a new clause safeguarding existing arrangements between landlord and tenant as to the ordinary repairs to premises, gates, fences, drains or ditches, which was added to the bill. Another amendment providing that the bill should not come into operation until Jan. 1st, 1908, was agreed to.

When the House resumed in the autumn the bill was taken up by the Government, and the Solicitor-General (Nov. 7th) moved an amendment to Clause II. providing that where the tenant had sustained any damage from game which "neither he nor any one claiming under him has" the lawful right to kill, he should be entitled to compensation from his landlord for the damage caused. This was afterwards amended by inserting after the word "him" the words "other than the landlord," and agreed to. The Solicitor-General further moved to omit the words "at any time during the tenancy" from the provision that a tenant who has sustained damage should, at any time during the tenancy, be entitled to compensation from his landlord, which was agreed to. Sir E. Strachey, who took charge of the bill for the Government, moved to provide that a tenant should be entitled to compensation for damage "if it exceeds in amount 1s. per acre of the area over which the damage extends," and this was carried by 301 to 76. On Clause II. the Solicitor-General (Nov. 8th) moved a new subsection providing, where the landlord proves that under a contract of tenancy made before the commencement of this Act any compensation for damage by game is payable, or that in fixing the rent to be paid under such contract allowance in respect of such damage to an agreed amount was expressly made, the arbitrator shall, in assessing the compensation under this section, make such deduction from the compensation which would otherwise be payable as may appear just. The amendment was agreed to without a division. An amendment by Mr. Cochrane (Nov. 12th) to exclude Scotland from the operation of the second clause (compensation for damage by game) was rejected. An amendment moved by Mr. E. Dunn to include under game deer, pheasants, partridges and black game, was carried by 309 to 81. On the motion of Sir E. Strachey, the third clause (right of killing hares and rabbits by firearms) was struck out of the bill. Sir J. Banbury moved to discard Clause 4, which proposes to confer on the tenant full right to cultivate, crop, or dispose of the produce of his holding as he

thinks fit, as long as adequate provision is made by him to protect the holding from injury or deterioration. The proposal was subsequently negatived by 236 to 65. On the fifth clause (compensation for unreasonable disturbance) the Solicitor-General (Nov. 13th), said the Government was prepared to make certain modifications in the clause. As it stood, compensation was to be given when the landlord "unreasonably and without good and sufficient cause" terminated or refused to grant a renewal of the tenancy. For these words he was prepared to substitute "without good and sufficient cause, and for reasons inconsistent with good estate management." He was prepared further to accept the substance of an amendment standing in the name of Colonel Kenyon-Slaney, who desired that a tenant who left his holding because the rent was raised should be entitled to compensation only when it could be shown that the increase of rent was demanded in respect of improvements which had been effected at the tenant's cost, and for which he had received no equivalent from the landlord. A further amendment proposed by the Solicitor-General, and passed without division, provided that a tenant evicted without good and sufficient cause, and for reasons inconsistent with good estate management, should, in addition to compensation for improvements, be entitled to compensation for the loss or expense which he sustained in connection with the sale or removal of his goods, implements, produce, or stock. When Clause VII. was reached, Sir E. Strachey announced that the Government had decided to make large concessions. The clause proposed that without the consent of the landlord a tenant should be at liberty to lay down permanent pasture, repair buildings, roads, etc., plant orchards, and effect other enumerated improvements. By amendments which he would move, the clause would practically disappear, and in its place would be substituted a provision merely giving the tenant a right to execute without consent building repairs when they were necessary for the proper cultivation of the holding; but the tenant would have to give notice to the landlord in order that the latter might have a prior opportunity of doing the work. The amendments giving effect to the Ministerial concessions were then agreed to in succession. The bill was read a third time (Nov. 23rd) by 260 to 27, the official leaders of the Opposition not challenging a division.

[41] \*Marriage with Foreigners Act (r.a. Nov. 29th), presented by Mr. H. Samuel and supported by Sir E. Grey. Clause 1 makes good the defect that in certain foreign countries British subjects cannot marry subjects of the countries in question without the production of a declaration from some British authority to the effect that no obstacle is known to exist which would render the marriage invalid according to British law. Under the present system the protection afforded to their subjects by the countries in question through the requirement of a declaration of that character is not given by British law to British subjects who marry foreigners in the United Kingdom. Neither need steps be taken to ascertain whether a marriage valid here would be valid in the foreigner's country. Clause 2 proposes a remedy for this evil. Its application is left to Order in Council, so that it may be made operative only in the case of nationalities whose Governments make satis-

factory arrangements to supply their subjects with the necessary certificates at a low cost. It is understood that several Governments are prepared to do this. Third reading (July 19th), and sent to the Lords. Returned to the Commons as amended (Aug. 1st); returned from the Commons with the amendments agreed to (Aug. 4th).

[42] \***Merchant Shipping Acts Amendment Bill**, to amend the Merchant Shipping Acts, 1894, to 1901. Mr. Lloyd-George (March 20th), in moving for leave to introduce this bill, said that it dealt with a few of the admitted grievances from which British shipowners and seamen suffered. The Government had decided to make the regulations as to overloading and unseaworthiness applicable to foreign ships arriving in British ports and sailing from them, and foreign shipowners, after a period of two or three years to make their arrangements, would be required to use the same disc as British vessels, in order to ascertain whether a ship was overloaded or not. With regard to the storage of grain and life-saving appliances, the same rules as applied to British ships would be imposed on foreign ships trading in our ports. Our regulations as to emigrant ships would be applied to foreign emigrant ships calling in England for passengers. It was proposed to provide that no foreign sailor should be allowed to serve on British vessels unless he was capable of understanding the words of command in English. Mr. Wyndham referred to the number of foreign pilots who, he said, were already too well acquainted with our coasts. Mr. Lloyd-George said that he was not in favour of pilotage certificates being issued to foreigners, and that if, without causing any international difficulty, an amendment of the law could be made, he should be glad. Bill read the second time and committed to the Standing Committee on Trade (March 27th). Reported with amendments June 18th.

\*Mr. A. Williamson (Oct. 23rd) moved an amendment limiting the liability of charterers in certain contingencies. After discussion of a technical character, it was agreed that the liability of charterers to whom "a ship is demised" should be the same when accidental damage was done by the ship as the liability of a permanent owner. Mr. Lloyd George then asked the House to reverse a decision arrived at in Grand Committee, providing that if a foreign vessel was overloaded in a foreign port, the British load-line regulation should apply on her arrival here, although she might then not be overloaded. The amendment was carried by 319 to 90. An amendment by Mr. J. H. Wilson, imposing a fine not exceeding £5, or twenty-one days' imprisonment, on a seaman who, having been engaged, and having received under his agreement an advance-note, after negotiating his advance-note, wilfully or through neglect fails to join his ship, or deserts before the note becomes payable. He estimated that no less than £200,000 a year was lost in the ports of the United Kingdom through such men entering into engagements as sailors and obtaining and cashing advance-notes, although they had no intention of fulfilling their engagements. The proposal was agreed to without discussion.

The bill was re-committed to Committee of the whole House in respect of new clauses on Nov. 16th. A new clause, moved by Mr. Lloyd George, requiring masters of vessels to enter in their log-books the records of boat drill and the

practice with life-saving apparatus, was agreed to. Mr. Havelock Wilson objected to a proviso under which deck loads of timber may be carried to a height of 7 ft. where the bulwarks are of that height, and moved the rejection of the clause. Mr. Lloyd George said he was satisfied that the proposals in the clause involved no special danger to the lives or limbs of the seamen. On the whole it had been found that deck loads of timber were a protection rather than a source of danger. Mr. Austin Taylor moved an amendment which would permit heavy wood cargoes to be carried in such turret spaces as were not included in the net register tonnage of the vessel, provided that the class of wood so carried was approved by the Board of Trade and the loading registered by the Board of Trade. Mr. Lloyd George suggested the acceptance of the amendment, and if this were done, he himself would move the insertion of a proviso in these terms: "Provided that regulations may be made by the Board of Trade for the protection of seamen from any risk arising from the carriage of goods to such a height, and these regulations must be complied with on the ship." The amendment and the proviso were agreed to, and the clause as amended was added to the Bill. Another clause was agreed to without discussion for the punishment of persons who fraudulently induce others to engage passages on board ship. Mr. Lloyd George moved a clause providing that all superintendents, deputies, clerks, and servants in mercantile marine offices shall be appointed and removable by the Board of Trade. After considerable discussion this clause was read a second time and added to the Bill, as was a further new clause under which managing owners are to make annual returns as to the earnings of ships. Some slight further amendments having been made, the Bill as amended was reported to the House.

The Bill was read a third time (Nov. 22nd) and sent to the Lords, where it was read a first time and (Nov. 27th) a second time.

[43] \***Musical Copyright Act, 1906** (6 Edw. VII. ch. 36—r.a. Aug. 4th), presented by Mr. T. P. O'Connor, declares that every person who prints, reproduces, or sells, or exposes, offers, or has in his possession for sale any pirated copies of any musical work, or has in his possession any plates for the purpose of reproducing pirated copies, shall, unless he proves that he acted innocently, be guilty of an offence punishable on summary conviction, and shall be liable to a fine not exceeding five pounds. Also, any constable may take into custody without warrant any person who in any street or public place has in his possession for sale any pirated copies of a musical work. In cases where there is reasonable ground for suspecting an offence against this Act, a court of summary jurisdiction may grant a search-warrant authorising a constable to enter the premises, if necessary by force, and to seize suspected copies or plates.

[44] \***National Galleries of Scotland Bill**, to establish a board of trustees to manage the national galleries of Scotland, and for other purposes; presented by Mr. Sinclair, April 14th. Second reading July 28th. (A).

[45] \***Naval Lands (Volunteers) Bill**, presented by Mr. E. Robertson (May 14th), to extend the Military Lands Act to Naval and Marine Volunteers. (A).

[46] \***Naval Prize Bill**, to consolidate, with

amendments, the enactments relating to naval prize of war; presented by the Lord Chancellor. Passed through the Lords, and sent to the Commons March 19th. Read a first time March 23rd. Second reading April 10th. (A).

[47] \***Notice of Accidents Bill**, to amend the law relating to returns and notifications of accidents in mines, quarries, factories and workshops, and under the Notice of Accidents Act, 1894. Presented by Mr. H. Samuel. In moving the second reading, Mr. Samuel pointed out that the object of the bill was to more clearly define the nature of the accidents in mines, quarries, factories and workshops, required to be returned. The bill was read a second time and committed to the Standing Committee on Trade (March 6th), reported with amendments (March 28th), and read a third time April 24th. It was read the first time in the Lords (April 30th). (A).

[48] \***Plural Voting Bill**, to impose a penalty on a Parliamentary elector registered in more than one constituency, who votes in any constituency except that selected for the purpose. Mr. Harcourt (May 2nd), in asking leave to introduce the bill under the ten minutes' rule, said it was a measure to limit the abuse and anomaly of certain classes of plural voting by imposing a penalty on a Parliamentary elector registered in more than one constituency who votes in any constituency except that selected for the purpose. The bill abolished that multiplication of electoral power which came from the geographical distribution of real estate, and sometimes from the vagaries of boundaries commissioners, and proposed that a plural voter should select once a year which of his several votes he would exercise during the ensuing calendar year, and, unless it were subsequently cancelled by the voter himself, the selection would hold good after that period. He believed that the bill would remedy the over-representation of certain classes. On the motion for second reading, Mr. Forster moved an amendment declaring that the House declined to consider a change in the franchise unaccompanied by a scheme to remove the serious anomalies existing in the distribution of electoral power. He said the bill was founded on the supposition that it was unfair that one man should have a much larger share of electoral power than his neighbour. That objection denoted an imperfect appreciation of the principle on which our electoral system was based—the representation of localities rather than of individuals. Mr. Harcourt, replying to various criticisms, said he believed that the bill would make the suffrage residential, for the plural voter was human, and would generally decide to vote where his home was. With regard to the question of Universities, the graduate with more than one vote could still vote for his University if he chose. The amendment was negatived by 403 to 95, and the motion for the second reading was agreed to.

In Committee the question of University representation was raised (Oct. 24th), and Mr. Cave moved to insert words limiting the operation of the clause to electors in constituencies other than University constituencies. The amendment was negatived by 347 to 92. An amendment by Viscount Helmsley to amend the clause by permitting a plural vote in a constituency in which a voter had a direct interest by ownership or occupation of business premises, or by resi-

dence for a specified period, was negatived by 348 to 83. During the discussion on another amendment the point was raised that an elector qualified to vote in more than one constituency might lose his right to vote in the selected constituency through the opposition of political agents, of whose action he was ignorant. Mr. Asquith promised that words should be inserted to prevent this. Mr. A. Chamberlain (Oct. 25th) moved to provide that when a voter having more than one qualification failed to make a choice, he should be registered automatically as a voter in respect of his place of abode. This was negatived by 326 to 81. A number of amendments dealing with penalties for contravention of the provisions of the bill were then discussed and negatived. Sir E. Carson moved to insert a provision enabling a voter who had innocently contravened the subsection to apply to the High Court for relief, and this was agreed to after modification by Mr. Harcourt. Sir C. Dilke (Oct. 25th) proposed that a plural voter should vote in the constituency where he was qualified by residence, but that if he had residences in more than one constituency, he should be required to make a selection. It was his opinion that unless the machinery of the bill was simplified, it would be impossible to enforce the new law. Mr. Harcourt, while avowing that he would like to found the franchise on residence, said it was impossible to incorporate the amendment in the bill. After considerable discussion the amendment was finally negatived without a division. Mr. Shackleton called attention to the fact that the name of a working man who had moved from one place to another might be on two registers without his knowing it, and that he might be disqualified for not having made a selection. Mr. Harcourt assured him that the point had engaged the attention of the Government, and that it would be dealt with. The first clause was carried on Oct. 30th. Clauses 2 to 4 were rapidly passed, and a discussion rose on Clause 5, empowering the Secretary for Scotland to issue instructions affecting the application of the bill to the country north of the Tweed. The clause was carried (Oct. 31st) by 364 to 86. A new clause by Mr. H. Marks, who desired that no proceedings should be taken under the Act except on the fiat of the Attorney-General, was accepted in principle by Mr. Harcourt. An amendment by Mr. Ashley, providing that no person registered as an elector in a constituency, but debarred by the new legislation from voting in it, should be held to be an elector within the meaning of the Corrupt Practices Act, 1883, was in an amended form added to the bill by 294 to 58, and the bill was reported (Oct. 31st). On the report stage (Nov. 26th) the Government carried a closure by compartment resolution, allotting two days to it, and Mr. Harcourt carried a new clause which he had undertaken to move, providing the procedure in cases where electors had failed to select a constituency, and it was agreed (27th) that no prosecution under the Act should be instituted except by or with the consent of a law officer of the Crown. The report stage was concluded (Nov. 28th).

[49] **Post Office (Literature for the Blind) Act, 1906** (6 Edw. VII., ch. 22—r.a. Aug. 4th), authorises the fixing of special rates for postal packets consisting of books and papers for the use of the blind.

[50] \***Post Office (Money Orders) Act, 1906**

(6 Edw. VII., ch 4—r.a. May 20th), extends certain provisions of the Post Office (Money Orders) Act of 1883 to money orders transmitted between the United Kingdom and foreign states or British protectorates.

[51] **Prevention of Corruption Act, 1906** (6 Edw. VII., ch. 34—r.a. Aug. 4th).—The object of this Act is to make punishable all corrupt transactions with agents. It deals with: (1) Any agent who corruptly accepts or obtains any gift or consideration as an inducement or reward for doing or forbearing to do any act in relation to his principal's affairs or business; (2) Any person who corruptly gives or offers any gift or consideration to any agent as an inducement or reward for any act in relation to his principal's affairs or business; (3) Any person who knowingly gives to any agent, or, the agent who knowingly uses with intent to deceive his principal, any document in respect of which the principal is interested and which contains any statement which is false and intended to mislead the principal. The penalty for misdemeanour on conviction or on indictment is imprisonment not exceeding two years or a fine not exceeding £500, or both imprisonment and fine. On summary conviction, imprisonment not exceeding four months or a fine not exceeding £50, or both. This Act comes into operation on Jan. 1st, 1907.

[52] **\*Public Health (Regulations as to Food) Bill**, to enable regulations to be made for the prevention of danger arising from the importation, preparation, storage or distribution of articles of food; presented by Mr. John Burns (July 11th), and supported by Mr. Runciman. (A.)

[53] **\*Public Trustee Bill**, to provide for the appointment of a public trustee, to amend the Judicial Trustees Act, 1896, and otherwise to amend the law relating to the administration of trusts. Presented by the Lord Chancellor (March 22nd). In moving the second reading (March 27th) the Lord Chancellor said the object of the bill was to safeguard estates, especially among the poorer classes, by the establishment of a public trustee, with special facilities for the administration of small estates. In the case of other trusts, the public trustee might be appointed as custodian trustee. The bill, with certain amendments, was read a third time (May 11th), and sent to the Commons. In moving the second reading (June 15th) the Attorney-General explained that the object of the measure was to secure the appointment of a public trustee who would be officially responsible for trust funds committed to his charge, and who would be supported by a guarantee upon the Consolidated Fund to make good all losses. The motion for second reading was agreed to. (A.)

[54] **\*Sale of Intoxicating Liquors (Ireland) Bill**, to amend the law relating to the sale of intoxicating liquors in Ireland on Saturdays and Sundays, and for other purposes connected therewith. Presented by Mr. Sloan (Feb. 22nd). In moving the second reading (May 25th) Mr. Sloan explained that the bill provided for the Sunday closing of licensed premises for the sale of intoxicating liquors in the exempted cities of Dublin, Belfast, Cork, Limerick, and Waterford, as in other districts of Ireland, and for fixing 9 o'clock as the hour for closing on Saturday nights throughout the country. Mr. Bryce welcomed the bill, for which he claimed there was urgent need in Ireland. The motion

for second reading was carried by 244 to 50. Bill committed to Standing Committee on Trade (June 27th). An amendment to make the *bonâ-fide* traveller limit five miles instead of six in the large towns was agreed to, and the bill read a third time (July 30th). First reading in the Lords, July 31st.

Lord Mayo (Oct. 23rd) moved the second reading of the bill, which, after a brief discussion, was passed. The bill passed through Committee on Oct. 24th, after an amendment to limit the existing regulations as to the *bonâ-fide* traveller was withdrawn, and was read a third time and passed on Nov. 1st.

[55] **\*Sea Fisheries (Scotland) (Application of Penalties) Bill**, to provide for the payment to the Fishery Board for Scotland of the penalties or other moneys recovered in respect of illegal sea-fishing in Scotland; presented by Mr. Sinclair, July 31st. (A.)

[56] **\*Seaman's and Soldier's False Characters Act, 1906** (6 Edw. VII., ch. 5—r.a. June 22nd), to amend the law relating to the falsification of seamen's and soldiers' certificates of service or discharge, and to false statements made, used, or given in connection with entry or enlistment into His Majesty's naval, military, or marine forces; presented by Mr. Haldane. Clause 1 states the penalty for (1) forgery of service or discharge certificates of a seaman or soldier; (2) use of certificate to obtain employment; (3) personation of holder of certificate. Clause 2 imposes a fine not exceeding £20 on any man who when enlisting makes use of a forged statement as to his character or previous employment, which to his knowledge is false in any material particular; also, any person making a written statement as to the character or employment of a man which he knows to be false, and which he allows to be used for purposes of enlistment, shall be liable to the like fine.

[57] **\*Seed Potatoes Supply (Ireland) Act, 1906** (6 Edw. VII., ch. 3—r.a. May 29th), makes provision with respect to loans and sales for the purpose of the supply of seed potatoes to occupiers and cultivators of the land in Ireland. It legalises any loans made between Dec. 1st, 1904, and Sept. 1st, 1905, by the Board of Works to the guardians of any union, for the purpose of providing seed potatoes; the loan to be repayable in two equal instalments, the first on Feb. 1st, 1907, and the second on Feb. 1st, 1908. Also, any sales of seed potatoes made between Dec. 1st, 1904, and Sept. 1st, 1905, by the guardians to any occupier or cultivator of land shall be considered legal—payment to be made in two instalments to be obtained by a special rate levied by the county council or urban district council. No electoral disability or loss of Parliamentary franchise is incurred by the purchase of seed potatoes under this Act.

[58] **\*Small Landholders (Scotland) Bill**, to encourage the formation of small agricultural holdings and to amend the law relating to such holdings (including crofters' holdings) in Scotland, and for other purposes connected therewith. Mr. Sinclair, in asking leave to introduce this bill, said that its object was to remove restrictions upon the enlargement of holdings, to enlarge the purposes for which the holdings could be used, to admit leaseholds to the benefit of the Crofters' Act, to raise the limit of the qualifying rental from £30 to £50, and to give power for the creation of crofter tenants by

agreement or by compulsory order. The definitions in the Crofters' Act of 1886 would be abandoned, and the Act would permit all small landholders in Scotland paying a rent of £50 or under to have a fair rent fixed and to come within its provisions. The Crofters' Commission and the Congested District Boards would be merged into one body, to be called the Scottish Land Commission, and a Commissioner of Agriculture for Scotland was to be appointed, with general powers of supervision, to whom the powers now exercised by the Board of Agriculture and Fisheries in Scotland would eventually be transferred. Read the first time July 28th. (A.)

[59] *\*Town Tenants (Ireland) Bill*, to improve the position of tenants in towns in Ireland, presented by Mr. McKillop, and read a first time Feb. 22nd. Mr. McKillop (May 18th), in moving the second reading, said that its object was to bring to an end a tenure in the cities and towns of Ireland which enabled one class to confiscate the property of another class; and to encourage improvements in these towns by guaranteeing to the improver that at the end of his lease his improvements should not be "grabbed" by those who had no title to them without paying adequate compensation. At present it was the custom of the landlord to seize the improvements of his tenant at the expiry of the lease. **PART II.** of the bill provided a moderate amount of compensation to be paid for disturbance to the tenant on quitting his holding where such disturbance was caused by the landlord. The Bill did not prevent the landlord making a demand for increase of rent and notice to quit unless the increase was paid; but it enabled the tenant to apply to the county court to fix the capital value of the landlord's interest, and on paying such a capital sum to become owner of his holding. In the event of his not being prepared to buy he must either pay the increased rent or quit. Mr. Bryce said that the bill contained some provisions with which they were all in accord, and others of which some of them disapproved. Clause 5, which dealt with the method of taking compensation for disturbance, appeared to him entirely unworkable. The provisions for leasehold enfranchisement went a good deal beyond what was needed or desirable. He would vote in favour of the bill, and would do so in the hope that when it went to Committee it might be put in a form in which the objections taken might be removed, and a long standing grievance terminated. On a division the second reading was passed by 244 to 54. The Bill was committed to the Standing Committee on Trade on July 6th.

On the motion that the House consider the bill as amended, Mr. Balfour (Nov. 10th) moved the adjournment as a protest against the action of the Government in adopting the measure as their own (as they had done in the meantime) after it had obtained a second reading, and had been piloted through Standing Committee as a private member's bill. Mr. Bryce, in reply, pointed out that the bill had been drafted in a form entirely different from what it was at present, except with regard to the first four clauses. The leasehold enfranchisement clause had been struck out, and the bill as it now stood was practically redrafted by the Government, so that it was really a Government measure. The motion for adjournment was defeated by 278 to 75. A number of amend-

ments to Clause 1 were then successively negatived, and the clause was carried by 316 to 66. On the consideration of Clause 2, the Attorney-General for Ireland moved a new subsection providing that a tenant shall not be entitled to any compensation in respect of any improvement made, whether before or after the passing of this Act, in pursuance of a contract entered into for valuable consideration. The amendment was agreed to. An amendment by Mr. Campbell was also accepted, providing that a tenant should not be entitled to claim compensation for any improvement made before the passing of the Act, except permanent dwellings, unless such improvement was made within twenty years before the date of the claim. On Clause 3, which deals with the landlord's right to object to a tenant making improvements on his holding, Mr. C. Craig moved an amendment that the Court should consider the reasonableness of any proposed improvement as well as its suitability when sanctioning any improvement put forward by the tenant. This was agreed to, as was a further amendment to the effect that the Court should consider that any proposed improvement would not diminish the letting value of any other property of the same landlord. A lengthy discussion arose on an amendment by Mr. Campbell to omit Clause 5, which provides for payment to the tenant of compensation for disturbance. The clause was eventually passed by 308 to 74. A number of amendments to Clause 5 and subsequent clauses were accepted without discussion, and the bill was ordered for third reading (Nov. 21st).

#### [60] *Trades Disputes Bill.*

The Attorney-General, in moving for leave to introduce this bill, said that under legal decisions a construction had been put upon the law of conspiracy so loose and so wide that it was impossible to tell beforehand what was the legal quality of an action which a trade union might take; the right of peaceful persuasion had been impaired, and provident funds had been made liable for claims founded on the acts of unauthorised agents. All this had created a feeling of insecurity and injustice, which the Government had received a mandate to redress. The law of conspiracy as interpreted by the courts operated unfairly against combinations of workmen. This the Government proposed to remedy by considering the act of a trades union as right or wrong, lawful or unlawful, assuming it to have been committed by an individual and not in combination. Dealing with the law as to picketing, he said the bill would enact in express terms the right to persuade peacefully, thereby reviving a law dating from 1859. Approaching the most difficult part of the subject, the problem of agency, he said that in the opinion of the Government trade unions had been the victims of a too rigorous administration of the law. A union having hundreds of branches might, through the rash or imprudent act of some official or committee of one branch, be sued for damages, and this might involve in liability numbers of innocent people. The bill proposed that the union should appoint an executive committee with the right to conduct operations in all disputes, and the union was not to be bound for any act except the act of the executive committee formally passed. The executive committee when appointing an agent might

prescribe the acts which he was not to commit, and if the conduct impugned should be a violation of his instructions, the union funds would not be liable. Representatives of labour, he was aware, would prefer a general declaration that no action could ever be brought; but though these views would receive friendly consideration, he asked the House to hesitate before adopting a proposal of this kind.

Mr. Shackleton regretted that the Government had not seen fit to render trade union funds immune. Sir E. Carson thought trade unionists were given very special privileges by the bill. Mr. Bell maintained that workmen ought not to be hampered in their fight, as they had been since the decision in the Taff Vale case. After discussion the motion was agreed to. Read the first time March 28th. The Solicitor-General (in absence of the Attorney-General) moved the second reading of the bill, and dealt at length with the legal position of trade unions, which he described as essential safeguards against sweating. He thought the bill was one for consideration in committee, and hoped that stage would be reached with the least possible delay. Bill read second time April 25th. In Committee Clauses 1, 2 and 3 were added to the bill without amendment. The Attorney-General moved to postpone the consideration of Clause 4 in order to bring up a substituted clause prohibiting actions of tort against trade unions except in certain circumstances. Mr. Balfour charged the Government with having surrendered to the Labour members, and said the new clause was deliberately designed to prevent trade union funds being responsible for injuries which trade unions, through their officials, had deliberately intended to inflict. The Chancellor of the Exchequer said he would not have consented to exempt the funds from liability except on the understanding that the immunity would be extended to masters as to men, and he would support the clause because it was bilateral. The motion was agreed to. Clause 5 was then agreed to. The Attorney-General brought up the new clause, and it was read a first time. "An action against a trade union, whether of workmen or masters, or against any members thereof on behalf of themselves and all other members of the trade union for the recovery of damages in respect of any tortious act alleged to have been committed by or on behalf of the trade union, shall not be entertained by any court, provided that nothing in this section shall affect the liability of the trustees of such unions to be sued in the events provided for by the Trades Union Act, 1871." The clause was read the second time, and amendments amplifying its provisions were then agreed to. The bill was reported as amended, Aug. 3rd.

On consideration as amended (Nov. 1st), Clause 1 was passed without further amendment. On Clause 2 Mr. F. E. Smith (Nov. 2nd) moved an amendment conferring the right recognised by the clause upon an individual employer, as well as on combinations of employers. The Attorney-General, while questioning whether this addition was really necessary, consented to it, with an enlargement making it clear that the right would be enjoyed not only by individuals but by firms. The Attorney-General moved a further amendment to strike out the direction that the protection accorded to trade unions was to be

confined to protection against actions for the recovery of damages. The unions, he contended, should be protected against injunctions as well. The amendment was carried by 312 to 45. Upon the motion of Mr. Rufus Isaacs an addition was made, and it was resolved that nothing in the clause should affect the liability of the trustees of a trade union to be sued in the events provided for by Section 9 of 1871, except in respect of any tortious act committed by or on behalf of a union in contemplation or furtherance of a trade dispute. The bill was then ordered for third reading. After some discussion the bill was read a third time without division on Nov. 9th.

[61] Wireless Telegraphy Act 1906, 6 Edw. VII, ch. 13,—r.a. July 20th] presented by the Postmaster General, continues the Wireless Telegraphy Act of 1904 until December 1st, 1909.

### [62] Workmen's Compensation Bill.

To consolidate and amend the law with respect to compensation to workmen for injuries suffered in the course of their employment. Mr. Gladstone said that the time had now arrived for an extension of the Act of 1897 to every class of labour. Whilst under that Act all classes of workmen who were not expressly mentioned were excluded from its operations, the present bill proposed to include all who were not expressly excluded. The term "workman" was to include any person not a police-constable, clerk, outworker, domestic servant, or a member of the employer's family dwelling in his house. Workmen employed in workshops, in transport service, fishermen, postmen, seamen, were not to be brought within the operation of the Act. Small employers whose workmen did not exceed five in number should come under the Act, with the exception that where the accident was attributable to the use by employer of machinery driven by steam, water or other mechanical power, or if the workman at the time of the accident was employed in the care of horses, in mining, quarrying, building operations, or in laying or repairing any electric line or works, the limit of five should not apply in the case of such workmen. It was also proposed to extend the workmen's compensation to cases of industrial diseases—anthrax, lead poisoning and others enumerated in the schedule. With regard to the payment of compensation, he said that whereas an application could not be made under the existing law until two weeks had elapsed from the time of the accident, it was proposed now to reduce the period to one week. In the case of casual labour, if a workman had been with an employer for two weeks continuously or more, his compensation, if he were injured, would be founded on the wages which he had received; and that if he had not worked continuously for two weeks the Court was to have regard to the earnings which such a workman would receive in the district. With respect to persons who had reached 60 years of age, a maximum sum of £25 would be payable in case of death, and a maximum of 10s. weekly in case of injury and incapacity. The bill also dealt with the cases of incapacitated minors, widows and dependants, and with the appointment of medical men to act as referees. The bill was ordered to be brought in by Mr. Gladstone, the Chancellor of the Exchequer, the Solicitor-General, and Mr. H. Samuel, and read a first time (May 26th).

On the motion for the second reading, Mr. C.

Dilke moved an amendment "That this House desires such recognition and guarantee of insurance as to prevent the defeat of legal expectation of compensation created under the law." Mr. McArthur supported the amendment, and Mr. Bell said that a system of compulsory insurance under Government supervision would get rid of many difficulties. Mr. Gladstone said that the Government regarded the principle as right, but that it was not not practicable to deal with the subject at the present moment. The amendment was negatived. Bill read the second time and committed to Standing Committee on Law April 10th. Reported with amendments June 26th.

**Sewage Disposal of.** A Royal Commission was appointed during '98 to inquire and report on the best method or methods of treating and disposing of sewage (including any liquid from any factory, or manufacturing process) consistently with due regard for the requirements of the existing law, for the protection of the public health, and for the economical and efficient discharge of the duties of local authorities. The members of the Commission are: Lord Idlesleigh, Major-General C. Phipps Carey, R.E., Sir Michael Foster, M.P., Col. T. W. Harding, Sir W. Ramsay, Dr. J. B. Russell, Mr. W. H. Power, and Mr. T. J. Stafford, with Mr. Frederick J. Willis, as Secretary. Interim reports were issued in 1901, 1903, and 1904, for which see 1906 ed.

**Seymour, Admiral of the Fleet Sir Edward H., G.C.B., O.M., G.C.V.O.,** Hon. LL.D. Camb., was b. in 1840, and is a son of the late Rev. Richard Seymour. He was ed. at Radley, and entered the Navy in '52. He served through the Crimean War in the Black Sea, the China War '57-60, operations against Chinese rebels, and the Egyptian War '82, taking part in most of the naval fighting in connection with those wars. As Commander was badly wounded in action on the river Congo. He became Captain '73, Rear-Admiral '89, and Vice-Admiral '95, and was Commander-in-Chief of the China station '98-1901. From '94 to '97 he served in the Admiralty as Superintendent of Naval Reserves. He commanded the Naval Brigade of the Allied forces near Tientsin in 1900, and was promoted to G.C.B. He was, in Oct. 1902, appointed H.M.'s First and Principal Naval Aide-de-Camp. Commander-in-Chief Devonport 1903. Admiral of the Fleet 1905. Accompanied Prince Arthur in his mission to Japan, 1906. Queen Anne's Mansions, S.W.; United Service Club; Travelers', Wellington and Royal Societies.

**Shakespeare Memorial.** A public meeting was held at the Mansion House on Feb. 28th, 1905, in support of a proposed Shakespeare memorial in London. An influential general committee was appointed for the purpose of organising the movement. A "world's tribute" to Shakespeare is contemplated. The report of a special committee, approved at a meeting of the general committee at the Mansion House on July 6th, was in favour of an architectural memorial, competition for the design to be thrown open to artists throughout the world. The London County Council has expressed its willingness to provide a suitable site for an adequate memorial. The question of the site and the terms of the proposed world-wide competition for the design were referred

to an advisory committee, appointed by the executive committee. **Treasurer,** Lord Avebury. **Hon. Secretary,** Prof. I. Gollancz. Offices, 32, George Street, Hanover Square, W.

**Shorthand.** The Incorporated Phonographic Society, established '90, of which Mr. Alfred Pitman is president, has established districts in many large towns, and has examined and granted diplomas to more than 1000 shorthand teachers. The Society also conducts examinations in typewriting. The secretary is Mr. H. W. Harris, 100, Mattison Road, Finsbury Park, N. The Incorporated Society of Shorthand Teachers was established '94, for promoting the interests of teachers. The secretary is Mr. W. H. Jones, A.C.I.S., 3, Birch Grove, Rusholme, Manchester. The Institute of Shorthand Writers practising in the Supreme Court of Judicature (registered), established '82, has for its object the promotion of efficiency in note-taking in connection with legal proceedings, and admits members by examination. **Hon. Secretary,** Mr. A. T. Wright; office, 118, Chancery Lane, W.C.

### SIAM.

Siam is a kingdom embracing part of the Indo-Chinese and part of the Malay peninsula. Its territories have dwindled very much in recent years, through the action of France.

A treaty with France signed at Paris Feb. 13th, 1904, and ratified Dec. 7th, 1904, defined the frontier between Siam and Cambodia, and provided for its delimitation, transferring to French government an area of about 8000 sq. miles, while, by clause 4 of the Treaty, the Siamese Government abandoned all sovereign rights over the Luang-Prabang territory, on the right bank of the Mekong. France agreed to evacuate Chantaboon, but the harbour of Krat, on the Gulf of Siam, was ceded to France. Siam was placed under strict stipulations as to the troops it should keep in the Siamese basin of the Mekong, France requiring that the troops and officers must be Siamese and not foreigners, except with the consent of the French Government.

By the Anglo-French Agreement (April 8th, 1904) the territories situated to the west of the basin of the River Menam and of the Gulf of Siam were recognised as being in the British sphere, and the territories situated to the east of the same region as being in the French sphere.

The states of Kedah, Patani, Kelantan, and Tringgannu in the Malay Peninsula acknowledge the sovereignty of Siam, but retain a certain amount of independence. The King appointed Mr. Graham as adviser to Kelantan in 1903.

The royal dignity is nominally hereditary, but each sovereign appoints his own successor. The ruling sovereign is Chulalongkorn I., b. Sept. 21st, 1853, succeeded Oct. 1st, '68. The heir to the throne is Prince Chowsa Maha Vajiravudh, b. Jan. 1st, '80. The executive power is exercised by the King in conjunction with a Council of Ministers, most of whom are relatives of the King. The Legislative Council consists of 51 members, including the Ministers, certain members appointed by the King, and 6 princes of the royal house. There are 41 provinces, each administered by a Commissioner appointed by the King, and some of the tributary districts are administered by their own chiefs. The standing army is only about 5000, but there is a general training of males as militia. A new law regulating military service was passed in 1905. The rifle in use

is of Japanese make. A small but effective navy is being built up, with a strong force of marine infantry. Buddhism is the State religion. Western ideas of civilisation are spreading rapidly, and many Siamese youths are sent to Europe for their education. A limited number of "King's Scholars," selected by competitive examination, are sent to England each year at the King's expense. Several of the Royal Princes, like the Crown Prince, have received, or are receiving, a European education. Moreover, Europeans are now very largely employed in the administration.

### **Industries, Statistics, and Diplomatic.**

The country is very inadequately developed, partly because of the condition of the inhabitants, who formerly, at least, were virtually serfs, owing to a system of debt-slavery which obtained. The King, however, has issued decrees putting an end to slavery for the future. Foreign trade centres at Bangkok, and is almost wholly in the hands of foreigners. There are State railways from Bangkok to Korat, with a branch running north, which reached Paknampho in 1905, and is being extended to Pitsanulok and Utaradit. Another State line runs from Bangkok to Petchaburi. Lines worked by private companies run from Bangkok to Paknam, near the mouth of the Menam, and from Bangkok to Tachin, on the coast to the west of the Menam. There is also a tramway connecting the Bangkok-Paknampho line with Phrabad. Bangkok has a well-equipped system of street electric tramways, and a new line by a Siamese company was opened by the King in Oct. 1905. Chief exports: rice, teak-wood, pepper, and fish.

Area about 220,000 sq. miles; pop. estimated in 1905 at 6,686,000, including Siamese 1,750,000, and Chinese and Malays about 2,000,000. Capital, Bangkok, pop. about 500,000, situated on the delta of the river Menam, the great natural and economical centre of the kingdom. Revenue, 1901, £1,874,300; estimated 1905-6, £2,953,645; expenditure, 1901, £1,676,000; estimated 1905-6, £2,946,572. Imports, 1902, £3,393,674; 1903, £3,475,315; 1904, £4,363,966; 1905, £3,993,635; exports, 1902, £4,533,972; 1903, £3,955,881; 1904, £5,650,175; 1905, £5,989,100. Of the imports in 1905 about 79 per cent. were sent from British ports.

General Adviser to the Siamese Government, Prof. E. H. Strobel; Legislative Adviser, M. Padoux; Judicial Adviser, Mr. Stewart Black; Financial Adviser, Mr. W. J. F. Williamson, F.C.S.; Minister of the Interior, H.R.H. Prince Damrong; Minister of Justice, H.R.H. Prince Rajaburi; Minister of Foreign Affairs, Prince Devawongse.

Minister in London, Phya Visutr Kosà, 23, Ashburn Place, South Kensington, S.W.—*Councillor of Legation*, F. W. Verney, 12, Connaught Place, W.—*Financial Agent in London*, C. Rivett Carnac.—*Consul-General*, (vacant).

British Minister and Consul-General, Ralph Paget, C.M.G.—*Consul*, W. R. D. Beckett.—*Consul at Chiangmai*, C. E. W. Stringer.—*Judge of H.M. Court for Siam*, Skinner Turner.—*Assistant Judge*, A. R. Vincent.—*Travelling District Judge*, W. A. R. Wood.—*Consul at Kedah, etc.*, Meadows Frost (at Penang).

**Silk.** According to a report of the British Consul at Lyons the world's production of raw silk in 1904 and 1905 was as follows:—

	1904, lbs.	1905, lbs.
China . . . . .	13,967,000	12,936,000
Japan . . . . .	12,819,400	10,230,000
Italy . . . . .	10,780,000	9,350,000
Turkey . . . . .	2,690,600	3,157,000
France . . . . .	1,375,000	1,390,400
Persia and Turkestan	937,200	1,012,000
Caucasus . . . . .	792,000	638,000
Austria-Hungary . .	693,000	759,000
India . . . . .	396,800	616,000
Balkan States . . .	336,600	396,000
Spain . . . . .	169,400	171,600
Greece and Crete . .	143,000	154,000
	<u>45,100,000</u>	<u>40,810,000</u>

**Sion College**, Victoria Embankment, E.C. Librarian, Rev. W. H. Milman, M.A.

**Smith, Goldwin, D.C.L.**, was b. at Reading, Berks, 1823. Ed. at Eton and Oxford, graduating first class in classics '45; Fellow of Univ. Coll. Oxford '46. He was Assistant Sec. of the Royal Commission of Inquiry into the condition of the University of Oxford '50, Secretary to a subsequent Commission, under which important University reforms were introduced, and a member of the Education Commission in '58. Regius Professor of History ('58 to '66) at Oxford, and was brought prominently into notice by his lectures, which were characterised by great vigour and originality. He championed the cause of the North in the American Civil War, at the conclusion of which he visited the United States on a tour. In '68 he accepted an honorary Professorship of History at Cornell Univ., New York, of which University he is now an Emeritus Professor. Since '71 he has resided at Toronto, where he has led an active literary life. During '91 he published "Canada and the Canadian Question," "A Trip to England" in '92, a "History of the United States" in '93, "Oxford and her Colleges," "Bay Leaves: Translations from Latin Poets," "Specimens of Greek Tragedy," "Essays on Questions of the Day," in '94, and "Guesses at the Riddle of Existence" ('96).

**Soap Manufacturers' Combination, 1906.** The following announcement, published on Nov. 24th, tells briefly the story of an incident which evoked great popular interest in the autumn of 1906: "The working arrangement entered into between the leading soapmakers of the United Kingdom has been received with so great disfavour by the trade and the public as to make it unworkable; and as it is clearly the first consideration to endeavour to satisfy the trade and the public, it has been decided to terminate the working arrangement from to-day, Nov. 23rd. Each firm will, therefore, continue to conduct from this day its own business as was done prior to the negotiations being entered upon, and entirely separate from each other. The working arrangement between the leading soapmakers is now, therefore, absolutely and finally dissolved."

**Social and Political Education League.** Founded 1877 by the late Sir John Seeley for the gratuitous delivery of lectures on social and political topics from a strictly non-partisan standpoint. Hon. Sec., Mr. Holford Knight, 5, Pump Court, Temple. Organizing Sec., Mr. A. H. Reed, 23, Old Square, Lincoln's Inn, W.C.

## SOCIALIST MOVEMENT.

Socialism, primarily and broadly, is the name given to the doctrine which proclaims the equal right of all to the material conditions of existence—that is, to the enjoyment of the necessities, comforts, and luxuries of life—and at the same time the equal duty of all to labour in relatively equal proportion (so far as may be needful) for the maintenance of those material conditions. Socialism is thus, in its first intention, an economic doctrine. But by most schools of Socialists this has been, and is, regarded as the necessary foundation of a reconstruction of human life generally—*i.e.*, of a complete readjustment of political, religious, and domestic relations, involving radical changes in their present forms. In the following article the Socialist organisations in England and abroad are briefly reviewed.

The English societies are: the **Social Democratic Federation**, which has about 170 branches and affiliated societies, with a membership of 10,500—Secretary, H. W. Lee, 3, Bolt Court, Fleet Street, E.C.; the **Fabian Society**—Secretary, E. R. Pease, 3, Clement's Inn, Strand, W.C.; and the **Independent Labour Party**, which has for its object the establishment of an "Industrial Commonwealth founded upon the socialisation of land and capital." It was formed at a conference held in Bradford early in '93, and has about 500 branches and 30,000 members. Over 450 members have been elected to various local bodies. The Party owns a weekly paper, the *Labour Leader*, and has an extensive publishing department, from which it issues books and tracts on political and labour questions. At the General Election in 1906 the I.L.P. nominated ten candidates, seven of whom were elected. **Chairman**, Mr. J. Ramsay MacDonald, M.P.; **Treasurer**, Mr. T. D. Benson; **Sec.**, Mr. Francis Johnson. Office, 10, Red Lion Court, Fleet Street, E.C.

The Socialists of Germany are known as the Social Democrats, and are led by Herren Bebel, Vollmar, and Singer. They form the strongest political party in the empire, polled 3,010,771 votes at the 1903 election, and secured the return of 82 members to the Reichstag. The number of party organs is 76, 22 of which are dailies. An anti-dogmatic party, led by E. Bernstein, long resident in England, has recently made much headway, and advocates co-operation with the ordinary political parties. See **GERMANY, Political Parties**.

In France Socialists are divided into two main groups: the Government Socialists, led by M. Jaurès and M. Millerand, an ex-Minister, who served under M. Waldeck-Rousseau; and the Revolutionary Socialists, led by M. Jules Guesde, who declare that Socialism is inconsistent with the opportunism required by participation in the work of government under existing conditions. A motion to expel M. Millerand was brought forward and hotly debated in 1903. Finally a resolution supporting M. Millerand, proposed by M. Jaurès, was carried by 100 votes to 89. In 1904, however, the Socialist Federation of the Department of the Seine resolved to exclude M. Millerand from the Socialist party. A split amongst the Radical Socialist group in Parliament followed, 65 members of the group forming a new party, which they called the Radical Socialist Left. M. Jaurès and others conduct the journal called *L'Humanité*, to-

wards which the German Social Democrats in October contributed £1000 to aid in keeping it in existence.

In Austria the Socialist party is strongly organised, a powerful propaganda is carried on through the Press, and the influence of the party is very marked in the elections. In Bohemia and Silesia the movement has made great way, but not so much in the Alpine districts, though an anti-clerical and socialistic body, called the Styrian Peasants' League, has 10,000 members. Socialism in Austria is a political force, rather than a theoretical adherence to communistic principles, and in 1905 it took up with irresistible force the demand for universal suffrage. The party organ is the *Arbeiter Zeitung*, which is ably conducted.

In Italy there are three sections making up the Socialist party. The Moderate party is led by Signori Bissolati and Turati, the Revolutionary party by Signor Labriola, and a third group follows Signor Ferri. The Moderate or Reform party is in favour of co-operating in legislation for the advancement of the working classes whenever possible, and of supporting such Government measures as it can approve. The Revolutionary party are frankly anarchical in theory, in order to bring about a social revolution. Signor Ferri and his group, who control the *Avanti*, the chief Socialist organ, occupy a middle position between the two extremes, and advocate unity.

In Russia there is a strong and active Social Democratic party, which aims at the establishment of a democratic republic. It likewise advocates the rights and claims of the workmen and the abolition of all survivals of the condition of serfdom. There is also a Socialist Revolutionary party, which believes in striking for freedom, and has specially endeavoured to stir up the peasantry. See **RUSSIA, History 1906**.

There is a Socialist party in Spain, led by Señor Iglesias, which in 1903 joined hands with the Republicans, and has since conducted a vigorous revolutionary propaganda.

The grant of universal suffrage in Belgium brought the Socialists of that country into great prominence, and 34 Socialist candidates were returned at the 1902 election. Socialism in Denmark is of the Marxist order; but here again, as in Austria, political discontent has driven many to join the Social Democratic Federation. These form the moderate section, and tend to join the Radicals, the extreme revolutionary section being very small in numbers. The Socialist party in Norway numbers about 56 unions, with a total membership of 6000. Its avowed aims are to abolish the private ownership of land and of the instruments of production. A tacit alliance exists between the Socialists and the Radicals. In the towns of Sweden the movement has made some little headway. In the Netherlands, by a decree of the Cour de Cassation, the Socialist League was dissolved in '94 as an illegal association; but 52 branches of it united to form a new body, and it has recently been agitating vigorously for universal suffrage.

**Society for the Rescue of Young Women and Children.** The Rescue Society was established in 1853, and incorporated in '86 for the reformation of openly immoral women and the guardianship and training of young girls exposed to danger. Maternity and Lock Hospital cases are also admitted. Six Homes are

maintained, accommodating 175 inmates. The industrial earnings were £1362 in 1905, or nearly one-third of the total cost. Funds are greatly needed. **Chairman of Committee**, Mr. Edmund Ives; **Secretary**, Mr. C. Stuart Thorpe. **Offices**, 205, Great Portland Street, W.

**Society of British Composers**, founded June 1905, to promote the publication and performance of high-class works by British composers, and to protect their interests. Subscription for members and associates, £1 rs. per annum. **Hon. Sec.**, J. B. McEwen, The Doon, Pinner, Middlesex.

### SOCIOLOGY.

Sociology is the science of the origin, organisation and development of human society. The **Paris** and the **Edinburgh Schools** were fully described in the '94 ed., and the **American School** at Hartford in the '95 ed.

The **International Institute of Sociology** is an association founded, under the presidency of Lord Avebury, by the most eminent sociologists of different countries in '93. The **General Secretary** is Dr. René Worms, 115, Boulevard St. Germain, Paris. The sixth international congress of Sociology was held in 1906 in London, in the hall of London University, and the subject was "Social Conflicts." A bibliography of contemporary productions in sociologic study and research is given each month in the *Revue Internationale de Sociologie* (price 20 fr. per annum), published in Paris (16, Rue Soufflot), and in the *American Journal of Sociology* (price 2s. 6d.), published by the University of Chicago Press. Since '06 there have been published (at 16, Rue Soufflot, Paris) 34 vols. of the *Bibliothèque Sociologique Internationale*, written by sociologists of all countries.

The **Sociological Society** was formed in 1903. The subscription is £1 rs. per annum, while the payment of £10 10s. qualifies for life membership. **Secretary**, Dr. J. W. Slaughter, Ph.D., 24, Buckingham Street, Strand, W.C.

The **British Institute of Social Service** was established in 1904 to collect, classify, register, and disseminate information relating to all forms of social service and industrial betterment adaptable to the needs of the United Kingdom, and to promote the initiation and development in this country of the most beneficial and successful forms of social service. **President**, Earl of Meath; **Hon. Director**, James Dangerfield. **Offices and Library**, 11, Southampton Row, W.C.

**Soldiers' and Sailors' Families Association**. Founded 1885 by Col. Sir James Gildea, C.V.O., C.B. The object of the Association is to aid the wives and families, without distinction, of men of all branches of the land and sea forces of the United Kingdom serving with the colours. The work is entirely voluntary. **Secretary**, Capt. Wickham Legg. **Office**, 23, Queen Anne's Gate, Westminster, S.W.

**Sonnino**, Baron Sidney, Italian statesman, was b. at Florence March 11th, 1847, and ed. at the Univ. of Pisa, where he took his law degree in '65. He afterwards entered the Diplomatic service, and was attached to the Legations at Madrid, Vienna, Berlin and Paris. He then turned to a study of the agrarian and social problems of Southern Italy, published "I Contadini in Sicilia" and "La Mezzadria in Toscana," and established the paper *Rassegna*. He was elected Deputy for San Casciano '80,

and has sat for it ever since, attaching himself to the Left Centre in the Chamber. In '87 he joined the Crispi administration as Under Sec. for the Treasury, and first as Finance Minister, '93, and then as Minister of the Treasury, he worked a great reform in the country's finances. After Crispi's fall in '96, he became one of the Opposition leaders, and from Feb. to May 1906 was Premier, but fell over the railway question. See ITALY.

### SPAIN.

#### Ruler.

**Alfonso XIII.** is the son of the late King Alfonso XII. and Queen Maria Christina, a daughter of the late Karl Ferdinand, Archduke of Austria. He was b. after his father's death, on May 17th, 1886, and his childhood was spent at Madrid and the Palace of Miramar, in San Sebastian. In Spain the sovereign comes of age at sixteen, and during the King's minority his mother reigned as Queen Regent. On May 17th, 1902, the regency ceased, and Alfonso XIII. assumed his full powers. He has received a liberal education, and speaks English exceedingly well. On May 31st, 1906, he was married to H.R.H. Princess Ena of Battenberg, and as the King and Queen were returning to the Palace they narrowly escaped death from a bomb thrown by an Anarchist (see **History**, 1906, below). Their Majesties visited this country in August. Of his two sisters, the Princess of the Asturias, Maria-de-las-Mercedes, b. Sept. 11th, 1880, was married, Feb. 14th, 1901, to Prince Carlos of Bourbon, son of the Count of Caserta (offspring Alfonso, b. Nov. 30th, 1901, and another son b. Feb. 28th, 1903), and died in 1904. Her eldest son was proclaimed as successor to the throne (Oct. 20th, 1904). The other sister of the King is the Princess Maria Teresa, b. Nov. 12th, 1882, and married Jan. 12th, 1906, to Prince Ferdinand of Bavaria, her first cousin. The King is a K.G., G.C.V.O., a General in the British Army, and received the Royal Victorian Chain in June 1905. He has a Civil List of about £280,000.

#### Government.

By the constitution of 1876, Spain is declared a constitutional monarchy, with the executive power vested in the King, and the legislative power in the Cortes with the King. The **Cortes** consist of Senate and Congress. The **Senate** is composed of three classes: those who sit by right of royal or noble birth or official position, 100 members nominated by the Crown (these two classes not numbering more than 180 together), and 180 elected by the communal and provincial states, the church, the universities, and the largest taxpayers of the kingdom. The elected Senators must be renewed by one half every 5 years, and altogether whenever the Cortes are dissolved. The **Congress** contains 431 deputies, elected for 5 years by citizens of 25 years of age who have enjoyed full civil rights in any municipality for 2 years. There is some provision for minority representation, and for the election of ten deputies who, though not returned in any single district, yet receive a cumulative vote of more than 10,000 in several districts. The Senate and Congress are equal in authority, and either of them, or the King, can introduce new laws.

### The Army.

Under the terms of an order of Jan. 29th, 1903, the Army was reorganised on the basis of an effective of 80,000 men; the second battalions of the infantry regiments and the fourth squadrons of the cavalry being reduced to skeleton formations. There are in all about 23,000 officers, provided for the old establishment, but the supernumeraries are on half-pay, and their places are not being filled. There are eight captain-generalcies, but the eight army corps are replaced by divisions, and further reductions are being introduced. The headquarters are respectively: 1st, Madrid; 2nd, Seville; 3rd, Valencia; 4th, Barcelona; 5th, Saragossa; 6th, Burgos; 7th, Valladolid; 8th, Corunna. The constitution, by units, of the army is: Infantry, 56 regiments, 20 battalions of Chasseurs, 4 African regiments, 2 regiments in the Balearic Isles, 2 regiments in the Canaries, recruiting cadres, etc. The Cavalry, 28 regiments, and 3 squadrons for foreign possessions. Artillery, 13 field, 1 siege and 3 mountain regiments (all with four 6-gun batteries), 14 fortress battalions, 1 Central Gunnery School, 1 Central Remount Committee, and 4 companies of artificers. The Minister of War in Nov. 1905 introduced a bill authorising the purchase from the Creusot factories of 200 quick-firing guns with the necessary material, at a cost of £840,000, spread over four financial years. The Engineer Corps consists of 4 regiments of sappers and miners, 1 pontoon regiment, 1 telegraph battalion, 1 railway battalion, 1 topographical brigade, 1 company of artificers, and 8 reserve depots, with 5 separate companies of sappers and miners for the Balearic Islands, etc. For recruiting purposes the Peninsula has 116 districts, the Canaries and Balearics have 2, and Ceuta and Melilla have 2. The total armed strength is estimated to be 500,000.

### The Navy.

There are 16,700 of all ranks in the Spanish Navy, and 9000 marines. All these are conscripts. The officers are divided as follows: 1 admiral, 4 vice-admirals, 11 rear-admirals, 22 captains, 47 commanders, 94 lieutenant-commanders, 131 lieutenants, 340 sub-lieutenants, 165 midshipmen, and 100 cadets.

The strength in ships built and building on Oct. 30th was:—

	Built.	Building.
Battleship . . . . .	1	—
Armoured cruisers . . . . .	2	1
Protected cruisers . . . . .	5	2
Torpedo vessels . . . . .	6	—
Torpedo-boat destroyers . . . . .	4	—

A bill came before the Cortes during 1905 for a new shipbuilding programme. The vessels projected were 8 battleships of 14,000 tons, 5 armoured cruisers, and attendant small craft; the total cost to be £15,840,000 (396,000,000 pesetas), and to be spread over 6 years. On Oct. 18th, 1906, the Minister of Marine announced that 5,000,000 pesetas granted to his department for new construction would be devoted to the building of three coast defence vessels and a training ship.

The principal dockyards are situated as follows:—Cadiz: three docks take cruisers. Cartagena: one floating dock takes large cruisers. Bilbao: one dock takes any Spanish ship; two smaller.

### Local Government, Education, etc.

Each of the 49 provinces has its own parliament, and each commune its own elected ayuntamiento, presided over by the alcalde, for municipal and provincial administration; and by the constitution neither the Executive nor the Cortes can (although they do) interfere in municipal or provincial administration, except for the protection of national and permanent interests. The State Religion is the Roman Catholic, and the public worship of any other creed is forbidden. There were in 1902 3115 religious communities in the country, with 50,933 members, of whom 40,188 were women and 10,745 men. Of these 2611 obtained registration, 150 were held over, and the greater part of the remaining 354 were exempt from registration under the Concordat of 1851. Education is free, but inefficient, the cost being borne mainly by the municipalities. There were 25,340 public schools in 1901. A decree for the regulation of non-official schools, numbering about 6180, came into force Sept. 25th, 1902, providing for their registration and inspection, and for the appointment of properly qualified teachers.

Three-quarters of the total population are engaged in agriculture. The principal products are wine, cereals, minerals, and cotton textiles. Iron, coal, and copper are the chief minerals worked. Over 8500 miles of railway, all belonging to private companies, are open and worked. A new Customs tariff came into force on July 1st, 1906.

### Statistics and Diplomatic.

Area, including the Balearic and Canary Isles, and the small possessions on the north coast of Africa, 106,173 sq. m.; estimated pop., 1900, 18,618,086. The population of Madrid is about 540,000, and of Barcelona 533,000. The Canary Islands, off the N.W. African coast, are ruled as an integral province of the kingdom. Bananas, potatoes, and tomatoes are their most valuable products. Area 2808 sq. m.; pop. 358,564. The population of Tenerife is 95,000, of Grand Canary 75,000, and of Palma 32,000.

Revenue, 1904, £32,287,947; estimated 1906, £36,740,000; expenditure, 1904, £30,593,391; estimated 1906, £35,230,000; public debt, £417,296,000, including over £12,000,000 of Cuban debt. Imports, 1905, £30,915,000; exports, £27,792,000. Great Britain and her Colonies have the largest individual share of the trade. In 1904 British imports into Spain were £6,931,685; French, £5,737,203; American, £4,090,752; German, £3,744,210.

Ministry: Premier, Señor Moret.—Foreign Affairs, Señor Perez Caballero.—Interior, Señor Quiroga Ballisteros.—Justice, Señor Barroso.—War, General Luque.—Marine, Señor Alba.—Public Works, Señor Gasset.—Public Instruction, Señor Borbolla.—Finance, Señor Eleuterio Delgado.

Ambassador in London, Señor de Villaurrutia, 1, Grosvenor Gardens, S.W.—First Secretary, The Marquis of Villalobar, 18, Victoria Square, S.W.—Consul-General in London, Don Ernesto Merle, 20, Mark Lane, E.C.

British Ambassador in Madrid, Sir Maurice de Bunsen, G.C.V.O., K.C.M.G., C.B.—Councillor of Embassy, E. M. Grant Duff, Esq.—Commercial Attaché, S. Pepys Cockerell, Esq.

British Consuls: Consul-General at Barcelona,

J. F. Roberts.—*Consuls*: A. Maclean (Bilbao), A. L. Keyser (Cadiz), C. M. Trayner (Corunna), J. G. Haggard (Malaga), J. E. Croker (Teneriffe).

### Colonies.

By the war with the United States in '98 Spain lost Cuba and all her West Indian possessions, besides the Philippine Islands. The Caroline, Pelew and Ladrone Islands were sold to Germany in '99.

**Fernando Po** is a volcanic island in the Gulf of Guinea, forming, with Elobey, Annobon, Corisco, and other islands, a Spanish colony Area 780 sq. m.; pop. 24,000. Discovered in 1471 by a Portuguese sailor of same name, and ceded by Portugal to Spain in 1778. Capital, **Clarence Cove**, originally an English settlement, established in 1827. The natives, **Aniyo** or "**Boobies**," stupid and repulsive in appearance. **Exports**: indiarubber and palm oil. Now used as a place of exile for political offenders.

**British Consular Agent**, J. Cottrell.

The **Muni River Settlements** consist of the country on the banks of the Muni and Campo rivers, on the west coast of Africa, in the Gulf of Guinea, and an agreement has settled the dispute about the boundary between French and Spanish territory in this region. Area estimated at about 9000 sq. m.; pop. 140,000.

**British Consul**, A. Nightingale (resides at Boma).

**Rio de Oro** is a Spanish possession on the west coast of the Sahara, bounded on the north by Morocco and on the south by a line running east from Cape Blanco, and, with **Adrar**, is placed under the Governorship of the Canary Islands, with a sub-governor at Rio de Oro. Area estimated at 70,000 sq. m.; pop. 130,000.

### Political Parties.

The chief parties are the **Liberals**, who are much divided into sections; the **Conservatives**, also broken up to some extent, and, until his retirement in 1903, led by **Señor Silveira**; the **Republicans**, and the **Carlists**.

**Don Carlos** (Carlos Maria de los Dolores Juan Isidore Josef Francisco Quirino Antonio Miguel Gabriel Rafael, Duke of Madrid), head of the **Carlist** faction, and cousin of King Alfonso XII., was b. March 30th, 1848. He is a son of Prince Juan and the Archduchess Maria Teresa of Austria. He was educated in Austria, and on Feb. 4th, '67, married Princess Margaret of Bourbon, daughter of Duke Carlos III. of Parma. By her he had a son, **Don Jaime**, b. June 27th, '70, who is an officer in the Russian army, and four daughters, before she died on Jan. 29th, '93. On April 28th, '94, he married Marie Berthe, Princess de Rohan. When Amadeo was chosen King of Spain in 1870 Don Carlos protested, and in '73 he entered Spain, and remained in the north of the country despite all the efforts to dislodge him during the Republic, and after the accession of Alfonso XII. until '76, when he fled to France. Afterwards he took up his abode at Venice, where he still lives.

The **Conservatives** were in power '95-'7, '99-1901, and 1902-5. The **Liberals** held office in '93-5, '97-9, and 1901-2. Madrid was swept by the **Republicans** at the 1903 election, and the Republican movement made considerable headway during the year under the leadership of **Señor Salmeron**, who said they intended to deliver themselves from the Jesuits and the Vatican. In Dec. 1903 a new party, the **Democratic Liberal** party, was formed.

The **General Election** of Sept. 10th, 1905, resulted in the return of 240 **Dynastic Liberals** (including about 100 personal friends of **Señor Moret**, 120 followers of the Prime Minister, **Señor Montero Rios**, and 20 **Democratic Liberals** who follow **Señor Canalejas**), and 167 members of the **Opposition** groups (including 3 **Carlists**, 2 **Ultramontanes**, 7 **Catalan Regionalists**, 8 **Independents**, 19 **dissident Conservatives**, 97 **orthodox Conservatives**, followers of **Señor Maura**, and 30 **Republicans**). The **Senatorial** election on Sept. 24th, 1905, resulted in the return of 109 **Liberals** and 71 members of the **Opposition** (52 **Conservatives**, 9 **Prelates**, 4 **Independents**, 2 **Catalan Regionalists**, 2 **Republicans**, and 2 **Carlists**). The Government were thus able, with the existing life Senators, to command the support of over 180 Senators, which gave them a small majority over the **Opposition**. In Dec. 1905, however, **Señor Moret** succeeded **Señor Montero Rios** as Premier.

### History, 1906.

The Conference on the **Morocco** question met at **Algeiras** (Jan. 16th), and the Spanish delegate, the Duke of **Almodovar**, was elected President. See **Morocco**.

A delicate situation arose within the Cabinet owing to the demand made by the **Army** and the **Navy**, backed by the Ministers of War and Marine, that offences against the army and national unity should be tried, not by the Civil Courts, but by Military Courts. The majority of the Ministry proposed to retain the civil jurisdiction in regard to such cases, but to increase the penalties in regard to that class of offences. A bill was afterwards introduced transferring from the civil to the military jurisdiction the prosecution and trial of all persons accused of attacks against the national unity and the army. This was generally regarded, except by the military, as an infringement of the constitutional principle of civil supremacy, but the **Conservatives** assisted the Premier, **Señor Moret**, to carry it. Then **Señor Moret** resigned, but the King declined to accept the resignation (March 21st).

In the Chapel at **Miramar Palace** **Princess Ena of Battenberg** abjured the Protestant faith and was received into the Roman Church (March 7th), the members of the Spanish Royal Family and the Premier, **Señor Moret**, being present. The betrothal of the King and the Princess was then formally announced, and King Edward met them, with **Princess Henry of Battenberg**, at **Biarritz** (9th), the two Kings frequently meeting at **San Sebastian** or at **Biarritz** on the following days. The Premier formally announced the marriage to the Cortes (12th), and a bill was passed providing an annual allowance of £18,000 for the future Queen, and £10,000 in the event of her surviving the King and not re-marrying. **Princess Ena** arrived at the **Pardo Palace, Madrid** (May 25th), having met with an enthusiastic reception all along the line from **Irun**, where she was met by King Alfonso. The marriage contract was signed, and the official betrothal took place (30th). The wedding was solemnised at the Church of **San Jeronimo** (31st); and on the return journey to the Palace a bomb was thrown at the Royal carriage, killing 23 and injuring 99 among the soldiery and spectators. Their Majesties were uninjured, and the next day drove through the city in a motor car without

escort, and received a tremendous ovation. The assassin, a Spanish anarchist named Morral, on being challenged at Torrejon, shot a policeman dead and then shot himself (June 3rd).

The Premier and Ministry tendered their resignations (7th), but the King said the Premier and the Liberal Party enjoyed his full confidence, and asked Señor Moret to form a new administration; a task which he accomplished (10th). The Ministry, however, resigned because the King declined to grant a dissolution, which Señor Moret considered necessary before introducing their measures as to lay education and the religious orders (July 5th), and Marshal Lopez Dominguez then undertook to form a concentration Cabinet consisting of Liberals with the support of the Conservatives. In October the Minister of Justice, Count Romanones, issued an order reminding the ecclesiastical and other authorities that the law did not require any declaration of faith from those wishing to contract a civil marriage; and the bishops at once denounced civil marriages as mere legal concubinage. Count Romanones afterwards announced that the Government would bring in a measure directed against the power of the religious orders, and a project for the revision of the Concordat. The Committee of the House of Deputies accordingly drew up the text of a Law on Religious Associations in November, but the resignation of the Cabinet was announced (29th). It appeared that there was considerable division amongst the Liberal party, not only on personal grounds, but over the question of the relations with the Vatican and the Church raised by the Associations law. Señor Montero Rios and Señor Moret did not go to the same lengths in an anti clerical direction as Marshal Dominguez, and consequently the Cabinet resigned, and was reconstructed under Señor Moret as Premier (30th).

A revised tariff was put in force (July 1st), and commercial negotiations were in progress during the year with most of the Continental Powers.

**Spiritualism.** The London Spiritualist Alliance, Ltd., was founded in 1884, in succession to other societies of the same nature, which had preceded it; and was incorporated in '96. The chief work of the society has been to maintain and expound the principles of Spiritualism—viz., a belief in the existence and life of the spirit apart from, and independent of, the material organism, and in the reality and value of intelligent intercourse between spirits embodied and spirits disembodied. Offices, 110, St. Martin's Lane, W.C.; organ, *Light*, founded '81. The first President of the London Spiritualist Alliance and editor of *Light* was, until his decease, Mr. W. Stainton-Moses, M.A. (Oxon.), whose writings, "Psychography," "Spirit Identity," "Spirit Teachings," etc., etc., are well known. The present President of the Alliance, and editor of *Light*, is Mr. E. Dawson Rogers. A valuable library of works on psychic science is available at the offices at St. Martin's Lane. Meetings are held for the discussion of matters of interest to students of psychology, and information can always be obtained by inquirers. It is impossible to say how many Spiritualists there are in Great Britain, but there are local organisations in almost all towns of any importance.

## SPORT IN 1906.

Below we give a summary of the chief events and results in the various departments of sport and athletics for the year under review, arranged alphabetically.

### Athletics.

The principal competitions resulted as follows:—

**Northern Counties Cross-country Championship.** Won by Crewe Harriers, C. J. Straw, of Sutton Harriers, finishing first in 61 min. 7 sec.

**Midland Counties Cross-country Championship.** Won by Birchfield Harriers, W. G. Dunkley, of the Alpine Harriers, finishing first in 58 min. 1 sec.

**Southern Counties Cross-country Championship.** Won by Highgate Harriers, G. Pearce, of the Highgate Harriers, finishing first in 61 min. 9 sec.

**National Cross-country Championship.** Won by the Sutton Harriers, C. J. Straw finishing first in 61 min. 12 sec.

**Cross-country Championship of Scotland.** Won by the Clydesdale Harriers, S. Stevenson finishing first in 65 min. 55 sec.

**International Cross-country Championship.** Won by England, C. J. Straw finishing first in 57 min. 32 sec.

The Sports between Scotland and Ireland at Belfast were won by Scotland by 7 events to 4. Oxford and Cambridge University Sports ended in a victory for Oxford by 7 events to 3. The results were as follows:—

100 Yards: K. G. Macleod, Cambridge, 10<sup>3</sup>/<sub>8</sub> sec.

Quarter-mile: K. Cornwallis, Oxford, 51 sec.

Half-mile: K. Cornwallis, Oxford, 1 min. 56<sup>3</sup>/<sub>8</sub> sec.

One Mile: A. R. Welsh, Cambridge, 4 min. 21<sup>1</sup>/<sub>2</sub> sec.

120 Yards Hurdles: E. R. J. Hussey, Oxford, 16<sup>3</sup>/<sub>8</sub> sec.

Hammer: A. H. Fyfe, Oxford, 136 ft. 3 in.

Weight: Hon. G. W. Lyttleton, Cambridge, 38 ft. 3<sup>3</sup>/<sub>8</sub> in.

High Jump: P. M. Young, Oxford, 5 ft. 7<sup>1</sup>/<sub>2</sub> in.

Long Jump: P. M. Young, Oxford, 22 ft. 3 in.

Three Miles: N. F. Hallows, Oxford, 15 min. 14 sec.

**Annual Sandhurst and Woolwich Sports.**—Resulted in a win for Sandhurst by 6 events to 4.

**Seven Miles Walking Amateur Championship.**—Won by F. J. Carter in 53 min. 20<sup>3</sup>/<sub>8</sub> sec.

**Ten Miles Running Amateur Championship.**—Won by A. Aldridge in 54 min. 7<sup>1</sup>/<sub>2</sub> sec.

The Amateur Athletic Association Championships resulted thus:—

100 Yards: J. W. Morton (holder), 10<sup>3</sup>/<sub>8</sub> sec.

220 Yards: C. H. Jupp, 22<sup>3</sup>/<sub>8</sub> sec.

Quarter-mile: W. Halswell (holder), 45<sup>3</sup>/<sub>8</sub> sec.

Half-mile: A. Astley, 1 min. 57<sup>1</sup>/<sub>2</sub> sec.

One Mile: G. Butterfield (holder), 4 min. 18<sup>3</sup>/<sub>8</sub> sec.

Weight: T. Kirkwood, 45 ft. 4<sup>1</sup>/<sub>2</sub> in.

Hammer: H. A. Leeke, 123 ft. 1 in.

120 Yards Hurdles: R. S. Stronach (holder), 16<sup>3</sup>/<sub>8</sub> sec.

Long Jump: P. O'Connor (holder), 23 ft. 5<sup>1</sup>/<sub>2</sub> in.

High Jump: Con. Leahy (holder), 6 ft. 1 in.

Two Miles Walking Race: A. T. Yeomans, 14 min. 20<sup>3</sup>/<sub>8</sub> sec.

Two Miles Steeplechase: A. Russell (holder), 11 min. 14<sup>3</sup>/<sub>8</sub> sec.

Pole Jump: A. E. A. Harragin, 10 ft. 4 in., w.o.

**Cricket.**

The season was remarkable for absence of rain. Hayward (who beat the previous record aggregate by over 200 runs), Hirst, Hayes, Denton, and Tyldesley all made upwards of 2000 runs; Hirst, Fielder, Dennett, Haigh, and Lees were the most successful bowlers. Hirst was undoubtedly the finest all-round player.

The positions of the Counties at the close of the 1906 season were as follows:—

County.	Pl.	W.	L.	D.	Pts.	Per-centage.
1 Kent . . .	22	16	2	4	14	77'77
2 Yorkshire . .	28	17	3	8	14	70'00
3 Surrey . . .	28	18	4	6	14	63'63
4 Lancashire . .	26	15	6	5	9	42'85
5 Notts . . .	20	9	4	7	5	38'46
6 Warwickshire .	20	7	4	9	3	27'27
7 Essex . . .	22	9	6	7	3	20'00
8 Hampshire . .	20	7	9	4	—2	—12'50
9 Gloucestershire	20	6	10	4	—4	—25'00
10 Sussex . . .	24	6	12	6	—6	—33'33
11 { Middlesex . . .	18	4	10	4	—6	—42'85
{ Northants . . .	16	4	10	2	—6	—42'85
{ Somerset . . .	18	4	10	4	—6	—42'85
14 Worcestershire	20	2	8	10	—6	—60'00
15 Leicestershire .	22	3	14	5	—11	—64'70
16 Derbyshire . .	20	2	7	1	—15	—78'94

Cambridge beat Oxford by 94 runs. Eton beat Harrow by 4 wickets. The Gentlemen beat the Players by 45 runs at Lord's, but were beaten by the Players at the Oval by 165 runs. North beat South by an innings and 71 runs. Kent (Champion County) suffered defeat from Rest of England by 251 runs. Oxford University beat Gentlemen of England by 4 wickets. Gentlemen beat Cambridge University by 7 wickets. M.C.C. and Ground beat Cambridge University by 4 wickets. M.C.C. and Ground beat Oxford University by 4 wickets and 18 runs.

Among the second-class counties, Staffordshire finished first.

The chief Batting averages for 1906 were:—

	Innings.	Runs.	Highest.	Not out.	Average.
Burnup, C. J. . .	21	1207	179	3	67'05
Hayward . . .	61	3518	219	8	66'37
Hutchings, K. L. .	34	1597	176	4	53'23
Bosanquet, B. J. T. .	8	415	101	0	51'87
Arnold . . .	39	1767	166	4	50'48
Iremonger . . .	43	1794	200*	6	48'48
Perrin, P. . .	43	1893	150	3	47'32
Tyldesley . . .	52	2270	295*	3	46'32
Hirst . . .	58	2385	169	6	45'86
Sewell, C. O. H. . .	9	409	107	0	45'44
Hayes . . .	56	2309	218	5	45'27
Gillingham, F. H. .	17	679	102	2	45'26
Jones, A. O. . .	39	1560	105	3	43'33
Dillon, E. W. . .	15	562	85	2	43'23
Burns, W. B. . .	32	1206	105	4	43'07
Warner, P. F. . .	33	1299	137	2	41'90
Fishwick, T. S. . .	23	919	135	1	41'77
Devey . . .	34	1237	110*	4	41'23
Denton . . .	60	2287	157*	4	40'83
Hobbs . . .	53	1913	162*	6	40'70
Mason, J. R. . .	18	649	88	2	40'56
Baker (C. S.) . .	25	848	144	4	40'38

\* Signifies not out.

The chief Bowling averages for 1906 were:—

	Overs.	Mdns.	Runs.	Wkts.	Aver.
Huddleston . . .	234'1	65	613	50	12'26
Cuttell . . .	442'1	170	909	67	13'56
Udal, N. R. . .	146'1	53	434	29	14'96
Haigh . . .	971'3	209	2540	174	14'59
Hallam . . .	832'2	288	1723	104	16'56
Hirst . . .	1306'1	271	3434	208	16'50
Dennett . . .	1145'5	256	3096	175	17'69
Gregson . . .	151'1	27	428	24	17'83
Bestwick . . .	776'1	186	2123	115	18'46
Wass . . .	609'2	130	1888	100	18'88
Morcom, A. F. . .	235'4	57	700	37	18'91
Goodwin, H. J. . .	78'2	12	286	15	19'06
Tarrant . . .	626	135	1740	91	19'12
Blythe . . .	886'5	243	2209	111	19'90
Kermode . . .	592'2	149	1724	89	19'37
Brearley, W. . .	253'4	36	878	45	19'51
Vogler . . .	374'1	67	1234	63	19'58
Harry . . .	648'1	200	1708	87	19'63
Knox, N. A. . .	754'5	107	2828	144	19'63
Fielder . . .	1159'3	234	3756	186	20'19

**Cricket.**

The following were the results of the chief events:—

All-England Open Championship.—C. Corbally beat Leslie O'Callaghan.

Ladies' Championship.—Mrs. Preston beat Mrs. Whitaker.

Mixed Doubles Championship.—R. C. J. Beaton and Mrs. Beaton beat C. Corbally and Miss Coote.

Association Challenge Cup was won by G. H. Woolston with 14 wins and 4 losses. C. Corbally coming next with 13 wins and 5 losses, and C. L. O'Callaghan finishing third with 12 wins and 6 losses.

Association Gold Medal.—M. Barry beat R. C. J. Beaton.

Ladies' Gold Medal.—Miss Gatehouse beat Miss Bramwell.

Brighton Tournament.—Gentlemen: C. L. O'Callaghan beat J. E. Currey. Ladies: Miss B. Willis beat Miss Gatehouse.

Eastbourne Open Meeting.—R. C. J. Beaton Silver Cup was won by C. L. O'Callaghan.

Epsom Tournament.—E. Fawcett won Gentlemen's Singles, and Miss Wood Ladies' Singles.

Ranelagh Tournament.—Gentlemen: C. L. O'Callaghan beat G. Turner. Ladies: Miss N. Coote beat Mrs. Cullen.

Rochampton Challenge Cup Meeting.—A Division: C. D. Locock beat R. J. C. Beaton. B Division: G. Ashmore beat Mrs. Tariff. C Division: S. J. L. Gilchrist beat Miss Cutbell.

**Football.**

1. Association.—The International matches resulted as follows:—

England beat Ireland 5 goals to 0. England has now won 22, Ireland 1, drawn 2.

England beat Wales 1 goal to 0. England has now won 22, Wales 2, drawn 4.

Scotland beat England 2 goals to 1. England has now won 12, Scotland 16, drawn 8.

Royal Liverpool G.C. Gold Medal: J. Ball. Dun Silver Cross: A. J. Graham. Duke of Connaught's Star: T. Graham, 76.

Manchester Open Tournament: Amateurs—H. H. Barker, 79+75=154; Professionals—G. Duncan, 71+73=144.

The English professionals beat the Scottish professionals by 6 points.

Cambridge beat Oxford by 30 holes to 7.

The Bar Tournament was won by J. F. Tindall Atkinson beating G. R. Venables by 3 and 2.

The Parliamentary Handicap was won by F. H. Newnes beating H. J. F. Badeley by 5 up and 3 to play.

The Calcutta Cup was won at St. Andrews by Captain MacAllan beating Mr. Norman Hunter by 1 up.

Queen Victoria Jubilee Vase: M. C. Boevey beat P. Murray by 4 and 2 to play.

H.R.H. Prince of Wales' Challenge Cup: H. O. Jones beat Major Legh by 5 and 4.

"News of the World" Tournament at Hollinwell: A. Herd beat C. H. Mayo in the final by 8 and 7.

Bar beat Press 6 points to 5.

Medical Tournament at Watford: A. W. Soper.

The Lamb Memorial Medal: C. K. Hutchinson beat A. H. Read.

St. Andrews Gold Cross at Hoylake: J. Ball, 79.

Hon. Company of Edinburgh Golfers Gold Medal, North Berwick: J. E. Laidlay, 75.

### Hockey.

In the International matches—

England	beat Scotland	. 3 goals to 0
England	" Ireland	. 2 " 1
England	" Wales	. 12 " 2
Ireland	" Scotland	. 7 " 1
Scotland	" Wales	. 3 " 1
Ireland	" Wales	. 8 " 0

Other matches resulted thus:

Cambridge	beat Oxford	. 4 " 1
South	" North	. 7 " 2
South	" West	. 3 " 0
Midlands	" North	. 4 " 1
Kent	" Essex	. 4 " 2
Surrey	" Kent	. 8 " 1
Surrey	" Essex	. 8 " 1
Essex	" Herts	. 5 " 2
Northants	" Leicestershire	. 3 " 0
Middlesex	" Lancashire	. 2 " 0
Kent	" Middlesex	. 5 " 0
South	" Midlands	. 5 " 1
Middlesex v. Essex	drawn.	
Middlesex	beat Surrey	. 2 " 1
Somerset	" Devon	. 2 " 1
Cornwall	" Devon	. 4 " 1
Devon	" Gloucestershire	. 3 " 2
Hampshire	" Surrey	. 6 " 2
Leicestershire	" Lincolnshire	. 1 goal to 0
Wilts	" Oxfordshire	. 1 " 0
Somerset	" Gloucester	. 5 goals to 1
Middlesex	" Sussex	. 4 " 1

### Hunting.

According to figures given by the *Field* there were in the United Kingdom in the 1906-7 season:—

	England and Wales.	Scotland.	Ireland.
Staghounds	. 16	—	4
Foxhounds	. 171	11	24
Harriers	. 98	2	39
Beagles	. 58	1	9

### La Crosse.

The principal matches resulted as follows:—

Northern Flag Competition.—Final: South Manchester beat Stockport 3 goals to 2.

Southern Flag Competition.—Final: Surbiton beat Catford 14 goals to 1.

Club Championship of England (Iroquois Cup).

—South Manchester (Northern Flag holders) beat Surbiton (Southern Flag holders) 10 goals to 6.

North beat South 9 goals to 5.

Cambridge beat Oxford 10 goals to 3.

Catford beat Woodford 5 goals to 1.

Lancashire beat Kent 11 goals to 2.

Essex beat Surrey 11 goals to 9.

Kent beat Surrey 2 goals to 1.

Lancashire beat Cheshire 14 goals to 9.

Middlesex v. Kent drawn.

### Lawn Tennis.

The results of the principal matches were as follows:—

Covered Courts Championship.—H. L. Doherty (holder) beat A. W. Gore 3 sets to 0. Ladies: Miss D. K. Douglass beat Miss H. Lane (holder). The Doubles were won by R. F. Doherty and H. L. Doherty, who beat A. W. Gore and G. A. Cardia 3 sets to 0. Mixed Doubles: A. F. Wilding and Miss D. K. Douglass beat R. F. Doherty and Miss G. Eastlake Smith (holders).

In the Championships the All Comers was won by F. L. Riseley who beat A. W. Gore 3 sets to 0, but was beaten in the championship round by H. L. Doherty (the holder) 3 sets to 1. In the Ladies' Championship Miss D. K. Douglass beat Miss M. Sutton 4 sets to 0. The Doubles were won by S. H. Smith and F. L. Riseley, who beat R. F. and H. L. Doherty (holders) 3 sets to 2. Ladies' Doubles: Miss Hillyard and Miss Sutton beat Mrs. Sterry and Miss Morton. Mixed Doubles were won by A. F. Wilding and Miss Douglass, who beat A. W. Gore and Miss Thompson.

The International Davis Cup. America beat Australasia 3 matches to 2. S. H. Smith (British Isles) beat R. D. Little (America) 3 sets to 0, and H. Ward (America) 3 sets to 0. H. L. Doherty (British Isles) beat H. Ward (America) 3 sets to 0, and R. D. Little (America) 4 sets to 1. R. F. Doherty and H. L. Doherty (British Isles) beat H. Ward and R. D. Little (America) 3 sets to 1, and England won by 5 matches to 0.

Surrey Championships.—S. H. Smith. Ladies': Miss T. Lowther. Doubles: R. J. McNair and A. D. Prebble. Ladies Doubles: Mrs. Sterry and Miss A. M. Morton.

Middlesex Championships.—M. J. G. Ritchie. Ladies: Miss D. K. Douglass. Doubles: M. J. G. Ritchie and G. M. Simond. Mixed Doubles: G. M. Simond and Miss "Shirley."

Northern Championships.—F. L. Riseley beat S. H. Smith (holder) 3 sets to 1. Ladies': Miss D. K. Douglass beat Miss M. Sutton (holder). Doubles: S. H. Smith and F. L. Riseley. Ladies' Doubles: Miss D. K. Douglass and Miss Thompson.

All-England Mixed Doubles.—F. L. Riseley and Miss D. K. Douglass.

Irish Championships.—F. L. Riseley. Ladies': Miss W. A. Longhurst (holder). Doubles: F. L. Riseley and A. H. Porter. Mixed Doubles: A. H. Riseley and Mrs. Barker.

Oxford v. Cambridge.—Oxford won Singles 6 matches to 3, and Doubles 5 matches to 1.

**London Championships** (Queen's Club).—M. J. G. Ritchie beat J. M. Flavell. Ladies: Miss E. W. Thomson beat Miss M. Coles.

**Welsh Championships**.—S. H. Smith. Ladies: Miss Sutton. Mixed Doubles: Divided between S. H. Smith and Mrs. Sterry, and J. M. Boucher and Miss Boucher.

**Kent County Championship**.—A. W. Gore beat A. L. Bentley (N. E. Brookes, holder, retired). Ladies: Miss D. K. Douglass beat Miss Lowther (Miss C. W. Wilson, holder, retired).

**Inter-County Challenge Cup**.—Gentlemen: Gloucester (holders) beat Middlesex. Ladies: Middlesex beat Durham.

**Suffolk Championships**.—H. Roper Barrett (holder). Ladies: Miss A. M. Morton beat Miss Tootell (holder).

**Essex Championships**.—H. Roper Barrett beat Capt. A. W. Davies. Ladies: Miss A. M. Morton (holder) beat Miss Tootell.

**Yorkshire Championships**.—E. Middleton beat E. Watson. Ladies: Miss B. Holder beat Mrs. P. N. Morton. Doubles: E. and S. Watson beat E. Middleton and S. B. Learoyd.

**Scottish Championships**.—A. M. Mackay beat R. Welsh. Ladies: Miss A. M. Fergusson beat Mrs. Curtis Whyte. Doubles: A. M. Mackay and A. W. McGregor beat K. Sanderson and R. Welsh. Mixed Doubles: Miss A. M. Fergusson and A. M. Mackay beat Miss M. E. Morton and D. T. Harbison.

**Leicester Open Tournament** (Championship of Europe).—F. L. Riseley beat G. C. Ball Greene. Ladies: Miss M. Sutton beat Miss Pinckney.

**Covered Court Championships of London**.—A. F. Wilding beat G. A. Caridia. Doubles: R. F. Doherty and G. M. Simond beat R. B. Hough and L. H. Escombe. Ladies: Miss Eastlake Smith beat Miss M. Coles. Mixed Doubles: R. F. Doherty and Miss Eastlake Smith beat J. B. Ward and Miss M. Coles.

**South of England (Eastbourne) Tournament**.—A. F. Wilding beat R. J. McNair. Ladies: Miss D. K. Douglass beat Miss A. M. Morton. Doubles: H. N. Marrett and A. F. Wilding beat E. K. and C. G. Allen. Mixed Doubles: G. W. Hillyard and Miss Douglass.

**Gipsy Open Tournament** (North London Championship).—A. W. Gore beat H. Roper Barrett (holder). Ladies: Miss A. M. Morton beat Miss B. Tulloch.

**Duke of Devonshire's Cup for Ladies' Singles** was won by Mrs. Hillyard at Buxton.

### Olympic Games.

These games were opened in the Stadium at Athens by the King of the Hellenes on April 22nd. The opening ceremony was honoured by Queen Olga, their Majesties King Edward and Queen Alexandra, and a number of other royal personages:—

The following are the results of the principal events:—

**Bicycling**—1000 mètres: Verri (Italy), 1st, beating H. C. Bouffler (Polytechnic C.C.) by two lengths.

**Five kilomètres**: Was won by Verri (Italy), H. Crowther (Leeds) finishing 2nd.

**20 kilomètres**: Was won easily by W. J. Pett (Putney) in 29 minutes.

**Discus Throwing**—P. J. Sheridan (America) won with a throw of 135 ft. 8 in. N. Georgantas (the Greek champion) was second, and Jaevinen (Finland) third.

**Fencing**—The English beat the German team by 7 points and the Belgian team by 5 points,

but in the final they were beaten by the French team by 9 points to 6.

**Hurdles**—In the final, Levitt (America) finished 1st, H. Healey (England) 2nd, and Dunker (Germany) 3rd. Time 16½ sec.

**High Jump**—R. Ewry (America), 6 ft. 2 in.

**Long Jump**—M. Prinstein (America) 1st, with 23 ft. 7½ in.; P. O'Connor (England), 2nd, with 23 ft. 0½ in.; and Friend (America) 3rd, with 22 ft. 10 in.

**Polo Jump**—Gondor (France), 11 ft. 4 in.

**Running**—100 mètres: A. Halin 1st, Moulton 2nd, Barter 3rd. Time, 11½ sec.

**400 mètres**: Pilgrim (America) 1st, W. Halswell (Scotland) 2nd, and N. Barker (Australia) 3rd. Time, 53½ sec.

**800 mètres**: Pilgrim (America) 1st, J. D. Lightbody (America) 2nd, and W. Halswell (Scotland) 3rd. Time, 2 min. 1½ sec.

**1500 mètres**: Was won by J. D. Lightbody (America) by 6 yds., J. McGough (Scotland) finishing 2nd, and K. Hellström (Sweden) 3rd. Time, 4 min. 12 sec.

**Five miles**: Was won by Lieut. H. C. Hawtrey (L.A.C.), J. Svanberg (Sweden) finishing 2nd (50 yards behind the winner), E. Dahl (Sweden) 3rd, and J. J. Daly (Galway Harriers) 4th. Time, 26 min. 1½ sec.

**Swimming**—100 mètres: C. M. Daniels (America) 1st, Z. Halmay (Hungary) 2nd, M. Healy (Australia) 3rd, J. H. Derbyshire (England) 4th. Time, 1 min. 13 sec.

**400 mètres**: Was won by Scheff (Austria), H. Taylor (England) finishing 2nd, and J. A. Jarvis (England) 3rd. Time, 6 min. 23½ sec.

**One mile**: H. Taylor (England) 1st, J. A. Jarvis (England) 2nd, and Scheff (Austria) 3rd. Time, 28 min. 28 sec.

**Weight-lifting**—Contest was won by Tophalos (Greece) with a record lift of 314 lb. 14 oz.

**The Marathon Foot-race** (42 kilomètres) was won by W. J. Sherring (Canada) in 2 hrs. 51 min. 23 sec. (beating the record), J. Svanberg (Sweden) finishing 2nd, in 2 hrs. 58 min. 20 sec., and W. G. Frank (America) 3rd, in 3 hrs. 46 sec.; J. N. Cormack (Britain) finished 14th, in 3 hrs. 35 min.

**The Athletic Pentathlon** was won by H. Melander, a Swede residing in Liverpool.

### Racing Retrospect, 1906.

The season was characterised by an amount of unrest and agitation somewhat unusual in the racing world. It is an almost universal opinion that reforms are imperatively needed. The administrative methods now in operation are not, it is felt, equal to present-day exigencies. Prominent amongst the demands put forward are the appointment of paid stewards for each important meeting, with enlarged powers of dealing with the questions of entries, forfeits, stable accommodation, in addition to a complete control and supervision of the general conduct of the racing. The "Racehorse Owners' Association," announced in our last year's issue, has played a useful part, although, unfortunately, it became involved in a controversy with the Jockey Club and with the executive of a leading race meeting on the subject of free stabling for horses, which was not adjusted without some trouble. A far-reaching scheme, involving a complete alteration of the lines on which the sport has been conducted, has been formulated by a leading London "daily," and has received considerable support in various quarters. Among the main points of the "Turf

Revolution," as it is styled by its author, are: That horse-racing should be converted into a healthy pastime—just as are cricket and football—for the people; that races should be run later in the day, so as not to interfere with business; that club enclosures be abolished; that the present system of entries be revised; with the institution of special county racecourses for the benefit and encouragement of locally bred horses.

With regard to the racing itself, interest was well sustained, despite the great drawback of hard ground—the result of the summer's prolonged drought—and an epidemic of influenza which attacked many of the stables. In the great classic races and Ten Thousand Pounders, honours were very equally apportioned. The Derby fell to the share of Major Loder by the aid of Spearmint; the St. Leger to the Duke of Westminster with Troutbeck; the Oaks to the Earl of Derby with Keystone II.; the "Two Thousand Guineas" to Mr. A. James with Gorgos; the "One Thousand Guineas" to Mr. D. Cooper with Flair; the Prince of Wales' Stakes to Mr. Reid-Walker's Dinneford; the Eclipse Stakes to Mr. Neumann with Llangibby; and the Jockey Club Stakes to Mr. J. E. Rothschild's Beppo. In the chief long-distance "cup" race—the Ascot Gold Cup—Mr. Sol Joel's Bachelor's Button, although it was his sixth season, ran the best race of his life by defeating Pretty Polly and Cicero, the Derby winner of 1905. The veteran also won the Manchester Cup handicap, carrying the top weight of 9 st.

As the champion three-year-old, the claim of Spearmint is undisputed; for in addition to the great Epsom race, he crossed the Channel and secured the premier French race, the Grand Prix de Paris. Troutbeck proved himself a remarkably game and honest horse by winning nine out of ten of his races, his only failure being when, in the Derby, he succumbed to Spearmint. The only important race which fell to a French owner was the Lincolnshire Handicap, which was won by Ob, the property of M. Ephrussi. Of the other chief handicaps, the City and Suburban at Epsom was won by Mr. Joel's Dean Swift; the Metropolitan by Mr. Wood's Whinbloom; the Chester Cup by Mr. Clarke's Feather Bed; the Manchester Cup by Mr. S. Joel's Bachelor's Button; the Ascot Stakes by Mr. Singer's Pradella; the Royal Hunt Cup by Mr. R. Walker's Dinneford; the Northumberland Plate by Mr. Stevenson's Outbreak; the Ebor Handicap by Mr. Buchanan's Golden Measure; the Cesarewitch and Cambridgeshire at Newmarket respectively by Mr. Buchanan's Mintagon and Mr. Joel's Polymelus.

Of the two-year-olds the chief prize-winners, and, apparently, most formidable candidates for future honours, were Polar Star, Galvani, Slieve Gallion, Saxham, Traquair, Prince of Orange, Olympian, and Bezonian. The four first-named were all bred in Ireland.

The leading position among trainers was taken by the Hon. G. Lambton, manager of the stables of Lords Derby and Farquhar and Rear-Admiral Lambton, with a total of £34,069, won chiefly by the aid of Keystone II. (Oaks), Chaucer (Liverpool Summer Cup), and Bridge of Canny, winner of nine consecutive races. Of the other Newmarket trainers, the most successful have been Mr. P. F. Gilpin, who had charge of such champions as Spearmint, Pretty Polly, Galvani, and Llangibby, in addition to Flair and other first-class animals. R. Marsh also

materially improved his position, with £19,298, of which the largest share was due to Mr. A. James's Gorgos and Prince of Orange, and His Majesty the King's Victoria, Osella, and Cheverel. W. Waugh, who succeeded Porter as trainer to the Dukes of Westminster and Portland, and Lords Falmouth and Coventry, stood well, with £16,274, but the bulk of this came by the instrumentality of Troutbeck, for a numerous string of highly bred two-year-olds, of whom great things were anticipated, turned out very indifferently. C. Peck (£13,461) had for his chief winner Mr. Sol Joel's old champion Bachelor's Button; F. Peck (£11,224), Lord Rosebery's Traquair; and J. E. Brewer (£10,345), Mr. L. Robinson's Roseate Dawn, Gingal, Challenger, and Linacre.

Of the provincial trainers, Robinson, of Lyddington, Wilts, once again stood first, with £17,040, to which the chief contributors were Polar Star, Witch Elm, and Black Arrow. W. E. Elsey, of Baumber, Lincs, if only second as regards cash value, was an easy first in the number of races won, which reached the remarkable total of 110, in respect of which he, so far, holds the record. F. C. Pratt, Wantage, Berks, although training only a very limited number of horses for Mr. J. A. de Rothschild, did very well, with £9700, his chief winner being Beppo, one of the best of his year. The season also brought about a marked revival in the prestige of the North-country stables, one of which, that of W. T'Anson at Malton, supplied the winner of Newmarket's premier handicap, the Cesarewitch, in Mintagon.

As regards the amounts won in stakes by the principal owners, the figures are as follows: The Earl of Derby, £32,927; Major Loder, £17,849; Mr. Hall Walker, £14,355; Mr. Sol Joel, £13,852; Mr. Reid Walker, £12,018; Duke of Westminster, £11,271; Earl of Rosebery, £10,773; Mr. Neumann, £10,360; Mr. J. A. de Rothschild, £9324; Sir E. Vincent, £9097; Mr. W. Bass, £8415; Mr. A. James, £8369.

The chief stud honours for 1906 went to Persimmon, sire of Keystone II., Plum Tree, Plum Centre, etc., who headed the list with £21,737. Next to him came Ladas, sire of Troutbeck and Gorgos, with £19,850; Gallinule, sire of Pretty Polly, Slieve Gallion, Hammerkop, and Rocketter, with £16,212; the imported Australian horse Carbine, sire of Spearmint, Gingal, Ramrod, and Tui, with £16,048; Ayrshire, sire of Traquair and King Duncan, with £14,620; Love Wisely, sire of Bridge of Canny and Earliston, £14,450; Isinglass, sire of Wombwell, Buckminster, and Shilla, £13,521; Marco, sire of Beppo and Malua, £13,486; Dinna Forget, sire of Dinneford, £12,346; Cyllene, sire of Polymelus, Cicero, and Bellavista, £12,118 10s.; Florizel II., sire of Prince of Orange, £11,050; and Wildfowler, sire of Llangibby, £10,000.

There was a very fair demand for blood stock, and high prices were in many instances realised. The highest price obtained for an individual animal was by His Majesty the King, who disposed of his "triple crown" winner of 1899, Diamond Jubilee, for 30,000 guineas. The sale of Mr. Musker's stud at the Newmarket Summer Meeting totalled £84,250, two animals—Flying Lemur and Baroness la Fleche—each fetching 7500 guineas. At the Newmarket and Doncaster sales, too, a very large number of animals were disposed of at prices quite up to the average; for in addition to home buyers there was a keen competition

with purchasers from the Continent and South America.

As regards jockeys, the list of successful horsemen is headed by W. Higgs, who advanced from fourth on the list in 1905 to first, with a total of 149 winning mounts. Next to him come the following: O. Madden, 104; D. Maher, 103; Wheatley, 93; G. McCall, 76; H. Randall, 68; Trigg, 63; Lynham, 61; Halsey, 59; Griggs, 59; Templeman, 55; H. Jones, 54; B. Dillon, 51; Priestman, 46; J. H. Martin, 41; Howard, 38; Saxby, 32.

The obituary for 1906 includes Sir James Miller, a senior steward of the Jockey Club and owner of Rock Sand, the champion of 1902 and 1903; Mr. W. G. Gubbins, the Irish breeder and owner; Mr. W. G. Craven, also a member of the Jockey Club of nearly 50 years' standing; Mr. Quartermaine East; and Fred Bates, the trainer, of Tugill, Yorks.

### Racquets.

The following were the results of the principal matches:—

**Oxford v. Cambridge.**—In the Singles G. N. Foster (Oxford) beat St. J. F. Wolton (Cambridge) 3 games to 1.

In the Doubles Cambridge, represented by St. J. F. Wolton and W. G. Pound, beat Oxford, represented by G. N. Foster and H. M. Butterworth, by 4 games to 3.

**Public Schools Challenge Cup.**—Charterhouse (C. V. Hooman and R. M. Garnett) beat Wellington (H. Brougham and E. C. Harrison) by 4 games to 1.

**The Championships.**—In the final for the Open Competition Major S. H. Sheppard beat P. Ashworth by 3 games to 1.

In the Doubles F. D. Longworth and E. H. Miles beat Major S. H. Sheppard and P. Ashworth by 4 games to 3.

**Grand Military Championship.**—The Doubles were won by the holders, the 2nd Batt. Highland Light Infantry (Lieuts. H. Balfour Bryant and P. Bramwell Davis), beating the 4th Batt. King's Royal Rifles (Major S. F. Mott and Lieut. G. T. Lee) by 4 games to 1; the Singles were won by Major S. H. Sheppard (R.E.), beating Lieut. H. Balfour Bryant (2nd H.L.I.) by 3 games to 2.

### Rowing.

The 63rd Oxford and Cambridge University Boat Race was won by Cambridge by  $\frac{3}{4}$  lengths in 19 min. 24 sec. The following are the names and weights of the crews:—

**Cambridge**—G. D. Cochrane, Third Trinity, 10 st. 8½ lb.; J. H. F. Benham, Jesus, 11 st. 6 lb.; H. M. Goldsmith, Jesus, 12 st. 6½ lb.; M. Donaldson, First Trinity, 13 st. 9½ lb.; B. C. Johnstone, Third Trinity, 12 st. 6½ lb.; R. V. Powell, Third Trinity, 12 st. 6½ lb.; E. W. Powell, Third Trinity, 11 st. 6 lb.; D. C. R. Stuart, Trinity Hall (stroke), 11 st. 1½ lb.; A. G. L. Hunt, Lady Margaret (cox.), 8 st. Average, 11 st. 13½ lb.

**Oxford**—G. M. A. Graham, New, 10 st. 13 lb.; C. H. Illingworth, Pembroke, 11 st. 13 lb.; J. Dewar, New, 12 st. 4½ lb.; L. E. Jones, Balliol, 13 st. 12 lb.; A. G. Kirby, Magdalen, 13 st. 8 lb.; E. P. Evans, University, 13 st. 6 lb.; A. C. Gladstone, Christ Church, 10 st. 7½ lb.; H. C. Bucknall, Merton (stroke), 11 st. 3 lb.; L. P. Stedall, Merton (cox), 8 st. 5 lb. Average, 12 st. 3½ lb.

Oxford have now won 34 and Cambridge 28 times. There was a dead heat in 1877.

**The Oxford Summer Eights** resulted—Magdalen 1st, New College 2nd, Christ Church 3rd, Trinity 4th, University 5th, Balliol 6th, Pembroke 7th, St. John's 8th, Lincoln 9th, Brasenose 10th, Corpus 11th.

**The Cambridge Eights** resulted—Third Trinity 1st, First Trinity 2nd, Trinity Hall 3rd, Jesus 4th, Christ's 5th, First Trinity II. 6th, Lady Margaret 7th.

**Henley Royal Regatta.**—The events resulted as follows:—

**Grand Challenge Cup**—Club Nautique de Gand, Belgium.

**Ladies' Plate**—First Trinity, Cambridge.

**Thames Challenge Cup**—Christ's College, Cambridge.

**Stewards' Challenge Cup**—Leander.

**Visitors' Challenge Cup**—Third Trinity, Cambridge.

**Wyfold Challenge Cup**—London Rowing Club.

**Silver Goblets and Nickalls' Challenge Cup**—Third Trinity (B. C. Johnstone and R. V. Powell).

**Diamond Sculls**—H. T. Blackstaffe beat Capt. W. H. Darell in 8 min. 35 sec.

By special permission of the Committee, the **Royal Artillery v. Royal Engineers** was rowed at Henley, and resulted in a win for the Royal Engineers.

**Metropolitan Challenge Cup**—London Rowing Club.

**London Cup**—Capt. W. H. Darell.

**Metropolitan Champion Cup**—Thames Rowing Club.

**The Wingfield Sculls**—H. T. Blackstaffe (holder) beat A. H. Cloutte by 10 lengths.

**The Professional Punting Championship** was won by the holder, W. Haines.

**Harvard v. Cambridge.**—Great interest was taken in this eight-oared race, which was rowed from Putney to Mortlake on Sept. 8th. Cambridge beat the Challengers by 2 lengths in 19 min. 18 sec. The following are the names and weights of the crews:—

**Cambridge**—A. B. Close-Brooks, Winchester and First Trinity, 11 st. 4 lb.; J. H. F. Benham, Fauconberge and Jesus, 12 st. 1 lb.; H. M. Goldsmith, Sherborne and Jesus (President), 12 st. 2½ lb.; M. Donaldson, Charterhouse and First Trinity, 13 st. 8½ lb.; H. G. Baynes, Leighton Park and First Trinity, 14 st.; R. V. Powell, Eton and Third Trinity, 12 st. 6 lb.; B. C. Johnstone, Eton and Third Trinity, 12 st. 8½ lb.; D. C. N. Stuart, Cheltenham and Trinity Hall (stroke), 11 st.; B. G. A. Scott, St. Paul's and Trinity Hall (cox.), 8 st. 5 lb. H. Shimwell, Shrewsbury and Trinity Hall (reserve). Aggregate weight, 99 st. 2½ lb.; average weight, 12 st. 5½ lb.

**Harvard**—B. M. Tappan, Noble's, 12 st.; S. W. Fish, Groton, 11 st. 11 lb.; P. W. Flint, Worcester, U.S.A., 12 st. 0½ lb.; C. Morgan, Harrow, 12 st. 6½ lb.; J. Richardson, Noble's, 12 st. 13 lb.; R. L. Bacon, Groton, 13 st. 3½ lb. D. A. Newhall, Haverford, 12 st. 13 lb.; O. D. Filley, Rugby (captain), (stroke), 11 st. 12 lb.; M. B. Blagdon (cox.), 7 st. 5 lb. A. A. Glass, L. K. Lunt, and R. M. Faulkner (reserves). Aggregate weight, 99 st. 4 lb.; average weight, 12 st. 5½ lb. Harvard, however, weigh stripped, while Cambridge weigh as they row, which makes the Americans about 2 lb. a man heavier.

### Skating.

**Amateur Figure Skating Championship of Great Britain (N.S.A.)**—H. Torromé.

**European Amateur Championship at Davos**—R. Gundersen, Christiania, 500 mètres, 44½ sec.; 5000 mètres, 9 min. 9½ sec.; 1500 mètres, 2 min. 27½ sec.; 10,000 mètres, C. de Koning, 13 min. 50½ sec.

**The Figure Skating Championship of Europe**—Gentlemen, U. Salchow; Pairs, Mr. and Mrs. Syers.

C. de Koning beat the world's record for one hour's skating, doing 20 miles 207 yards at Davos.

**World's Figure Skating Championship at Munich**—Herr G. Fuchs.

**Speed Skating Championship**—At Helsingfors. 500 mètres, J. Wikander; 5000 mètres, N. Sedoff; 1500 mètres, R. Gundersen; 10,000 mètres, N. Sedoff.

**Symonds Shield**—Klostors, J. L. Alleman.

**Symonds Cup**—Josia Guler.

**Ladies' Bowl**—Mrs. Furze.

**Arosa Meeting: Omnium Race**—V. Abplanalp.

**Grand Prix**—V. Abplanalp.

**Guthrie Cup, Davos**—H. M. Braybrooke.

**Wills Cup, Davos**—Mrs. Furze.

**Freeman Trophy**—Mrs. Stuart Maclaren.

**Ashbourne Cup**—J. A. Bott.

**Bandy**—Davos beat St. Moritz 6 goals to 2.

### Swimming.

The Oxford and Cambridge contests resulted as follows:—

50 Yards—J. G. Scoular, Cambridge, 31 sec.

100 Yards—T. Williams, Cambridge, 1 min. 10½ sec.

440 Yards—T. Williams, Cambridge, 7 min. 2½ sec.

The team race was won by Cambridge.

The Water Polo match was won by Oxford.

**Long Distance Championship**, from Kew to Putney, was won by J. A. Jarvis (Leicester S.C.), H. Taylor second, A. G. Harvey third. Time, 1 hour 3 min. 40 sec., creating a record.

**100 Yards Amateur Championship**—C. M. Daniels (N.Y.A.C.) first, Cecil Healy (N.S.W.) second, J. H. Derbyshire (Manchester Osborne S.C.) third.

**Half-Mile Championship** was won by H. Taylor in 11 min. 2½ sec., P. H. Lister finishing second.

**Water Polo**—England beat Ireland 2 goals to 1 at Leicester.

**One Mile Championship of South of England** was won by A. G. Harvey (holder), 28 min. 41½ sec.

**100 Yards Midland Championship**—W. Kell beat J. Snow (holder) by 1½ sec. Time, 67½ sec.

**Quarter-Mile Midland Championship**—L. Moist, 6 min. 8½ sec.

The King's Cup was won by M. H. Blackmore.

**Long Plunge Championship**—Major W. Taylor (holder), 82 ft. 7 in., beating the record by 3 ft. 4 in.; J. A. Barker second, also broke the record, covering 80 ft.

**Channel Swimming**.—Several unsuccessful attempts to swim the Channel were made during 1906 by Burgess, Mew, Wolfe, and others.

### Tennis.

**Gold Medal and Championship** was won by E. H. Miles (holder), who beat J. Gould by

3 sets to 1. J. Gould won the silver medal by beating V. Pennell (winner 1905) by 3 sets to 1.

**M.C.C. Challenge Prizes**.—Major Cooper Key beat W. M. Cazalet by 3 sets to 0 in the All-Comers', and challenged H. E. Crawley (the holder of the silver medal), beating him by 3 sets to 2. E. H. Miles (the holder of the gold medal) beat Major Cooper Key by 3 sets to 0, and also became holder of the J. B. Gribble Cup.

**The Championship**.—C. Fairs (holder) beat Ferdinand Garcin by 7 sets to 4.

**Oxford** (Hon. C. N. Bruce and H. A. Walker) beat **Cambridge** (L. W. Huntingdon and A. W. Berg) by 3 sets to 1.

In the **Singles Oxford** (C. N. Bruce) beat **Cambridge** (L. W. Huntingdon) by 3 sets to 2.

In other matches, C. Fairs (Champion) beat E. H. Miles (Amateur Champion) by 3 sets to 1.

P. Latham, conceding 15, lost to E. H. Miles 3 sets to 2. F. Covey beat E. Johnson 3 sets to love. E. Johnson beat E. Lambert 3 sets to 1. C. Fairs, giving 15, beat J. Gould 3 sets to love. J. Gould (American Amateur Champion), who received 15 and 1 bisque, beat C. Fairs 3 sets to 1.

### Yachting.

The following were the results of the principal events in 1906:

The **Heligoland Cup**, given by the German Emperor, was won by the 92-ton yawl *Betty*, owned by Mr. J. H. Benn, the schooner *Sunshine* being second, and the yawl *Armgarth* third.

The **Royal London Yacht Club Handicap**, on Aug. 6th, the first race of the Cowes Week, was won by *Clara*, *Meteor* finishing second, and *Adela* third.

The **King's Cup**, on Aug. 7th, was won by Sir M. FitzGerald's yawl *Salanita*, of 300 tons, beating *Kariad* by 10 min. 41 sec.

The **German Emperor's Cup**, on Aug. 8th, was won by *Salanita*, *Creole* finishing second, and *Clara* third.

The **Handicap Match**, on Aug. 10th, for yachts of 100 tons and upwards T.M. was won by *Merrymaid*, with *White Heather* second, and *Kariad* third.

The **Vice-Commodore's Cup**, sailed for at Ryde on August 14th, was won by *Cetonia*, with *Adela* second, and *Sunshine* third.

The race on August 15th for yachts exceeding 50 and not exceeding 100 tons T.M., was won by *Lorna*, *Betty* finishing second.

The **Ryde Town Cup**, on August 16th, was won by *Lorna*, *Kariad* finishing second.

The races on July 18th, from Dover to Ostend, resulted as follows: Handicap for yachts exceeding 100 tons, *Clara* first, *Sunshine* second. Handicap for yachts exceeding 48 tons, but not exceeding 100 tons T.M., *Betty* first, *Rosamund* second.

There was a distinct revival in class racing during the season. The five boat *Maymon* was missed from the 52-footers, and no new boats figured in this class. The following is the record of the season's racing in the 52 foot linear rating class:—

Yacht.	Owner.	Designer.	Starts.	Firsts.	Seconds.	Total Number of Prizes.
<i>Britomart</i>	Mr. W. P. Burton	Mylne	44	20	12	32
<i>Moyana</i>	Mr. J. W. Leuchars	Mylne	43	16	18	34
<i>Sonya</i>	Mrs. G. Turner Farley	Herreshoff	34	8	10	18

The following is the complete record of the season's racing in the "unlimited" class:—

Yacht.	Owner.	Designer.	Starts.	Firsts.	Seconds.	Thirds.	Total Number of Prizes.
<i>Nyria</i> . . .	Mr. Robert Young .	Nicholson	29	16	4	—	20
<i>White Heather</i> .	Mr. M. B. Kennedy	Fife . . .	30	11	7	—	18
<i>Karad</i> . . .	Sir Jas. Pender, Bt.	Watson	21	1	4	1	6
<i>Navahoe</i> . . .	Mr. G. Watjen .	Herreshoff	4	—	—	1	1

The record of the south coast one-design class season of 1906 was:—

Yacht.	Owner.	Firsts.	Seconds.	Thirds.	Flags.	Starts
<i>Caprice</i> . . .	Col. Balfour and Capt. Sloane Stanley . . . . .	3	9	10	22	47
<i>L'Amoureuse</i> .	Capt. R. Charteris . . . . .	17	16	6	39	49
<i>Harmony</i> . . .	Lord Aibemarle and Lord Brassey	—	2	3	5	5
<i>Gracie</i> . . .	Mr Almeric Paget . . . . .	3	13	8	24	42
<i>Jean</i> . . .	Mr. John Gretton . . . . .	9	4	7	20	46
<i>Eilun</i> . . .	Major Hon. A. Greville and Mr. B. FitzGerald . . . . .	15	6	5	26	46

**Stanford, Sir Charles Villiers, M.A., Mus.D., D.C.L.**, was b. at Dublin 1852, and ed. privately and at Queen's College and Trinity College, Cambridge, Leipzig and Berlin. He was organist of Trinity College and conductor of Cambridge University Musical Society '72-93, conductor of the Bach Choir '85-1902, conducted the Leeds Festivals 1901 and 1904, and is Professor of Music at Cambridge University and of Composition and Orchestral Playing in the Royal College of Music. He was elected a member of the Royal Academy of Arts of Berlin in 1904, and of the Society for Musical Art in Amsterdam in 1906. Is a corresponding member of the Société des Compositeurs de Musique, Paris. His works have been produced at the Provincial Festivals, in London, and abroad. His operas are "The Veiled Prophet," "Much Ado about Nothing," "Savonarola," "The Canterbury Pilgrims," and "Shamus O'Brien"; and among his other notable compositions are two oratorios, a Requiem, a Te Deum, several cantatas (amongst them "The Revenge" and "Last Post"), symphonies, chamber music, and songs. Address: 50, Holland Street, Kensington, W.

**State Children's Association** (with which is incorporated the Boarding-out Association). Object, to obtain individual treatment for children under the guardianship of the State and the dissolution of large aggregated schools, so that the children may be brought up, where possible, in families; and to obtain for the State further powers of control over neglected children. **Chairman**, the Right Hon. the Earl of Crewe; **Hon. Sec.**, Mrs. S. A. Barnett; **General Secretary**, F. P. Philp; **Office**, 58, Old Broad Street, E.C.

**Stationery Office Publications.** His Majesty's Stationery Office is in Princes St., Westminster. **Controller**, Mr. R. Bailey, M.V.O., I.S.O. (£1500); **Assistant Controller**, Mr. W. G. Newton (£750). The vast number of papers issued to the public under the superintendence of the Stationery Office, and of which the copyright is vested in the Controller, renders it impossible to enter much into detail; but they

comprise books affecting the military, naval, and civil services, reports of the scientific results of the voyage of H.M.S. *Challenger*, calendars of State Papers, chronicles and memorials, and publications of the Record Commissioners, rules under the various Acts of Parliament, papers issued by, or affecting, the Board of Trade (including the *Labour Gazette*), the Board of Education, and the Local Government Board, Explosive and Factory Books and Forms, Customs Forms, and numerous miscellaneous books. The *Board of Trade Journal* (weekly) contains useful information for merchants and others, and the *Kew Bulletin* (monthly) contains valuable notes on Economic Produce and Plants. The official sale agents, who also supply all Parliamentary publications, including Acts of Parliament and the Reports of the Historical Manuscripts Commission, are Messrs. Wyman & Sons, Fetter Lane, London, E.C.; Messrs. Oliver & Boyd, Tweeddale Court, Edinburgh; and Mr. E. Ponsonby, 116, Grafton Street, Dublin. Free Public Libraries are supplied by these agents at a discount of 25 per cent. from published prices. The *Journal of the Board of Agriculture* is sold by Messrs. Laughton & Co., of 3, Wellington Street, Strand, W.C. The Admiralty Charts and other Hydrographic Publications are obtainable from Mr. J. D. Potter (agent for the sale of the Admiralty Charts), 145, Minories, E. Patent Specifications, the *Illustrated Journal of Patents* and the *Trade Marks Journal* are only to be obtained at the Patent Sale Office, Cursitor Street, Chancery Lane, London, E.C.

## STOCK EXCHANGE, LONDON.

The London Stock Exchange was established in Capel Court in 1801, and has since been enlarged and extended until it reaches as far as Broad Street, and occupies nearly the whole of one side of Throgmorton Street. The interior is not divided in any way, but the dealers in the different classes of stocks are found grouped in their own particular place on the floor of the House, "House" being the colloquial name for the Stock Exchange

itself. The building belongs to proprietors, under a deed of settlement, and is managed by 9 elected trustees and managers. The capital is now £240,000 in 20,000 shares of £12 each, unlimited, but no call may exceed £2 in one year. Holders must be members of the Stock Exchange, and no person can hold more than 200 shares. The dividends for the past three years have been at the rate of £9 per share. There is also an issue of 4-per-cent. debentures amounting to £450,000.

The members of the Stock Exchange are quite distinct from the proprietors, and are governed by the "Committee for General Purposes," consisting of a chairman, deputy-chairman and 28 members, who make rules guiding the conduct of business and of the members themselves, and decide what stocks and shares shall be recognised and officially quoted. To become a member the applicant must be of British birth, or, if a foreigner, he must have been naturalised for at least 2 years and have resided in this country for 7 years. He has to be recommended by three members of standing, who will become surety for him to the extent of £500 each for 4 years after his election, the entrance fee being 500 guineas. Gentlemen who have served as "clerks in the House" for 4 years are admitted on a reduced fee of 250 guineas, and require only two sureties for £300 each. Members elected since Nov. 23rd, 1904, have to become proprietors by acquiring one share if admitted with two sureties, or three shares if admitted with three sureties. A member employing a clerk in the House "authorised to deal" has to pay for him an entrance fee of 50 guineas, and for an "unauthorised" clerk 10 guineas. The annual subscription for members (except those admitted before '99) is 40 guineas, for authorised clerks 30 guineas, and for non-authorised 12 guineas. Members have to go through the form of re-election every year, in March, without further fee beyond the annual subscription, which is due and payable in April. At the present time the number of members is about 5379, and of clerks 2199, the numbers always varying. The whole of the money paid for entrance fees and subscriptions goes to the proprietors, who maintain the building in proper condition. The "Trustees and Managers" and the "Committee for General Purposes" are two distinct and separate bodies, one being, in fact, the landlords of the building, and the others the tenants.

All bargains are settled according to the Rules and Regulations, which are very voluminous, and all transactions must be closed bi-monthly, either by the delivery of the stock bought or sold, or by "carrying-over"—that is, the postponement of the delivery until the next settling day. Bargains in Consols "for money" are settled the same day, but 'for the account' monthly. All stock or shares bought must be paid for on the settling day, and in the case of no stock passing, any "difference" must be paid (on either side) on that day. In the case of a sale or purchase of registered stock 10 days are allowed for the preparation and execution of the necessary transfer deeds. There is no fixed official scale of brokerage, but custom has created one—viz.,  $\frac{1}{8}$  per cent. on home or foreign Government stocks,  $\frac{1}{2}$  per cent. on Indian, Colonial, and American dollar stocks, and in the case of English railway registered stock  $\frac{1}{2}$  per cent. on the proceeds:

on shares not exceeding £2 10s., 6d. per share; not exceeding £7 10s., 1s.; £10, 1s. 3d.; £15, 1s. 6d.; £20, 2s.; £25, 2s. 6d.; and exceeding £25,  $\frac{1}{2}$  per cent. on the money.

Secretary of Committee for General Purposes, Edward Satterthwaite; Office, New Court, Throgmorton Street, E.C.

Consult "The Stock Exchange," by G. D. Ingall and G. Withers (Arnold, 5s. net).

## STOCK EXCHANGE MOVEMENTS IN 1906.

Throughout the year there was a general complaint in the Stock Exchange that business was very dull. This applied chiefly, however, to speculative business, to the dealings in South African mine shares, and to the lower class of stocks; for there would appear to have been the ordinary volume of investments, and for industrial shares of the better sort there was usually a good demand. A great outcry was raised about the shrinkage in Consols, but it really did not amount to much, considering the generally unsettled state of things and the high price of money during the greater part of the year. The most serious depreciation was in Home railway stocks, in spite of the improving trade of the country, the increase in railway traffics, and for the first half of the year the improved dividends.

In the early part of the year the General Election was a disturbing element, and following upon this there was the Conference at Algeciras upon Moroccan affairs. The disturbances in Russia at one time brought about something like a panic in the Paris Bourse, which, however, did not last long. The terrible earthquake and fire in San Francisco was another trouble, because of the enormous liabilities of the British insurance companies; but this again was got over, although no doubt the companies had to dispose of large blocks of the securities they held in order to meet their engagements. The main source of disturbance was the shortness of money, which began to show itself as early as April, and became acute as time went on, until the Bank of England was compelled to take the unusual course of raising the Bank rate from 5 per cent., at which it had been fixed eight days before, to 6 per cent. on Friday, Oct. 19th. The South African market was the most depressed and unsettled. The output of gold from the Transvaal steadily increased month by month, but this did not serve to stay the dry rot in Kaffir mine shares, which continued to shrink in value with very few intervals of recovery; and indeed the complaints of the dullness of trade mainly came from this market, which for several years past had occupied the most prominent position in the Stock Exchange. This, however, and the depreciation in home railway stocks and the violent fluctuation in American shares, tended to make the record of 1906 an unsatisfactory one.

The changes in the Bank rate during the year were as follows:—At the beginning of the year it stood at 4 per cent., at which it had been fixed in 1905; and on April 5th it was reduced to  $\frac{3}{4}$  per cent., raised to 4 per cent. on May 3rd, reduced to  $\frac{3}{4}$  per cent. on June 21st, raised to 4 per cent. on Sept. 30th, to 5 per cent. on Oct. 11th, and to 6 per cent. on Oct. 19th, one day after the usual meeting of the Bank Directors, this special change being made to check the withdrawals of gold for New York, unusually large sums having already been taken for Egypt,

reducing the Bank's stock of coin and bullion to £29,175,010, the reserve being then down to £18,861,060, the ratio of reserve being 37½ per cent., this being the lowest figure since the beginning of the year, the ratio on Jan. 3rd being 29½ per cent., the amount of reserve being then £17,849,043, the lowest of the year, the amount on Nov. 7th being £19,076,395, the highest being on March 21st, when it stood at £28,988,588, the ratio being 50½ per cent. The largest amount of coin and bullion in the Bank was on March 21st, when it stood at £38,630,343, and the smallest on Oct. 24th, when it was only £28,429,264. The circulation reached the highest point on Aug. 1st, viz. £30,577,825, and the lowest on Feb. 21st, viz. £27,908,280. On Feb. 28th the deposits totalled £63,548,637, and on Oct. 24th they were no more than £49,681,831. The price of silver steadily appreciated throughout the year, being 29½d. in January and 33½d. in November.

Consols were an uneasy market during the whole of the year, but there were no very violent fluctuations, the tendency generally being downward. The highest price, 91, was touched on the satisfactory ending of the Algeiras Conference in April, and the lowest in October, on the advance of the Bank rate to 6 per cent. Other Government stocks followed the lead of Consols, but with the exception of India sterling stocks the movements were moderate; India threes, however, which were as high as 97½ in the early part of the year, dropped to 90½ in October, while rupee paper kept steady throughout. Colonials dropped when it was thought that heavy sales would be made by the insurance offices to meet their San Francisco losses, but later on there was a recovery which about restored the balance; but, as a matter of fact, Colonial issues were not in fashion amongst investors. At one time, in August, there was a little flutter in the Australian group, when the Commonwealth Minister spoke of a possible conversion of all the Australian loans into a Commonwealth stock, but nothing has been done towards carrying out this object.

### Foreign Loans.

Russian stocks, opening well, were well supported until about the end of May, when the price began to fall, until on July 23rd the quotation for the 4-per-cents. was little better than 69. From this, however, there was a steady recovery, but the quotation of the first of the year was never recovered. Other European stocks moved but slightly, and usually downwards. The feature of the year as regards Russian stocks was the issue at the end of April of a new 5-per cent. loan for £13,000,000 at 89, which at one time was quoted as low as 12 discount. Argentine bonds kept steady, and the Government paid off the Funding loan in January. Peruvian bonds were very active at first on the idea that the Government were about to settle up the arrears, and then they went flat when it was found that the Corporation had been passed over in the arrangements for the issue of a new loan; so that, after all, the latest prices were very little above the worst. Chinese loans went flat on the publication of an edict which seemed to suggest the transfer of the Maritime Customs to native control; nor was there much of a recovery when this was denied; but the silver loan improved with

the rise in the price of silver. Japanese loans generally depreciated, in spite of assurances that the trade of the country was excellent and the credit of the Government strong. Brazilians gave way on the suggested Government control of the coffee output, while Chileans were depressed on the proposal of the Government to spend more money on naval armaments.

### American Rails.

The record of the American market is summed up in a few words—excellent trade, good harvest, and a shortness of money; and between these opposing factors operators in these stocks had an exciting time. The year opened with a money squeeze, followed by a smart rise in Atchison, Unions, Denvers, Readings, and New York Central. In February there occurred a sharp all-round break; and in April, through a strike in the coal districts, prices again gave way, but quickly rallied. In May, on a statement that the Banks would restrict their loans on stocks, there was something near a panic, Milwaukee dropping nearly 9 points, Unions 7, Readings 6, Louisville 5, and Ontario and New York Central 4; but before a week was over the market had rallied once more. In August the markets got very wild on dividend expectations, and Unions rose to 203 and Milwaukee to 204½; but the dividends were not quite so good as had been hoped, and consequently prices fell back a little. Afterwards the money trouble got more acute, and prices fluctuated pretty sharply. United States Steel Shares were very active all the year, and hopes were entertained that the dividend would be increased; but as this did not occur, and money was dear, the price slipped back somewhat, though all the time both the ordinary and the preferred were well supported. The movements in the chief stocks will be found in the tabular statement herewith.

### Home Rails.

The dividend declarations for the second half of 1906, although good, and in many cases better than in the previous year, failed to excite any sort of interest, and by the beginning of May prices had all given way—in fact the market was dull and drooping throughout the greater part of the year. In the autumn the market appeared to be disturbed by the fear of labour troubles in connection with the railway employees themselves, and in October occurred a strike amongst the ship yards on the Clyde which upset the Scotch roads.

In May there occurred a smart fall in Metropolitan and in Districts, the traffics under the new electric traction being very disappointing; and when the District directors proposed to raise the fares in order to bring about a balance between income and expenditure, a violent protest was made.

On the whole the year 1906 was a most unsatisfactory one as regards English railways. The only new issue of importance was £2,000,000 3½-per-cent. stock, brought out and guaranteed by the Great Central and Midland railways. The lowest quotations occurred towards the end of October, this being brought about by the tension in the money market, and afterwards there was a small rally; but the depreciations were serious and general since the beginning of the year, the largest falls being in Metropolitan, Districts, and Caledonian deferred.

## Government and Colonial Stocks.

**Canadian and Foreign Rails.**

All things Canadian were very much in evidence during the year, and prices advanced smartly, Canadian Pacifics reaching 189½ in September. But there were many ups and downs, the movements in a great measure responding to those of American securities, and they were also affected by the issues of new stock at prices which gave a good bonus to the proprietors, \$20,000,000 ordinary stock being offered to them at par in March. The dividends were rather disappointing, seeing that the reported earnings were so large. The great features of the Canadian Pacific were the enormous increase in the takings and the increased land sales, the quantity sold and the prices obtained being largely in excess of any previous year; while the net earnings for the year from traffics were set out at \$4,988,500, against \$3,095,000 in the previous year. Grand Trunks were very well supported, but quotations did not alter much during the year. The full dividend was paid on the second preference for each half-year.

Argentine rails did not quite maintain the promise of the early part of the year, and prices generally dropped away, although not to any serious extent. Mexicans were well

supported, a very agreeable surprise being given by the announcement of a full dividend on the first preference stock, and at the rate of 3½ per cent. on the second preference. Nitrate rails improved to nearly 16½ on the better outlook of the nitrate industry. There was a considerable rise in Antofagasta stock, and Havana rails were disturbed by the outbreak of the revolution; but the advances of the early part of the year were not lost.

**New Issues.**

The new issues amounted to £112,500,000, comparing with £155,500,000 offered during the same period in 1905. The amount was made up of £6,250,000 of Government stock, £6,250,000 offered by Colonial Governments, £21,000,000 by foreign Governments, £4,700,000 by British, Colonial, and foreign municipalities, £7,250,000 by British railway companies, £19,000,000 by Colonial and Foreign railway companies, £12,000,000 by mining companies, and £36,500,000 by trading companies. Among the principal Government issues was one for £2,000,000 India 3 per cent. in May, tenders for which to the amount of £4,369,000 were received, the average at which the loan was allotted being £94 16s. 3d. In foreign loans Uruguay placed £2,911,169 5 per cents. in February, Chile

£3,700,000 4<sup>1</sup>/<sub>2</sub> per cents. in March; Brazil, £1,100,000 5 per cents. in April, at 96; and the city of Tokio, £1,500,000 5 per cents. at par in July. Amongst Colonial issues, New South Wales in February brought out a 3<sup>1</sup>/<sub>2</sub> per-cent. loan for £2,000,000 at 99<sup>1</sup>/<sub>2</sub>; Hong-Kong, £1,100,000 3<sup>1</sup>/<sub>2</sub> per cent. by tender in February; and the province of Quebec, £1,200,000 3<sup>1</sup>/<sub>2</sub> per cent. in March. In April the Corporation of London issued £1,200,000 3 per cent. at 93, which was tendered for five times over, and allotted at an average of £3 2s. 8d., the rate for a similar issue in the previous October being £3 19s. 4d.; and in May the Belfast Corporation placed £1,000,000 3<sup>1</sup>/<sub>2</sub> per cents. at 98; while in July the London County Council offered bills for £923,000 by tender. Amongst the railway issues the Canadian Pacific placed \$40,000,000 preference stock at par in February, and in March issued to existing shareholders \$20,280,000 ordinary stock at par; while the Grand Trunk of Canada issued £1,000,000 4-per-cent. guaranteed stock at par in March. The industrial issues were not of much significance, one special feature being the introduction of a great many Rubber Estate companies with moderate capitals.

## Mines.

One feature in the market for mine shares was the extreme depression in South Africans, which were first of all lower in price after the

general election, and though there was an occasional rally, the fall amounted to between 25 and 50 per cent., the Exploration and Land Shares suffering the most severely. The output of gold steadily increased month by month, but this did not prevent a serious depreciation in values, East Rand proprietary falling from 7<sup>1</sup>/<sub>8</sub> in January to 3<sup>1</sup>/<sub>2</sub> in July, Modderfontein from 8<sup>1</sup>/<sub>2</sub> to 4<sup>3</sup>/<sub>8</sub>, and Ross Deep from 5<sup>1</sup>/<sub>2</sub> to 3—these, however, being extreme fluctuations. Exploration shares suffered more severely, Consolidated falling from 6<sup>3</sup>/<sub>8</sub> to 3, East Rand Mining Estates from 3<sup>1</sup>/<sub>8</sub> to 1<sup>1</sup>/<sub>8</sub>, and Oceana from 1<sup>3</sup>/<sub>8</sub> to 15s. Rhodesian shares suffered with the rest, although here there were occasional periods of inflation, Rhodesian Bankets being at one time as good as 3<sup>1</sup>/<sub>8</sub>, but falling back to 2<sup>1</sup>/<sub>8</sub>, while Tanganyika fluctuated between 8<sup>1</sup>/<sub>4</sub> and 3<sup>1</sup>/<sub>4</sub>; others moved in similar fashion, but all were considerably lower at the end of the year than at the beginning.

Westralians were fairly active and maintained their prices pretty well, Kalgurli being a special feature, rising to 12<sup>5</sup>/<sub>8</sub> in October after being 8<sup>3</sup>/<sub>4</sub> in March; but beyond this this market presented no feature of great interest. The Deep leads of Victoria group attracted a good deal of attention, and prices went up in the expectation that results would prove the truth of the assertions made of the wealth in the beds of these ancient rivers; but up to the end of November the proprietors were still waiting.

Copper shares were very much in fashion on the great rise in the price of the metal, Tintos reaching 76½; Tin shares also being largely dealt in at considerably higher prices. Several Siberian mining ventures were put on the market, but the public took little interest in them. Diamond shares came in for a good deal of notice, Premiers rising from 8 to 19½, falling back however to 12; but the greatest excitement was over Vaal River diamonds, which in October fluctuated wildly between 3 and 12; and under cover of this several other unknown mines were brought out, but without marked success. The Broken Hill group of mines, sometimes called the Barrier range mines, were very active, and advanced in price. Indian mines were depressed, Champion Reef especially, these falling from 30s. to 13s.

### Industrial Shares.

In industrial shares Iron and steel shares were a strong feature; Nitrates also appreciated very considerably. Omnibus shares gave way on the competition of the new motor bus companies, the recovery being slight. Brewery shares generally were weak. In April there was a smart rise in Allsopps on a report that the company was arranging an amalgamation with two other companies, but the report was promptly denied. Land shares were in request in the early part of the year, but the great rise was in Hudson's Bays, which finally reached 120. A special feature of the year was the flotation of Indiarubber companies, in which a considerable business was done entirely upon estimates of what the profits might be. Insurance shares were much affected by the earthquake and fire in San Francisco, but the losses did not turn out so extensive as expected, consequently there was some recovery.

**Stolypin, Peter Arkazhevich**, Russian Prime Minister. B. 1863, the son of a popular general, he had a brilliant career at the University of St. Petersburg, and, after graduating in '84, obtained an appointment at the Ministry of the Interior. After two years he was transferred to the Ministry of Agriculture, where he remained another two years, then retiring for a time into private life, and devoting himself to the management of his estate in Kovno Government. He served as Marshal of the District Nobility, President of the Arbitration Board and Justice of the Peace, and in '99 became Marshal of the Provincial Nobility. He was appointed Vice-Governor of Grodno in 1902, Governor of Saratoff in 1903, and from Saratoff he was called to St. Petersburg to take up the portfolio of the Interior. He was one of the few Ministers to whom the Duma was ready to listen. When M. Goremykin resigned in 1906, M. Stolypin succeeded him as Premier. His integrity and equity are recognised on all hands.

**Strauss, Richard**, musical composer, was b. June 11th, 1864, at Munich, where his early studies began, his father being first horn player in the orchestra of the Court Opera-house. Appointed conductor at Meiningen in '85, from '89 to '94 he was Hofkapellmeister (with Eduard Lassen) at Weimar, and later conductor at the Munich Opera-house. He has written many charming songs, but his distinctiveness as a modern composer is chiefly due to extraordinarily elaborate instrumental works. A

Richard Strauss festival was held at St. James's Hall in June 1903, when "Ein Heldenleben," "Also sprach Zarathustra," and other symphonic poems from his pen were performed. His "Domestic Symphony" was performed several times at Queen's Hall in 1905, and the choral ballad "Tillefer" was sung at the Bristol festival (1905) for the first time in England.

**Sudermann, Herman**, German dramatist and novelist, was b. at Maziksen, in East Prussia, Sept. 30th, 1857; studied in the universities of Königsberg and Berlin, and became a teacher and journalist. Success and fame came to him in '88 with his drama "Ehre" (Honour). He then published a series of tales, of which "Frau Sorge," "Der Katzensteg," and "Es war" are the most impressive. The drama "Sodom's Ende," was produced in '90, and was followed by "Die Heimat," which, translated as "Magda," has been represented by Duse, Sarah Bernhardt, and Mrs. Patrick Campbell. His later works include "Das Glück im Winkel," "Reiherfedern," "Morituri," "Johannes," and "Das Johannisfeuer." An English version of his "Sodom's Ende" was produced in London in May 1902, and his comedy "Der Sturmgesselle Sokrates" was presented at the Royalty on Oct. 31st, 1903. In Oct. 1903 "Das Blumerboot" was produced in Berlin.

**Sugar.** The total production of cane and beet sugar is given as follows by the U.S. Bureau of Statistics at Washington:—

	Cane Sugar.	Beet Sugar.	Total.
	Tons.	Tons.	Tons.
1901-2	6,087,218	6,913,604	13,000,822
1902-3	6,055,725	5,763,416	11,819,141
1903-4	6,086,149	6,096,178	12,182,327
1904-5	6,754,328	4,926,456	11,680,784
1905-6	6,692,133	7,265,136	13,957,269

The great cane-sugar-producing countries are British India, Cuba, and Java. The chief beet-sugar-producing countries are Germany, Austria-Hungary, France, and Russia.

**Sunday League, National**, established 1855, has for its objects the opening of museums, art galleries, and libraries on Sunday afternoons, and generally aims at promoting intellectual and elevating recreation on that day. The founder of the League was Mr. R. M. Morrell. President, Alderman Sir W. P. Treloar, J.P.; Secretary, Henry Mills. Offices, 34, Red Lion Square, High Holborn, London, W.C.

**Sunday Society.** Established to maintain the opening of Museums, etc., on Sundays. Hon. Sec., Mark H. Judge, A.R.I.B.A., 7, Pall Mall, S.W.

**Surveyors' Institution, The**, incorporated by royal charter to secure the advancement and facilitate the acquisition of that knowledge which constitutes the profession of a surveyor. The Institution has nearly 4000 members, and consists of fellows (F.S.I. or Chartered Surveyor), professional associates (P.A.S.I. or Professional Associated Chartered Surveyor), associates, honorary members, and Colonial fellows, with a class of students attached. The annual subscriptions are: Students, £1 1s.; associates and professional associates, £2 2s.; and fellows, £3 3s. An entrance fee of £3 3s. is paid by both classes of associates, and one of £5 5s. by fellows. President, Mr. George Langridge; Secretary, Mr. Alexander Goddard. Offices, 12, Great George Street, Westminster.

## SWEDEN.

*Ruler.*

Oscar II., King of Sweden (and until 1905 of Norway also), was b. Jan. 21st, 1829. He is a grandson of Napoleon I.'s famous general, Marshal Bernadotte, who became King of Sweden in '18. King Oscar II. ascended the throne in '72, in succession to his brother Charles XV. He is an excellent scholar and writer, and has translated Goethe's "Faust" into Swedish. Issued in '88 a volume of minor poems under his *nom de plume* of "Oscar Frederik." He married, in '57, the Princess Sophia of Nassau, b. July 9th, '36, by whom he has issue four sons. He was appointed an Hon. Admiral of the British Fleet in June 1905. The Crown Prince is Prince Gustavus, K.G., b. June 16th, '58, and married in '81 to Princess Victoria of Baden. His eldest son, Prince Gustavus Adolphus, G.C.B., G.C.V.O., married in June 1905, H.R.H. Princess Margaret of Connaught, and a son was born to them April 22nd, 1906.

*Government, Army, and Navy.*

Under the Swedish Constitution of 1809, with subsequent amendments, the executive power is lodged in the king, who also possesses legislative power in matters of political administration; in all other respects such power is exercised jointly by the Diet, which alone may impose taxes. Every new law must have the assent of the king. The Diet consists of two Chambers, the First of 150 members (elected by provinces and municipalities for nine years), the Second of 230 members (150 representing rural and 80 urban constituencies), elected directly on a small property qualification for three years. Members of the Second Chamber are paid £66 per session.

The Swedish army underwent a reorganisation in 1901, which is progressive and is intended to have its full effect in 1914. General personal service has been adopted, with short periods with the colours: one year for service in the cavalry and artillery, and eight months for the infantry. The army will be substantially increased in strength. The 24 existing infantry regiments are to have a third battalion each, and 3 fortress regiments of similar strength are to be raised. Some of the new formations have already been brought into existence. On a peace footing there are 2606 officers, 1797 non-commissioned officers, 6947 corporals and others, 557 cadets, 7792 volunteers, and 22,332 men, being a total of 42,081; but when the recruits are under training the effective probably numbers 45,000. The artillery are to receive Krupp quick-firing guns. There are 4 corps of engineers. Steps are also to be taken to increase the body of reserve officers. One great object in the recent changes is to give a more homogeneous character to the forces. The plans for mobilisation of the reserves have been improved, and a Landsturm is being organised. The first-line troops on a war footing would probably number 205,000, the second line 75,000, and the Landsturm 20,000. Nominally, however, the war strength has been given as 424,000 and 493,000, but this estimate includes a large number of untrained men.

The total of the Naval Budget for 1906 was £1,164,333, showing an increase of £44,000 over those for 1905. The sum voted for new construction is £254,850, including sums for the

completion of the battleship *Oskar II.* and the construction of a torpedo flotilla. The Swedish Navy in 1905 numbered about 7500 of all ranks. In addition there are about 20,000 yearly conscripts available, but the majority of these are seldom called upon. **Minister of Marine,** Adolf Palander. The officers are divided as follows: 1 vice-admiral, 4 rear-admirals, 6 commodores, 24 captains, 64 commanders, 55 lieutenants, 30 sub-lieutenants. The strength of ships built and building on Nov. 1st was:—

	Built.	Building.
Coast defence vessels . . .	11	1
Armoured cruiser . . .	—	1
Torpedo vessels . . .	5	—
Torpedo-boat destroyers . .	1	1
Torpedo boats . . .	18	—
Submarine . . .	1	—

The principal dockyards in Sweden are situated as follows:—**Karlskrona:** three dry docks, take any Swedish ship; three smaller. **Stockholm:** one dock takes cruisers. In connection with the contemplated increase of the Navy a special commission has been appointed to consider the best type of ship to be adopted. In the instructions to the commission it is stated that the altered conditions of the naval defence of the country are to be taken into consideration.

*Industries, Statistics, and Diplomatie.*

Local affairs are administered through prefects nominated by the King and representative bodies elected in the 24 governments, and the communes or municipalities, into which the country is divided and subdivided. The larger towns, Stockholm, Göteborg, Malmö, Norrköping, and Gefle, have separate municipal councils. The State religion is Lutheran; all others, except the Jesuits, are tolerated. Elementary education is compulsory, free, and well organised. In 1903 there were 12,627 elementary schools and about 753,000 pupils. The principal paper is the *Svenska Dagbladet*. The chief exports are timber. The iron mines are very important and are making much progress; while there are large timber and woodwork industries, butter, metals, minerals, etc. The forest area is about 80,000 sq. miles. There are 7707 miles of railway, of which 2612 belong to the State.

**Area,** 172,876 sq. m.; estimated pop., 1904, 5,260,811. The capital, Stockholm, has a pop. of 311,043. **Revenue and expenditure,** 1903-4, £9,047,500; 1904-5, £9,892,770; estimated revenue 1905-6, £10,722,636; expenditure, £10,442,045; debt, 1905, £21,212,440. **Imports,** 1902, £28,066,500; 1903, £29,716,160; **exports,** 1902, £21,798,500; 1903, £24,525,000.

**Ministry:** *Premier,* M. Lindman.—*Foreign Affairs,* M. E. B. de Trolle.—*War,* Colonel L. H. Tingsten.—*Justice,* M. Albert Petersson.—*Marine,* Admiral Dyrssen.—*Interior,* M. Juhlin.—*Finance,* M. J. E. Biesért.—*Public Worship,* M. Hammarskjöld.—*Agriculture,* M. Alfred Petersson.—*Without portfolio,* M. Roos and M. Hedersteerna.

**Minister in London,** Count H. Wrangel, 17, Stratford Place, W. **Consul-General,** D. Danielsson, 24, Great Winchester Street, E.C.

**British Minister at Stockholm,** Sir Rennell Rodd, G.C.V.O., K.C.M.G., C.B. **Secretary of Legation,** H. G. Dering.

**British Consuls,** H. M. Villiers (Stockholm); J. Duff (Gottenburg).

**History, 1906.**

In opening Parliament the King announced that bills would be presented for extending the franchise in regard to Second Chamber elections, for reorganising the diplomatic and consular services, and for remodelling the country's defences in consequence of the dissolution of the union with Norway. The Budget Statement (Jan. 15th) showed revenue and expenditure balancing at £10,754,611. The Franchise Reform Bill was introduced (Feb. 25th), and was found to provide for practically universal suffrage. It conferred the franchise on every male citizen of 24, except bankrupts, those under legal disabilities, those receiving relief from the rates, those who had failed during the three preceding years to pay rates and taxes, or to fulfil their military obligations. It provided that of the 230 members of the Second Chamber 165 should be elected by the country districts and 65 by the towns, so long as the town population should not exceed  $\frac{1}{10}$ ths of the total population, one member being returned for each electoral district. Each member must obtain an absolute majority of the registered votes, failing which a second ballot must take place. The First Chamber rejected the Bill (May 14th), adopting instead an amendment in favour of proportional election. The Second Chamber, however, passed the Bill by 134 votes to 94 (15th). The Ministry, therefore, advised a dissolution, and on the King's inability to sanction their proposal, resigned (25th). M. Lindman, a Conservative member of the First Chamber, thereupon formed a new Administration (20th), the King requiring it to lay before the Riksdag next Session a new bill on the principle of universal suffrage, and proportional elections applicable to both Chambers.

**Swinburne, Algernon Charles**, son of Admiral Swinburne, was b. in London 1837. Ed. at Balliol College, Oxford ('57). Visited Florence, and passed some time there. His first productions were two plays, "Queen Mother" and "Rosamond" ('61). These were followed by two tragedies, "Atalanta in Calydon" and "Chastelard," and "Poems and Ballads," which met with severe criticism. His later works are "A Song of Italy," "William Blake, a critical essay," "Songs before Sunrise" ('71), in which he glorifies Pantheism and Republicanism; "Studies in Song" ('81); "A Century of Rondels" ('83); "Life of Victor Hugo" ('86); a poem on "The Armada" ('88); "A Study of Ben Jonson" ('90); "Astrophel, and other Poems," "Studies in Prose and Poetry" ('94), "The Tale of Balen" ('96), "Rosamund, Queen of the Lombards" ('99), "A Channel Passage, and other Poems" (1904) and "Love's Cross-Currents" (1905).

**SWITZERLAND.**

Switzerland is a Confederation of nineteen entire and six half cantons, which have been united for Federal purposes since 1848. The constitution of '74 vests supreme legislative and executive authority in two chambers—viz. (1) a State Council of 44 members, chosen two for each canton and one for each half-canton for three years; and (2) a National Council of 167 delegates of the Swiss people (of whom 29 are sent by Berne and 22 by Zurich), chosen also for three years, directly by manhood suffrage, one deputy for every 20,000 of the population.

The united chambers form the Federal Assembly, to which is confided the supreme government. The executive authority is deputed to a Federal Council of seven members, elected for three years by the Assembly, the president and vice-president of which are elected annually, and are the first magistrates of the republic. The Council sits at Berne, which is the headquarters of the Federal administration.

The principles of the Referendum and of the Initiative are in force. The latter signifies the right of any 50,000 citizens to demand a direct popular vote on any constitutional question. The Federal Government can alone contract treaties or declare war. The army, postal system, finance and customs, are also under its control. Civil and criminal law, justice, police, public works, and schools are all left under the jurisdiction of the cantonal authorities, while labour legislation may be initiated either by the Confederation or by the cantons. The neutrality of the country is guaranteed by the Treaty of Vienna, 1815, as indispensable to the general interest of Europe. The Swiss agree to this, but yet claim the right to make alliances, and even to declare war.

The Federal forces do not constitute a standing army, the principle being that of a militia, and the liability to serve twelve years in the Elite, twelve in the Landwehr, and six in the Landsturm. During the twelve years in the Elite (ten for the cavalry) the aggregate service is 141 days in the Infantry, 146 in the Engineers, 160 in the Cavalry, and 163 in the Artillery.

The total military strength consists of:—Elite (20 to 32 years of age): 96 battalions of Infantry, 8 battalions of Rifles, 24 squadrons of Dragoons, 48 field batteries of 6 guns, 2 mountain batteries, 10 position batteries, and 12 companies of Light Horse. Landwehr (32 to 44 years of age): 96 battalions of Infantry, 8 battalions of Rifles, 24 squadrons of Dragoons, 8 field batteries, and 15 position batteries. An aggregate total, in round numbers, of 200,000 men, of whom 130,000 are in the first 12 classes of the "Elite," formed into 4 army corps. In addition, the Landsturm can furnish fully 300,000, giving an armed strength of 500,000, maintained at a cost of about £1,000,000 a year for a total population of 3,500,000.

Complete liberty of conscience prevails, but Jesuits are interdicted. About 59 per cent. of the population are Protestants and 40 per cent. Roman Catholics. Education is free and compulsory, and admirably organised from the primary schools to the universities. The chief occupation is agriculture, carried on by nearly 300,000 peasant proprietors, though there is much manufacturing industry. The principal exports are textiles, silk goods, clocks and watches, and food produce. There are about 289 miles of railway open, most of which has been nationalised. Great Britain enjoys most-favoured-nation treatment for her commerce.

As to Simplon Tunnel and other similar works see ENGINEERING.

**Area**, 15,976 sq. m.; **pop.** (1904) 3,425,383. There are 18 German-, 5 French-, 1 Roumansch-, and 1 Italian-speaking cantons. The chief towns are Zurich (pop. 175,000), Basle (125,000), Geneva (113,000), and Berne (70,000). **Federal revenue**, 1904, £4,614,500; **expenditure**, £4,611,700. **Revenue of 25 Cantons**, £4,841,520; **expenditure**, £4,863,856. **Federal debt**, 1904, £4,068,293. The aggregate cantonal debts amounted, in 1900, to

£15,050,288. Imports, 1901, £42,000,000; 1902, £45,140,200; 1903, £47,846,500; 1904, £49,602,800; 1905, £54,369,000; exports, 1901, £33,463,000; 1902, £34,972,200; 1903, £35,541,000; 1904, £35,659,200; 1905, £38,772,800.

President for 1906, Dr. Ludwig Forrer. Vice-President, Col. Eduard Müller.

Minister to Great Britain, Mons. Gaston Carlin, 38, Beauchamp Place, London, S.W.

British Minister at Berne, Sir George Bonham,

Bart.—*Secretaries*, Mr. H. B. Brooke and Mr. Ellice M. Hicks Beach.

British Commercial Agent, Mr. J. C. Milligan, British Consulate-General, Zurich.

Consuls: *Consul-General at Zurich*, Sir Henry Angst, K.C.M.G.; *at Berne*, G. de Muralt; *at Geneva*, Sir George Philippo, K.C.; *at Lausanne*, Alfred Galland; *at Lucerne*, Louis Falck; *at St Moritz*, Dr. F. Holland; *at Davos*, Dr. W. R. Huggard.

## T

**Taft, William Howard**, United States Secretary for War, appointed 1903, was b. at Cincinnati, Sept. 15th, 1857. Graduated at Yale University '78, and admitted to Ohio Bar '80. In '82 he obtained the post of Collector of Internal Revenue, which he resigned a year later to take up general law practice, acting as assistant county solicitor for co. Hamilton '85-7. In '87 he was made a judge of the Superior Court of Ohio, in '90 Solicitor-General of the United States, and in '92 U.S. Circuit Judge. He came into political prominence as President of the Philippine Commission (1900-4), and as Civil Governor of the islands (1901-4). He left the latter post to become Secretary for War in succession to Mr. Elihu Root in 1904. In 1905, as Special Commissioner, he visited the Philippines, extending the cruise to Japan and China. He was sent to Cuba, and established a provisional Government there when the United States had to intervene owing to the rebellion against the Cuban Government in Sept. 1906. Address: War Department, Washington; and Cincinnati.

**Tattenbach, Count Christian Friedrich Ludwig**, German Minister to Portugal, Chamberlain to the Bavarian Court and Privy Councillor of the German Empire. B. Jan. 16th, 1846; entered the Imperial Chancellerie when Prince von Hohenlohe was in office; was appointed to the Tangier Legation, from which he was promoted to Lisbon. His experience of Moroccan affairs and his firm advocacy of German expansion led to his selection as head of the special mission sent by the German Emperor in 1905 to the Sultan at Fez. He afterwards returned to his post in Lisbon, but attended the Algiers Conference in 1906.

### TELEPHONES.

The National Telephone Company, which is an amalgamation of various companies that were formed in the past to develop the telephone industry of the country, is now, under licence from the Postmaster-General, conducting the greatest part of the telephone business in the United Kingdom in local areas, but the trunk lines (consisting of 487 trunk wire centres, 1755 trunk circuits, and about 128,000 miles of wire) connecting the various areas together are, in accordance with the Telegraph Act of 1892, worked by and are the property of the Postmaster-General. The capital expenditure on the trunk wire system up to March 31st, 1906, was £2,897,503.

The royalties paid to the Post Office during the year ended March 31st, 1906, were: National Telephone Co., £217,905; other licensees, £9303.

The number of trunk-line conversations during the year ended March 31st, 1906, was 17,974,000 (15,461,822 in previous year). The revenue from this service was £449,004 (£381,967 in previous year).

The National Telephone Company in 1906 was working 1228 exchanges, and sending annually over its wires 1,200,000,000 messages. The Company had about 380,000 subscribers and a gross revenue of about £2,250,000. Under its licence the Company has to pay the Government 10 per cent. of its gross receipts from telephone exchange business. This general licence expires on Dec. 31st, 1911, and the Postmaster-General on Feb. 2nd, 1905, made an Agreement with the Company for the purchase of their system on the expiration of their licence. Under the Agreement the Postmaster-General will purchase, on Dec. 31st, 1911, the plant of the Company, and will take over the business carried on by them up to that date. Provisions are inserted for the purpose of excluding from the purchase plant which is inefficient or unsuitable. The price, which is to be determined by arbitration in case of disagreement, is to be based on what are known as "tramway terms." No payment is to be made in respect of goodwill or profits, except in the case of the Company's private wire business, which can be transacted without a licence (the value of which is to be taken to be three years' purchase of the net profits), and in the case of the four local areas where the licence has been extended beyond 1911 under the Telegraph Act, 1899, as a consequence of municipal competition. During the continuance of their licence the Company are to allow intercommunication without additional charge between their system and that of the Postmaster-General. They are precluded from showing favour or preference as between subscribers, and the rates to be charged by them are confined within certain limits. Conditions were also inserted to ensure the proper maintenance and development of the telephone system until 1911. The servants and officers of the Company (excepting the general manager and officers receiving £700 per annum or upwards) who have been not less than two years continuously in the service of the Company on Dec. 31st, 1911, will be taken into the service of the Post Office.

The municipalities at present working telephones, and the number of telephones connected with their exchanges, are the corporations of Brighton (1864), Portsmouth (2466), Hull (1875), and Swansea (1392), besides Guernsey. Licences have been granted to a number of other towns throughout the kingdom.

The Post Office has its own system of exchanges in the provinces, besides an exchange system in London and another at Glasgow, established by the Corporation in 1901, with 12,290 telephones connected, which was taken over by the Post Office in Sept. 1906. An agreement has been entered into between the Post Office and the Company as to London, providing for intercommunication between subscribers on the two systems, so that the competition is one of efficiency, and not of rates.

The number of subscribers to Post Office Provincial Telephone Exchanges on March 31st, 1906, was 8425, and the number of telephones rented was 10,380 (8644 in previous year). The capital expenditure on provincial exchanges up to 1906 was £403,195.

The number of telephones connected with the Post Office London Telephone system on March 31st, 1906, was 32,879 (24,351 previous year). Besides the Central Exchange a City Exchange has had to be provided. There are 314 Post Office call offices open in the London area. The capital expenditure on London exchanges up to 1906 was £2,232,588.

The financial results of 1905-6 showed a balance of £396,605 after paying working expenses, while the estimated amount required for depreciation of plant and interest at 3 per cent. on the capital expenditure of £5,890,000 was £353,492.

There are International Telephone Lines connecting England and Belgium and England and France. Experiments have shown that telephonic communication with Holland is not at present practicable; and though communication between London and Rome by way of Paris has been exchanged, a public service is not yet possible.

### TEMPERANCE SOCIETIES AND INSTITUTIONS.

The Temperance movement had its origin in Scotland and Ireland in 1829, and in England in 1830, the British movement having been suggested by the earlier reform in the United States in 1826. At first societies were founded on the principle of abstinence from ardent spirits, but in less than ten years this abstinence was extended to all intoxicating beverages. Temperance organisations are now of great variety and extent, and the following analysis may enable the reader to form a clear conception of their distinctive characteristics.

I. In the first section may be included all societies which exist chiefly to inculcate total abstinence from all intoxicating liquors.

Of these societies some are national, such as the British Temperance League (Sec., Charles Smith, F.S.S., 29, Union Street, Sheffield); the National Temperance League (Sec., J. T. Rae, Paternoster House, London, E.C.); the National United Temperance Council (Sec., Mr. C. Pinhorn, 28, Memorial Hall, Farringdon Street, E.C.); the Scottish Temperance League (Sec., Jas. Gillies, 108, Hope Street, Glasgow); the Irish Temperance League (Sec., W. Wilkinson, 18, Lombard Street, Belfast).

Some are denominational, such as the Baptist, Congregational, Wesleyan and other Methodist bodies, the Society of Friends, Unitarian, etc.

Some are specially devoted to work among women, such as the British Women's Temperance Association, National (Sec., Miss Hunt, 47, Victoria Street, London, S.W.), the Women's Total

Abstinence Union (Sec., Miss Boyd, 4, Ludgate Hill, E.C.), and the World's Women's Christian Temperance Union, founded by the late Miss Frances Willard (President, Lady Henry Somerset; Hon. Secs., Miss Agnes E. Slack, Ripley, Derbyshire, and Miss Anna A. Gordon, Evanston, Ill., U.S.A.).

Some particularly operate among distinct classes, such as lawyers, commercial travellers, caterers, railway servants, post-office officials, etc. Prominent among these is the British Medical Temperance Association (Hon. Sec., Dr. Ridge, Carlton House, Enfield, Middlesex).

Some are connected with the temperance teaching and training of the young, such as the United Kingdom Band of Hope Union (Sec., C. Wakely, 59 and 60, Old Bailey, E.C.), with its unions and branches; The Young Abstainers' Union (Sec., Miss C. Helen Hatch, 18, Exeter Hall, London, W.C.), and other juvenile societies. All these are believed to number between two and three million members.

In this section also must be included district unions, such as the North of England, the Midland, and the Western Temperance Leagues, and the thousands of local and congregational societies spread over the United Kingdom.

II. The second section may be assigned to the International Order of Good Templars (first formed in New York in 1851, and extended to England in '68 by Joseph Malins), whose Grand Lodges for England, Wales, Scotland and Ireland constitute, with their subordinate Lodges, a great temperance confederacy of adults and juveniles. Permanent Offices, 168, Edmund Street, Birmingham.

III. The third section may be allocated to the Church of England Temperance Society (4, The Sanctuary, Westminster, S.W.) formed in 1862, and re-formed on the dual basis in 1873. One of its sections is confined to total abstainers only, and this includes the juvenile department. The other section includes non-abstainers who co-operate with the abstainers in methods and measures for discouraging intemperance. A Women's Union is attached to the Society, which has diocesan branches existing throughout the kingdom.

IV. Section 4 consists of organisations chiefly aiming to procure legislation for the promotion of sobriety.

The United Kingdom Alliance, formed in 1853, aims at obtaining a law enabling the voters of each locality to exclude totally, or partially, the sale of intoxicating liquors; but it aids all legislation of a temperance character. The Scottish Permissive Bill and Temperance Association, the Irish Temperance League, and the Irish Association for the Prevention of Intemperance are in sympathy with its object. Official organ, *The Alliance News and Temperance Reformer*, weekly (Thursdays), 1d. Sec., W. Williams, 16, Deansgate, Manchester.

The National Temperance Federation (168, Edmund Street, Birmingham) is composed of representatives of thirty leading temperance societies, and it keeps a watchful eye on all measures affecting temperance action before or coming before Parliament.

The Temperance Legislation League was formed in Nov. 1905 to advocate a definite constructive policy of Temperance Reform by means of legislation and the effective administration of the licensing laws. President, Viscount Peel; Chairman of Committee, Sir

T. P. Whittaker, M.P.; Sec., A. F. Harvey. Office, Parliament Mansions, Victoria Street, S.W.

V. The fifth section is occupied by the Royal Army Temperance Association (Sec., Clare White, 47, Victoria Street, Westminster, S.W.), and the Royal Naval Temperance Society (Miss Weston, Sailors' Rest, Portsmouth). Both are under official patronage.

VI. Section 6 comprises (1) Friendly Orders, such as the Rechabites, Sons of Temperance, and Sons of the Phoenix; (2) The United Kingdom Temperance and General Provident Institution, and other insurance societies putting total abstinents into a distinct section.

VII. The seventh section is devoted to the London Temperance Hospital (Hampstead Road, N.W.). It has treated over 25,000 out-patients. Alcohol is seldom prescribed, and the rate of mortality is low.

Terry, Miss Ellen, was b. at Coventry, Feb. 27th, 1848, and made her first appearance on the stage during Charles Kean's Shakespearian revivals in '58, playing the parts of Mamillius in "The Winter's Tale" and Prince Arthur in "King John." When only fourteen she was a member of Mr. Chute's Bristol company, which included Miss Kate Terry, Mr. William Rignold, Mrs. Kendal, Mrs. Labouchere, and Kate Bishop. She reappeared in London March '63, as Gertrude in "The Little Treasure," and

until Jan. '64 played Hero in "Much Ado about Nothing," and other secondary parts. In that year she married and left the stage, but returned to it again in Oct. '67, in "The Double Marriage" at the New Queen's Theatre, London. She afterwards joined Mr. and Mrs. Bancroft at the Prince of Wales's Theatre, where she acted the part of Portia. On Dec. 30th, '78, she made her first appearance at the Lyceum, and in conjunction with the late Sir Henry Irving, played in the longest runs ever known of "Hamlet," "The Merchant of Venice," "Romeo and Juliet," "Much Ado about Nothing," and "Macbeth." She also appeared as Viola in "Twelfth Night," as Marguerite in W. G. Wills' "Faust," as Lucy Ashton in "Ravenswood," as Queen Katharine in "Henry VIII.," as Cordelia in "King Lear," as Rosamonde in "Becket," and as Imogen in "Cymbeline." In June 1902 she played Mistress Page in "The Merry Wives of Windsor," produced at His Majesty's Theatre by Mr. Tree, Mrs. Kendal being also in the cast. In 1903 she was the manageress for a few months of the Imperial Theatre. In 1906 the stage jubilee of Miss Terry was celebrated, and a benefit performance at Drury Lane on June 12th produced nearly £6,000. Later in the year she played Hermione in "The Winter's Tale" at His Majesty's. Address: Tower Cottage, Winchelsea.

## TEXTILE INDUSTRIES OF THE WORLD.

### I. COTTON. II. WOOL. III. JUTE. IV. LINEN.

This article is devoted to the special treatment of the textile industries, for the purpose of affording some indication as to their broad trend. No attempt is made to discuss in detail the ramifications of each section of these industries, but attention is mainly confined to two important aspects:—

#### 1. The sources of supply of raw material.

2. The production of trade in manufactured goods in this country, contrasted with that of our principal competitors.

It does not appear that any attempt to present such figures, as this article does in a concise form, has been made before; and the compilation of these tables has involved a good deal of special investigation of official records, British and foreign. The particulars given below, it is hoped, will enable the reader to grasp the important and salient points connected with this branch of industry, the most important of any existing in this country from the point of view of its foreign trade.

### I. THE COTTON INDUSTRY.

In 1904 extraordinary difficulties attended the cotton industry, owing to the scarcity of supplies, and this caused the whole subject of cotton production to attract widespread attention. In 1905 there was also actual and prospective scarcity.

The facts of the position may be briefly stated. Hitherto the cotton manufacturing industry has relied mainly upon the United States for its supplies. Out of an annual crop now amounting to about 16,500,000 bales, the United States furnishes on the average about 11,000,000 bales. India is responsible for a further 3,000,000 bales (of which, however, nearly half is consumed in that country itself), and the remainder is not of sufficiently high

quality to be available for most manufacturers. Egypt produces another 1,250,000 bales, and a further 1,000,000 is derived from various parts of the world.

With the development of cotton manufacturing in the United States, and on the Continent, the proportion of the American cotton crop available for the United Kingdom diminishes, though the real requirements of its manufacturers increase. This is shown by the following table, which sets out the American and other crops at various dates during the past 21 years, and the takings of British, Continental, and American manufacturers respectively.

#### Production and Consumption of Cotton.

	1884-5.	1890-1.	1897-8.	1905-6.
	(1000 Bales)	(1000 Bales)	(1000 Bales)	(1000 Bales)
<b>Production—</b>				
United States .	5,136	8,137	10,890	11,048
Other countries	2,101	3,039	3,316	4,772
<b>Total . .</b>	<b>7,237</b>	<b>11,176</b>	<b>14,206</b>	<b>15,820</b>
<b>Consumption—</b>				
Great Britain .	2,746	3,384	3,432	3,848
Continent . .	2,604	3,631	4,628	5,252
United States .	1,527	2,367	2,962	4,726
Other countries	567	1,129	1,866	2,569
<b>Total . .</b>	<b>7,444</b>	<b>10,511</b>	<b>12,888</b>	<b>16,395</b>

It will thus be seen that while consumption in this country has steadily increased, in other

parts of the world it has grown much more rapidly, and that production is on the whole hardly keeping pace with the demand. In future, apart from the development of new sources of supply, absolute scarcity seems imminent, owing to the very large reliance at present placed on supplies from the United States.

Two additional tables will further elucidate the real position. The first shows the amount of the American cotton crop over a series of years:—

American Cotton Crop.

	1000 Bales.		1000 Bales.
'82-3 . . .	6,992	1900-1 . . .	10,425
'92-3 . . .	6,717	1901-2 . . .	10,701
'95-6 . . .	7,162	1902-3 . . .	10,758
'97-8 . . .	11,181	1903-4 . . .	10,121
'98-9 . . .	11,235	1904-5 . . .	13,420
'99-1900 . . .	9,440	1905-6 . . .	11,048

American home requirements have very greatly increased, as will be obvious from the following figures of

American Cotton Consumption.

Year ended Aug. 31st.	Northern Mills.	Southern Mills.	Total.
	Bales.	Bales.	Bales.
'90 . . .	1,799,258	546,894	2,346,152
'92 . . .	2,190,766	686,080	2,876,846
'94 . . .	1,601,173	718,515	2,319,688
'96 . . .	1,660,271	904,701	2,564,972
'98 . . .	2,211,740	1,231,841	3,443,581
1900 . . .	2,068,300	1,597,112	3,665,412
1902 . . .	2,050,774	1,937,971	3,988,745
1904 . . .	2,137,369	2,007,509	4,144,878
1905 . . .	2,346,652	2,203,406	4,550,058
1906 . . .	2,453,948	2,398,404	4,852,352

Position of British and Foreign Cotton Manufacturers.

In this connection it is interesting to form some idea of the relative position of British and foreign cotton foreign manufacturers at different dates. The following estimate has been prepared by the *New York Chronicle*, giving the number of spindles at various periods during the past 33 years.

The World's Cotton Spindles.

	U.K.	Conti- nent.	U.S.	Other Coun- tries.	Approximate Total.
	Million spindles.	Mil. spin.	Mil. spin.	Mil. spin.	Mil. spin.
'70	37½	13	7	—	57½
'80	44½	21	10½	2	78
'90	44½	26	14	4	88½
1900	46	32	19	7	104
1903	47	34	22	9	112
1904	47½	34½	23	8	113
1905	48½	35	24	8½	116
1906	50	35½	24½	8½	119

It is evident from these figures that while the production in the United Kingdom is increasing, and is still much larger than in any other part of the world, its proportion to

the whole output is very much smaller, and British makers consequently find increasing difficulty in obtaining adequate supplies. Further, and this concerns the cotton producers of the whole world, the supply of raw material is not developing so rapidly as the demand. It is estimated that 500,000 additional bales are required in the aggregate annually, while for some years the production has been almost stationary. Of course this difficulty is accentuated by the speculation in cotton which is so constantly taking place, but it is not caused by it. No effective remedy can be looked for, apart from a considerable increase in production, and it is therefore important to examine what the prospects are of that increase taking place.

#### United States Cotton Supplies Decreasing.

Naturally attention must first be directed to the probability of a larger output from the United States, which is now and will probably remain the chief and most important source of supply, because the quality there is superior to that of any other part of the world. It cannot be said that the outlook in this connection is very hopeful, in spite of the increased yield in 1904-5. While a larger area is being planted in the United States, every year, the yield per acre has been decreasing. The causes of this seem to be in the main two: (1) There has been great industrial expansion, chiefly in the Southern States, during the past ten years, and this has rendered the supply of coloured labour smaller and more precarious; (2) it seems probable that the soil itself in the older plantations has become less productive, owing to exhaustion. Though it is true that some American authorities contend that there are vast fields in the Southern States, and especially in Texas, suitable for the production of cotton, which have not yet been brought under cultivation, and that America may still be relied upon to furnish the world's needs, this is a possibility rather than a probability.

#### British Cotton-Growing Association.

The question of seeking supplies in other directions has therefore become very urgent. This task has been seriously taken up by the British Cotton-Growing Association, a body formed by the Lancashire producers. The following is a brief summary of the results of the investigations which have hitherto been made.

India.—As already stated, India is a large cotton producer, but the quality has suffered a good deal from the methods of picking, while at the same time the standard of quality in manufactured articles has been steadily growing higher. At the present time, therefore, but little of the long-staple varieties suitable for the requirements of the British manufacturers are produced. Attempts to introduce American seed into India have been made, but American varieties do not thrive in India. Attention has therefore been directed to improving the indigenous growths rather than acclimatising exotic varieties, but it seems doubtful whether India will ever be able to produce sufficient long-stapled cotton to be of real value to European and American manufacturers.

Egypt.—Egyptian cotton is good in quality, but unfortunately nearly the whole area suitable

for cotton growing has already been taken up, and the prospect of increased supplies from this source are therefore not considerable. Possibilities undoubtedly exist with regard to the Soudan, which is favourably regarded by some experts from this point of view, and it is quite probable that important developments may take place there.

**British Central Africa.**—Investigations show that cotton growing in British Central Africa offers very promising prospects. The Protectorate contains an area of 20,000,000 acres suitable for cotton growing, and cotton has indeed been grown in a small way for centuries. Thousands of acres are being planted, and it is anticipated that good supplies will be available within a few years. Small colonies of natives from India are settling in the district, and are found to furnish very satisfactory labour.

**West Africa.**—All the British colonies and protectorates in West Africa are capable of producing good cotton crops, but the possibilities in this connection are dependent upon improved transport facilities, which at present do not exist. In Gambia cotton has been grown for ages, and the same may be said of Sierra Leone. The Gold Coast offers less favourable prospects, and both in Southern and Northern Nigeria there are undoubted possibilities. In the former experimental plots have already been planted, and there are good transport facilities owing to the rivers. In the latter there is an immense area capable of cotton cultivation, and some of it has already been under the plant for centuries. Here again, however, transport facilities are urgently needed; but it is said that if these existed in adequate amount, Northern Nigeria alone would be capable of producing all the cotton Lancashire wants.

**Rhodesia.**—The cotton plant grows wild over nearly the whole of Rhodesia, and the results of experiments and investigations there have been so far encouraging as to lead to the sending out of an American expert to conduct experiments on a very large scale. This expert has already reported that he is very hopeful as to the general prospects, and the British South Africa Company is doing all it can to encourage the establishment of the industry. The chief difficulty here is the distance of the fields from the world's markets.

**West Indies.**—Here the cotton industry has been re-established on an extended scale; and Sir Daniel Morris, the Imperial Commissioner of Agriculture, hopes that within a few years the exports from the West Indies will reach 50,000 bales per annum.

#### **Cotton Manufactures in various Countries.**

While it is impossible to give exact figures relative to the cotton manufactures of various countries, owing to the fact that in practically every case a large part of the output is consumed at home, and no figures are available as to any country's home trade, indications of the chief movements are to be found. The table already given of the spindles of the world furnishes a rough guide as to the progress of the industry in various countries. A further test of the progress of the chief nations concerned is to be found in the export figures.

Taking cotton yarn first, the following are the particulars of the exports of this country, Germany, and France during the past 12 years.

**Value of Exports of Cotton Yarn.**

	United Kingdom.	Germany.	France.
	(£1000)	(£1000)	(£1000)
1894 . .	9,286	785	—
1895 . .	9,291	835	103
1896 . .	10,045	810	133
1897 . .	9,930	1,050	108
1898 . .	8,923	985	113
1899 . .	8,059	1,145	252
1900 . .	7,741	1,455	217
1901 . .	7,977	1,425	158
1902 . .	7,404	1,585	127
1903 . .	7,407	1,625	182
1904 . .	8,956	1,492	262
1905 . .	10,317	1,703	750

British trade is very much larger than that of the other two countries put together, but it will be seen that it has shown a fluctuating tendency for some time past, while that of both Germany and France has been improving on the whole. This, however, reflects no discredit upon British producers. Owing to a number of favourable circumstances they practically had a monopoly for many years; and that that monopoly has now disappeared, though a preponderating share still remains, merely indicates that their rivals have surmounted the difficulties which earlier they had to encounter.

As regards cotton manufactures, figures can be given relative to four countries, though it should be explained that with regard to the United States the statistics include cotton yarn.

**Value of Exports of Cotton Piece Goods.**

	United Kingdom.	Germany.	United States.	France.
	(£1000)	(£1000)	(£1000)	(£1000)
1894	57,279	7,090	2,867	—
1895	54,455	9,195	2,758	4,731
1896	59,310	8,315	3,357	5,258
1897	54,044	8,860	4,208	4,773
1898	55,977	9,050	3,405	5,150
1899	59,489	10,305	5,113	6,970
1900	62,009	12,235	4,801	6,977
1901	65,708	10,990	4,054	7,054
1902	65,054	12,060	4,702	7,042
1903	55,267	13,181	5,543	7,238
1904	64,078	12,974	5,495	7,829
1905	70,817	13,208	6,000	10,562

British trade has been steadily growing in volume, and the increase has been much larger than in that of all the other three countries put together. The table affords an incidental illustration of the fallacy of percentage increases. The United States, for instance, starting from a very low level, shows an increase of about 200 per cent., while the United Kingdom has only an increase of about 20 per cent. In point of fact, however, British trade has increased £12,000,000, and that of the United States only £3,000,000.

#### **II. THE WOOL INDUSTRY.**

While cotton is only grown in tropical and semi-tropical countries, wool is mainly a product of temperate regions. The sheep is, however,

an animal which can live under very varied climatic conditions, so that there are few countries of the world, except in the immediate regions of the Equator, where wool is not produced in fair quantities. Its use as a material for producing wearing fabric is, however, almost confined to the temperate regions, and it is from them that the world's supplies are mostly obtained. In a great many countries using wool freely for manufacturing purposes, the home supply is an important element, and even in Great Britain nearly a seventh of the quantity used is obtained from the British farmer. Under present conditions of cheap transit, however, the breeding of sheep is most economically and efficiently carried on where good grazing land is to be had very cheaply, and hence the world's sources of supply are, apart from domestic production, mainly from new and only partially developed countries. Some idea of the relative importance of the different sources of supplies may be gained from the following table.

**Imports into Europe of Extra-European Wool.**

	Australasian.	Cape.	River Plate.	Other sorts.	Total.
	1000 Bales	1000 Bales	1000 Bales	1000 Bales	1000 Bales
1894	1862	249	422	497	3030
1895	2025	263	476	534	3298
1896	1790	299	517	505	3111
1897	1826	249	498	542	3115
1898	1679	287	543	494	3003
1899	1662	266	537	491	2956
1900	1437	131	396	455	2419
1901	1719	214	533	395	2861
1902	1654	245	468	427	2794
1903	1442	229	538	480	2689
1904	1423	206	443	518	2590
1905	1693	214	448	516	2871

It may be noted that, although European imports do not cover the whole of the demand, they do cover the great bulk of it. Not much wool is imported into the United States, and in other parts of the world in which woollen

industries exist on a limited scale, the manufacturers are dependent on the domestic supply.

The above table shows the immense predominance of Australasia as a wool producer. In good years it is responsible for about two-thirds of the whole imports into Europe, and even in poor years the proportion exceeds one-half. This point needs to be insisted upon, for it is the key to the whole question of supply—an important one at the present moment, because, as in the case of cotton, there is a dearth of wool, the significance of which is that the industries dependent upon it are materially affected. A further examination of the table reveals the cause of that dearth. It was the prolonged drought in Australia which decimated the flocks of sheep and caused wool supplies to shrink very considerably. There is, however, this important difference between the scarcity of wool and that of cotton—that the animal product is scarce temporarily only. Already there is every prospect that the supplies yielded by Australia will continue to show a decided increase. In the absence of any further drought, a much nearer adjustment between imports and requirements may safely be calculated upon. Even in the improbability of supplies from Australia being permanently diminished, a stimulus would be given to production elsewhere, so that in time the balance would be redressed, however inconvenient might be the consequences meanwhile. The problem thus presented by wool is therefore of a comparatively insignificant character, compared with that of cotton. It may be noted, however, that it is of special importance to the United Kingdom, inasmuch as it consumes about two-thirds of the total European imports of Australasian wool. River Plate wool is mainly used on the Continent, and supplies from thence show on the whole an increasing tendency.

**Importation of Colonial Wool.**

The effect on prices of the shortage in Australasian wool is shown in the following table, which sets out the importation of Colonial wool into Europe and America over a period of more than forty years, with the approximate average value per bale.

Year.	Australasian Bales.	Cape Bales.	Total Colonial Bales.	Average value per bale.	Total value.
				£ s. d.	£
'60	187,000	79,000	266,000	25 15 0	6,850,000
'70	546,000	152,000	698,000	16 15 0	11,691,000
'80	869,000	219,000	1,088,000	20 5 0	22,032,000
'85	1,094,000	188,000	1,282,000	14 0 0	17,948,000
'90	1,411,000	288,000	1,699,000	14 15 0	25,060,000
'95	2,001,000	269,000	2,270,000	11 0 0	24,970,000
'98	1,703,000	279,000	1,982,000	12 5 0	24,280,000
'99	1,641,000	267,000	1,908,000	14 10 0	27,666,000
1900	1,456,000	140,000	1,596,000	13 10 0	21,546,000
1901	1,745,000	217,000	1,962,000	10 10 0	20,601,000
1902	1,699,000	234,000	1,933,000	11 15 0	22,713,000
1903	1,454,000	234,000	1,688,000	13 10 0	22,747,000
1904	1,371,000	201,000	1,572,000	14 10 0	22,794,000
1905	1,633,000	209,000	1,842,000	15 15 0	29,011,000

It will be seen that imports of Australasian wool were steadily progressive until they reached their maximum in the year 1895, at which time the cost was the lowest on record. Since then, with fluctuations, due to market

causes, into which it is not now necessary to enter, imports have fallen, and prices have been considerably higher than in 1895. They are likely to continue to be firm for some time to come. Increase in consumption is taking place

yearly, and will probably for some time proceed at least as fast a pace as increase in the supplies. In all industries connected with wool, higher prices tend considerably to check the demand for manufactured goods. While woollen fabrics are necessarily used in most temperate climates, the consumer can economise by wearing garments longer and by buying them of cheaper material. This is important to bear in mind in connection with tables given later, relative to exports of woollen goods.

### **Consumption of Wool in the United Kingdom.**

As showing how production in the United Kingdom has been affected by the scarcity, the following table is of interest :

Average.	Domestic Clip (Esti- mated).	Imports.	Exports.	Left for Home Cons'pn.
	Mil. lbs.	Mil. lbs.	Mil. lbs.	Mil. lbs.
'61-70 .	150	220	87	283
'71-80 .	156	381	186	351
'81-90 .	134	578	322	390
'91-95 .	146	744	399	491
'96-1900	139	701	318	522
1899 . .	140	698	315	523
1900 . .	141	581	220	502
1901 . .	138	716	313	541
1902 . .	136	678	320	494
1903 . .	133	639	321	451
1904 . .	132	598	293	437
1905 . .	131	651	314	468

It will be seen that the quantity left for home consumption was very much lower in 1902, 1903 and 1904 than in the previous years, but that an improvement took place in 1905. It is not probable that so far any actual decrease in manufactures has occurred, the shortage having been made up by a considerable reduction in visible and invisible stocks; it now seems probable that the period of dearth is over, as supplies from Australia are steadily increasing.

### **Exports of Woollen and Worsted Yarn.**

This being the broad position as regards supply and demand for the raw material, it is now of interest to see how different countries are faring in the matter of exports. The following table gives the exports of woollen and worsted yarn from the United Kingdom, Germany, and France respectively.

	United Kingdom.	Germany.	France.
	£1000.	£1000.	£1000.
'94 . . . .	4,718	2,140	—
'95 . . . .	5,372	2,340	1,244
'96 . . . .	5,655	2,245	1,184
'97 . . . .	4,840	2,230	967
'98 . . . .	4,674	2,245	1,179
'99 . . . .	4,876	2,865	1,483
1900 . . . .	4,492	2,840	1,383
1901 . . . .	3,488	2,815	969
1902 . . . .	3,531	3,125	1,371
1903 . . . .	4,198	2,956	1,410
1904 . . . .	4,209	3,286	1,235
1905 . . . .	4,244	3,176	1,490

The United Kingdom still remains the largest exporter of the three, but it is noticeable that its relative importance has seriously diminished during the period covered by the table; while both Germany and France, especially the former, have improved their position, and it is not improbable that in a few years the United Kingdom will lose the leading place. This can certainly not be regarded as satisfactory. The explanation is that yarn being a comparatively simple form of manufacture, any superiority British manufactures originally possessed in its production has now practically ceased.

### **Exports of Woollen and Worsted Manufactures.**

Turning to the exports of woollen and worsted manufactures, the following table includes the same three countries as before, with the addition of the United States. As regards the last named, however, the figures include yarn as well as piece goods.

	United Kingdom.	Germany.	France.	United States.
	£1000.	£1000.	£1000.	£1000
'94 . . . .	14,011	9,335	—	155
'95 . . . .	17,738	11,105	12,932	134
'96 . . . .	18,269	10,780	11,766	183
'97 . . . .	15,976	10,480	10,620	189
'98 . . . .	13,700	10,055	8,914	218
'99 . . . .	14,789	10,860	10,556	209
1900 . . . .	15,682	11,790	9,089	260
1901 . . . .	14,237	10,630	8,544	309
1902 . . . .	15,261	13,345	8,810	302
1903 . . . .	15,864	12,075	8,735	344
1904 . . . .	17,993	12,323	8,412	398
1905 . . . .	19,619	14,076	7,361	419

Here again the British have a superiority, but here also of later years the Germans are running them more and more closely in the race—though a considerable portion of their gain so far has been at the expense of France. United States exports have improved largely in percentages, but are still on a small scale, as the high duties on wool and all classes of machinery hamper the export trade very considerably. It will be noticed that in nearly all the countries considerable fluctuations occur from year to year, and this leads to an important point which deserves emphasis—that this trade largely depends upon fashion as well as on the cost of the raw material. With all allowances, however, it would appear as if British manufacturers were not adequately holding their own against foreign competitors. The Germans have shown great ability for a great many years past to produce cheap goods with a good appearance, and it is this fact, no doubt, which has largely enabled them to develop their export trade. The speciality of France in this branch of manufacture is the production of very high-class goods, the demand for which is, on the whole, of decreasing quantity. British superiority is in medium qualities, and this is fairly well maintained, though there is no reason why more should not be done in other directions. It will be noticed that British export figures were largest in '95 and '96, and the subsequent diminution is largely due to the adoption of the Dingley Tariff in the United States in '97,

which imposes such heavy duties on woollen and worsted goods as largely to destroy a profitable export trade which British exporters had previously carried on there. This loss has, however, been now practically made up.

### III. THE JUTE INDUSTRY.

The supplies of jute are mainly derived from India, and the crop of course varies from year to year. The acreage under jute in British India in 1906-7 is stated as 3,271,400 acres, as compared with 3,167,650 acres in 1905-6. Nearly the whole jute area lies in Bengal. The estimated yield of jute in 1905-6 was 1,497,150 tons, which compares with an average for the preceding quinquennium of 1,265,500 tons. The consumption by the Indian mills for 1905-6 is estimated at 721,350 tons, or nearly half the total output. In the same year the Indian spindles used for jute were 453,168 in number, as compared with 317,348 five years previously, and the jute industry is now a very important economic factor in British India. In 1905-6 the Indian exports of raw jute were the largest on record, with the exception of 1901-2, while the high prices realised raised the total value to exceptional figures. The following are particulars of the exports during the past six years:—

#### Exports of Raw Jute from India.

Year ending July 31st.	Quantity.	Value.	Average price per cwt.
	Cwts.	£	s. d.
1901 . . . .	12,414,000	7,245,000	11 8
1902 . . . .	14,755,000	7,865,000	10 8
1903 . . . .	13,036,000	7,418,000	11 4
1904 . . . .	13,721,000	7,812,000	11 4
1905 . . . .	12,875,000	7,978,000	12 0
1906 . . . .	14,581,000	11,417,000	15 9

As regards manufactures of jute, they form one of the smallest textile industries in the United Kingdom. As will be seen from the following table, Great Britain has an immense superiority over the only important European rival, France; but here again it is hardly satisfactory that while British shipments tend on the whole to decrease, those of France are growing in magnitude.

#### Exports of Jute Yarn and Manufactures.

	United Kingdom.	France.
	£1000.	£1000.
1894 . . . .	2,444	—
1895 . . . .	2,624	299
1896 . . . .	2,648	270
1897 . . . .	2,628	224
1898 . . . .	2,265	305
1899 . . . .	2,362	366
1900 . . . .	2,361	427
1901 . . . .	2,658	434
1902 . . . .	2,438	442
1903 . . . .	2,579	460
1904 . . . .	2,531	549
1905 . . . .	2,680	562

### IV. THE LINEN INDUSTRY.

The United Kingdom does a satisfactory export trade in linen goods, the industry in the north of Ireland being particularly important, and the business tends on the whole to increase. The chief rival is France, whose trade is now much larger proportionately than it was a few years ago, though it is still insignificant as compared with British trade.

#### Exports of Linen Yarn and Manufactures.

	United Kingdom.	France.
	£1000.	£1000.
1894 . . . .	4,505	—
1895 . . . .	5,351	805
1896 . . . .	5,031	558
1897 . . . .	4,771	482
1898 . . . .	4,393	512
1899 . . . .	5,073	962
1900 . . . .	5,225	1,266
1901 . . . .	5,020	1,096
1902 . . . .	5,430	1,477
1903 . . . .	5,540	1,203
1904 . . . .	5,732	1,681
1905 . . . .	6,340	—

**Thames Conservancy.** The Conservators of the River Thames were constituted a body corporate by Act of Parliament in 1857, and their powers enlarged by various Acts from time to time. Their general jurisdiction extends over the entire waterway and foreshores of the river, and their powers are:—(1) The maintenance and improvement of the navigation; (2) the administration and control of the Harbour and the provision of moorings for vessels frequenting it; (3) the control of the explosives, petroleum, and carbide of calcium traffic, and of the fisheries of the river; (4) the prevention of pollution over practically the entire watershed of the river; (5) the preservation of the non-tidal part of the river as a place of recreation, and the control of the pleasure navigation. The County Councils of Middlesex, Surrey, Kent, Essex, Oxfordshire, Berks, Bucks, and Herts each appoint one Conservator; the Gloucestershire and Wilts County Councils jointly appoint one; the County Boroughs of Oxford, Reading and West Ham each appoint one, and the Metropolitan Water Board one, the Admiralty two, the Board of Trade two, Trinity House two, shipowners three, owners of sailing barges, lighters and steam tugs two, dock-owners one, wharfingers one, Corporation of London six, and London County Council six. Secretary of the Conservancy, Mr. R. Philipson; Offices, Victoria Embankment, near Blackfriars Bridge, E.C.

**Theotokis, George,** Greek Premier for the fourth time. He entered politics at an early age as Deputy for Corfu, and was soon singled out by M. Tricoupi, who, in '86, intrusted him with the Portfolio of Marine. Three years later he was Minister of Public Education and Public Worship, and then Minister of the Interior—a post which he again occupied in '97 in the administration formed by M. Ralli, now his political opponent. In '89 King George

called him in to form a Ministry, and he was again Prime Minister in June 1903, and Dec. 1903 and 1905. At the general elections in March 1906 the Theotokists secured a great majority.

**Tittoni, Signor**, Italian statesman, is the son of an Italian exile who fled from the Papal States in 1859 to England, and remained there till the Italian troops entered Rome. Signor Tittoni had never held Ministerial office till 1903, when he was appointed Minister of Foreign Affairs, but had filled the office of President of the Provincial Council of Rome with credit, and took office with a good reputation. He is a member of the Right. He came to England with the King of Italy in Nov. 1903, and was appointed an Hon. G.C.V.O. He resigned with Signor Fortis in Dec. 1905, but resumed office with Signor Giolitti in May 1906.

**Tobacco.** Figures compiled by the Bureau of Statistics, Washington, U.S.A., show that the World's Tobacco Crop has been as follows in the years named :—

1900 . . . . .	2,201,193,000 lb.
1901 . . . . .	2,153,820,000 "
1902 . . . . .	2,266,050,000 "
1903 . . . . .	2,297,593,000 "
1904 . . . . .	2,046,817,000 "

Of the total quantity, the United States produces, as a rule, about two-fifths, from 820,000,000 to 830,000,000 lb., but in 1904 the United States crop sank to 667,461,000 lb., and in 1905 to 633,033,719 lb. British India is the next largest producer, with 441,000,000 lb. in 1904. In Europe 452,010,000 lb. were grown, of which Russia produced 174,000,000, Austria-Hungary 102,815,000, and Germany 76,000,000. Other totals are :—

Japan . . . . .	106,075,000 lb.
Dutch East Indies . . . . .	96,100,000 "
Turkey . . . . .	90,000,000 "
Brazil . . . . .	55,000,000 "
Cuba . . . . .	46,000,000 "
Philippine Islands . . . . .	33,100,000 "
Mexico . . . . .	25,000,000 "

**Togo, Admiral Heihachiro**, the Nelson of Japan. His signal at Tsushima, when he annihilated the Russian Baltic Fleet, read : "The destiny of our country depends upon this battle. You are all expected to do your utmost." Third son of Togo Kichizaemon, a samurai of the Satsuma clan, he was b. at Kogoshima, Oct. 14th, 1857. He was sent to England for training on H.M.S. *Worcester* (1873-74). After his return to his country he became one of the group of hard-working young officers who successfully achieved the task of creating a new navy. First came into prominence as commander of the *Naniwa*, which sank the transport *Kowshing* and forced on the war with China. He was then a Rear-Admiral and third in command of the fleet. After the war he became Commander-in-Chief at Maizuru, and was promoted Vice-Admiral. At the close of Jan. 1904 he was summoned to Tokio and told that he had been selected to command the entire Japanese fleet in the inevitable hostilities against Russia. How he succeeded is a matter of history. In 1906 he received the Order of Merit. Admiral Togo is a student as well as a fighter, and a pleasant, kindly man.

**Tolstoi, Count Lyof Nikolaivitch**, was b. Aug. 28th, 1828, at Yasnaia Poliana, in the

government of Toula, where he still lives. Entered the army when 23, served in the Caucasus and at Sebastopol. First made literary reputation by his vivid sketches from Sebastopol. Leaving the army soon after the close of the Crimean war, he devoted himself to literature. His "War and Peace," a tale of the invasion of Russia by Napoleon in '12, is regarded by Russians as his masterpiece; but his "Anna Karenina," which appeared in '76, is better appreciated abroad. "The Cossacks" is another admirable work. Translations of his "Kreutzer Sonata" appeared in '90. He has written much on education, and published many short tales and reminiscences of childhood and youth. Latterly he has devoted himself to religious teaching. He makes "Resist not evil" the keystone of the Christian faith, and insists that the literal interpretation of the Sermon on the Mount is the only rule of the Christian life. His religious views are set forth in "Christ's Christianity" and "My Religion." In October '92 he deposited his Memoirs and Diaries with the Curator of the Rumyanzoff Museum on the condition that they should not be published till ten years after his death. In November he legally made over his whole fortune, including his real and personal estate, to his wife and children. He married in '61, and has nine children living. During '93 he wrote "The Kingdom of God Within Us," an important work on the social question; and in '95 "The Four Gospels Harmonised and Translated" by himself. He was excommunicated by the Holy Synod in 1901.

## TRADE, BOARD OF.

The first Committee for Trade appears to have been appointed in the year 1622, during the reign of James I. It was reconstituted by Charles I., and held meetings from time to time from 1625 to 1640. During the Commonwealth the Council of State, which was constituted in 1649-50, passed a resolution directing "the whole Council or any five of them to be a Committee for Trade and Plantations." In 1660 Charles II. instituted a Council for Trade and another Council of Foreign Plantations. These were amalgamated in 1672, but in 1675 their duties were transferred to the Privy Council. In 1695, under William III., and from time to time afterwards, the Council was revived; but on the motion of Burke it was abolished in 1782. In 1786 a permanent Committee was formed under an Order in Council, which still regulates the legal constitution of the Board. The working of the Department is now assimilated to that of the other great offices of State, its work being done by the President aided by a permanent staff. The work of the Department—which has enormously increased since 1786, by the growth of joint stock companies, the establishment and development of railways, the increase in shipping, and other industrial developments, which have imposed new administrative duties upon it—is divided amongst several departments, viz.: **Bankruptcy Department** (Inspector-General, Edward Hough), constituted in '83 by the Bankruptcy Act '83. See separate article, **BANKRUPTCY**.—**Commercial, Labour, and Statistical Department** (Comptroller-General, H. Llewellyn Smith, C.B.), which prepares the statistical abstracts, supervises the trade accounts, publishes the *Board of Trade Journal*, the *Labour*

*Gazette*, etc. The Commercial Intelligence Branch of this Department, which is located at No. 73, Basinghall Street, E.C., was established in '99, and provides accurate information on tariff and trade matters. The Imperial Institute (*q.v.*) is now a branch of this department.—**Companies Department** (Comptroller, G. S. Barnes, 8, Delahay Street, S.W.). The Joint Stock Companies' Registry Office (Registrar of Joint Stock Companies, H. F. Bartlett, I.S.O.), is under this Department.—**Railway Department** (Assistant-Secretary, Col. Sir Herbert Jekyll, K.C.M.G.). Under this Department is the Standards Department, transferred from the Exchequer in '66, which tests and examines weights and measures used in trade and for scientific purposes, keeps the standards of weight and measurement at the Standards Office, 7, Old Palace Yard, and performs various duties under the Coinage Act, '70, the Sale of Gas Act, '59-60, and the Petroleum Act, '70.—**Marine Department** (Assistant-Secretary, Walter J. Howell, C.B.), which administers the Merchant Shipping Act '94. A Sub-Department is the General Register and Record Office of Shipping and Seamen (Carlisle Place, Westminster, S.W.).—**Harbour Department** (Assistant-Secretary, Hon. T. H. W. Pelham, C.B.), which shares with the Finance and General Department the control of the lighthouse funds of the Trinity House, the Commissioners of Northern Lighthouses, and the Commissioners of Irish Lights, and manages all Colonial lighthouses in the hands of the home Government.—**Finance and General Department** (Assistant-Secretary, Sir T. W. P. Blomefield, Bart., C.B.). Under this department are the Patent Office (Comptroller-General of Patents, Designs and Trade Marks, C. N. Dalton, Esq., C.B.).

**President**, Right Hon. David Lloyd George, M.P.; **Parliamentary Sec.**, Mr. H. E. Kearley; **Permanent Sec.**, Sir Francis Hopwood, K.C.B., K.C.M.G.

An Advisory Committee on Commercial Intelligence was appointed for three years in September 1905 to advise the Board on the work of their Commercial Intelligence Branch, and on such matters relating to Foreign Tariffs and other Commercial questions as the Board may refer to them. **Sec.**, Mr. U. F. Wintour.

### TRADE MARKS.

The law recognises two kinds of Trade Marks: (1) those which are unregistered, and depend upon the old Common Law protection; and (2) those which are registered, and thereby obtain statutory protection.

The general principle of the Common Law is that any one who has been in the habit of using some special mark to distinguish his particular goods is protected—quite apart from any formal registration—from all deceptive imitations of such mark. Consequently the owner of an unregistered trade mark can successfully sue any person utilising his trade mark, or some close imitation of it, so as to "pass off" his goods to the public as if they were the goods of the original owner of the trade mark. But he still labours under the disadvantage that he has formally to prove his right to the trade mark acquired by continued use, instead of having the more definite right acquired by registration; and, in addition to this, he must prove that the imitations are intended or

likely to mislead, as a mere infringement of an unregistered trade mark (not in use before 1875) is not sufficient cause for legal proceedings. A trade name cannot in itself be monopolised in the same way as a trade mark. But here, too, the law will restrain the use of a similar trade name—even in the case of a person trading under his own name—if there is a deliberate intention to deceive, "to palm off his own commodity as the production of another." In other words, the owner of an unregistered trade mark may be said to have only a limited protection. He has no remedy for infringement, but he can stop imitations which tend to deceive the public.

The law as to registration is contained in the Trade Marks Act, 1905, which consolidates and amends previous Acts on the subject. It provides that a Register of Trade Marks shall be kept at the Patent Office; recognises and regulates the Sheffield Registry for special marks on metal goods, and the Manchester Registry for special marks on cotton goods; provides that "a trade mark must be registered in respect of particular goods or classes of goods"; and provides that "a registrable trade mark must contain or consist of at least one of the following essential particulars: (1) The name of a company, individual, or firm represented in a special or particular manner; (2) The signature of the applicant for registration or some predecessor in his business; (3) An invented word or invented words; (4) A word or words having no direct reference to the character or quality of the goods, and not being according to its ordinary signification a geographical name or a surname; (5) Any other distinctive mark, but a name, signature, or word or words, other than such as fall within the descriptions in the above paragraphs (1), (2), (3), and (4) shall not, except by order of the Board of Trade or the Court, be deemed a distinctive mark." Any distinctive mark used as a trade mark both before and since August 13th, 1875, is registrable. The proprietor of a trade mark wishing to register it must apply to the Registrar, who may refuse such application absolutely, or may accept it absolutely or subject to conditions. From him there is an appeal to the Board of Trade. An accepted application is advertised by the Registrar, and any person may give notice of opposition. In case of honest concurrent user, or other special circumstances, the Court may permit the registration of the same or nearly identical trade marks for the same description of goods by more than one proprietor. Registration is for a period of 14 years, but may be renewed from time to time in accordance with the Act; and, apart from fraud, registration is conclusive evidence of title after 7 years.

Rules under the Act have been issued by the Board of Trade which deal with the procedure and the fees payable. Among them are those providing that on receipt of an application for registration the Registrar is to have a search made to ascertain whether there are on record any marks for the same goods or description of goods identical with the mark applied for or so nearly resembling it as to be calculated to deceive." Besides, a search may be made in any class to ascertain whether any marks are on record resembling any mark sent in duplicate by the person requesting such search. They also provide that a trade mark, if acceptable, is

to be entered on the register one month from the date of advertisement of the application.

The fees are various, depending upon the procedure, etc., required under the particular circumstances. The chief items are:

- (1) On application for a trade mark to be registered for one or more articles included in one class, 10s.
- (2) For registration of a trade mark for one or more articles included in one class, £1.

The International Convention, 1883, to which most civilised Powers (except Germany) were parties, resolved that trade marks registered in one country should be recognised as such and be protected in each of the other countries. This has not yet been fully carried out by British legislation. A foreigner must register anew in this country in accordance with our law; but he has priority for this purpose if applying here within 4 months of registration in his own country. And the same law applies to Colonial trade marks. But in either case actions for "passing off" can be brought in the same way as by a British resident.

The Merchandise Marks Acts 1887-1891 make it a criminal offence to forge a trade mark, or falsely apply any trade mark so as to deceive, or to apply any false trade description to goods. It will be seen that these Acts extend beyond fraudulent trade marks. And even a seller of fraudulently marked goods may become liable unless he can show that he has taken reasonable care.

Sect. 16 (of the principal Act) prohibits the importation of all goods of foreign manufacture bearing any name or trade mark being, or purporting to be, that of any manufacturer, dealer, or trader in the United Kingdom, unless such name or trade mark is accompanied by "a definite indication of the country in which the goods were made or produced." Sect. 18 provides, however, that the Act shall not apply to false trade descriptions when these have been hitherto lawfully and generally applied to indicate goods of a particular class or manufactured in a particular manner. But if the use of a name of a place or country in this connection is calculated to mislead, then the correct name of place or country must be added.

The result of this legislation against fraudulently marked imports has been curious in one respect. As a precaution, or as an advertisement, the name of the country of origin is now frequently indicated under conditions when it is not required by the Acts.

The standard works on the law of Trade Marks are by Sebastian and Kerly.

**Trade Protection Societies of the United Kingdom, Association of.** Established in 1848 to protect and develop the trade of the country, to promote Parliamentary measures, and to aid the interests of the commercial community, and oppose measures injuriously affecting these interests. There are 102 affiliated societies directly representing over 50,000 manufacturers, merchants, and traders in the United Kingdom. The Association is managed by a Committee elected by the Societies, which also are mutual and managed by committees elected by the members. The Association communicates directly with Government departments upon all matters affecting trade. An annual meeting is held in London. President, George M. Chamberlin, J.P.; Sec., J. H. Hadwen. Offices, 16, Berners Street, London, W.

## TRADE REVIEW OF 1906.

Interesting as are many of the special trade features of the year, it is of more importance and value to many to trace the broad developments of our commerce, to know where it is transacted and of what it mainly consists, and to gain some indications as to its trend. By way, therefore, of preface to the more detailed examination of trade movements given subsequently, the following tables are specially constructed to show, over a term of years, what proportion of our imports and exports are derived from foreign countries, and what from British possessions.

### Sources of British Imports.

Over a period of fourteen years our imports have been as follows:—

Imports from	1890.	1898.	1905.
	(£1000)	(£1000)	(£1000)
Russia . . . . .	23,751	19,490	33,366
Scandinavia (including Denmark) . . . . .	18,308	26,427	31,390
Germany . . . . .	26,073	28,534	35,880
Holland . . . . .	25,901	28,533	35,481
Belgium . . . . .	17,384	21,534	27,751
France . . . . .	44,828	51,397	53,073
United States . . . . .	97,283	126,062	115,573
South and Central America . . . . .	15,808	20,445	45,440
Other countries . . . . .	55,105	48,362	59,197
<b>Total foreign . . . . .</b>	<b>324,531</b>	<b>370,784</b>	<b>437,151</b>
British India . . . . .	32,669	27,470	36,062
Straits Settlements and Ceylon . . . . .	8,599	8,800	11,313
South Africa . . . . .	6,096	6,206	5,541
Australia . . . . .	20,992	19,835	26,969
New Zealand . . . . .	8,347	9,016	13,391
N. American Colonies . . . . .	12,444	20,752	26,204
Other possessions . . . . .	7,014	7,682	8,389
<b>Total colonial . . . . .</b>	<b>96,161</b>	<b>99,761</b>	<b>127,869</b>
<b>Grand Total . . . . .</b>	<b>420,692</b>	<b>470,545</b>	<b>565,020</b>

Roughly, four-fifths of our imports come from foreign countries, but the quantities arriving from different sources vary greatly from year to year. As will be seen from a later table, our imports consist mainly of food-stuffs and raw material, and, as regards the former especially, the figures are governed by good or bad production of crops, etc., owing largely to climatic conditions. With every allowance for this consideration, however, certain broad and interesting deductions may be made from the table.

It will be seen that among foreign countries the United States easily ranks first in every case, though its position in 1905 was relatively poorer than in 1898. The second place may be assigned to Germany, Holland and Belgium, which for trade purposes practically form a unit, as most of the productions of Germany, Austria, and Switzerland are shipped through Dutch and Belgian ports. Perhaps, however, the most significant figures in the table as regards foreign countries are those relating to South and Central America, our imports from

that source having nearly trebled in fifteen years. South America is indeed more and more becoming one of the world's greatest granaries, owing to the rapid opening up to agriculture of large and fertile regions, Argentina having particularly developed its agricultural resources.

Of imports from British possessions nearly a third come from India, where a somewhat similar agricultural development to that noted in South America is in progress, though interrupted at times, as in 1898, by drought and famine. Marked improvement has taken place in Australia since the termination of the drought, and New Zealand has recently gone steadily ahead. Remarkable growth is shown by Canada, as a consequence of the opening out of large and rich wheat districts in the North-West.

### **Destination of British Exports.**

As our exports consist mainly of manufactures, they are less liable than the imports to fluctuations of a temporary and accidental character, though they are of course affected to some extent by good and bad harvests.

In the fifteen years covered by the table the proportion of our total exports taken by British possessions has not on the whole varied greatly, being on the average about 30 per cent. The requirements of India vary considerably, but decidedly tend on the whole to increase, as the result of general economic development. Shipments to Australia are now larger than they were before the drought, and there was decided improvement in 1905 as compared with 1904.

Exports to	1890.	1898.	1905.
	(£1000)	(£1000)	(£1000)
Russia . . . . .	8,846	14,187	14,884
Scandinavia (including Denmark) . . . . .	7,822	12,424	14,338
Germany . . . . .	30,516	33,332	42,742
Holland . . . . .	10,446	13,046	14,517
Belgium . . . . .	13,595	13,851	14,819
France . . . . .	24,711	20,514	23,233
United States . . . . .	46,340	28,534	47,282
China and Japan . . . . .	9,586	10,162	23,096
Central and South America . . . . .	27,578	21,271	36,307
Other countries . . . . .	48,290	36,504	53,666
<b>Total foreign . . . . .</b>	<b>233,730</b>	<b>203,825</b>	<b>284,884</b>
British India . . . . .	35,230	30,363	44,361
Straits Settlements and Ceylon . . . . .	3,989	4,057	4,756
Australasia . . . . .	25,456	23,412	26,471
South Africa . . . . .	9,803	13,148	17,840
N. American Colonies . . . . .	8,273	7,541	14,268
Other possessions . . . . .	11,771	11,590	15,017
<b>Total colonial . . . . .</b>	<b>94,522</b>	<b>90,111</b>	<b>122,713</b>
<b>Grand total . . . . .</b>	<b>328,252</b>	<b>293,936</b>	<b>407,597</b>

### **Percentages of Imports and Exports from and to Various Countries.**

In order to present a picture of our foreign trade in a supplementary and rather different

form, we give below the percentages of imports and exports to the various countries over the somewhat lengthened period of fifteen years, showing what proportion of the trade is done with each country, and the extent to which that proportion has varied.

### **Percentages of Imports from Various Countries.**

Imports from	1890.	1898.	1905.
Russia . . . . .	5'6	4'1	5'9
Scandinavia (including Denmark) . . . . .	4'3	5'6	5'5
Germany . . . . .	6'2	6'2	6'2
Holland . . . . .	6'2	6'1	6'2
Belgium . . . . .	4'1	4'6	4'9
France . . . . .	10'7	10'9	9'3
United States . . . . .	23'1	26'9	20'4
Central and South America . . . . .	3'8	4'3	8'0
Other countries . . . . .	13'1	10'2	10'4
<b>Total foreign . . . . .</b>	<b>77'1</b>	<b>78'9</b>	<b>76'8</b>
British India . . . . .	7'8	5'8	6'3
Straits Settlements and Ceylon . . . . .	2'0	1'9	2'0
South Africa . . . . .	1'4	1'3	1'9
Australia . . . . .	5'0	4'2	4'7
New Zealand . . . . .	2'0	1'9	2'3
N. American Colonies . . . . .	3'0	4'4	4'6
Other possessions . . . . .	1'7	1'6	1'4
<b>Grand total . . . . .</b>	<b>100'0</b>	<b>100'0</b>	<b>100'0</b>

### **Percentages of Exports to Various Countries.**

Exports to	1890.	1898.	1905.
Russia . . . . .	2'7	4'8	3'7
Scandinavia (including Denmark) . . . . .	2'4	4'2	3'5
Germany . . . . .	9'3	11'3	10'5
Holland . . . . .	5'0	4'4	3'6
Belgium . . . . .	4'1	4'7	3'6
France . . . . .	7'5	7'0	5'7
United States . . . . .	14'1	9'7	11'6
China and Japan . . . . .	2'9	3'4	5'7
Central and South America . . . . .	8'4	7'2	8'9
Other countries . . . . .	14'7	12'4	13'2
<b>Total foreign . . . . .</b>	<b>71'1</b>	<b>69'1</b>	<b>70'0</b>
British India . . . . .	10'7	10'4	10'9
Straits Settlements and Ceylon . . . . .	1'2	1'4	1'2
South Africa . . . . .	3'0	4'5	4'3
Australasia . . . . .	7'8	8'0	6'5
N. American Colonies . . . . .	2'6	2'6	3'5
Other possessions . . . . .	3'6	4'0	3'6
<b>Grand total . . . . .</b>	<b>100'0</b>	<b>100'0</b>	<b>100'0</b>

### Sources of the Foreign Trade of the United Kingdom.

In order to render these general statistics as comprehensive as possible, we give two further tables in which imports and exports are classified into categories:—

#### Imports from Foreign Countries and British Possessions.

	1899 £1000.	1902 £1000.	1905 £1000.
<b>Food-stuffs, etc.</b>			
From foreign countries	166,964	181,054	172,913
From British possessions	43,377	43,350	59,205
<b>Total</b>	<b>210,341</b>	<b>224,404</b>	<b>232,118</b>
<b>Raw Materials and Articles mainly unmanufactured.</b>			
From foreign countries	100,957	119,634	135,975
From British possessions	49,665	49,413	52,131
<b>Total</b>	<b>150,622</b>	<b>169,047</b>	<b>188,106</b>
<b>Articles wholly or partly manufactured.</b>			
From foreign countries	108,254	118,832	126,548
From British possessions	13,334	13,648	15,992
<b>Total</b>	<b>121,558</b>	<b>132,480</b>	<b>142,540</b>
<b>Miscellaneous.</b>			
From foreign countries	1,958	1,956	1,715
From British possessions	526	505	541
<b>Total</b>	<b>2,484</b>	<b>2,461</b>	<b>2,256</b>
<b>Summary.</b>			
From foreign countries	378,133	421,475	437,151
From British possessions	106,902	106,916	127,869
<b>Grand Total</b>	<b>485,035</b>	<b>528,391</b>	<b>565,020</b>

By far the largest category of imports consists of food-stuffs. The supply of these from foreign countries does not, in the aggregate, vary greatly; while the changes as regards British possessions are mainly occasioned by whether harvests in India and Australia (particularly the former) are good or bad.

As regards raw materials, the most noticeable feature is the considerable increase in the imports from foreign countries in 1905 as compared with 1902. During the last two years many raw materials have been high in price, particularly cotton, which is at present hardly grown at all in the British Empire.

In other categories the changes are unimportant and mainly accidental in character.

### Exports of Home Products to Foreign Countries and British Possessions.

	1899 £1000.	1902 £1000.	1905 £1000.
<b>Food-stuffs, etc.</b>			
To foreign countries	6,420	8,013	11,087
To British possessions	6,452	9,105	8,384
<b>Total</b>	<b>12,872</b>	<b>17,118</b>	<b>19,471</b>
<b>Raw Materials and Articles mainly unmanufactured.</b>			
To foreign countries	26,271	31,415	32,790
To British possessions	2,489	3,183	2,756
<b>Total</b>	<b>28,760</b>	<b>34,598</b>	<b>35,546</b>
<b>Articles wholly or mainly manufactured.</b>			
To foreign countries	142,070	132,499	169,606
To British possessions	77,521	95,038	100,162
<b>Total</b>	<b>219,591</b>	<b>227,537</b>	<b>269,768</b>

<b>Summary.</b>			
To foreign countries	176,827	174,332	216,379
To British possessions	87,665	109,092	113,438
<b>Grand Total</b>	<b>264,492</b>	<b>283,424</b>	<b>329,817</b>

The course of our export trade during the last six years has been noteworthy. The year 1900 was the end of a period of expansion, the total reached in that year being £291,000,000. A decline was experienced in the two succeeding years, but since 1902 the growth has been continuous, and in 1905 and 1906 all previous figures were exceeded.

Our exports of food-stuffs are quite unimportant. Those of raw materials consist mainly of coal, for which the Colonial demand is, by reason of distance and cost of carriage, comparatively small.

Manufactures constitute quite four-fifths of the total exports, and are therefore the category most deserving of attention. Shipments to foreign countries increased very considerably in 1905, and again in 1906, while those to British possessions are at present growing less rapidly, though the volume of the latter is steadily larger on the whole, and shows a growth of about 30 per cent. during the last six years.

#### TRADE MOVEMENTS, 1906.

Our foreign trade, which entered on a period of expansion in the latter part of 1904, and increased continuously throughout 1905, continued to show remarkable growth in 1906. Exports in every month were considerably larger than during the corresponding period of 1905, and the contrast with 1904 is very significant. We are in the midst of a period of

unexampled general prosperity throughout the world. In almost every country in the world great progress is being made, and not only is there a great demand for British manufactures, but capital is again flowing out freely to many parts of the world. Hence the growth in the exports means, among other things, that we are making investments abroad which are adding to our permanent resources.

The official figures for the first ten months for the past three years are as follows:—

Month.	Exports (Home Products only).		
	1904 (£1000).	1905 (£1000).	1906 (£1000).
January . . . . .	24,083	24,990	30,775
February . . . . .	23,895	25,269	28,781
March . . . . .	24,252	28,071	31,651
April . . . . .	24,485	24,138	27,032
May . . . . .	23,332	27,253	31,730
June . . . . .	24,070	25,985	30,639
July . . . . .	24,784	27,821	33,433
August . . . . .	26,360	29,518	33,493
September . . . . .	25,929	29,350	30,525
October . . . . .	25,444	29,367	33,234
<b>Totals (10 months)</b>	<b>246,632</b>	<b>271,763</b>	<b>311,293</b>

As regards imports the record is also a very good one. The total percentage improvement is nearly 8 per cent., which is spread fairly over all categories. The increase in the case of food stuffs is about 4 per cent., indicating a growth in the purchasing power of the inhabitants of this country. As regards raw materials the improvement is as much as 9½ per cent., and though this is in part due to the dearness of some staples, it has also been largely brought about by activity in trade and manufactures. Articles wholly or mainly manufactured improved 9 per cent. Of these, according to the somewhat illogical classification adopted by the Board of Trade, more than a sixth consisted of metals, really raw materials for our industries.

Monthly details are as follows:—

Month.	Imports.		
	1904 (£1000).	1905 (£1000).	1906 (£1000).
January . . . . .	46,132	47,766	53,476
February . . . . .	44,111	42,845	47,529
March . . . . .	48,692	48,983	53,271
April . . . . .	45,182	43,283	47,054
May . . . . .	44,780	46,833	51,430
June . . . . .	43,197	43,557	47,893
July . . . . .	40,957	44,742	48,610
August . . . . .	42,440	46,803	48,895
September . . . . .	43,074	45,733	45,068
October . . . . .	49,518	48,676	54,639
<b>Totals (10 months)</b>	<b>447,875</b>	<b>459,064</b>	<b>497,865</b>

### Coal.

The home demand for coal was active, thanks to general industrial activity throughout the country, and the exports, as will be seen from the figures below, very largely increased.

There was not, however, any decided advance in quotations, prices being only about 1s. per ton dearer in Oct. 1906 than in Oct. 1905. In point of fact, production fully kept pace with the increased demand.

One of the features of Mr. Asquith's Budget in April 1906 was the repeal of the export duty on coal, but as the remission did not take effect until Nov. 1st, its practical result, so far as the export figures for the first nine months of the year were concerned, was negligible. Exports were as follows:—

First nine months.	Exported.	Shipped for the use of steamers.
	Ton .	Tons.
1903 . . . . .	34,768,110	12,377,704
1904 . . . . .	36,950,140	12,837,333
1905 . . . . .	36,679,155	13,071,367
1906 . . . . .	42,872,853	13,845,545

France, Italy, and Germany are still our largest customers, though the shipments to the last-named country were rather smaller than in 1905, partly owing to strikes in various industries there early in the year. At the same time, owing to German inability to spare coal for export, our deliveries to Russia, Sweden, and Belgium, countries which normally are largely supplied from Germany, show a considerable increase. The large exports in 1906 are thus to a great extent exceptional, though there is a fair prospect that for the present they will continue.

### Copper.

The upward movement in the price of copper, which has been steadily in progress since 1902, was specially pronounced in 1906. The fear of large secret supplies entirely disappeared, while great shipbuilding activity, considerable industrial prosperity in all parts of the world, and the spread of electrical railways, steadily increased the demand at a greater rate than the supply. Prices therefore advanced very considerably. In Nov. 1905 G.M.B. was quoted at £76 per ton, and advanced to £79 10s. by the end of that year. With some fluctuations, the quotations during 1906 continued to advance; the price touched £103 per ton early in October. This level has only once before been touched, and that was during the Secretan corner in 1888. It was followed by some temporary weakness, but the quotation early in November stood at £98 per ton, and there is every probability that it will be maintained at a high level, in view of the strength of the industrial position, and of the fact that the world's production, though steadily increasing, is barely equal to the demand.

The imports of raw copper into the United Kingdom increased nearly 10 per cent. in 1906, and those of unwrought and partly wrought showed a distinct but smaller improvement.

### Cotton.

The Lancashire cotton trade was very active in 1906—indeed, more so than at any previous time. As will be seen from the figures below, exports were on an unusually large scale, though during the autumn there was some slackening in the demand. Home requirements were also on a larger scale than usual. At the same time the American cotton crop for

1905-6 was only 11,048,000 bales, as compared with 13,420,000 in 1904-5. Hence, though prices fluctuated somewhat, their average level was high. At the beginning of Nov. 1905 **Middling Upland** was quoted at 5'77d. per lb., but it advanced, on unfavourable crop rumours, to 6'24d. by the end of the year. Apart from a temporary decline in February, it kept steady at rather over 6d. until the end of July, but there was another reaction in August, involving a decline to 5'41d. by the first week in September. Thereafter there was a steady advance, due to unfavourable reports with regard to the growing crop, and the price was 6'34d. in the middle of October. By the middle of November, however, it had fallen to 5'75d.

As already indicated, our **cotton export figures** were unusually large in 1906. Shipments of cotton yarn and twist rose from 168,250,900 lbs. during the first ten months of 1905 to 173,777,400 lbs. during the corresponding period of 1906, and this is the more notable as the advance in the former year was unusually large. By far our best customer is Germany, which bought on a larger scale than usual. There were also increased shipments to India, and a very great improvement in the sales to Japan. The only important customer which took less from us was Turkey.

In **cotton piece goods** there was an improvement of about 15 per cent. in 1905 as compared with 1904, and there was a further increase of nearly 3 per cent. in 1906 as compared with 1905. The total deliveries for the first ten months of 1906 were 5,258,663,300 yards, as compared with 5,112,879,500 during the same period of 1905. India is by far our best customer, taking nearly 30 per cent. of our total exports, and its demands in 1906 showed a very substantial increase. Deliveries to Turkey, China, and Japan also exhibited a very marked improvement. The demand from South America showed contraction, but in nearly every other direction there was considerable growth.

**Cotton hosiery and sewing thread** were exported on a much larger scale in 1906 than in 1905.

#### Flax and Linen.

Though flax ruled fairly high during the year, owing to scarcity of supplies from Russia, and prices were firm throughout, the linen trade was fairly prosperous, as more readiness was shown by buyers to pay prices for manufactured goods commensurate with the cost of the raw material. Exports both of **linen yarn and piece goods** showed a decided increase in 1906. Of the former, 12,370,800 lbs. were exported during the first ten months of the year, as compared with 12,011,200 lbs. during the corresponding period of 1905. Germany is by far our largest customer. In **linen piece goods** there were also increased exports, the total for the first ten months of 1906 being 155,773,600 yards, as compared with 150,003,900 yards for the same time in 1904. More than half the total foreign trade is done with the United States, which proved a particularly good customer in 1906; while exports to Canada, which have now attained considerable proportions, were also on an increased scale. Cuba, to which large quantities are annually sent, took less than usual, owing to political unrest, but there was an increased demand from South America and Germany.

#### Jute.

Jute was very dear during 1906, the price in October being about 50 per cent. higher than a year previously. In spite of this, however, the large crop in India (see **TEXTILE INDUSTRIES**) led to considerably increased imports, while the exports showed some improvement in quantity. Shipments of **jute yarn** for the first ten months of 1906 increased about 16 per cent., while those of piece goods rose from 139,531,700 yards to 142,913,400 yards. Considerably more than half our total exports go to the United States, but competition on the part of the Indian mills is increasingly feared in that quarter.

#### Iron and Steel.

The course of the iron and steel trades during the first ten months of the year was marked by a fair and steady improvement in the home demand, by activity in the shipbuilding industry, and by a very large increase in foreign shipments. Under the influence of these factors prices were firm, with a slightly upward tendency throughout. The present position is on the whole a satisfactory one. There is no apparent slackening in the general home demand, the requirements of foreign countries, and particularly of Germany and the United States, are large, and stocks are within very narrow limits. The least favourable feature is the absence of shipbuilding orders, which indicate that the phenomenal activity recently displayed by that branch of industry is practically over. Labour difficulties may cause unrest in other quarters, and may introduce undesirable complication in the iron and steel trades, but the outlook is on the whole a favourable one.

Perhaps the most remarkable feature of the year was the large growth in **pig-iron shipments**, due largely to the inability of Germany and the United States not merely to export, but even fully to meet their own requirements. Particulars are interesting. Exports of pig-iron have very nearly doubled during the past few years, while the expansion in 1906 was phenomenal. The following is a summary of the trend of the trade during the last two years:—

First nine months.	1905 Tons.	1906 Tons.
Sweden . . . .	30,762	46,057
Germany, Holland, and Belgium . .	202,209	515,434
France . . . .	33,904	79,820
Italy . . . .	84,393	101,536
Japan . . . .	53,093	42,053
British Colonies and India . . . .	77,908	105,425
United States . .	135,622	175,134
Other countries . .	120,728	97,594
Total . . . .	738,624	1,163,053

Shipments of railroad iron declined in 1906, largely as the result of a diminished demand from South Africa and India. Galvanised sheets again improved considerably, but the export of tin plates slightly contracted. Cutlery and tools showed distinct improvement, and the demand for **machinery** was a good deal larger than in 1905.

**Sugar.**

Prices of sugar, though at a comparatively low level throughout, somewhat hardened during the year. The quotation for 88 per cent. beetroot, which stood at 8s. 7½d. in Oct. 1905, had advanced to 9s. 5d. in Oct. 1906. Production, which was low in 1904-5, considerably increased in 1905-6, as will be seen from the following figures:—

**World's Production of Sugar.**

Year ending Sept. 1st.	Beetroot. tons.	Cane. tons.	Total. tons.
1903 ..	5,561,000	4,192,000	9,753,000
1904 ..	5,881,000	4,297,000	10,178,000
1905 ..	4,713,000	4,589,000	9,302,000
1906 ..	6,875,000	4,959,000	11,834,000

As stocks are adequate, and as consumption has never yet reached an annual total of 11,000,000 tons, there seems no reason to anticipate higher prices for the present. Controversy still continues as to the real effects of the Sugar Convention, and it must be some years necessarily before sound conclusions can be definitely arrived at. This much is, however, clear—that the imports of sugar, both refined and unrefined, are again on the up-grade, though how far this is due to increased consumptive power it is difficult to determine. Particulars for the past six years are as follows:—

1st ten months.	Refined. cwts.	Unrefined. cwts.	Total. cwts.
1901 ..	16,380,465	10,554,132	26,934,777
1902 ..	15,675,429	11,146,689	26,822,118
1903 ..	16,197,690	10,490,532	26,688,222
1904 ..	14,291,745	12,038,464	26,330,209
1905 ..	11,639,512	11,195,999	22,835,511
1906 ..	14,833,706	12,773,258	27,606,964

Many fears were expressed when the Sugar Convention came into force as to the injurious results accruing to our export trade in confectionery, jam, etc. So far, however, no harm has been done. It will be seen from the figures below that our shipments have considerably and continuously increased during the past four years, allowing for the 1906 figures being only for a portion of that year:—

**Exports of Confectionery, Jam, etc.**

Year	cwts.	£
1900 ..	276,248	606,867
1901 ..	309,251	749,572
1902 ..	335,228	845,819
1903 ..	319,931	802,879
1904 ..	314,879	812,213
1905 ..	345,376	895,597
1906 (10 months)	279,775	730,619

**Tea.**

Tea prices were steady during the past year, with a hardening tendency, and the position may be described as fairly satisfactory. Contrary to original expectation, the output in India during 1905 showed only a nominal increase, and this largely accounted for the firmness of prices. Messrs. Gow, Wilson, & Stanton give the following comparative statistics:—

**Indian Tea Production.**

	Area. acres	Production. lbs.
1901 ..	525,397	191,302,773
1902 ..	525,252	188,409,261
1903 ..	526,611	209,041,888
1904 ..	524,527	222,203,661
1905 ..	527,350	222,350,532

It will be noticed that while the area under cultivation has remained practically stationary during the past six years, production has increased over 30 per cent. This is explained by the fact that during the earlier part of the period there was a considerable proportion of immature plants, which have since become mature. This accounts for the small increase in 1905. It therefore seems probable that prices for some time will continue firm, with an upward tendency. Another indication pointing in the same direction is furnished by the statistics of exports to outside countries, which are as follows:—

**Exports of Indian and Ceylon Tea to countries other than the United Kingdom.**

First six months	lb.
1902 ..	38,959,000
1903 ..	44,167,000
1904 ..	54,260,000
1905 ..	53,604,000
1906 ..	61,148,000

The slight check experienced in 1905 was mainly owing to the diminution in the Russian demand, occasioned by the late war with Japan. Otherwise the expansion has been continuous, and even rapid, and there is every prospect of its continuance. Hence the tea industry is at present in a sounder state than it has been for years past.

There is of course not the same scope for improvement as regards exports to the United Kingdom, but these are also growing with the expansion of population, as will be seen from the figures contained in the following table. It covers a period of nearly forty years, and shows the decay of the China and the marvellous rise of the Indian and Ceylon trade.

**Tea entered for Home Consumption.**

Yr.	China 1000 lbs.	India 1000 lbs.	Ceylon 1000 lbs.	Total 1000 lbs.
'59	76,304	None	None.	76,304
'69	101,080	10,716	None.	111,796
'79	126,340	34,092	None.	160,432
'85	113,514	65,678	3,217	182,409
'90	57,530	101,962	34,516	194,008
'95	26,201	116,343	74,024	221,800
'00	13,144	138,025	92,470	249,792
'02	11,531	148,728	85,541	254,440
'04	11,048	155,197	79,445	256,560
'05	6,659	150,530	89,386	259,089
'06*	4,753	130,535	78,646	225,033

\* 10 months only.

**Tin.**

Owing to the relatively small supplies from the Straits, to small stocks, and to a general consumptive demand of a very strong character, the price of tin in 1906 touched phenomenal figures, and there is no present prospect of a decidedly lower range of values. This state of affairs has been most beneficial to Cornwall, and many mines there which for years past have been dragging out a precarious and unprosperous existence, have shown very good results of late. The following table shows the highest and lowest prices of tin per ton during the past ten years:—

	Highest.	Lowest.
1896 .. .. .	61 $\frac{3}{4}$	56
1897 .. .. .	63 $\frac{3}{4}$	58 $\frac{3}{4}$
1898 .. .. .	86 $\frac{3}{4}$	63
1899 .. .. .	149 $\frac{1}{2}$	92
1900 .. .. .	152	108
1901 .. .. .	132	101
1902 .. .. .	137	100
1903 .. .. .	140 $\frac{1}{2}$	111 $\frac{1}{2}$
1904 .. .. .	136 $\frac{1}{2}$	116 $\frac{1}{2}$
1905 .. .. .	166 $\frac{1}{2}$	120 $\frac{1}{2}$
1906 .. .. .	215	161

Apart from a set-back in 1901 the price has risen almost continuously during the past decade, a fact which points to a firm state of prices in the near future.

### Wool.

Though supplies of Australian wool, the chief market factor, are considerably increasing, and are likely in 1907 to attain even larger proportions, prices were well upheld. Thanks to manufacturing activity, the trade was easily able to absorb all supplies available, while stocks continue at a low level. How far increased supplies in 1907 will affect values is of course a matter of uncertainty, and is much discussed in wool circles, but there seems a fair probability that the range of quotations will at any rate be such as to be satisfactory to growers. As will be seen from the following table, supplies have of late years been much below the former level, and the rate of increase is not very rapid, considering the activity of trade.

### Imports into the United Kingdom.

	Colonial. Bales.	Foreign. Bales.	Total. Bales.
1884 ..	1,285,641	318,998	1,604,639
1888 ..	1,534,343	468,617	2,002,960
1892 ..	1,765,904	505,638	2,271,542
1896 ..	1,674,878	402,181	2,077,059
1898 ..	1,556,638	526,595	2,082,984
1900 ..	1,223,733	459,706	1,683,439
1902 ..	1,443,981	483,900	1,927,881
1903 ..	1,312,588	506,081	1,818,669
1904 ..	1,194,482	527,182	1,721,664
1905 ..	1,331,538	526,310	1,857,848

### Woolens and Worsteds.

Though in some directions the high price of the raw material had a detrimental effect on the volume of our exports, the foreign demand was on the whole larger in 1906 than in 1905, and trade was fairly satisfactory from the manufacturers' point of view.

A distinct improvement took place in yarn shipments. Exports of woollen yarn increased in value about 18 per cent., while those of worsted yarn fully recovered the decline which took place in 1905. Nearly three-fourths of the total goes to Germany, which proved a much better customer than in the preceding year, and Belgium, France, and Russia also bought more freely. The total exports of worsted yarn amounted to 44,300,500 lbs. for the first ten months of 1906, as against 39,352,100 lbs. for the corresponding period of 1905. Shipments of alpaca and mohair yarn, of which two-thirds go to Germany, showed an increase of about 20 per cent.

The export of woollen piece goods, which has been steadily growing for some years past, experienced another decided advance in 1906.

The improvement during the last four years is sufficiently remarkable to render the following details of interest:—

rst ten months.	Yards.
1903 .. .. .	42,195,300
1904 .. .. .	54,543,100
1905 .. .. .	59,911,100
1906 .. .. .	67,716,400

Hitherto China has been our best customer, but it was easily surpassed in 1906 by Japan, which increased its takings by over 2 $\frac{1}{2}$  million yards. Canada, which stands second, bought much more freely than in the previous year, and shipments to nearly all parts of Europe showed distinct improvement. South America, South Africa, India, and the Argentine all bought more freely, and there were no important declines in any direction.

Worsteds piece goods show a decline as regards quantity, though values were higher. This falling off was more than accounted for by reduced orders from the United States, which bought more freely than usual in 1905, improvement being shown as regards most other countries. The total exports for the first ten months of 1906 were 83,220,300 yards, as against 88,403,500 yards during the same period of 1905.

The demand for flannels again showed a reduction, but there was a considerable improvement (amounting to about 18 per cent.) in carpets. Canada, which is much our largest customer, bought more freely, and there was also a better demand from the United States and Australasia.

### TRAMWAYS.

The following details are taken from the returns issued by the Board of Trade (Railway Department) as to the Street and Road Tramways and Light Railways of the United Kingdom. The returns are made up to Dec. 31st, 1904, in respect of Companies, and to March 31st, 1905, in respect of Local Authorities.

In 1905 there were 174 undertakings belonging to Local Authorities, with 1395 miles of line open for traffic, and 146 to other than local authorities, with 721 miles open for traffic. The capital expended on the former was £32,964,144, and on the latter £19,711,008.

The following are the latest figures, for the year 1904-5:

Authorised Capital ..	£79,451,642
Paid-up Capital ..	£51,501,410
Capital expended ..	£52,675,152
Miles open ..	2117
Electric Traction ..	1786
Horse ..	210
Steam, Cable, etc. ..	126
Horses employed ..	13,357
Loco Engines ..	237
Cars running, electric ..	8,292
" " non-electric ..	2,052
Gross Receipts ..	£9,917,026

### TREASURY.

The Lord High Treasurer, who, when existing, is the third great officer of State, had of old the appointment of all officers employed in collecting the revenues of the Crown, the nomination of all escheaters, and the disposal of all plans and ways relating to the revenue; and power to let leases of Crown lands. This definition of his powers and duties still holds good, to a great extent, in regard to the Treasury Board; although the management of the Crown lands has long since passed into the hands of the Commissioners of Woods and Forests. The Treasury has control over the management, collection, and expenditure of the public revenue (see p. 156), and exercises a general supervision and control over all the public departments, and no increase of salaries or additions to or material changes in the civil establishments can be made without its authority. All exceptional cases in matters of revenue are referred to it, and it settles all questions regarding the amount of compensations, allowances, and pensions to be awarded in exceptional cases. It audits the civil list, and is the accounting department to the House of Commons for a number of Civil Service Votes, including those for rates on Government property, secret service, criminal prosecutions, revising barristers, learned societies, suppression of the slave trade, subsidies to telegraph companies, and for temporary commissions.

Since the days of George I. the powers and duties of the office of the Lord High Treasurer have been invariably executed by Commissioners, consisting of the First Lord of the Treasury, the Chancellor of the Exchequer, and three Lords Commissioners, who are usually designated Junior Lords. The First Lord, if he fill that office only, has no share in the management of the department; but some minor duties, such as recommending for Civil List Pensions, appertain to his position. A number of appointments are in his gift, and he is an *ex-officio* trustee of the National Gallery and British Museum. For nearly eighty years prior to '85 the office of First Lord was invariably held by the Prime Minister of the day. The departmental duties of the three junior lords are almost nominal. The Patronage Secretary to the Treasury is principal Government Whip (see p. 330). The commissioners forming the Treasury Board seldom if ever meet; and in fact the real work of the department is performed by the Chancellor of the Exchequer, who is its

effective head, aided in matters of detail by the Financial Secretary, and the Permanent Secretaries, Sir Edward Hamilton, G.C.B., K.C.V.O., I.S.O., and Sir George Murray, K.C.B., I.S.O.

The Chancellor of the Exchequer sees that the estimates sent in by the spending departments are framed with due regard to economy, is made acquainted with the views of the revenue departments regarding probable receipts, and then prepares and introduces his Budget. Appointments in the National Debt Office are in his gift, and not only questions affecting public revenue and expenditure, but the National Debt, and the best methods of reducing it, and the advances made by the National Debt Commissioners for local loans, are all matters within his special cognisance. He is master of the Mint, and he presides at the nomination of sheriffs. Like the First Lord of the Treasury, he is provided with an official residence at Downing Street. In connection with the Treasury there is a Parliamentary Counsel who drafts Government Bills, and a Solicitor who acts for the Government in certain legal prosecutions, and is the Crown's nominee when His Majesty becomes entitled to the personal estate of an intestate, and administration is granted by the court; and who is also King's Proctor for Divorce Interventions and Director of Public Prosecutions.

Tree, Herbert Beerbohm, the actor, is the son of a grain merchant named Beerbohm, and was b. in London in 1853. Shortly after entering his father's office in '70 he became a member of the Irrationals Amateur Dramatic Club, and joined the profession in '77. His first hit was as the timid curate in "The Private Secretary," at the Prince of Wales's; and immediately after he played the grim spy Macari in "Called Back." Taking the Comedy Theatre ('87), he produced "The Red Lamp"; and in the autumn of the same year took the Haymarket Theatre. In April '97 he opened his new theatre, His Majesty's, in the Haymarket. Here he has produced the greatest of his successes: "Julius Cæsar" ('98), "King John" ('99), "A Midsummer Night's Dream" and "Herod" (1900), "Twelfth Night" (1901), "The Merry Wives of Windsor," with Miss Ellen Terry and Mrs. Kendal in the cast, "Ulysses," "The Eternal City" (1902), "King Richard II.," "The Darling of the Gods" (1903), "The Tempest" (1904), "Much Ado about Nothing," "Business is Business," "Oliver Twist," "Nero," and "Colonel

Newcome" (1906). In 1905 he inaugurated a Shakespeare Festival, which is now one of the annual arrangements of the theatre. During the Shakespeare celebrations in 1906 he revived "Hamlet," "Julius Caesar," "Twelfth Night," "Much Ado about Nothing," "Henry IV." (Part I.), and "The Tempest." His wife, an admirable Greek scholar formerly connected with Queen's College, is a very refined actress.

**Treloar, Sir William**, Lord Mayor of London, was b. at his father's house in Ludgate Hill in 1843; ed. at King's Coll. School, and afterwards entered the carpet manufacturing business in Ludgate Hill, becoming sole proprietor in '86. He m. in '65, Annie, daughter of the late Mr. George Blake. He is a Mason, a Conservative in politics, and a Churchman. In '93 he became President of the National Sunday League, and succeeded in getting the Guildhall Art Gallery opened to the public on Sundays. He also instituted the annual Christmas entertainment of ragged, destitute, and crippled children at the Guildhall. In '81 he was elected to the Common Council, and became Alderman for his ward of Farringdon Without in '92. He was Sheriff in '99, and was then knighted. J.P. for the City of London, Kent, and Surrey, and Past Master of the Loriners' Company.

**Trinity House** was incorporated in the year 1514, by King Henry VIII. In the present day the Trinity House exists in several capacities: (1) **As the General Lighthouse Authority** for England and Wales, the Channel Islands, and Gibraltar, it deals with the lighthouses, light-vessels, buoys, beacons, fog-signals, and removal of dangerous wrecks on our shores, exercising control over the local light authorities within their own area, as well as over the other general lighthouse authorities of the kingdom. There are District Stations at Blackwall, Sunderland, Yarmouth, Harwich, Ramsgate, Cowes, Penzance, Milford Haven, Cardiff, Holyhead, and Gibraltar. (2) **As the Chief Pilotage Authority** of the kingdom it has the management of all matters relating to pilots and pilotage in the London, English Channel, and certain other districts on our coasts. (3) **As an Ancient Corporation** it possesses estates and almshouses, and awards pensions and bounties to distressed mariners and their widows. (4) **As Nautical Advisers** two of the Elder Brethren in turn assist the Judges in the Admiralty Division of the High Courts of Justice in determining marine causes tried at law. The Elder Brethren consist of members of the Royal Family and statesmen (eleven in number), retired officers of high rank in the Royal Navy, and commanders in the mercantile marine (13 in number), as shown in the accompanying list:—Master, Vice-Adm. H.R.H. the Prince of Wales, K.G.; Deputy-Master, Capt. Sir George Vyvyan, K.C.M.G.; Elder Brethren, H.M. King Edward VII., Capt. John Fenwick, Admiral Sir F. Leopold M'Cintock, K.C.B., Capt. Arthur Edward Barlow, Right Hon. Lord George Hamilton, G.C.S.I., Rear-Admiral Hector B. Stewart, Right Hon. the Earl of Rosebery, K.G., Capt. Adolphus Edmund Bell, Right Hon. Viscount Goschen, Field-Marshal H.R.H. the Duke of Connaught and Strathearn, K.G., Capt. A. S. Thomson, C.B., Capt. A. W. Clarke, Capt. Robert Hoare, Capt. H. A. Blake, Right Hon. Joseph Chamberlain, M.P., Capt. Laurence Hugh Crawford, C.B., Right Hon. A. J. Balfour,

M.P., Right Hon. the Earl of Selborne, Rear-Admiral H.S.H. Prince Louis of Battenberg, G.C.B., Right Hon. the Earl Spencer, K.G., Capt. Oswald Percival Marshall, Capt. Thomas Golding, Secretary, Mr. Arthur Owen. Headquarters, Trinity House, Tower Hill, London.

### TRIPLE ALLIANCE.

The Triple Alliance was concluded in consequence of the occupation in 1881 of Tunis by France (at the suggestion of Prince Bismarck), and the consequent isolation of Italy, who, feeling herself menaced by France, became a party to the then existing alliance for mutual defence between Germany and Austria. That Alliance, which was directed against Russia, whose Eastern policy was held to threaten the balance of power in Europe, was made in 1879 by a treaty arranged within one year after the Berlin Congress by Prince Bismarck and Count Andrassy, and confirmed in '80, and Italy joined it in '82. Italy was also influenced by the possibility then apprehended that a French clerical attempt might be made to restore the temporal power of the Pope and so dismember Italy. The three allied nations agreed to defend the integrity of their Continental possessions, as then and now existing, against any other or others of the great Powers. In October '87, after a meeting between Bismarck and Crispi at Friedrichsruhe, a still closer alliance in the nature of an offensive and defensive league between the three Powers was concluded. The terms of the treaty have never been officially published, but it has been stated that Italy agreed, under certain contingencies, the most probable of which was a war between France and Germany, to invade South-Western France with 200,000 men. During 1901 M. Henri des Houx professed to give a secret clause of the treaty, according to which Italy bound herself to place two army corps at the disposal of Germany in case of a war with France, sending them into Germany across Austrian territory. In 1902 Count von Bülow, the German Imperial Chancellor, declared that "none of the partners to the Alliance was obliged by the Alliance to maintain its military or naval forces at a prescribed level"; and that the "Alliance did not exclude the possibility of good relations between its partners and other Powers." The Italian Government also gave assurances to France that in no case could Italy become either the instrument or the auxiliary of an aggression against France. One main object of the Alliance was the maintenance of the balance of power in the Mediterranean, an object which undoubtedly had the sympathy of Great Britain, though no formal pledge was entered into by the British Government.

France and Russia in '87 had been for some time on friendly terms, and it was no doubt their *rapprochement* which led to the closer bond which, as has been said above, was in that year effected between the three Powers. In '91 Admiral Gervais took his fleet to Cronstadt, and began the series of visits interchanged between France and Russia which eventually led to the formal acknowledgment of the Dual Alliance, which has since confronted the Triple Alliance in Europe. In June '91 the Triple Alliance was formally renewed, and again in '96 until May 6th, 1903.

On June 28th, 1902, the three Powers agreed to prolong the Alliance for ten years. The revelations made by Prince Bismarck in '96 as to the existence of a secret treaty of "benevolent neutrality" between Germany and Russia until '90, when Count Caprivi succeeded Prince Bismarck as Imperial Chancellor, caused much excitement in Austria and Italy, of course, but had no effect on the Alliance. In '96 Roumania joined the Triple Alliance, which guaranteed her territorial integrity and the maintenance of the *status quo* on the Lower Danube.

The rapprochement between Italy and France, which had in Dec. 1901 become a complete and friendly understanding in regard to all questions affecting the Mediterranean and Italian interests in Tripoli, was sealed in 1903 by the visit of the King and Queen of Italy to President Loubet and by the conclusion of a treaty of arbitration between the two countries on Dec. 25th, 1903. This *rapprochement*, as Signor Prinetti, then Italian Foreign Minister, admitted in 1902, deprived some of the considerations which had led Italy to enter the Triple Alliance of much of their weight. Similarly, the better feeling that prevailed between France and Great Britain during 1903, and found expression in Royal and Presidential visits, and in 1904 in the Anglo-French Agreement, had its natural result, together with the result of the Russo-Japanese war, in modifying the manner in which the Dual Alliance between France and Russia was regarded.

The Anglo-French entente excited considerable apprehension in Germany during 1905. It was stated on high authority that an alliance between France and Great Britain was proposed, and that M. Delcassé resigned on this question. The *entente* between the two countries, however, remained unshaken, and was probably even strengthened, by the action of Germany with regard to the Morocco question. On the other hand, the Algeciras Conference (see MOROCCO) showed that the aggressive policy of Germany was far from acceptable to Italy, and some friction was caused by the remarkable telegram of the German Emperor to Count Goluchowski in April 1906 acknowledging his aid as that of "a brilliant second on the duelling ground" at the Conference. This seemed to reflect upon Italy; and, probably to redress the balance, the Emperors of Germany and Austria-Hungary when they met in Vienna sent to the King of Italy, "our third true ally, the expression of our unchangeable friendship."

**Tschirsky und Bögendorff, Herr Heinrich von**, German Minister of Foreign Affairs, was b. 1838. Belongs to a titled family of Saxony, which has supplied many soldiers and public men to that country. After serving for a period in the Saxon judicial service, Herr von Tschirsky was transferred to the Foreign Office. In '83 he became an Attaché at Constantinople, and served in turn at Vienna, Athens, Berne, and St. Petersburg, until, in 1900, he became Germany's diplomatic representative in Luxembourg. Two years later he was made Prussian Minister at Hamburg. He was repeatedly selected by the German Emperor to accompany him on his travels as the representative of the Foreign Office, and in 1906 he succeeded Baron von Richthofen as Minister of Foreign Affairs. The growth of German influence in the Near East is ascribed in a great measure to his influence.

## TURKEY.

### Ruler.

**Abd-ul-Hamid II., Sultan of Turkey**, was b. Sept. 22nd, 1842, and was the second son of Sultan Abd-ul-Medjid. He was proclaimed Sultan in succession to his brother Murad V., who was deposed in consequence of his mental incapacity (Aug. 31st, '76), and died on Aug. 29th, 1904. The succession to the throne, according to Turkish custom, vests in the senior male descendant of the house of Othman, sprung from the Imperial Harem. The Sultan does not marry, but from the inmates of the Harem selects a certain number who are known as Ladies of the Palace, the others occupying positions subordinate to them. All children born in the Harem are held to be of legitimate and equal birth. The eldest son of the Sultan only succeeds when there are no uncles or cousins of greater age than himself. The Sultan has several children, the eldest being Mehmed-Selim Effendi, born Jan. 11th, '70. His brothers are the heir-apparent Mehmed-Reshad Effendi, b. '44; Süleiman Effendi, b. '60; and Wahid-Uddin Effendi, b. '71. Under the rule of Abd-ul-Hamid the Ottoman Empire has been dismembered of some of its fairest regions. The Berlin Treaty, concluded after the disastrous war with Russia in '78, practically deprived the Sultan of Bulgaria, Bosnia, and Herzegovina in Europe, and of Ardahan, Kars, and Batoum in Asia.

### Government.

An empire possessing extensive territories in South-Eastern Europe, Western Asia, and North Africa. The Asiatic possessions are Asia Minor, Armenia and Kurdistan, Mesopotamia and Syria, and Yemen and the Hedjaz in Arabia. In Africa Tripoli and Bengazi belong to Turkey. Particulars are given below as to some of the more important of these provinces. Turks, Greeks, and Albanians make up 70 per cent. of the population in European Turkey. In Asiatic Turkey there are also large numbers of Turks, about 4,000,000 Arabs, and many Greeks, Kurds, Circassians, Armenians, etc. Nominally subject to Turkey are Bulgaria, Bosnia-Herzegovina, Samos, Crete, and Egypt. There are, it is estimated, about 16,000,000 Mahometans and 5,000,000 Christians (of the Roman, Greek, and other Churches) within the empire, besides those of other faiths.

The commands of the Sultan are absolute, unless opposed to the express directions of the Koran, a legal and theological code upon which the fundamental laws of the empire are based. The legislative and executive authority is exercised through the Grand Vizier and the Sheikh-ul-Islam, who are appointed by the Sultan, the latter with the nominal concurrence of the Ulema or general body of lawyers and theologians, over which the Sheikh-ul-Islam, as head of the Church, presides. The Grand Vizier, as head of the temporal government, is assisted by the Medjliss-i-Hass or Cabinet of Ministers, of whom there are 12, including the Grand Vizier and the Sheikh-ul-Islam. The 10 other Ministers each take charge of a department, e.g., the Interior, War, Foreign Affairs, Finance, Justice, etc.

### The Army.

The Turkish military forces are organised on the territorial system, the whole empire being divided into seven territorial districts. By the

recruiting law all Mussulmans are liable to military service. Christians and certain sects pay an exemption tax. The nomad Arabs, although liable to service by law, furnish no recruits, and many Kurds evade service. The conscription therefore falls somewhat heavily on the Osmanlis, or Turks proper.

The men liable to service are divided into—(1) *Nizam*, or regular army, and its reserve; (2) *Redif*, corresponding to a Landwehr; and (3) *Mustahfiz*, or Landsturm. There are also 660 *Ilavah* battalions, mostly skeleton formations, in which men supplementary to the establishments are enrolled. Liability to service until recently commenced at twenty years of age, and lasted for twenty years—*i.e.*, with colours of the *Nizam*, four years; in the Reserve of the *Nizam*, two years; in the *Redif*, four years in first class and four years in second class; and in the *Mustahfiz*, six years. An *Irade* issued in Nov. 1903 increased the total *Nizam* service to nine years and the *Redif* service to nine years, it being estimated that this will add 250,000 men to the army. The Cavalry are set down at 55,300; the Artillery (174 field and 22 mountain batteries) at 54,720—1356 guns; the Engineers at 7400; Infantry, 583,200; total, 700,620. The *Nizam* has 320 battalions, 203 squadrons, and 248 batteries, and the *Redif* 374 battalions, 666 supplementary battalions (incomplete), and 48 squadrons. An irregular "*Hamidieh*" Cavalry has been raised among the Kurds, and has 266 squadrons.

The total war strength is estimated to be: 46,400 officers, 1,531,600 men, 1530 guns, and 109,900 horses. The Ottoman army has been trained and reorganised largely by German officers, and is composed of the best fighting material.

### The Navy.

The Naval departments of the Ministry of Marine are under the control of Vice-Admiral Mehmet Rijaat Pasha, and the Civil under Djelal Pasha. There are 81,000 officers and men in the Navy, and 9000 marines. The officers are divided as follows: 2 admirals, 9 vice-admirals, 16 rear-admirals, 30 captains, 90 commanders, 300 lieutenant-commanders, 250 lieutenants and 200 sub-lieutenants.

The strength in ships built and building on Nov. 30th was:—

	Built.	Building.
Battleships . . . . .	7	—
Protected cruisers . . . . .	3	4
Torpedo vessels . . . . .	6	—
Torpedo boat destroyers . . . . .	4	—
Torpedo boats . . . . .	25	—
Submarines . . . . .	2	—

Four battleships are being reconstructed—the *Feth-i-bulend*, *Mukadem-i-Hair*, *Muin-i-Zaffer*, and *Avni-illah*. The four vessels building are the *Fezibahri*, the *Hundavendikar*, the *Selimiéh*, and the *Shadie*, all of which are under construction in Turkey. A torpedo boat was launched for the Turkish Navy at the yard of the Ansaldo Armstrong Co. at Sestri Ponente, in May 1906.

### Administration, Religion, etc.

For administrative purposes the empire is divided into *vilayets* or governments, subdivided further into provinces (*sanjaks*), districts (*kazas*), sub-districts (*nahiés*), and communities (*kariés*). These are governed

by Valis, or Governors-General, with provincial councils, and by subordinate officials. Foreigners living in Turkey are amenable only to their respective Consular tribunals, except in cases where Turkish subjects are concerned, which come before the Turkish courts, or when the case relates to landed property owned by foreigners, when it comes before a Turkish civil court. Mahometanism is the religion of only about half the population in European Turkey, though it is professed by the great majority of the inhabitants of Turkey in Asia. Mahometan priests number 11,600, and are subject to the *Sheik-ul-Islam*, but their offices are hereditary. The Government recognises the ecclesiastical heads of the Roman, Greek, Armenian, Protestant, and other Churches, however. Education is given in about 36,000 schools of different kinds, and is free. There is a university at Constantinople.

### Industries and Trade.

Agriculture is largely carried on, but in very primitive fashion, and is greatly hampered by the tithes and taxes levied on agricultural produce, even when exported from one province to another. Tobacco, cereals, cotton, coffee, wine, silk and fruits are the chief productions. The provinces in Asia abound in minerals, coal, borax, manganese, chrome, silver-lead, etc., which, however, are little worked. All goods imported are taxed 8% *ad valorem*, except tobacco and salt. There are about 3425 miles of railway open. The capital is Constantinople, with a population of about 1,125,000. Other chief towns are Damascus (230,000), Smyrna (201,000), Bagdad (145,000), Aleppo (127,150), Beirut (119,000), Salonica (105,000), and Adrianople (81,000).

### Statistics and Diplomatie.

The area of Turkey, without the states nominally subject to it, is estimated at 1,111,741 sq. m.; and the total population at about 25,000,000. The area of Turkey in Europe is 65,350 sq. m., pop. 6,130,000; in Asia Minor, 193,540 sq. m., pop. 9,090,000; Armenia and Khurdistan, 75,000 sq. m., pop. 2,500,000; Mesopotamia, 143,250 sq. m., pop. 1,400,000; Syria, 114,530 sq. m., pop. 2,890,400; in Arabia, 170,300 sq. m., pop. 1,050,000; in Africa, 400,000 sq. m., pop. 1,000,000. Revenue, about £17,150,000; expenditure, not known. Public debt, 1905, £110,152,000. By June 1905 the unification of the Series Debt, amounting to £69,100,000, was practically completed. Imports, '98-9, £24,201,129; '99-1900, £22,269,580; exports, '98-99, £12,204,945; '99-1900, £14,174,005.

**British Consuls**, H. Z. Longworth (Aleppo), F. E. Crow (Basra), Captain L. R. Samson (Adrianople), J. F. Jones (Jidda), E. C. Blech (Jerusalem), F. G. Freeman (Trebizond), and G. P. Devey (Damascus).

### History, 1906.

Under EGYPT (p. 133) the failure of the Porte's attempt to occupy territory within the Anglo-Egyptian sphere in the Sinai Peninsula is recorded. A similar attempt was made to establish Turkish claims to the oasis of Janet, in the Tripolitan hinterland, but the French Government took energetic measures to prevent this encroachment, and the Porte (Aug. 21st) ordered Janet to be evacuated and the troops on the way thither, if they had not already arrived, to be stopped. On another side the Turkish Government displayed enterprise, and a long dispute occurred through their action in occupying certain districts on the Persian frontier which had hitherto been under Persian administration. The British and Russian Ambassadors supported the Persian Ambassador at Constantinople, and in May it was agreed that the Turkish troops should be withdrawn from Passoah and the frontier delimited by a joint Commission.

A long discussion took place during the year on the question of the proposed increase in the Turkish Customs duties from 8 to 11 per cent. *ad valorem*. The British Government stipulated, among other things, that the Porte should give effective guarantees for the proper collection of the increased duties and the application of the money raised primarily for the benefit of Macedonia. Ultimately on Sept. 30th a Joint Note was agreed on by the Powers laying down the conditions on which they would consent to the increase; and on Nov. 9th the Porte accepted the conditions and undertook that its share in the increased Customs revenue due to the extra duty should be devoted exclusively to the financial needs of the three Macedonian vilayets. The other conditions of the Powers had reference to amendments in the mining laws, in the organisation of the Customs administration, the chemical analysis of imported goods, etc.

### Albania.

Albania is a part of the Turkish Empire in Europe, extending along the Adriatic coast between Montenegro in the north and Greece in the south, and lying opposite the Italian coast. It includes the vilayets of Scutari, Yanina, and Kossovo. There are about 1,500,000 Albanians, divided into the Ghegs who live in the north of Albania, and the Tosks who dwell in the south. They are Mahomedans for the most part. The Sultan's bodyguard is recruited from Albania. Greece and Montenegro are both keenly interested in the future of Albania, and so is Italy for geographical reasons. She has disclaimed any territorial ambitions there, but she would not tolerate the occupation of Albania by any other Power.

### Arabia.

The two Turkish provinces in Arabia are Hedjaz and Yemen. Hedjaz contains 96,500 sq. m., and a pop. of 300,000. The Hedjaz camels are bred here, and about 20,000 are sent annually to Syria. The imports *via* Jiddah were, 1904, £1,405,422; and the exports £25,128. A railway is being built connecting with the Anatolian and Baghdad systems, and giving access to the sacred places of Arabia. See Mecca Railway under ENGINEERING. Mecca, besides being the goal of Mahometan pilgrims, who numbered 65,500 (11,820 from India) in 1905, is the chief distributing centre for Central Arabia.

Yemen has an area of 73,800 sq. m., and a pop. of 750,000. The inhabitants are Zaidis—Arabs who do not acknowledge the Sultan of Turkey as commander of the faithful. They rose in revolt in Feb. 1905, led by the Imam Yahia, defeated a force under Riza Pasha, and captured the town of Sana in April. Other towns were taken, and by the end of June the province was completely under the power of the insurgents. Marshal Ahmed Feizi Pasha was then appointed to command the Turkish forces, and advanced on Sana. The insurgents destroyed the Government buildings there, cleared out the stores, and retired to the west. Feizi Pasha entered Sana (Sept. 5th), but found it almost deserted. Other towns surrendered to him subsequently, and he recovered guns and rifles previously taken by the insurgents. Fighting went on in 1906 with no definite result, except that the Turkish troops could make no headway. They were decimated by disease, and a serious mutiny occurred during the summer.

### Armenia.

Armenia, together with Khurdistan, forms a part of the Turkish Empire in Asia. The total area is about 75,000 sq. m., and the population was recently estimated at from 2,500,000 to about 5,000,000. Tradition assigns the cradle of the human race to Armenia. The country contains some mineral wealth, which, however, needs developing. The province is divided into three vilayets or governments—Erzerum, Mamuret ul Aziz, and Diabekr, with the districts of Bitlis and Van. The inhabitants are of the Christian faith, most of them belonging to the Gregorian Church, which greatly resembles the Greek Church in doctrine and ritual. There are many, however, who acknowledge the authority of Rome, though retaining their own distinctive ritual. In '94 terrible atrocities were perpetrated upon the Armenians in the Sasun district. A Pan-Armenian Congress met at Brussels in July 1902, and formed a Permanent International Committee to watch over Armenian interests and promote reform.

**British Consul**, H. S. Shipley, C.M.G. (resides at Erzerum); **Vice-Consul**, W. J. Heathcote, Bitlis.

### Macedonia.

Macedonia is the country which lies principally in the three vilayets (or provinces) of Salonika, Monastir, and Kossova. It is bounded by Bulgaria on the north and by the Aegean Sea on the south; Albania lies on the west. There are large numbers of Bulgarians and Christians of other nationalities in Macedonia. These differ fiercely amongst themselves, the Bulgarian Exarch being at the head

of the Bulgarian Christians, while the Patriarch of the Greek Orthodox Church is acknowledged by other Christians; and the Turks and Albanians oppress them all in brutal fashion, the authorities helping them as a rule. The real responsibility for the state of affairs in Macedonia, however, rests upon the Powers who have neglected to enforce the execution of Article 23 of the Treaty of Berlin. Under the previous Treaty of San Stefano, Macedonia was included in the principality of Bulgaria; and though the Treaty of Berlin altered this and left Macedonia to Turkey, it provided that reforms should be carried out in the provinces under the supervision of special commissioners. The Porte pursued its usual policy of evasion, the Powers did not insist, and so matters remained in *statu quo*. The **Macedonian Committee** at Sofia has long agitated for the introduction into Macedonia and the vilayet of Adrianople of reforms analogous to those given to Crete. A rising took place in the vilayet of Monastir in Sept. 1902, which was followed by terrible atrocities. The Governments of Austria-Hungary and Russia drew up at the close of 1902 a Reform Scheme, which the Sultan accepted and approved, but it was never carried out; and the year 1903 was marked by terrible excesses on the part of the Turkish troops, especially the Bashi-Bazouks, and by fierce and despairing fighting on the part of the revolutionary bands. Ultimately, after a Conference between the Czar and Emperor Francis Joseph at Murzsteg, a Joint Note was sent to the Porte insisting on the execution of the Reform Scheme, and demanding the Porte's consent to the introduction of a system of foreign control to ensure its execution. After considerable resistance the Porte assented (Nov. 25th, 1903), reserving the right to discuss details, particularly on the first two points. M. Müller (who died in 1905 and was succeeded by M. Oppenheimer) and M. Demerik were then appointed as Civil Agents or Assessors, and Lieut.-General Emilio de Giorgis, of the Italian Army, was appointed to take command of the gendarmerie (Jan. 2nd, 1904). The work of the foreign officers was obstructed by the Turkish Government and officials from the first, and in various parts of the country strife between the villagers and the troops went on continuously.

English public opinion, voiced by the **Balkan Committee**, declared plainly that the Reform Scheme was inadequate; and in 1905 Lord Lansdowne induced the Austrian and Russian Governments to formulate an additional scheme for international financial control by an International Commission supervising the collection of the taxes and the execution of financial reforms. This the Porte refused to accept, and Austria, Russia, France, Italy, and England joined in a coercive naval demonstration. Germany, though agreeing to the Financial Commission, sent no ships. Mitylene was occupied on Nov. 26th, and Lemnos on Dec. 6th, 1905. Eventually, owing to the lack of unanimity amongst the Powers, a compromise was arranged by which the Financial Commission was shorn of executive functions. The headquarters of the Commission are at Salonika, and the British Commissioner is Mr. H. P. Harvey. Its work has been obstructed and rendered futile in precisely the same manner as that of the Gendarmerie officers; and the Secretary of the Balkan Commission, who travelled extensively in the country in 1905 and

1906, reported that its condition was worse than in 1902, and that all the European representatives despaired of any other issue than war between Bulgaria and Turkey. The activity of Greek Bands during 1906 was very marked. They endeavoured to make the inhabitants of Bulgarian villages declare allegiance to the Patriarchate and accept Greek priests and schoolmasters.

**British Consul-General**, R. W. Graves, C.M.G. (Salonika); **Vice-Consuls**, R. Graves (Salonika), J. H. Monahan (Monastir), and H. E. Satow (Uskub).

**Balkan Committee** in England. **President**, Prof. Westlake, K.C.; **Chairman**, Mr. Noel Buxton; **Secretary**, Mr. W. A. Moore. **Office**, 10, Adelphi Terrace, London, W.C.

### Tripoli.

Tripoli is a Turkish province in Africa on the Mediterranean coast, bounded on the west by Tunis and Algeria, on the east by Egypt, and on the south-east and south by the Sahara. The estimated area, with Bengazi, is about 400,000 sq. miles, and the population about 1,000,000, mostly Berbers, though there are many Jews. Tripoli is the chief town, with a population of 40,000. The Turkish force in the province number about 10,000. The trade of the province, about a fourth of which consists of the caravan trade with the Soudan, practically all passes through Tripoli and Bengazi. The chief exports are esparto fibre, skins and hides, ostrich feathers and sponges. Italy looks forward to the time when the province will become hers; and in 1902, as a result of the *rapprochement* between France and Italy, an agreement was come to in which France intimated that she had no interests in Tripoli, and that consequently Italy had a free hand there. On the other hand the Sultan showed himself awake to the situation, and sent a number of troops into the province. **Revenue**, 1901-2, £142,056; **expenditure**, £170,424. **Imports**, 1903, £379,940; 1904, £360,300; **exports**, 1903, £388,180; 1904, £386,560. **Imports into Bengazi**, 1902, £188,174; 1903, £234,360; **exports**, 1902, £338,555; 1903, £475,050. **Imports into Derna**, 1902, £23,597; 1903, £29,026; **exports**, 1902, £11,847; 1903, £16,499.

**British Consul-General**, J. C. W. Alvarez (Tripoli).

**Consul**, R. A. Fontana (Bengazi).

**Turner, Right Hon. Sir George, P.C.**, K.C.M.G., is a solicitor by profession, and was b. at Melbourne in 1851. In 1889 he was elected for St. Kilda in the Victorian Legislative Assembly, became Commissioner of Customs and Minister of Health '91, Solicitor-General '92, leader of the Opposition '94, Minister for Defence '94-5, and Premier and Treasurer '94-99. His forte is organisation. He took a prominent part in the Federation Movement, and was President of the Federal Council of Australia '95-7. He visited London on the occasion of the Jubilee in '97, and was then made a Privy Councillor, K.C.M.G., and LL.D. Cambridge. He resigned office Dec. 1st, '99, but after the general election of 1900 succeeded to office again, till he joined the first Commonwealth Ministry as Treasurer in Jan. 1901, retaining the office under Mr. Deakin in 1903, and under Mr. Reid till the resignation of the latter in July 1905. 341, Collins Street, Melbourne.

## U

## UNITED STATES OF AMERICA.

**President.**

Colonel Theodore Roosevelt was b. in New York in '58. Ed. at Harvard, he began his political career in the New York Legislature in '82, and speedily took a prominent position there, becoming leader of the House in '84. He was a Civil Service Commissioner, U.S.A., '89-95, President of the New York Police Board '95-7, and was then appointed Assistant Secretary of the Navy. When the war with Spain broke out in '98 he raised a corps of Rough Riders and took them to Cuba, where they did splendid service. He has told the story himself in his book "The Rough Riders," '99, and is the author of many other successful books. He was made Governor of New York State in '98, and was the life and soul of the Republican fight for the Presidency in 1900, being himself nominated, against his wish, for the Vice-Presidency, and triumphantly elected, entering on his duties March 4th, 1901. On the assassination of President McKinley in 1901, he succeeded him for the remainder of his term of office. He is a great popular favourite, and one of the strongest and most straightforward men in American political life. His declarations on the necessity of controlling Trusts aroused great interest in 1902, and an attempt was made by some of the wirepullers to avoid his selection as the Presidential candidate in Nov. 1904. His popularity with the rank and file of the party proved too great, however, and he was unanimously and enthusiastically nominated at the Chicago Convention on June 23rd, 1904, and re-elected President by 335 votes to 140 on Nov. 8th. He announced at once that he would not under any circumstances be a candidate for re-election. In 1906 his directions as to spelling reform were issued, and caused a good deal of comment and controversy. His daughter, Miss Alice Roosevelt, was married on Feb. 17th, 1906, to Mr. Nicholas Longworth, a member of Congress for Ohio, and a barrister. Address: White House, Washington, and Sagamore Hill, Long Island, New York.

**Constitution and Government.**

The United States were constituted by the Declaration of Independence adopted by Congress, July 4th, 1776, and are now a confederation of forty-five (forty-six including the new state of Oklahoma) North American sovereign states united together by a federal bond for Imperial objects, the local administration being reserved to each state. By the constitution of 1787 and subsequent amendments the government is intrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The first is vested in a President elected on the Tuesday after the first Monday in November every leap year for four years by electors appointed by each separate state. The number of such electors is equal to the number of senators and representatives to which the State is entitled in Congress; but no senator or representative or office-holder under the Government can be an elector. The President, who has an annual salary of \$50,000, is commander-in-chief of the national forces, and has a veto on all laws passed by

Congress, although a bill may become law in spite of his veto, on being afterwards passed by a two-thirds majority of each House of Congress. The administration is conducted under the immediate authority of the President by a Cabinet of nine Ministers chosen by him, and holding office at his pleasure, though confirmed by the Senate. The salary of each Minister is \$8,000 per annum. A Vice-President is chosen in the same manner as the President; he is *ex-officio* President of the Senate, and in case of the death or resignation of the President he assumes his office for the remainder of the term, and the Senate elects a temporary vice-president. He has a salary of \$8,000 per annum.

**Congress and Judicature.**

The Legislative power is vested in Congress, which consists of (1) the Senate, of 90 (92 with Oklahoma) members—two chosen by each State Legislature for six years—who ratify or reject all treaties made by the President, confirm or reject all appointments made by the President, and who constitute a High Court of impeachment, with power only to remove or disqualify from office; (2) the House of Representatives, of 386 (391 with Oklahoma) members, chosen every two years by all adult male citizens duly qualified according to the laws of their respective states, and apportioned among the states according to population, as determined by the census taken every 10 years. New York at present has 37 representatives, Pennsylvania 32, Illinois 25, and Ohio 21, the other states having much smaller numbers. In addition to the representatives, delegates from the organised "territories" (districts not admitted as states) are entitled to debate on matters pertinent to their interests, but must not vote. Congress may propose an amendment to the Constitution if two-thirds of both Houses deem it necessary; and such amendment shall be deemed to be incorporated in the Constitution when ratified by the legislatures of three-fourths of the several States. All members of Congress are paid \$5000 per annum, with travelling, etc., allowances, but the Speaker of the House of Representatives receives \$8000.

The judicial power is confided to a Supreme Court (the members of which are nominated by the President for life) with power to interpret the constitution, to decide all disputes between the Federal Government and the individual states, and to hear all causes arising under the federal laws, etc. There are about 60 Federal Courts, each appointed for a district, and above these 9 Circuit Courts, and the Supreme Court. Offences against the person and against property are dealt with by the State Courts, which also deal with matters of probate, divorce, and bankruptcy. There are Justices of the Peace and Police Judges in towns and cities, Courts of Record for the counties, and a Supreme Court for each State.

**The Army.**

An "Act to increase the efficiency of the Permanent Military Establishment of the United States" became law on Feb. 2nd, 1901, and is

being carried into effect. The maximum number of enlisted men is fixed at 100,000 (which was reached during the Philippine insurrection), including "native organisations" not exceeding 12,000, which the President might create, "when, in his opinion, the conditions of the Philippine Islands justify such action." The legal minimum is 60,000. The strength, according to the latest returns, was 3750 officers and 56,064 men, of whom upwards of a sixth have had 5 years' service or more.

The regular forces consist of 15 regiments of Cavalry (47 officers and 780 rank and file each), 30 batteries of Artillery, not to exceed 18,920 enlisted men, and comprising coast and field artillery; and 30 regiments of Infantry. The infantry regiment is to have the same establishment of officers as the cavalry unit, and is divided into three battalions of four companies. The company will have 3 officers and 64 rank and file; but the President has power to increase the number of privates from 48 to 127, provided that the total number of enlisted men is not exceeded. The Engineers are to form three battalions of four companies; the number of officers, which is considerably larger than that required for duties with the troops, is fixed at 159, exclusive of a Chief of Engineers.

Opinions of experienced British and foreign officers show the United States army to have attained a high degree of efficiency. An important measure was the establishment in Feb. 1903 of a General Staff, comprising 42 officers, to report upon efficiency, preparation, distribution, supplies, etc., and to prepare plans for national defence and manoeuvres. The last report of Mr. Taft, as Secretary for War, strongly urged the necessity of increasing the number of officers.

Under a new Militia Law the organised militia have been reconstituted, and the total strength is about 125,000. Most of the states have prepared plans for rapid mobilisation, and within five years the force is expected to have assumed an efficient military character. It now conforms to the organisation of the Regular Army, and Mr. Taft has reported very favourably upon it. The Militia Reserve (untrained) includes every able-bodied male citizen between the ages of 18 and 45. Under the Act some 17,000,000 men could be called up for training and service.

### The Navy.

The President of the United States is *ex officio* Commander-in-Chief of the Navy. As his executive he appoints a Secretary of the Navy, a member of his Cabinet, on a four years' term. He also appoints an Assistant-Secretary of the Navy, and these two political officials, who are usually civilians, exercise a general control and supervision of the ten departments or bureaux among which the business is distributed. These departments are very similar to those in the British Admiralty, and they are almost all of them under the direction of naval officers. There are also special boards, mostly departmental, who advise either the Secretary of the Navy or the chiefs of the bureaux on technical points. There is nothing approximating to the headquarters staff which is found in all naval administrations, based on the precedent of the organisation of land forces. In this respect the naval administration of the United States and Great Britain differ from almost all the

rest. With regard to the estimates, the chiefs of the various bureaux prepare and make annually reports which are published, and in these reports they make recommendations with estimates of cost. The Secretary of the Navy also makes an annual report, summarising the reports of his subordinates, with his own recommendations, which are submitted to Congress in the shape of Bills, and, being passed by the House of Representatives and Senate, and approved by the President, become law. The U.S. Navy is manned by voluntary enlistment.

The Admiralty Bureaux are as follows:—

Secretary of the Navy, Hon. C. Bonaparte.

Assistant Secretary, Truman H. Newberry.

Chief of the Bureau of Navigation and Principal Naval Adviser to the Secretary, Rear-Admiral G. A. Converse.

Chief of the Bureau of Ordnance, Rear-Admiral Newton E. Mason.

Chief of the Bureau of Equipment, Rear-Admiral Henry N. Manney.

Constructor-in-Chief, Washington L. Capps.

Engineer-in-Chief, Rear-Admiral C. W. Rae.

Paymaster-General, Henry T. B. Harris, Esq.

Surgeon-General, P. M. Rixey, Esq.

Chief of the Bureau of Yards and Docks, Civil-Engineer M. T. Endicott.

Judge Advocate-General, Capt. S. W. B. Diehl.

Commandant U.S.N. Corps, Brig.-Gen. G. F. Elliott.

There is also a General Board, for advisory purposes only, composed as follows:—Admiral-of-the-Navy George Dewey; Rear-Admirals H. C. Taylor, C. E. Clarke, A. Walker; Captains J. S. Sperry (President of the War College), S. Schroeder (Chief Intelligence Officer), William Swift and R. R. Ingersoll; Commander Sargeant, Lieut. Marble, and Colonel of Marines G. C. Reid.

The Naval Appropriation Bill, 1905, allowed for a sum of £20,617,830 (\$100,202,653) for the charges of the Navy, and of this total it was proposed to devote £4,810,609 (\$23,379,560) to new construction. The corresponding figures for last year were £19,267,608 (\$96,338,038) and £5,977,000 (\$29,885,000).

The number of officers and men on the effective list of the United States Navy is 41,043, inclusive of marines.

The executive officers of the United States Navy are distributed as follows:—1 admiral, 1 vice-admiral, 21 rear-admirals, 73 captains, 114 commanders, 172 lieutenant-commanders, 350 lieutenants, 100 sub-lieutenants, 130 ensigns, 90 naval cadets at sea.

The strength in ships of the U.S. Navy built, building and projected (Nov. 1906) was:

	Built.	Build- ing.	Pro- jected.
Battleships, 1st class .	19	8	1
2nd class .	1	—	—
Coast defence ships .	11	—	—
Armoured cruisers .	13	2	—
Protected cruisers—			
1st class . . . .	3	—	—
2nd class . . . .	17	—	—
3rd class . . . .	2	—	—
Unprotected cruisers .	6	—	5
Scouts . . . . .	—	3	4
Torpedo vessels . .	2	—	—
Torpedo-boat destroyers	20	—	—
Torpedo boats . . .	32	—	—
Submarines . . . .	8	4	2

The following vessels finished their trials and were completed for service:—Battleships: *Rhode Island* and *Virginia* in Feb. 1905, *Georgia* and *New Jersey* in March, the *Louisiana* and *Connecticut* in June, and the *Nebraska* in September. The cruisers *Washington*, *Tennessee*, *California*, *Maryland*, *South Dakota*, *Milwaukee*, and *St. Louis*.

The Government dockyards are situated as follows:—*Brooklyn*: one large dock, two smaller. *Norfolk, Va.*: one large dock, one smaller. *Mare Island, Cal.*: one large dock. *Boston, Mass.*: one small dock. *League Island, Pa.*: one large wooden dock. *Portsmouth, N.H.*: one small dock.

The commands of the various Fleets are divided as follows: *Atlantic Fleet*, Rear-Admiral Robley D. Evans, Commander-in-Chief; *Second Division*, Rear-Admiral Chas. H. Davis; *Pacific Squadron*, Rear-Admiral William T. Swinburne; *Asiatic Fleet*, Rear-Admiral James H. Dayton.

The programme of construction suggested in Oct. 1905 by the General Board of the Navy comprised 3 battleships, 5 scout cruisers, and a number of torpedo craft. In March 1906 the Secretary of the Navy, speaking in the House of Representatives, asked for one battleship of 19,400 tons if two 16,000-ton vessels were refused. He advocated the construction of 4 destroyers, 2 submarines, 3 gunboats, and 2 scouts. In May the House passed the Naval Appropriation Bill, providing for the construction of one battleship to cost \$10,000,000, and all the smaller craft, including a sum of \$1,000,000 for submarines.

The American fleet was reviewed by President Roosevelt in Long Island Sound, off Oyster Bay, on Sept. 3rd, 1906. The vessels included 12 first-class battleships, 4 armoured cruisers, 4 monitors, 5 protected cruisers, 12 torpedo craft, and 2 submarines. The total number of ships was 49.

### State and Local Government.

The constitutions and modes of administration of the various States bear a close resemblance to each other—the executive being confided to a Governor and the legislative to two elective chambers, while each State has its own judicial system. Roughly speaking, each State has voluntarily surrendered to the central Government all federal matters (including taxation for federal purposes only, foreign affairs, the control of the army, navy, foreign and inter-state commerce, postal service, coinage, etc.), while reserving the right to administer all local affairs and to impose local taxes at its pleasure. The Governor and the State officials are chosen by direct vote of the people, and each party therefore appoints its own adherents when it wins the election. For local government within the States the unit is the rural township, under officials appointed by the local electors, and these are combined to form counties, though in the south and some other parts the county itself forms the unit. The soil of the United States not included within the boundaries of an individual state is divided into "territories,"—*Alaska*, *Oklahoma*, *New Mexico*, *Arizona*, and *Indian Territory* (of which *Oklahoma* and *Indian Territory* were in 1906 admitted as a new state). The Governor in each case is appointed by the President. *Hawaii* is also a "territory" with a local legislature. When duly qualified by popula-

tion, etc., it is competent for the Confederacy to form the territories into new "States" and admit them into the Union. There are *Indian Reservations*, with an area of 90,941 sq. miles, and an Indian population (1905) of 284,079, situated not only in Indian Territory but in *Arizona*, *South Dakota*, *Montana*, *Oklahoma*, etc. The "district of Columbia," which is really the capital, *Washington*, and which has an area of 70 sq. miles, with a population of 278,718, is the seat of Federal Government, and is under the direct government of the Confederacy through three Commissioners appointed by the President.

### Education, Agriculture, Industries.

Perfect equality is accorded to all religions in the United States. The Roman Catholics are the strongest religious body, Methodists, Baptists, Lutherans, and Presbyterians following in that order. Education is free and general, although backward in some of the former slave states, the cost being met from state or local funds, and the Federal Government contributing a portion. The number of pupils in 1904 in the public schools, supported by public taxation, was 16,256,038. The amount expended on the public elementary and secondary schools in 1904 was \$273,216,227. Uninhabited and uncultivated land is held to be national property, and titles to stated portions may be acquired under the homestead laws and the timber-culture Acts. In 1900 there were 5,739,657 farms in the country, with an acreage of 841,201,546 acres, giving an average of 146.6 acres per farm. The value of farms was put at \$16,674,690,247 for the land, and of the improvements, buildings, implements, live stock and products at \$3,839,311,591. The fixed capital invested in agriculture is therefore put at \$20,514,201,838, as compared with \$9,874,664,087 invested in manufactures. About 10,500,000 of the population are engaged in agriculture. Cereals, other farm and dairy produce, preserved vegetables and fruits, sugar, cotton, tobacco, live stock, timber, iron, silver, gold, coal and other minerals (see MINES AND QUARRIES OF THE WORLD for details) are the chief products, and there are also many large and flourishing manufacturing industries employing over 7,000,000 persons—textiles, cotton (see TEXTILE INDUSTRIES OF THE WORLD), wool, silk, iron and steel, lumbering, etc., being the chief. The chief imports are food products, such as sugar, coffee, fruits, wines and spirits, tea, etc., raw materials like silk, rubber, fibres, hides and skins, tin, wood, etc.; manufactured goods, etc. About three-fifths of the imports consist of food and raw material and two-fifths of manufactured goods. The chief exports are agricultural products, such as cotton, breadstuffs, meat, dairy produce, mineral produce, timber, and other raw materials, and manufactures including iron and steel, tobacco, implements; etc. The value of the farm products exported in 1904-5 was estimated at about £186,000,000, about one-half of which go to the United Kingdom. The manufactures amount to nearly one-third of the total exports. There were 212,349 miles of railway in operation in 1905, and 30,187 miles of street railways and traction lines, of which 29,548 miles are worked by electricity.

As to the *Panama Canal* question, see ENGINEERING, p. 143.

### The Monroe Doctrine.

The Monroe Doctrine, which is a cardinal point of American policy, was formulated by President Monroe in 1823, in agreement with Great Britain and in opposition to the designs of the Holy Alliance, which contemplated the partition of South America among the European Powers. It has ever since been accepted as laying down the principles which guide the United States in respect to the relations of European Powers with the other countries upon the American continent. President Monroe said: "We owe it to candour, and to the amicable relations existing between the United States and those Powers [the Allied Powers of Europe], to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European Power we have not interfered, and shall not interfere. But with the Governments who have declared their independence and maintained it, and whose independence we have on great consideration and on just principles acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any unfriendly disposition towards the United States. It is impossible that the Allied Powers should extend their political system to any portion of either continent without endangering our peace and happiness; nor can any one believe that our Southern brethren, if left to themselves, would adopt it of their own accord. It is equally impossible, therefore, that we should behold such interposition in any form with indifference." President Roosevelt pointed out in 1902 that the Doctrine was not a means of aggression, but defensive in purpose; and that it would be respected just so long as the United States possessed a first-class Navy. In an address on the subject delivered to the Yale Law School in 1903, Mr. Whitelaw Reid said neither of the two essential propositions in President Monroe's Message "objects to transfer of dominion to Europeans by cession, purchase, or the voluntary act of the inhabitants; and neither of them gives any pledge to any American State that we would interfere in its behalf against the use of force for the collection of debts or the redress of injuries, or indeed against any European attack."

### Immigration Law and Statistics.

The United States Immigration Law, 1903, raised the head-tax on immigrants from 1 dollar to 2. The classes of aliens previously prohibited were Chinese labourers, persons under agreement to perform labour or service in the United States, idiots, insane persons, paupers, or persons likely to become a public charge, persons suffering from a loathsome or dangerous contagious disease, persons who had been convicted (except political offenders), polygamists, and persons whose ticket or passage is paid for by the money of another or who is assisted by others to come. To these the new Act added epileptics, persons who have been insane within five years previous or who have had two or more attacks of insanity, professional beggars, anarchists or persons who believe in or advocate the overthrow by force of the

government of the United States, or of all government, or of all forms of law, or the assassination of public officials. There are also in force the Chinese Exclusion Act and the Alien Contract Labour Law. During 1905, 1,026,499 immigrant settlers arrived in the United States, including 221,479 from Italy, 275,693 from Austria-Hungary, 184,897 from Russia and Finland, 26,591 from Sweden, 25,064 from Norway, 64,709 from England, 2503 from Wales, 52,945 from Ireland, 16,977 from Scotland, and 40,574 from Germany. The immigrants denied admission numbered 11,879, and 845 aliens were deported in addition.

### Pensions.

The annual report of the U.S. Commissioner of Pensions showed that in the year 1905 there were on the roll 998,441 pensioners, of whom 717,761 were soldiers and 280,680 widows and dependants. The cost of the system during the year was put at \$141,142,861. It appears that the Civil War contributed 684,608 invalids and 261,210 widows to the total above given.

### Newspapers.

In 1905 the total number of newspapers and periodicals published was 23,146. In the census year (1900) there were 2226 daily newspapers in the United States, as follows:—Morning (including Sundays), 359; morning (excepting Sundays), 235=594; evening (including Sundays), 208; evening (excepting Sundays), 1423=1631. At the previous census there was a proportion of two evening papers to one morning, but now the proportion is three to one. In New York the daily papers circulate to the extent of a third more than the total population. The *Journal* (Independent), owned by Mr. W. R. Hearst, possesses the largest circulation. The *New York World* is a Democratic organ; proprietor, Mr. Pulitzer. The *New York Herald* (Independent) is owned by Mr. Gordon Bennett. The *New York Tribune* belongs to Mr. Whitelaw Reid, the American Ambassador to the Court of St. James, who became editor-in-chief and chief proprietor in '72. The *New York Times*, the *New York Sun*, and the *New York Evening Post* must also be mentioned. The leading illustrated weekly papers are *Harper's Weekly*, *Collier's Weekly*, and *Leslie's Illustrated Weekly*; whilst *Judge*, *Puck*, and *Life* represent three of the best humorous journals of the States.

In Chicago, with a population of 1,698,575, there are 5 dailies which take premier places: the *Chicago Daily News* (Independent), the *Chicago American*, the *Chicago Record-Herald*, the *Tribune*, and the *Inter-Ocean*, the two latter being Republican organs. There are likewise daily papers not only for Germans and Jews, but also for Norwegians, Polish, and Bohemians.

In Philadelphia the *Public Ledger* and *Philadelphia Times* and the *Philadelphia Record* (Independent Democrat) are prosperous dailies. The *North American* is the organ of the Republicans.

Boston possesses 11 dailies, including the two Independent organs, the *Boston Globe* and the *Boston Herald*, the Democratic *Post* and the Republican *Record*. The *Evening Transcript* has a high reputation for the literary quality of its Wednesday and Saturday supplements.

**Statistics and Diplomatic.**

The total area of the Union, including the Territories, Alaska, and Hawaii, is 3,622,933 sq. miles; the population was estimated at 82,859,211 on June 1st, 1905. At the census of 1900 it was 76,303,387, of whom 39,059,242 were males and 37,244,145 females. The whites numbered 66,990,788, and the coloured 9,312,599. The Indians numbered 266,760. The proportion of the foreign-born was 13.7. New York had a population of 3,437,202, Chicago of 1,698,575, Philadelphia of 1,293,697, and Washington of 278,718. The wealth of the country was estimated by the Census Office, in 1890, at \$65,037,091,197, or £13,000,000,000, exclusive of Alaska and Hawaii.

**Revenue** for year ending June 30th, 1903, £114,414,321; 1904, £110,378,982; and 1905, £100,872,748; **expenditure** for June 30th, 1903, £109,353,776; 1904, £123,889,412; and 1905, £115,819,444.

	<b>Imports.</b> Dollars.	<b>Exports.</b> Dollars.
1900 . .	829,149,714	1,477,946,113
1901 . .	880,419,910	1,465,375,860
1902 . .	969,316,870	1,360,685,933
1903 . .	995,494,327	1,457,647,183
1904 . .	1,035,909,190	1,425,711,233
1905 . .	1,179,135,344	1,599,420,539

In 1905 raw materials imported amounted to \$561,425,245, and finished manufactures to \$345,678,983. Of the exports \$897,659,755 were agricultural products, \$571,410,497 manufactures. The imports from the United Kingdom in 1905 were \$191,000,000, and the exports to the United Kingdom \$542,500,000.

**Public Debt**, 1903, £449,669,892; 1904, £469,292,800; 1905, £464,400,575.

**Vice-President**, Charles W. Fairbanks, elected 1905.

**Cabinet**: *Secretary of State*, Mr. Elihu Root. — *Secretary of the Treasury*, Leslie M. Shaw (George B. Cortelyou from March 4th, 1907). — *War*, William H. Taft. — *Attorney-General*, W. H. Moody (Charles J. Bonaparte from March 4th, 1907). — *Postmaster-General*, George B. Cortelyou (George Von L. Meyer from March 4th, 1907). — *Navy*, Charles J. Bonaparte (Victor H. Metcalf from March 4th, 1907). — *Interior*, Ethan A. Hitchcock (James A. Garfield from March 4th, 1907). — *Secretary of Agriculture*, James B. Wilson. — *Secretary of Commerce and Labour*, Mr. Victor Metcalf (Oscar S. Strauss from March 4th, 1907).

**Ambassador in London**, The Hon. Whitelaw Reid, 123, Victoria Street, S.W. — *First Secretary*, John R. Carter. — *Second Secretary*, Craig W. Wadsworth. — *Third Secretary*, U. Grant Smith.

**Consul-General in London**, Robert J. Wynne. — *Vice- and Deputy Consul-General*, Richard Westcott. — *Deputy-Consul-General*, Francis W. Frigott.

**British Ambassador at Washington**, Rt. Hon. Sir H. Mortimer Durand, G.C.M.G., K.C.S.I., K.C.I.E. (announced his impending resignation Nov. 1906). — *Councillor of Embassy*, Esmé W. Howard, C.V.O., C.M.G. — *First Secretary*, Ernest Rennie, M.V.O. — *Second Secretary*, Ronald C. Lindsay. — *Third Secretary*, Hugh Gurney.

**British Commercial Agent**, E. Seymour Bell, 196, La Salle Street, Chicago.

**British Consuls**: *Consuls-General*, Sir P. Sanderson, K.C.M.G. (New York), C. W.

Bennett, C.I.E. (San Francisco). — *Consuls*, Gilbert Fraser (Baltimore), Capt. W. Wyndham (Boston), Col. H. de Coëtlogon (Savannah), Alexander Finn (Chicago), H. T. C. Hunt (New Orleans), H. Nugent (Galveston), C. C. Bayley (New York), W. Powell (Philadelphia), James Laidlaw (Portland, Oregon).

**History, 1906.**

In his Message to Congress (Dec. 5th, 1905), the President referred particularly to the necessity of setting up some form of control of the great Trusts of the country, where their powers were used against law and justice. He said they could only be regulated and supervised by the Federal Government, and if that should prove impossible under the Constitution then the Constitution should be amended. What was needed was the prevention of such restriction of competition as was detrimental to the public. Speaking at Washington (April 14th) he said that it would ultimately be necessary to consider the adoption of a national scheme of a progressive tax on the transfer of fortunes swollen beyond healthy limits, and to prevent any individual from inheriting over a certain amount. There should be a system of national supervision of Inter-State corporations to cope with the evils of over-capitalisation. He felt sure that railway rate legislation could be framed and would secure tangible results. In his judgment, the rich class could not check the movement for the Governmental regulation of their business in the interest of the public. The House of Representatives by 346 votes to 7 passed the *Hepburn Railroad Rate Bill*, empowering the Inter-State Commerce Commission to investigate the question of and to regulate railway rates for the carriage of goods. This Bill later on was approved by the Senate, and after a conference between the two Houses became law. In July the Chicago and Alton Railway Co. was convicted of granting rebates and heavily fined, and a similar conviction was recorded in October against the New York Central Co. for granting rebates to the Sugar Trust, Judge Holt commenting on the heinousness of such unjust discriminations. The Standard Oil Co. of Ohio was convicted on a charge of conspiracy against trade, in violation of the Ohio anti-Trust Law (Oct. 19th), and appealed against the conviction. The Federal Attorney-General (Nov. 15th) commenced proceedings against the Standard Oil Co. and its 70 constituent corporations and partnerships to declare the combination unlawful, and to secure an injunction against it from entering into any contract or combination for the restraint of trade.

The House of Representatives adopted by 194 votes to 150 a bill providing for the admission of the Territories of Arizona and New Mexico to the rank of a Federal State, the two territories forming a new State to be called Arizona; and also for the admission of Oklahoma and the Indian Territory, to be known as the State of Oklahoma (Jan. 25th). Great opposition to the Bill was manifested in Arizona, and when it went to the Senate they struck out the provisions as to Arizona and New Mexico.

The Ship Subsidy Bill, granting £10,400,000 in aid of mercantile marine enterprises during the next 20 years, was carried in the Senate (Feb. 15th).

Considerable dissatisfaction was expressed.

by members of both parties at the President's decision to send a representative to the **Moroccan Conference at Algeiras**, which, in the view of the objectors, concerned Europe exclusively; but the Secretary of State explained that as one of the signatory Powers to the Treaty of 1880 at the Madrid Conference the United States could not decline the invitation to the Algeiras Conference.

A long struggle went on in the Senate early in the year with regard to the **treaty with San Domingo**, for which the ratification of the Senate was required. The bulk of the Democrats in the Senate opposed it, and tried to make its rejection a test of party loyalty; but a few Democrats held out, and asserted their right to support the President's legislation when, as in his attempt to pass a railway law, and to enforce regulations against the trusts for the people's benefits, he was pressing for things which they approved and held to be for the national good.

An agreement with Germany as to the tariff was arrived at, Feb. 10th, under which Germany agreed to accord to the States most-favoured-nation treatment on the basis of the new German tariff till June 30th, 1907, with the hope that a regular treaty should be concluded in the meantime. It was understood that the American Government agreed to modify its Customs administrative regulations.

For details of the **San Francisco Earthquake** (April 18th) see article on **Earthquakes**, p. 511. The number of lives lost was estimated at nearly 5000, and the damage to property at £80,000,000. Over 200,000 people were rendered homeless. Congress made generous appropriations for the relief of the sufferers.

A great sensation was caused in May and June by statements as to the methods employed in the slaughter-houses and packing establishments at **Chicago**, following on the publication of a novel called "**The Jungle**" by Mr. Upton Sinclair. The President sent representatives to Chicago to report on the conditions existing there, and at once a Meat Inspection Bill was drafted to remedy them. In a message to Congress the President said, "The conditions shown are revolting, and it is imperative in the interest of health and decency that they should be radically changed. It is impossible to secure satisfactory results under the existing law. The report [of the investigators appointed] shows that the packing houses are not kept even reasonably clean, and the method of handling and preparing food products is uncleanly and dangerous to health." The Meat Inspection Bill was much amended by the Committee on Agriculture, and, as finally passed, omitted a provision originally inserted requiring the date of inspection to be stamped on canned products.

On p. 209 reference is made to the **Insurance Scandals** which occupied so much of the public attention during the year, and led to important changes in the *personnel* of the management of the New York Life, and Mutual Life Insurance Companies. Civil suits were brought by the Mutual against the ex-President and others; and in March the ex-Vice-President of the New York Life was arrested.

Mr. Bryan returned to New York (Aug. 30th) after a Continental tour, and was given a great reception by the Democrats at Madison Square Garden. He began his first campaign speech as the Democratic candidate for the Presidency by a

strong plea for international arbitration and for an arbitration treaty, providing for the submission of disputes to The Hague, between England and the United States. As to foreign affairs he declared that America had lost prestige by her experiment in colonisation, and that no time should be lost in dealing with the Philippines as with Cuba. He characterised the Senate as having been for years "the bulwark of predatory wealth," said the paramount issue was that of the trusts, congratulated President Roosevelt on the Anti-Trust Law, and argued in favour of the State ownership of railways. He promised to deal with the tariff question at a future date.

The **New York State Election**, in which Mr. Hearst stood for the Governorship as the Democratic candidate against Mr. Hughes, the Republican nominee, resulted (Nov. 6th) in the defeat of Mr. Hearst by a majority of 55,000. The Republicans won the State elections generally, but by a reduced majority.

### **Territories and Dependencies.**

**Alaska** is a territory in the extreme N.W. of North America, purchased from Russia by the United States in '68 for £1,440,000. The area is 590,884 sq. m., and the population in 1900 was given as 63,592. It is administered by a Governor appointed by the President, and the capital is Sitka. Other towns are, Nome on the west coast, Skagway, and Juneau, a point of departure for the Yukon gold region, so named from the river Yukon, which rises in British territory, and has a course of over 2000 miles to its mouth in Behring Sea. There are valuable seal and salmon fisheries, and big timber resources.

**Guam**, the largest of the Marianne or Ladrone Islands, was ceded to the United States by Spain in '98, for use as a coaling station. It has a good roadstead. Area about 150 sq. m.; pop. about 9000. The capital is Agaña: pop. 6000.

The **Hawaiian Islands** are a group of eight inhabited and four uninhabited islands in the North Pacific. They were annexed to the United States in '98, attached to the department of California for military purposes, and made a Territory in 1900, with one delegate in the U.S. Congress. The administration is carried on by a Governor with a legislature of two Houses, a Senate of 15 and a House of 30 members. The natives almost all profess the Christian faith, and education is free. **Exports**: sugar, rice, coffee, hides, wool, whale oil, and bone. The bulk of the trade is with the United States. Steamers connect the islands with America, Australasia, China, and Japan. Area, 6449 sq. m.; pop. 154,000, including over 25,000 Chinese, over 60,000 Japanese, and about 28,500 whites. Capital, **Honolulu**, on the south-west coast of the island of Oahu, pop. 39,305. Imports, 1903-4, £3,247,879; 1904-5, £3,023,052; exports, 1903-4, £5,186,188; 1904-5, £7,429,941.

Governor, G. R. Carter.

British Consul, R. de B. Layard (Honolulu).

The **Philippine Islands** form a large group of the Asiatic Archipelago. The inhabitants, apart from the Europeans and Americans, consist of the aborigines, called **Negritos**; the **Igolotes**, probably of Chinese descent, who are the agriculturists of the islands; and the **Tagalos**, who are Malay immigrants. Until '98 the islands formed a Spanish colony, but after the **Americo-Spanish war** they were ceded to the United States, as territorial indemnity for the

expenses of the war. In 1902 a Civil Governor was appointed, with a Legislative Body consisting of seven Commissioners, four Americans and three Filipinos. The islands are divided into 40 provinces, each under an elected Governor, and all the towns have self-government through an elected President and Councillors. This decentralising policy has been much criticised, and is said to have led to great expense and extravagance. Great mineral wealth is said to exist, and coal, iron, and gold are now being mined in Cebu and Luzon with some success. The chief industries are in the hands of the Europeans and the Chinese, who number about 25,000 and 100,000 respectively. Sugar, hemp, copra, cigars, and tobacco are exported. The islands are specially rich in timber. Great harbour improvements are being made at Manila, and railway construction is proceeding rapidly in the islands. A new currency on a gold standard was instituted in 1903, the silver peso being equal to half the United States gold dollar. A large number of primary schools have been established in the chief centres, and are attended by about 300,000 children. Area, 115,026 sq. m.; pop., according to a census taken in 1903, 7,635,426, of whom 647,740 are described as uncivilised. The largest islands are Luzon (47,238 sq. miles) and Mindanao (36,237 sq. miles). The capital is Manila, with a population of over 302,000. Imports, 1904, £5,915,546; 1905, £6,010,110. Exports, 1904, £5,829,903; 1905, £6,090,955.

Governor, Luke E. Wright (appointed 1904).

British Consul-General, W. J. Kenny (Manila).

**Porto Rico**, until '98 a Spanish colony, but then ceded to the United States by the Spanish-American treaty of peace, lies to the east of San Domingo, in the West Indies. It is administered by a Governor with an Executive Council, consisting of 6 officials and 5 natives appointed by the President, and a Legislative Assembly of 35 members elected on a franchise restricted by a small property qualification and a low educational test. The island of Culebra, between Porto Rico and St. Thomas, has been made a U.S. naval base. The island is mountainous, the climate healthy, and the chief exports are coffee, fruit, sugar, tobacco, and timber. Free trade between the island and the United States was inaugurated in July 1901 with very beneficial results on the sugar and tobacco trades. The United States send the great bulk of the imports and take most of the exports. There are 173 miles of railway. Area is about 3606 square miles, and the pop. 1,000,000, of whom about 60,000 are negroes, about 300,000 mulattoes, and about 590,000 whites. The chief towns are: San Juan, pop. 32,048; Ponce, 27,952. Imports, 1902, £2,860,284; 1903, £2,726,728; 1904, £2,719,648; 1905, £3,355,746; exports, 1902, £2,637,399; 1903, £2,855,968; 1904, £3,424,146; 1905, 4,292,690.

Governor, B. Winthrop.

British Consul, W. B. Churchward (San Juan).

**Samoa Islands.** By an agreement between Great Britain and Germany concluded Nov. 9th, '99, and approved in Jan. 1900 by the United States, the Samoa Islands, which lie in the Western Pacific, were divided, Upolu and Savaii being assigned to Germany, and Tutuila and the other Samoan islands E. of 171° E. long. to the United States, Great Britain renouncing all her rights over the islands. Tutuila (area 54 sq. miles, pop. 3800) has the magnificent harbour of Pago Pago. In Feb. 1900 the United

States appointed a naval governor. The other islands have an area of about 25 sq. m., with about 2000 inhabitants. Imports, 1902-3, £32,430; exports, £8,820.

**Universal Time.** Generally speaking, Greenwich time—or Greenwich time plus or minus a number of hours—is now in use all over the world. Thus—

Greenwich time is used in . . .	{ Great Britain, Spain, Belgium, Holland.
1 h. fast on Greenwich . . .	{ Italy, Austria, Switzerland, Germany, Denmark, Norway.
2 h. fast . . .	{ Cape Colony, Transvaal, Orange River Colony, Natal, Turkey, Egypt.
4 h. fast . . .	{ Mauritius and dependencies (except Chagos) and Seychelles.
5 h. fast . . .	{ Chagos Archipelago.
5½ h. fast . . .	{ India (July 1st, 1905).
6½ h. fast . . .	{ Burma (July 1st, 1905).
. . .	{ West Australia, Coast of China from Newchang to Swatow, up Yangtse to Hankow, Hong Kong, Labuan, British North Borneo.
8 h. fast . . .	{ Japan, Philippines.
9 h. fast . . .	{ South Australia.
9½ h. fast . . .	{ Victoria, Queensland, New South Wales.
10 h. fast . . .	{ New Zealand.
11 h. fast . . .	{ New Zealand.

The United States and Canada since 1883 have been divided into five territories by meridians 67½°, 82½°, 97½°, 112½°, in which the times are 4h, 5h, 6h, 7h, and 8h, *slow* on Greenwich, and are known respectively as maritime, New York, central, mountain, and Pacific. France objects to Greenwich time merely because it is Greenwich. However, a bill has passed the Chamber of Deputies, but not yet the Senate, to legalise "Paris time diminished by 9m. 21sec."—i.e. Greenwich time. Ireland again uses Dublin time, or 25m. slow on Greenwich time; but the telegraph service and the villages in Kerry, where the Atlantic cables come, use Greenwich time.

## UNIVERSITIES.

### England.

**Birmingham University**, incorporated by royal charter March 24th, 1900, grew out of Mason University College, Birmingham, which was founded by Sir Josiah Mason, Kt., in '75, and opened in '80, being subsequently incorporated by the Mason University College Act of '97. The University includes faculties of science, arts, medicine, and commerce; others may be added by statute. It is a teaching and examining University, and on Oct. 1st, 1900, under the provisions of the Birmingham University Act, 1900, the whole of the endowments, equipment, and staff of Mason University College were merged in the University. These endowments amount to about £200,000, and in addition the University funds amount to upwards of £450,000. The following are the officers of the University: Chancellor, The Rt. Hon. J. Chamberlain, M.P.; Vice-Chancellor, C. G. Beale, Esq., M.A.; Pro-Vice-Chancellor and Treasurer, F. C. Clayton, Esq., J.P.; Principal, Sir Oliver J. Lodge, LL.D., F.R.S.; Vice-Principal and Registrar, R. S. Heath, M.A., D.Sc.; Dean of the Faculty of Science,

J. H. Poynting, Sc.D., F.R.S.; Dean of the Faculty of Arts, Hermann G. Fiedler, M.A., Ph.D.; Dean of the Faculty of Medicine, Gilbert Barling, M.B., F.R.C.S.; Sub-Dean, Arthur Robinson, M.D.; Dean of the Faculty of Commerce, W. J. Ashley, M.Com. Secretary, George H. Morley.

**Cambridge University.** About the middle of the thirteenth century students began to collect in hostels. The endowed colleges gradually absorbed the hostels, the last of which was annexed to Trinity in 1540. The legislative bodies are the Senate, which consists of graduates, and the Council, a smaller body elected therefrom. Like Oxford, the University underwent important changes in 1882, as did also many of the colleges in both universities. The following is the list of colleges: (*Founded 1257*), Peterhouse—Head, A. W. Ward, Litt.D. *Undergraduates*, 45; (1326), Clare, E. Atkinson, D.D., 190; (1347), Pembroke, A. J. Mason, D.D., 232; (1348), Gonville and Caius, E. S. Roberts, M.A., 241; (1350), Trinity Hall, E. A. Beck, M.A., 158; (1352), Corpus Christi, R. T. Caldwell, M.A., 55; (1441), King's, M. R. James, Litt.D., F.B.A., 157; (1448), Queens', T. C. Fitzpatrick, M.A., 116; (1473), St. Catherine's, C. K. Robinson, D.D., 52; (1496), Jesus, H. A. Morgan, D.D., 124; (1505), Christ's, John Peile, Litt.D., 221; (1511), St. John's, C. Taylor, D.D., 204; (1519), Magdalene, S. A. Donaldson, M.A., 42; (1546), Trinity, H. M. Butler, D.D., 671; (1548), Emmanuel, W. Chawner, M.A., 189; (1595), Sidney Sussex, Charles Smith, M.A., 76; (1800), Downing, Alex. Hill, M.A., M.D., 91. *Hostels* (1882), Selwyn, A. F. Kirkpatrick, D.D., 107; (1884), Non-Collegiates, 83. *Censor*, T. F. C. Huddleston, M.A. Total, 3054. The examinations necessary for the degree of Bachelor are the Previous ("Little Go"), General, and Special examinations. Candidates for Honours have to pass an additional examination in Mathematics, French or German with their Previous. The Triposes, which for Honour candidates take the place of the General and Special, are Classical, Mathematical, History, Law, Theology, Moral Science, Mechanical Science, Natural Science, Oriental Languages, Mediæval and Modern Languages, Economics and Political Science. Degrees: D.D., B.D., Sc.D., Litt.D., M.A., B.A., M.D., M.B., M.C., B.C., LL.D., LL.M., LL.B., Mus.D., Mus.M., Mus.B. Women are admitted to the examinations for honour students, and reside mostly in Newnham College and Girton College. (See WOMEN, HIGHER EDUCATION OF, p. 614.) Vigorous efforts have been made to secure the advantages of degrees for women by resident and non-resident members of the University, but hitherto without success. Many public schools are inspected by the University, and thousands of scholars in the Grammar and High Schools of the country compete in the Cambridge Local Examinations, while those who attend the University local lectures are also to be numbered by thousands. (See UNIVERSITY EXTENSION, p. 605.) The undergraduates have two most able organs, the *Cambridge Review*, and the *Granta*. Chancellor, His Grace the Duke of Devonshire, K.G., LL.D. Vice-Chancellor, E. S. Roberts, M.A., Gonville and Caius; High Steward, Lord Walsingham. Parliamentary representatives, S. H. Butcher, M.A., Trinity, and J. F. P. Rawlinson, LL.M., K.C., Trinity (see PARLIAMENT, pp. 383, 406).

Proctors, 1906 7: A. Munro, M.A., Queens', and G. A. Weekes, M.A., Sidney Sussex. Registrar, John Willis Clark, M.A., Trinity; Assistant Registrar, B. Benham, M.A., King's. Consult *Camb. Univ. Calendar*, *Ordinances of the University*, and *Students' Handbook to Colleges and University of Cambridge*.

**Durham University**, founded 1831, comprises University College (37), Bishop Hatfield's Hall (46), St. Chad's Hall (94), the Durham College of Medicine (52), and Armstrong College (71) at Newcastle-upon-Tyne. The students number 220 at Durham, and about 2000 (reckoning matriculated and non-matriculate students) at Newcastle. Unattached students first admitted '71. Affiliated are Codrington College, Barbados, and Fourah Bay College, Sierra Leone. Degrees: D.D., B.D., M.A., B.A., D.C.L., B.C.L., M.D., M.B., M.Surg., B.Surg., M.S., B.S., D.Litt., B.Litt., D.Sc., M.Sc., B.Sc., Mus.D., Mus.B. Licences in theology, Diplomas in public health, in the theory and practice of teaching, and Certificates of proficiency in general education, are also granted. Local University Lectures are likewise given in connection with this University, and local examinations have been established. Consult *Durham University Calendar*. Warden, the Dean of Durham, Very Rev. G. W. Kitchin, D.D., F.S.A., who is also President of the College of Science; President of the College of Medicine, Sir G. H. Philipson, M.A., M.D., D.C.L., LL.D.

**Leeds University** was constituted by royal charter April 25th, 1904. It grew out of the Yorkshire College, Leeds, which was merged in the university by the University of Leeds Act of the same year. The Yorkshire College was founded in 1874, and formed part of the Victoria University from 1887 to 1903. The School of Medicine was established as an independent institution in 1830. The university provides teaching and grants degrees in arts, science, medicine, dental surgery, law, and commerce. Special instruction is given in civil, mechanical, electrical and mining engineering, analytical chemistry, cloth manufacture, dyeing, leather manufacture, and agriculture. Last session there were 873 registered students, including 143 students in the school of medicine, but excluding 285 evening students. The principal officers of the University are: Chancellor, the Marquis of Ripon, K.G.; Pro-Chancellor, A. G. Lupton; Vice-Chancellor, N. Bodington, M.A., Litt.D.; Pro-Vice-Chancellor and Dean of the Faculty of Science, A. Smithells, B.Sc., F.R.S.; Dean of the Faculty of Arts, W. R. Phillips, LL.M.; Dean of the Faculty of Technology, R. Beaumont, M.Sc.; Dean of the Faculty of Medicine, A. S. Grünbaum, M.A., M.D.; Registrar, W. F. Husband, LL.B.

**Liverpool University** grew out of University College, Liverpool, which was established and received its charter of incorporation in Oct. 1881, and was one of the three federal colleges of Victoria University. Application was made in Dec. 1902 to His Majesty's Privy Council praying for the grant of a charter establishing a University in Liverpool, which was granted in July of the following year. Degrees: B.A., M.A., Litt.D., B.Sc., M.Sc., D.Sc., B.Eng., M.Eng., D.Eng., LL.B., LL.M., LL.D., M.B., Ch.B., M.D., Ch.M., B.D.S., M.D.S. Chancellor, The Right Hon. the Earl of Derby, K.G., G.C.B., LL.D. Vice-Chancellor, A. W. W. Dale, M.A.; Registrar, Prof. F. Hebblethwaite, M.A., LL.D.

**London University.** The University of London Act, '98, made provision for the re-constitution of the University as a teaching as well as an examining body, and it now undertakes teaching functions, in the appointed "Schools" of the University, in addition to its formerly exclusively examination work. The eight Faculties, with their respective Deans, are: **Theology**, Rev. A. C. Headlam, D.D.; **Arts**, Prof. E. A. Gardner, M.A.; **Laws**, Prof. Sir John Macdonell, C.B., LL.D.; **Music**, Sir Walter Parratt, M.V.O., Mus. Doc.; **Medicine**, J. K. Fowler, M.D., F.R.C.P.; **Science**, A. D. Waller, M.D., F.R.S.; **Engineering**, Prof. J. D. Cornmack, B.Sc.; **Economics**, G. Armitage-Smith, D.Lit. The Teaching Staff is organised under two categories: (1) Appointed Teachers, paid out of the University Funds; (2) Recognised Teachers, appointed and paid by the Schools of the University and other approved institutions, and recognised by the Senate as conducting work of University rank. Since 1900 the University, which formerly had its headquarters in Burlington Gardens, has been housed in the eastern and central portions of the main block and portions of the inner block of the buildings of which the whole were formerly occupied by the Imperial Institute at South Kensington. The degrees conferred are: B.D., D.D., B.A., M.A., D.Lit., LL.B., LL.D., B.Mus., D.Mus., M.B. and B.S., M.D., M.S., B.Sc., D.Sc., B.Sc. (Eng.), D.Sc. (Eng.), B.Sc. (Econ.), D.Sc. (Econ.). For regulations apply to the Academic Registrar; as to the External Examinations, to the External Registrar; as to University Extension Lectures and the Inspection and Examination of Schools, to the University Extension Registrar, University of London, South Kensington. Consult *London University Calendar*.

Chancellor, the Rt. Hon. the Earl of Rosebery, K.G., K.T., LL.D., F.R.S.

Vice-Chancellor and Chairman of Convocation, Sir Edward Henry Busk, M.A., LL.B.

Parliamentary representative, Sir Philip Magnus, B.A., B.Sc.

Principal, Sir Arthur William Rücker, M.A., D.Sc., LL.D., F.R.S.

Academic Registrar, Philip Joseph Hartog, B.Sc.

Registrar of the Council for External Students, Alfred Milnes, M.A.

Registrar of the Board to Promote the Extension of University Teaching, Robert Davies Roberts, M.A., D.Sc.

Secretary to the Senate, Percy Maxwell Wallace, M.A.

Superintendent of Examinations, W. H. Sampson, B.A., B.Mus.

Librarian, Lawrence Warrington Haward, M.A.

**Oxford University.** This University seems to have grown up in the twelfth century, although to Alfred the Great used to be ascribed the foundation of one college, University, in 872. The number of undergraduates in 1905 was 3648. The Government of the University vests in three bodies: The **Hebdomadal Council**, which alone has power of initiation, **Congregation** (consisting of resident M.A.'s and members of superior faculties), which has power of rejection and amendment, and **Convocation** (all M.A.'s and members of superior faculties), which has power of rejection alone. The two latter bodies consist of members

of Colleges, Halls, or of the Non-Collegiate Body. The Colleges, with reputed dates of foundation, and Heads, are: University, 872 (?), R. W. Macan, D.Lit.; Balliol, 1262, E. Caird, M.A.; Merton, 1270, T. Bowman, M.A.; Exeter, 1314, W. W. Jackson, D.D.; Oriel, 1326, C. L. Shadwell, D.C.L.; Queen's, 1340, J. R. Magrath, D.D.; New College, 1386, W. A. Spooner, D.D.; Lincoln, 1427, W. W. Merry, D.D.; All Souls, 1437, Sir W. R. Anson, Bart., M.P., D.C.L.; Magdalen, 1456, T. H. Warren, M.A.; Brasenose, 1509, C. B. Heberden, M.A.; Corpus Christi, 1516, T. Case, M.A.; Christ Church, 1532, Dean, the Very Rev. T. B. Stroug, D.D.; Trinity, 1554, H. F. Pelham, M.A.; St. John's, 1555, J. Bellamy, D.D.; Jesus, 1571, J. Rhys, D.Litt.; Wadham, 1613, P. A. Wright Henderson, D.D.; Pembroke, 1624, Rt. Rev. Bishop Mitchinson, D.C.L.; Worcester, 1714, C. H. O. Daniel, D.D.; Hertford, 1874, H. Boyd, D.D. The only remaining Public Hall: St. Edmund, 1226, E. Moore, D.D. New Foundation, Keble College, 1869, W. Lock, D.D. The Non-Collegiate Body was instituted in 1868; Censor, R. W. M. Pope, D.D. The Private Halls, which bear the name of their Master, are: (C. A.) Marcon's; (J. O'F.) Pope's; (Sir D.) Hunter-Blair's. A statute (passed in '80, amended in '93), allowing colleges within His Majesty's dominions to affiliate, has been adopted by St. David's College, Lampeter, University College, Nottingham, University College, Sheffield, Reading College, and Hartley College, Southampton. Under a similar statute (of '87), applying to Colonial Universities, the following Universities enjoy the privileges therein contained:—Cape of Good Hope, Sydney, Calcutta, Punjab, Bombay, Adelaide, Madras, Melbourne, New Zealand, Allahabad, Toronto, Tasmania, Montreal, New Brunswick, Malta, King's College, Windsor, Nova Scotia; Dalhousie University, Halifax, Nova Scotia; Mt. Allison College, Sackville, New Brunswick; Acadia University, Wolfville, Nova Scotia; University of Manitoba, Winnipeg; University of Queen's College, Kingston, Ontario. The degrees ordinarily granted by the University are: B.A., M.A., B.D., D.D., B.L., D.L., M.B., M.D., Mus.B., Mus.Doc., B.Litt., D.Litt., B.Sc., D.Sc. The B.A. must be taken either as a Pass or in any one of the Honour "Schools" of Classics, in its two divisions of Moderations and Litteræ Humaniores, Mathematics (also divided into Moderations and Final Schools), Jurisprudence, Modern History, Theology, Natural Science, in one or more of its several branches, Oriental Languages, English Literature, and Modern Languages. Women are admitted to the examinations for the B.A. degree, but here at present their privileges cease. They may join Somerville College, Lady Margaret College, St. Hugh's Hall, St. Hilda's, or the Home Students, a body in some degree resembling the Non-Collegiate Body (see WOMEN, HIGHER EDUCATION, p. 614). Chief Officers of the University: Chancellor, Viscount Goschen; Vice-Chancellor, F. H. Warren, M.A., President of Magdalen College; Proctors, H. W. B. Joseph, M.A., New College, and H. J. Cunningham, M.A., Worcester College. Parliamentary representatives, Rt. Hon. J. G. Talbot and Sir W. R. Anson, Bart., D.C.L., All Souls'. Clerk of the University, E. H. Bellamy.

**Sheffield University.** A University Charter was granted to University College, Sheffield, on May 31st, 1905. The University College

of Sheffield was incorporated by Royal Charter in '97, and was formed by the amalgamation of Firth College, founded by Mark Firth, Esq., in '79; the Sheffield School of Medicine, founded 1828; and the Sheffield Technical School. The University includes Faculties of Arts, Pure Science, Applied Science, and Medicine, and has power to constitute other Faculties. It is a teaching and examining university. The University, situate in the middle of the steel industry, specialises in Metallurgy and Engineering. Chancellor, His Grace the Duke of Norfolk, E.M., K.G.; Pro-Chancellors, Sir Frederick T. Mappin, Bart., M.P.; George Franklin, J.P.; Vice Chancellor, Sir Charles Eliot, M.A., LL.D., K.C.M.G., C.B.; Deans, (Arts) Prof. H. W. Appleton, M.A.; (Science) Prof. A. H. Leahy, M.A.; (Medicine) Prof. W. T. Cocking, M.D.; (Applied Science) Prof. W. Ripper, M.Inst.C.E.; Treasurer, H. K. Stephenson, J.P.; Registrar, W. M. Gibbons.

**Victoria University**, of Manchester, founded and incorporated by royal charter 1880 and reconstituted 1903, grew out of Owens College, Manchester, which was established '51. John Owens, a Manchester manufacturer, vexed with the tests at the Universities, bequeathed, on his death in '46, £96,654 for the purpose of founding this college. In '80 the College became the first college of Victoria University. Total students, exclusive of evening students (1905-6): arts, science, law, commerce, theology, technology, and music students (including 266 women students), 1099; and medical students (including 12 women students), 307. The admission of women was sanctioned by the Extension Act. There are three halls of residence—the "Hulme," the "Dalton," both for men only, and two women's halls of residence: Ashburne House, Victoria Park, and the Victoria Church Hostel, Oxford Road. Grants technical and commercial certificates, teaching diplomas and diplomas in Public Health to properly qualified candidates, and examines schools. Its degrees are: B.A., M.A., Litt.D., B.Sc., M.Sc., D.Sc., B.Sc.Tech., M.Sc.Tech., B.Com., M.Com., LL.B., LL.D., Mus.B., Mus.D., B.D., D.D., B.D.S., M.B., Ch.B., M.D., and Ch.M. Chancellor, Earl Spencer, K.G.; Vice-Chancellor, Alfred Hopkinson, K.C., LL.D. Registrar, Edward Fiddes, M.A.

#### Scotland.

**Aberdeen University** was founded in 1494 by Bishop Elphinstone as a *Studium Generale*, in which he constituted a college in 1505 known as King's College. In 1593 George Keith, 5th Earl Marischal, founded Marischal College, which came to be also a university distinct from the former foundation. In 1860 these two universities were united in one institution, and now form the University of Aberdeen. The quatercentenary celebrations took place in Sept. 1906, when the King, who was accompanied by the Queen, opened the new Marischal College Buildings. The celebrations were attended by a very large number of delegates from other universities and learned societies, and a number of hon. degrees were conferred. There are 24 professors, 19 lecturers, and upwards of 850 matriculated students. In conjunction with Glasgow the University sends one representative to Parliament (present member, Sir Henry Craik, K.C.B.). It grants degrees in Arts, Science, Divinity, Law, and Medicine, and is empowered to admit women as well as men to those degrees. It also

grants certificates of proficiency to women in the local examinations which it has instituted throughout the northern counties of Scotland. Its degrees are: M.A., D.Litt., D.Phil., B.D., D.D., B.L., LL.D., M.B., Ch.B., M.D., Ch.M., B.Sc., D.Sc., D.Sc. (Agr.); whereof D.D. and LL.D. are purely honorary. Chancellor, The Right Hon. Lord Strathcona and Mount Royal. Lord Rector, Sir Frederick Treves, Principal, The Very Rev. John Marshall Lang, C.V.O., D.D., LL.D. Secretary of Court, Mr. R. Walker. Secretary of Senatus, Mr. D. R. Thom. Librarian, Mr. P. J. Anderson.

**Edinburgh University**, founded 1582, has since become one of the chief medical centres in the world. During 1905 the total number of matriculated students was 3165. Of these 982 were enrolled in the Arts Faculty, 1500 in the Faculty of Medicine, 320 in Law, 52 in Divinity, 290 in Science, and 21 in Music. Of the matriculated students, 385 were women, while 89 women were attending extra-academical classes qualifying for graduation in Medicine, and 38 were also among the non-matriculated students, chiefly in attendance on the Music Classes. Women who have obtained their medical education in universities, or recognised extra-academical schools, are now admitted to degrees in medicine and surgery in the university. The aggregate value of the University fellowships, bursaries, and prizes now amounts to about £18,270 per annum, most of the bursaries, etc., being open to competition. Its Degrees are: M.A., B.D., D.D., LL.B., B.L., LL.D., M.E., Ch.B., M.D., Ch.M., B.Sc., D.Sc., D.Litt., D.Phil., Mus.D., Mus.B. Women are admitted to the Arts, Divinity and Science classes, and to Graduation in Arts, Science, Medicine, and Music on the same terms as men. Chancellor, Rt. Hon. A. J. Balfour; Lord Rector, Mr. R. B. Haldane, K.C., M.P.; Principal, Sir William Turner, K.C.B., D.C.L., LL.D. Conjointly with St. Andrews it sends a representative to Parliament; present member Sir John Batty Tuke, K.B., M.D., D.Sc., LL.D. Secretary of Senatus, Prof. Sir L. J. Grant, Bart., B.A., LL.D. Consult *Edinburgh University Calendar*.

**Glasgow University**. Founded by a bull of Pope Nicholas V. in 1451; received a new charter from James VI. of Scotland in 1577; remodelled by the Universities (Scotland) Acts, 1858 and 1889. There were last session 2393 students (512 women), and of the total 1120 were students in Arts (437 women) and 750 students of Medicine (66 women). Women students are taught separately at Queen Margaret College. See WOMEN, HIGHER EDUCATION, p. 617. Chancellor, Rt. Hon. Lord Kelvin. Rector, Rt. Hon. H. H. Asquith, K.C., M.P. Principal and Vice-Chancellor, Robert Herbert Story, D.D., LL.D. Parliamentary representative, Sir Henry Craik, K.C.B., LL.D. Registrar of General Council, W. Innes Addison. Degrees: M.A., D.Phil., D.Litt., B.Sc., D.Sc., B.L., LL.B., LL.D., M.B. and Ch.B., M.D., Ch.M., B.D., D.D.

**St. Andrew's University**, founded 1411, is thus the most ancient of the universities of Scotland. It included three separate colleges and corporations: (1) St. Salvator's (1450), (2) St. Leonard's (1512), and (3) St. Mary's (1537). In 1747 the two first-named were united and took the faculties of arts and medicine; St. Mary's being devoted to theology. **University College, Dundee** (founded in 1880), was affiliated to and made to form part of the University of St. Andrews by an ordinance which received

the approbation of Her Majesty Jan. 15th, '97. Degrees: M.A., B.D., D.D., LL.D., M.B., Ch.B., M.D., M.S., B.Sc., D.Sc., D.Phil., D.Litt. The diploma and title of LL.A. is also granted to women. In Oct. '92 the classes of the University and also the degrees of M.A., B.Sc., M.B., Ch.B., and M.D. were thrown open to women. Bursaries, scholarships and prizes of the aggregate annual value of about £5500 are available for students of the several Colleges. A number of these bursaries are available for women students, and a Hall of Residence has been built on the University grounds for their accommodation (Warden: Miss Frances H. Melville, M.A.). Chancellor, Lord Balfour of Burleigh. Vice-Chancellor and Principal, J. Donaldson, M.A., LL.D. Rector, Andrew Carnegie, LL.D. Jointly with Edinburgh University it returns a representative to Parliament—the present member is Sir John Batty Tuke, M.D. Secretary and Registrar, Andrew Bennett.

**Carnegie Trust for the Universities of Scotland.** The, was constituted in 1901 to administer a sum of \$10,000,000, in bonds of the United States Steel Corporation, given by Mr. Andrew Carnegie for improving and extending the opportunities for scientific study and research in the Universities of Scotland, and rendering attendance at these Universities more available to the deserving and qualified youth of that country to whom the payment of fees might act as a barrier to the enjoyment of these advantages. Chairman, The Earl of Elgin. Treasurer, Mr. John Ross, Solicitor, Dunfermline; Secretary, Mr. William S. McCormick; Offices, The Merchants' Hall, Edinburgh.

### Ireland.

**Dublin University.** The University of Dublin, commonly known as Trinity College, Dublin, was founded in 1592 by Queen Elizabeth, under the style of the College of the Holy and Undivided Trinity, near Dublin, mother of the University (Mater Universitatis). Its constitution has been altered by the charter of Charles I., and by numerous Royal statutes. In the Act of Union between Great Britain and Ireland (1800) it is spoken of as the University of Trinity College. The tercentenary festival of the College was celebrated in July 1892. The undergraduates exceed 800, and there are some 200 graduates attending lectures in the professional schools. Degrees are granted to women. There are 28 Junior Fellows and 40 Professors. Degrees: D.D., B.D., M.A., B.A., M.D., M.B., M.Ch., B.Ch., LL.D., LL.B., Mus.D., Mus.B., M.Engin., B.Engin., M.Dent.Sc., Sc.D., Litt.D. The two last-named are new degrees, conferred only for original research and for literary eminence. Chancellor of the University, The Earl of Rosse; Vice-Chancellor, the Right Hon. D. H. Madden, LL.D. Parliamentary representatives: Rt. Hon. Sir Edward Carson, K.C., and Jas. Campbell, LL.D. Provost, Anthony Traill, LL.D.; Vice-Provost, Rev. J. W. Barlow, M.A.; Bursar, Francis A. Tarleton, LL.D.; Senior Proctor, Rev. Thomas K. Abbott, Litt.D.; Senior Lecturer, Rev. John P. Mahaffy, D.D.; Registrar, Robert Y. Tyrrell, Litt.D.; Librarian, Rev. T. K. Abbott, Litt.D. Consult *Dublin University Calendar*.

**Ireland, Royal University of,** Earlsfort Terrace, Dublin, founded 1880 under the

University Education (Ireland) Act '79. On its establishment Queen's University, founded '50 at Dublin, dissolved; and the relations of the Queen's Colleges at Belfast, Cork, and Galway to the new University were revised. Its degrees, exhibitions, scholarships, and junior fellowships are open as well to female as to male students. The degrees are: LL.D., LL.B., M.D., M.B., M.Ch., B.Ch., M.A.O., B.A.O., D.Mus., B.Mus., M.E., B.E., D.Sc., B.Sc., D.Litt., D.Ph., M.A., B.A. Diplomas are granted in the treatment of Mental Diseases, Public Health, Teaching, Agriculture, and Engineering. Chancellor, Rt. Hon. Lord Castletown of Upper Ossory, C.M.G. Vice-Chancellor, Rt. Rev. Monsignor Molloy, D.D., D.Sc. Secretaries, Sir James C. Meredith, LL.D.; J. McGrath, LL.D. Consult *The Calendar*.

### Wales.

**Wales, University of,** is a federal teaching University. Its constituent colleges are the University College of Wales, Aberystwyth; the University College of North Wales, Bangor, and the University College of South Wales and Monmouthshire, Cardiff. It has powers to confer degrees in the faculties of Arts or Letters, Science, Technical or Applied Science, Law, Music, Medicine, and Theology. The charter passed under the Great Seal on Nov. 30th, '93. The sum of £3000 was granted and since then a slightly increased sum has been allowed by the Treasury. Statutes have been adopted, a Theological Board formed, certain theological colleges recognised as institutions in which candidates for theological degrees in the University may receive instruction, and the general work of organisation proceeded with. The University Senate, which is composed of the heads of departments in the three constituent colleges, has settled upon the courses of study for the initial degree of the University in Arts, Science, Music, and Law. The matriculation examination are held each year in June and September. The number of candidates for matriculation in 1906 was 530. The chief officers of the University are: Senior Deputy Chancellor, Sir Isambard Owen, M.A., M.D., D.C.L.; Vice-Chancellor, Principal H. R. Reichel, M.A., LL.D., University College, Bangor; Registrar, Mr. J. Mortimer Angus, University Registry, Cathay Park, Cardiff.

### Rhodes Scholarships.

Under the will of Mr. Cecil Rhodes a number of Colonial, American, and German scholarships were established, in order to instil into the minds of young colonists the advantage to the Colonies as well as to the United Kingdom of the retention of the unity of the Empire; to encourage in the students from the United States of North America an attachment to the country from which they have sprung; and to further a good understanding between England, Germany, and the United States.

There are 78 Colonial Scholarships of £30 per annum, tenable at any college in the University of Oxford for three consecutive academical years. They are allotted as follows: 9 to Rhodesia, 12 to Cape Colony, 3 to Natal, 18 to Australia, 3 to New Zealand, 24 to Canada, 3 to Newfoundland, 3 to Bermuda, and 3 to Jamaica; also a number of similar American Scholarships, 2 to each State and territory of the United States, tenable for 3 years; and German Scholarships annually, each of £250

tenable at Oxford for 3 years, the holders to be nominated by the German Emperor. There were 166 scholars in residence at Oxford in 1906-7. Office of the Trust, Seymour House, Waterloo Place, London, S.W.

### University Extension.

The object of this movement is to provide "the means of higher education for persons of all classes and of both sexes engaged in the regular occupations of life." It commenced in '72 with the University of Cambridge; about four years later Oxford took it up—abandoning it, however, until '85; and in '76 was formed the London Society for the Extension of University Teaching within the Metropolitan area. Durham University was for a time associated with Cambridge in forwarding the work in Northumberland and Durham; Victoria University is also in the field; and the Scotch Universities worked on a similar plan for some time. The University of Sydney, New South Wales, adopted the scheme in '87. An American Society for the Extension of University Teaching has been formed at Philadelphia and Chicago, and several other American universities have begun work on similar lines.

**Cambridge.**—Under the Local Lectures (University Extension) Scheme there are two principal terms in the year—September to December, and January to April—and a course of twelve lectures is given in each term. Lectures are also given less often in the summer term—April to July. Short courses of six lectures are also arranged where it is thought desirable. Of the whole number of centres connected with Cambridge, eight are affiliated—viz., Derby, Exeter, Hull, Newcastle-on-Tyne, Norwich, Plymouth with Stonehouse and Devonport, Scarborough, and Sunderland. (See previous eds. for the privileges given to affiliated students.) A town may come under the operation of the ordinary scheme by providing a place of meeting for the lectures and classes, and an inclusive fee of £50 per full course or £30 per short course to the University. All the local expenses are met by the local committee, who also fix and receive the fees. In connection with various County Councils courses on scientific subjects, bearing on agriculture, have been given annually by lecturers of the Syndicate since '91, followed in the summer by courses of practical work in the University Laboratory attended by Teachers holding County Council scholarships. For this work the system is variously modified to suit local needs. County and County Borough Councils now have the power of subsidising lectures on humanitarian as well as scientific subjects. Large summer meetings, attended by students from all parts of the world, are arranged at Cambridge at intervals during the month of August. Full particulars as to the Local Lectures may be obtained from the Secretary, Rev. D. H. S. Cranage, M.A., Syndicate Buildings, Cambridge.

**London.**—The work of the London Society has been transferred to the University, and is now carried on by the London University Extension Board. Number of courses, 1905-6, 166, for which there were 15,128 entries. Registrar, R. Davies Roberts, M.A., D.Sc., University of London, South Kensington, S.W.

**Oxford.**—The University first took an active part in educating non-matriculated students by means of University Extension Courses in '78. In '85 the system was reorgan-

ised on its present lines. The Oxford Delegacy is acting in conjunction with local committees established in nearly 200 towns in all parts of England and Wales, except the metropolitan area. From the last published report it appears that 137 of these local centres were in active work, and that 1337 lectures, distributed in 176 courses, were delivered. The number of students returned as being in regular attendance at the lectures was 22,595. Thirty-nine lecturers were employed. Of the 176 courses delivered, 51 were in literature, 68 in history, 32 in natural science, 19 in art and architecture, 4 in economics, 1 in geography, and 1 in education. It is proposed to hold the next biennial Oxford Summer Meeting in August 1907. The general subject will be "Oxford and its place in National History." Secretary, Mr. J. A. R. Marriott, M.A., University Extension Office, Examination Schools, Oxford.

### UNIVERSITY AND OTHER SETTLEMENTS.

**Toynbee Hall** (Canon Barnett, M.A., Warden; T. Edmund Harvey, M.A., L.C.C., Deputy Warden) opened in Commercial Street, Whitechapel, in 1884.

**The Oxford House**, Mape Street, Bethnal Green, is a Church of England movement, founded in '84. Head of the House, Rev. H. S. Woolcombe, M.A.

**Cambridge House** was founded in '97. It is located at 131, 133 and 135, Camberwell Road, S.E., and the Head of the House is the Rev. W. J. Conybeare. A Mission House and Settlement at Caius House, Battersea, is carried on by Gonville and Caius College (Warden, Rev. J. T. Aven).

**Mansfield House**, 89, Barking Road, Canning Town, E. (Warden, Rev. H. Cubbon, M.A.), was opened in Dec. '97. "Youths' Institute and Lads' Club," 310-14, Barking Road; "Wave" Lodging House, with 156 beds, at 235, Victoria Dock Road.

**The Bermondsey Settlement**, of which the Rev. J. Scott Lidgett, M.A., is warden, in Farncombe Street, Jamaica Road, is largely supported by Methodists.

**The Robert Browning Settlement**, York Street, Walworth Road, S.E. (F. Herbert Stead, M.A., Warden), was founded 1895, incorporated Jan. 1st, 1903. Secretary, Alderman Mather, 101, Queen's Road, Peckham, S.E. Superintendent of Medical Mission, Miss Lovibond, M.B.

**The Passmore Edwards Settlement**, Tavistock Place, St. Pancras, was founded under the initiative of Mrs. Humphry Ward. Warden of the Settlement, Mr. G. E. Gladstone; Hon. Sec., Mrs. Humphry Ward.

**Woodbrooke Settlement** for Religious and Social Study, Selly Oak, near Birmingham, for Friends.

**St. Margaret's House**, Bethnal Green (Miss Harington, resident Head), is the women's branch of Oxford House.

**The Women's Settlement** in Canning Town, E. (Miss R. H. Cheetham, chief resident worker), works upon an unsectarian basis. The Residence is at 457, 459 and 461, Barking Road, E.; the Offices, Club Rooms and Lees Hall are at 81, Barking Road, E. Hon. Secretaries, Mrs. Coote, Miss Shephard and Miss C. Spicer. Senior Resident Medical Officer, Miss Janet A. S. Mouat, M.B., Ch.B.

Women students of the Universities manage the Women's University Settlement, at 44, 45, and 46, Nelson Square, Blackfriars Road, S.E.; Warden, Miss H. Gladstone.

**University College, London** (University of London), founded 1826, opened '28, incorporated by Royal Charter '36, and re-incorporated with additional powers '69. The College is now one of the "Schools" of the University of London, and provides instruction in the Faculties of Arts (including Fine Art), Law, Science, Engineering, Economics, and Medical Science. The classes in Arts, Fine Art, Law, Science, and Economics are open to men and women. The College possesses seven museums, including the **Edwards Museum of Egyptology**: the hall under the dome contains the Flaxman sculptures. During 1902 a movement was started to incorporate the College in the University of London, and thus enable the University to start its career as a "Teaching" University, with buildings, teachers and equipment, under its direct control, and its incorporation in the University of London will take effect on the "Appointed Day," Jan. 1st, 1907. In order to bring this about it will be necessary to set free the whole of the college buildings for University purposes by removing the Boys' School, and to make certain financial and constitutional arrangements. For this purpose a sum of £200,000 was required; the whole of this has now been subscribed, the last £16,000 being allotted out of the "Bawden Fund" by Mr. Edgar Speyer. In order to enable the College when incorporated to carry out its University functions, with adequate buildings and endowments, a much larger sum, estimated at about £800,000, is required. Sir Edwin Durning-Lawrence is the Chairman and Sir R. Farrant the Treasurer of the Appeal Committee. **President**, Right Hon. Lord Reay, G.C.S.I.; **Provost**, T. Gregory Foster, Ph.D.; **Secretary**, Walter W. Seton, M.A.

## URUGUAY.

Uruguay is a republic on the east coast of South America, south of Brazil. Capital, **Montevideo**, pop. 298,127, at the mouth of the Río de la Plata. The Executive is vested in a President elected for four years by the two Chambers sitting together as a general assembly. The legislature is composed of a Senate of 19 chosen for six years by an electoral college, one-third retiring every two years, and a Chamber of 69 members

elected for three years, one for each 3000 of the male adults. In the intervals between the annual sessions a permanent committee of two senators and five deputies assumes legislative power and control of general administration. The revenue is mainly derived from the Customs dues, a property tax, licences, stamp duties, etc. State religion Roman Catholic, but all others tolerated. Education obligatory; cost partly borne by the State. The army numbers about 5000, and there is a national guard of about 35,000. Cattle and sheep form the chief wealth of the country, but there is a future for agriculture, and some mining is done. Exports chiefly wool, jerked beef, hides, skins etc. There are over 1200 miles of railway open. An arrangement was made by the Government with the Central Railway Co. in Dec. 1905 to extend the railway from Nico Perez to Centurion, on the river Yaguaron, the boundary between Uruguay and Brazil, and to build a branch line to Trienta y Tres, altogether about 250 to 300 miles.

**Area**, 72,210 sq. miles; **pop.** 978,000. **Revenue** 1902-3, £3,475,211; estimated 1905-6, £3,420,000. **Expenditure**, 1902-3, £3,439,010; estimated 1905-6, £3,420,000; **Debt**, 1905, £26,111,957 (including External Debt, £20,643,280; Internal Debt, £4,825,954; and International Debt, £624,723). In Nov. 1905 the Government signed a contract with the Banque de Paris et des Pays Bas (subject to the approval of the Legislature) for a loan of £7,000,000 at 5 per cent., to be applied to the conversion of the existing 6 per cent. internal debt, the payment of war claims and the carrying out of public works. **Imports**, 1902, £5,003,688; 1903, £5,341,270; 1904, £4,514,190. **Exports**, 1902, £7,149,471; 1903, £7,939,980; 1904, £8,182,163.

**President**, Don J. Battle y Ordoñez (elected Feb. 28th, 1903).—**Vice-President**, Dr. Francisco Soca.

**Ministry: Interior**, C. Williman.—**Finance and Public Works**, —.—**Foreign Affairs**, Dr. Jose Romen.—**War**, Gen. Vasquez. **Chargé d'Affaires** in London, Don Alfonso Saenz de Zumarán, 5 and 6, Clement's Inn Strand.—**Consul-General** in London, Dr. Carlos de Oliveira Nery, Clement's Inn, Strand, W.C. **British Minister Resident**, R. J. Kennedy, Esq. C.M.G., Montevideo. **Consul**, V. K. Cornish Montevideo.

## V

### VACCINATION.

The Vaccination Act, '98, brought about great changes in the law. The three most important were the substitution of domiciliary vaccination for vaccination at public stations, the use of glycerinated calf lymph, and the exemption from penalties of conscientious objectors. The period within which a child is required to be vaccinated was extended, to six months from the date of birth, and it is provided that a person can only be prosecuted twice in respect of the same child for neglecting to have it vaccinated, and the second prosecution can only be after the child is four years old. The public vaccinator of the district is required to call at the home of each child

within a certain time after its birth, and vaccinate it if the parent raises no objection. The old system of arm-to-arm vaccination with human lymph, which was probably the source of much disease, was abolished, and public vaccinators are now required to use glycerinated lymph supplied by the Local Government Board. The lymph is obtained from specially selected calves which have been vaccinated, and is rendered free from disease germs by being kept in glycerine. Any parent who satisfies two justices, or a stipendiary magistrate, that he conscientiously believes that vaccination would be prejudicial to the health of his child can receive from them a certificate to this effect, and then becomes exempt from penalties for non-vaccination of the child,

There has been a steady increase in vaccination since the passing of the Act. The number of successful primary vaccinations performed at the expense of the rates (1) at all ages, (2) under one year of age, and the ratio per cent. of these numbers to the registered births in respect of (3) all ages, (4) children under one year; and the number of (5) successful revaccinations at the expense of the rates, are shown in the following table for the years named:—

	(1)	(2)	(3)	(4)	(5)
1898.	281,124	263,448	30'4	28'5	22,858
1899.	403,964	345,984	43'6	37'4	7,745
1900.	444,383	400,980	47'6	43'0	31,290
1901.	449,085	413,101	48'8	44'9	19,869
1902.	623,733	465,438	66'4	49'6	1,024,213
1903.	569,597	492,599	59'9	51'8	318,528
1904.	543,321	495,187	57'4	52'3	95,613
1905.	546,062	506,701	58'2	54'0	64,176

Under the present law vaccination by a public vaccinator can be obtained, free of charge, in the case of any person who has not been previously vaccinated. Similarly, any person above the age of ten years, who has not been previously revaccinated within a period of ten years, can be revaccinated by the public vaccinator, free of charge. Vaccination officers, who are appointed by the Boards of Guardians, have the duty of enforcing the Vaccination Acts: they issue notices to parents, keep records as to vaccination of all the children in their district, and institute proceedings in cases of default. Both public vaccinators and vaccination officers are paid by fees for every birth registered in their district, in addition to fees for successful vaccinations.

The Imperial Vaccination League, formed in 1902, advocates general compulsory revaccination at the age of 12, or 10 in the presence of epidemic small-pox, "conscientious objection" being recognised as in the case of primary vaccination; the transfer of the administration of the vaccination laws from the Poor Law to some other authority charged with public health functions; and the desirability of all establishments for the preparation of calf lymph being placed under Government inspection and control. President, The Duke of Northumberland; Hon. Sec., Mrs. Garrett Anderson, M.D.; Office: 53, Berners Street, W.

The Jenner Society, formed in 1896, aims at "popularising knowledge in regard to the history of small-pox and the value of vaccination as a protection against it; promoting the practice of vaccination in a safe and efficient manner; and furthering generally the adoption of those modes of preventing and treating disease which rest upon the foundation of Jenner's great inquiry." President, the Earl of Ducie; Hon. Sec., Francis T. Bond, M.D., B.A. Lond., F.R.S. Edin., Gloucester.

On the other side there is the National Anti-Vaccination League, which carries on a vigorous crusade against vaccination. Hon. Sec., Mr. Chas. Gane. Office, 50, Parliament Street, S.W.

#### VAGRANCY COMMITTEE'S REPORT.

The subject of vagrancy has always attracted much attention, but this has been the case more particularly since 1900, owing to the increase of vagrancy which occurred during the first few years of the present century. In

July 1904 the President of the Local Government Board (Mr. W. H. Long, M.P.) appointed an Inter-Departmental Committee, with the following terms of reference: To inquire and report with respect to England and Wales as to (1) the law applicable to persons of the vagrant class (*i.e.* the statutory provisions, and the by-laws, rules, and regulations made thereunder); (2) the administration of the law applicable to these persons; and (3) any amendments which should be made in it or in its administration." The Committee consisted of the Right Hon. John L. Wharton, as Chairman, Sir W. Chance, Bart., J. S. Davy, C.B., A. H. Downes, M.D., Captain C. Eardley-Wilmot, Captain E. M. Showers, and H. B. Simpson. F. L. Turner (of the Local Government Board) acted as Secretary. The Committee presented their Report in Feb. 1906. (Cd. 2852; price 1s. 1d.).

The Report commences with an historical survey of legislation as to vagrants, showing the severe penalties which were from time to time imposed on this class, such as whipping, confinement in the stocks, branding, cutting off an ear, and hanging. Three centuries of frequent enactments and repeals ended in the Vagrancy Act of 1824, which, with some additions made in later Acts, contains the existing law for the punishment of persons convicted of vagrancy offences.

There are no reliable statistics of vagrancy. Particulars are published by the Local Government Board of the number of vagrants relieved in casual wards, and these show that from 1900 there was a marked increase up to the end of 1905, the numbers admitted to the wards on Jan. 1st being as follows: 1900, 5,579, 1901, 6,795; 1902, 7,840; 1903, 8,266; 1904, 8,510; 1905, 9,768. Up to 1900 there had been a fall in the numbers since 1895. Women and children vagrants are comparatively few: thus, on Jan. 1st, 1905, out of a total of 9,768 relieved in casual wards 8,693 were men, 887 women, and 188 children. A census taken on Feb. 28th, 1905, showed that there were in the prisons in England and Wales 4,108 persons of the vagrant class, or one-sixth of the entire prison population. The Committee came to the conclusion that the total number of habitual vagrants would not exceed 20,000, or 30,000, though in times of trade depression the number of persons with no settled homes and no visible means of subsistence might reach 70,000 or 80,000. They attribute the increase in vagrancy since 1900 to the close of the war in South Africa and the period of trade depression which followed. The Committee divide the vagrants into four classes: (1) the *bonâ-fide* working man in search of work: this class is few in numbers; (2) the casual labourer class, who object to or are unfit for continued work, rarely working more than two or three days a week; (3) habitual vagrants, who profess to be in search of work, but have no desire to get it; (4) old and infirm persons, and those unemployable from various causes.

The recommendations of the Committee may be divided into two main heads: first, the relief of vagrants, and secondly, their punishment.

In 1882 the Casual Poor Act and Regulations issued by the Local Government Board established the existing system for their treatment. The Committee found that this system had wholly failed. There was no uniformity on the part of the different boards of guardians in detention, task of work, or treatment, and in many unions the regulations were wholly dis-

regarded. They came to the conclusion that there was no chance of obtaining uniformity from the 624 boards of guardians; and they recommended, therefore, that the care of the vagrant should be transferred from the guardians to the police authorities—that is, the Standing Joint Committees in counties and the Watch Committees in separate police boroughs. The scheme proposed is that the existing casual wards should be taken over by the police authority where this arrangement can be made without interfering with the discipline of the work-house, the wards being either purchased or rented from the guardians; but where the wards cannot be conveniently transferred, the police authority are to provide fresh ones. The existing officers of the casual wards may be continued in certain cases by the police authority, but otherwise special police officers would be put in charge of the wards. It is suggested that the position of wards in the country should be rearranged, and it is anticipated that in this way many which are now superfluous would be discontinued. The circumstances of London are different, and it is suggested that the Metropolitan Police should have charge of the casual wards in their district, which includes the whole of London and Middlesex, and parts of Kent, Essex, Herts, and Surrey—the Standing Joint Committees acting as the authority in the remaining parts of the last four counties. Rules generally similar to those now in force would apply to the wards under the police authority, but the intention is that the two nights' detention and the task of work (always a time task) should be rigidly enforced.

An important recommendation is that women and children vagrants should not go to the casual wards, but should be admitted to the work-house and treated as far as possible like the ordinary inmates.

The case of the *bonâ-fide* work-seeker on tramp is provided for by a special scheme proposed by the Committee. A man who can prove to the police that he has reason to go in a certain direction, and affords evidence of recent work, may obtain a way-ticket, which entitles him to food and lodging at the casual wards on his route, and food for his midday meal on leaving the wards in the morning. He is not detained in the wards, and generally receives better treatment than the ordinary casual. The latter, for whom the law now provides no midday meal after he leaves the wards, can under the Committee's scheme obtain a meal on his way. The system of way-tickets thus suggested is based largely on the successful Swiss plan, and is an improvement on the limited systems in force in Wiltshire and Gloucestershire. The provision of a midday meal for all vagrants using the casual wards removes one of the chief arguments for almsgiving to this class. The Committee make a valuable suggestion—that information as to employment available should be collected by the police and displayed at the casual wards.

The second part of the recommendations is the more important to the public generally. As above stated, the offences characteristic of the vagrant class are begging, sleeping out, and certain offences in casual wards, such as refusal to perform task of work and destroying clothes. The Committee show that there is no uniformity on the part of magistrates in the punishment of persons convicted of these offences: the great majority of the sentences given are for 14 days

or under. The Committee are strongly of opinion that the system of short sentences is useless and costly, while it crowds the prisons and renders administration difficult. They show that the vagrant is often anxious for a short imprisonment, and at times wilfully commits an offence to obtain it: and they recommend that where a sentence of over one day is given for a vagrancy offence, it should be not less than 14 days. The Committee are clear, however, that, whatever sentence is given, imprisonment under present conditions is unsuitable for this class. They suggest that the task of work in prisons is lighter and the diet better than in the casual wards; that the vagrant often prefers prison, and that, in fact, it neither deters nor reforms him. As it is impossible to give in such a case a sentence of imprisonment which would be sufficiently long to prove deterrent without apparent injustice, they recommend that a special form of institution (labour colonies) should be established for the detention of habitual vagrants. The Committee propose a system of identification of vagrant offenders by the finger-print system, and recommend that a person convicted three or more times of a vagrancy offence should be treated as an habitual vagrant and sent to a compulsory labour colony for not less than six months or more than three years. Judging from previous experiments in this direction, the Committee do not anticipate that labour colonies will have much reformatory effect on the inmates, but they consider it necessary that this form of treatment should be resorted to in order to protect the public from the trouble and nuisance caused by the vagrant, to prevent children being trained in his habits, and to deter others from adopting this life.

The Report contains a useful description of the constitutions of the labour colony type which have been tried in other countries. There are two kinds—compulsory and voluntary. The latter are found chiefly in Germany and Switzerland, while the principal compulsory colonies are in Holland, Belgium, and Switzerland. In this country there are some colonies of the voluntary type, but these are comparatively small. The scheme suggested by the Committee is that the councils of counties and county boroughs should have power to establish, or contribute towards, labour colonies for habitual vagrants from their county. The Committee favour the establishment of colonies by philanthropic or religious societies, such as the Salvation Army or Church Army, as greater reformatory results may be obtained through such agencies. The county councils would contribute to the cost of maintenance in these latter colonies, and a small Government grant is to be paid in all cases. All the colonies would be subject to Government inspection. The inmates would be kept fully employed on useful work and be encouraged in good conduct by receiving an improvement in their dietary and other privileges. They would earn sums of money by their work, part of which they may spend, the rest being kept till their discharge. By good conduct an inmate would obtain discharge before the end of his term of detention. It is suggested that the weekly cost per head of colonial need not exceed 3s. or 4s.

The Committee make recommendations as to economy both in the management of casual wards and labour colonies by a uniform diet, and to more strict enforcement of the law relating to

common lodging-houses, and a more thorough supervision of vagrants likely to spread disease; as to a greater use of industrial schools for the children of vagrants; an extension of the law against sleeping out; and uniformity in the control of hawkers and pedlars. They also make recommendations for the control by the local authority of free shelters and distributions of free food, which they state are a source of danger to the community and demoralising to the recipients. They consider that old and infirm vagrants who wander to their own hurt should be dealt with by detention in the workhouse. Finally, they denounce indiscriminate almsgiving as the main support of vagrancy.

In Scotland there are no casual wards or specific provisions for the accommodation of vagrants, but the police returns show a large number of this class. In Ireland the vagrants are received in the workhouses, the system generally being somewhat similar to that which was in force in this country before the compulsory establishment of casual wards.

**Vecsey, Franz von**, violinist, b. at Buda-Pesth, March 1893. Both parents cultivated amateurs. At four his musical intelligence and memory were marked, and at eight, when placed under Hubay at the Buda-Pesth Conservatorium, he successfully attacked Paganini's intricate pieces. Won the favour of the veteran Joachim, and played in public in Berlin and Hamburg. On May 3rd, 1904, at St. James's Hall, he made his English *début*, and evoked enthusiasm by finished rendering of Wieniawski's Concerto in D minor and works by Bach, Hubay, and Paganini. First impressions of his rare gifts were confirmed by subsequent performances of Mendelssohn's Concerto.

**Vegetarian Federal Union, The**, is an association of such societies throughout the world as may be willing to unite together for mutual counsel and the promotion of Vegetarianism—*i.e.* abstinence from the flesh of animals (fish, flesh, and fowl) as food, and the encouragement of the use of cereals, pulses, seeds, grains, fruits, nuts, and all the wholesome products of the vegetable kingdom. **President**, Mr. A. F. Hills, D.L.; **Treasurer**, Mr. J. Hayward; **Secretary**, Miss F. I. Nicholson. **Offices**, 16, Farringdon Street, London, E.C.

**Vegetarian Society**, established 1847. **Sec.**, Albert Broadbent, F.S.S., F.R.H.S. **Office**, 257, Deansgate, Manchester.

## VENEZUELA.

### President.

**General Cipriano Castro** is a native of El Tachira, one of the Andine provinces. In the early nineties he was sent to the Federal Senate at Caracas, and there snubbed for his uncouth provincialism. He returned to his rancho vowing revenge. After a brush with tax-collectors he raised the standard of revolt, and in a few weeks was proclaimed President of the Andine Province. Towards the end of 1898, under President Andrade, he was called in by dissatisfied military leaders to bring about a revolution. This he did with the help of his Andinos, and with such success that he was proclaimed Andrade's successor, much to the disgust of the generals who had summoned him. The President of Venezuela has always in a general way been the owner of the country, but no one has owned it quite so completely as General Castro. He has annulled most of

the concessions granted to foreigners by his predecessor, and has inflicted indignities on foreign residents. As a result his ports have been blockaded, and he has perhaps received more ultimata than any other man living. In April 1906 General Castro announced that he was abandoning power temporarily, but he soon made a triumphant re-entry into Caracas.

### Government, Army, etc.

A republic in South America, consisting of 14 federal states and territories. It is bounded on the north by the Caribbean Sea, on the south by Brazil and Colombia, on the west by Colombia, and on the east by the Atlantic Ocean and British Guiana. The **President** is assisted by and elected (for a period of 6 years) from a **Federal Council** of 19 members appointed by Congress every two years. Congress consists of a **Senate** of 40 members elected by the legislatures of each state, and a **House of Representatives** of 52 members, elected directly, one member to every 40,000 of population. The term of office for both houses is 6 years. The constituent states have each their own legislature and executive. The permanent **army** consists of about 8000 men, but there is a national militia estimated at 60,000 strong. Roman Catholicism is the state religion, but private exercise of all others is permitted. Education is in a backward state, but is compulsory and free. La Guayra is the chief port of the Republic. There are over 500 miles of railway being worked. Agricultural and pastoral pursuits are largely followed. The chief products are coffee, cocoa, timber, cattle and hides. The country is rich in minerals, including gold, silver, copper and iron. There are asphalt lakes near Lake Maracaibo, but shipments were stopped in 1906 owing to a difference with the Government as to export duties.

In June 1905 a contract was signed for the unification and conversion of the consolidated debt of 1881 and the 5 per cent. loan of 1896, and Congress ratified it on July 10th, thus creating a new 3 per cent. debt of £5,229,700, of which £51,720 was redeemed, leaving £5,177,980 outstanding. The Government assigned 25 per cent. ordinary customs revenue to the service of the debt, but pending the settlement of the Arbitration award (which hypothecated 30 per cent. of the customs receipts of La Guayra and Puerto Caballo), 60 per cent. of the customs receipts at all other ports was temporarily assigned for the purpose. In 1905 there were £1,009,639 of the **Second Rank Claims** adjudicated on by the International Commissions of 1903 outstanding. A new internal 3 per cent. debt was created by conversion in 1905.

The action of the port authorities at La Guayra towards M. Taigny, the French *Chargé d'Affaires*, led in Jan. 1906 to the rupture of diplomatic relations between the two countries. M. Taigny went on board a French liner in the harbour, and was prohibited from returning to the shore. The Venezuelan *Chargé d'Affaires* at Paris was at once handed his passports and requested to leave France. Behind this dispute, it appeared, lay another as to the Venezuelan Government's action in cancelling a concession granted to the French Cable Company.

### Statistics and Diplomatic.

Area, 534,000 sq. m.; pop. 2,507,345. Capital, Caracas, pop. 72,429. Revenue, 1902, £988,608;

expenditure, £1,031,444; imports, 1901, about £3,000,000; exports, 1903-4, £2,710,003; 1904-5, £2,405,324.

**British Minister at Carácas**, H. G. O. Bax Ironside, Esq.—*Consuls*: E. F. Gray (Carácas); C. de Lemos (Ciudad Bolívar).

**Consul-General in England**, Carlos A. Villanueva, Finsbury Pavement House, London, E.C.—*Vice-Consul*, J. Steinemann, Finsbury Pavement House, E.C.

**Victoria and Albert Museum**, Exhibition Road, South Kensington. This was opened by Queen Victoria in June 1857, as the South Kensington Museum. On May 17th, '99, Her late Majesty laid the foundation stone for new buildings, designed by Sir Aston Webb, R.A., to extend the Museum at a cost of over £800,000, and by her command the institution is now styled "The Victoria and Albert Museum." It is under the control of the Board of Education. **Directors**: Art museum, A. B. Skinner, B.A., F.S.A.; Science museum, W. I. Last, A.M.I.C.E. The **Art Branch** illustrates the application of fine art to the industries of all periods, and includes collections of original works of art in every class of material, reproductions in metal and plaster, and a gallery of paintings in oil and water-colour of the British school. The number of volumes in the **National Art Library** is upwards of 110,000, prints and original drawings 160,000, photographs about 160,000. The **Dyce Collection**, bequeathed by the late Rev. A. Dyce in '69, consists of a library of about 15,000 volumes, and a collection of paintings and works of art. The library of about 18,000 volumes bequeathed by Mr. John Forster in '76 includes the original MSS. of many of Charles Dickens' works. The **Science Branch** contains collections of instruments and models used in scientific research and instruction, and collections of models illustrating the application of science to machinery and industries, as well as a library of 90,000 volumes and a complete series of British Patent specifications. The museum is open free from 10 a.m. to 10 p.m. on Mondays, Tuesdays, and Saturdays. On Wednesdays, Thursdays, and Fridays, it is open from 10 a.m. till 4 p.m. in January, November, and December; till 5 p.m. in February and October; and until 6 p.m. from March to September inclusive. On these days, being Students' days, the charge of 6d. for admission to the main building is made for each person, excepting ticket-holders; but the museum buildings to the west of the Exhibition Road are open free. On Sundays the whole of the Museum (excepting the libraries) is open free from 2 p.m. till 4 p.m. in January, Novem-

ber, and December; till 5 p.m. in February and October; till 6 p.m. in March, April, and September; and until 7 p.m. in May, June, July, and August. There is at Bethnal Green a **Branch Museum** of objects of art and science, which is open free every week-day at 10 a.m., closing on Mondays, Thursdays and Saturdays at 10 p.m. and on Tuesdays, Wednesdays, and Fridays at 4 p.m. in January, November, and December, at 5 p.m. in February and October; and at 6 p.m. from March to September inclusive. On Sundays it is open at the same times as the parent museum. Aid is also granted to provincial museums towards the purchase of works of art and objects of scientific interest.

**Victoria and Albert, Royal Order of**, was instituted in 1862, and enlarged in '64, '65 and '80; is for Ladies, and consists of four classes.

### VIVISECTION.

In Sept. 1905 the King appointed a **Royal Commission on Vivisection** as follows: Viscount Selby (chairman), Colonel Lockwood, C.V.O., M.P., Sir W. S. Church, Bart., K.C.B., M.D., Sir W. J. Collins, M.P., M.D., Sir J. McFadyen, M.B., Mr. M. D. Chalmers, C.B., C.S.I., Mr. A. J. Ram, K.C., Dr. W. H. Gaskell, F.R.S., Mr. J. Tomkinson, M.P., and Dr. G. Wilson.

**Secretary**, Captain C. Bigham, C.M.G. **Offices**, Chapel Place, Delahay Street, S.W.

The terms of reference are: "To inquire into and report upon the practice of subjecting live animals to experiments, whether by vivisection or otherwise; and also to inquire into the law relating to that practice, and its administration; and to report whether any, and if so what, changes are desirable."

A vigorous opposition to vivisection is carried on by the **National Anti-Vivisection Society**, which "advocates the total abolition of the scientific torture of animals, and seeks to attain this object by every possible means. The Society does not oppose, but on the contrary supports, any and every measure for the amelioration of the present condition of vivisectioned animals." The organ of the Society is the *Zoophilist and Animals' Defender*, edited by Edward Berdoe, L.R.C.P. Edin., M.R.C.S. **Hon. Sec. and Treasurer**, The Hon. Stephen Coleridge. **Secretary**, Robert Stewart. **Offices**, 92, Victoria Street, London, S.W.

The **London Anti-Vivisection Society**, which was founded in 1876, has offices at 13, Regent Street. **Secretary**, Mr. Sidney Trist, who edits the *Animals' Guardian*.

There is a **Parliamentary Association for Abolition of Vivisection**, with offices at Parliament Mansions, Victoria Street, S.W.

## W

**Wales, H.R.H. George Frederick Ernest Albert, Prince of**, Earl of Chester, Duke of Cornwall and York, Duke of Rothesay, Prince of Saxe-Coburg and Gotha, Duke of Saxony, Earl of Carrick and Inverness, Baron of Renfrew and Killarney, Lord of the Isles, and Great Steward of Scotland, Colonel-in-Chief of the King's Royal Rifle Corps, the Royal

Fusiliers, the Royal Welsh Fusiliers, the Royal Marines, and the Queen's Own Cameron Highlanders, K.G., K.T., K.P., G.C.M.G., G.C.V.O., G.C.S.I., G.C.I.E., I.S.O., the heir-apparent of King Edward VII., is the second son of King Edward VII. and Queen Alexandra, and was b. at Marlborough House on June 3rd, 1865, just seventeen months after his elder

brother, the late Duke of Clarence. The two brothers entered the navy together as cadets June 5th, '77. Two years were spent in the training ship *Britannia*, and then Prince George, accompanied by his brother, started for a three years' voyage round the world on board the *Bacchante*. In May '83 H.R.H. was made midshipman to the *Canada*, which was stationed on the North American and West Indian station. In '85 he was promoted to be lieutenant, and in '90 was given the separate command of the gunboat *Thrush* on the North American station. In '91 he was made commander. In '92, through the lamentable death of his elder brother, he became the heir to the throne, and took his seat in the House of Lords as Duke of York; and in the same year took command of the *Melampus* for the naval manoeuvres. In May '93 his engagement to Princess Victoria Mary of Teck was announced. The marriage was celebrated in the Chapel Royal at St. James's Palace, July 6th, '93. The children of their Royal Highnesses are: (1) Edward, b. June 23rd, '94; (2) Albert, b. Dec. 14th, '95; (3) Mary, b. April 25th, '97; (4) Henry, b. March 31st, 1900; (5) George, b. Dec. 20th, 1902; (6) John, b. July 12th, 1905. During '98 H.R.H. for some time hoisted his pennant on board the *Crescent*, attached to the Channel Squadron. He was promoted to the rank of Rear-Admiral (Jan. 1st, 1901), and appointed Colonel-in-Chief of the Royal Marine Forces. On the death of H.M. Queen Victoria (Jan. 22nd, 1901), he succeeded his father as Duke of Cornwall, and with the Duchess left Portsmouth in the *Ophir* (March 16th) on a tour to the Colonies, and to open the first Parliament of the Commonwealth of Australia. On Nov. 9th, 1901, H.M. the King's birthday, H.R.H. was given the title of Prince of Wales and Earl of Chester. In celebration of their safe return from their tour the Prince and Princess were entertained by the London Corporation at the Guildhall (Dec. 5th, 1901), on which occasion H.R.H. delivered his well-known advice to England to "wake up." In June 1902 he was promoted to the rank of General. In Feb. 1905 H.R.H. was appointed Lord Warden of the Cinque Ports and Constable of the Castle of Dover; and in March Grand Master of the Order of St. Michael and St. George. On Oct. 19th, 1905, the Prince and Princess of Wales left London for their visit to India, and landed at Bombay on Nov. 9th. They left Karachi on March 19th, 1906, and returned to England on May 8th, attended a Thanksgiving Service at Westminster Abbey on May 13th, and were entertained by the City at the Guildhall on May 17th. In H.R.H.'s speech on the occasion he said that "the task of governing India will be made the easier if we on our part infuse into it a wider element of sympathy." On May 31st T.R.H. represented the King and Queen at the Spanish Royal Wedding, and on June 21st attended the coronation of the King and Queen of Norway.

**Wales, National Museum and Library of.** During 1905, the Treasury having agreed to make a contribution from public funds towards the cost of establishing and maintaining a National Museum and a National Library in Wales, Lord Balfour of Burleigh, the Earl of Jersey, and Lord Justice Cozens-Hardy were appointed a Committee to determine the sites where they should be established, the cost, etc., and the constitution of the governing body. The Committee reported in June 1905

that the National Museum should be established at Cardiff and the National Library at Aberystwyth. The Cardiff Corporation has given a magnificent site of four acres for the Museum, in close proximity to, and in line with, the new Town Hall and new Law Courts. The charters for both institutions were in course of preparation in November 1906.

**Wallace Collection, The,** Hertford House, Manchester Sq., W. This collection of pictures, sculpture, arms and armour, furniture, and objects of art, was originally formed by the third and fourth Marquises of Hertford. By the fourth Marquis it was bequeathed to Sir Richard Wallace, Bart., by whom it was largely increased. Sir Richard left it to his wife, Lady Wallace, who died in 1897, and bequeathed it to the nation. Hertford House (the original of Gaunt House in Thackeray's "Vanity Fair") was purchased by the Treasury for £80,000, extensively altered, and opened to the public in June 1900. The Wallace Collection is open free on Mondays from 12 noon (from 10 a.m. on Bank Holidays), and on Wednesdays, Thursdays, and Saturdays from 10 a.m. to 4, 5, or 6 p.m., according to the season; also on Tuesdays and Fridays, on payment of 6d., from 10 a.m. to 4, 5, or 6 p.m. The museum is also open on Sundays from April to October inclusive, from 2 to 5 or 6. Closed on Sundays during the remainder of the year, and on Good Friday, Christmas Eve, and Christmas Day. The Keeper of the Wallace Collection is Mr. Claude Phillips.

**Water Engineers, The Association of.** Established in April '96. President, William Millhouse, A.M.I.C.E.; Secretary and editor of Transactions, Mr. Percy Griffith, M.I.C.E., F.G.S. Offices, 54, Parliament St., Westminster.

**Watson, Rev. J., M.A., D.D.** ("Ian Mac-laren"). B. in 1850 at Manningtree, Essex. Ed. at Edinburgh University, graduated '70, New College (Edin.) and Tübingen; minister of the Free Church, Logiealmond, Perthshire, in '75; Free St. Matthew's, Glasgow, in '77; Sefton Park Church, Liverpool, in '80; retired 1905. Hon. D.D. St. Andrew's University '95, Yale University '97. Author of "Beside the Bonnie Brier Bush," "The Days of Auld Lang Syne," and of "The Mind of the Master" and other religious works.

### THE WEATHER OF 1906.

The official figures are given, for the various districts named below, of the accumulated temperature, the rainfall, and the duration of bright sunshine for the 47 weeks ended Nov. 24th, 1906. In explanation of the summary table the following points should be noted:—

**Accumulated Temperature** indicates the combined amount and duration of the excess or defect of temperature above or below 42° F. for the period named, and is expressed in day-degrees—a "day-degree" signifying 1° continued for 24 hours, or any other number of degrees for an inversely proportional number of hours. The Means with which the current values are compared are those for the corresponding period in the 20 years 1881-1900.

**Rainfall.**—The Mean amounts are those for the corresponding periods in the 35 years '66-1900, but the Mean numbers of rainy days are those for the 30 years '71-1900 only.

**Bright Sunshine.**—The Mean values employed are those for the corresponding periods in the 20 years '81-1900.

Districts.	ACCUMULATED TEMPERATURE OF THE AIR. Dec. 31st, 1905—Nov. 24th, 1906.					RAINFALL. Dec. 31st, 1905—Nov. 24th, 1906.				BRIGHT SUNSHINE. Dec. 31st, 1905—Nov. 24th, 1906.			
	Above 42°.	Differ- ence from Mean.	Below 42°.	Day-deg.	Differ- ence from Mean.	No. of Rainy Days.	Dil- ference from Mean.	Total Fall. Ins.	Dif- ference from Mean.	Hours Re- corded.	Dif- ference from Mean.	Per cent. of Pos- sible Du- ration.	Dif- ference from Mean.

**West India Committee, The.** Incorporated by Royal Charter. An association of planters, merchants, and others interested in the British West Indies, British Guiana, and British Honduras, founded *circa* 1760. Sec., Algernon E. Aspinall, 15, Seething Lane, London, E.C.

**Whyte, Rev. Alexander, M.A., D.D.**, was b. at Kirriemuir, Forfarshire, 1837; ed. at Aberdeen University (M.A. '62) and Free Church College, and ordained at Glasgow in '66. Four years later he became minister of Free St. George's, Edinburgh, the premier Presbyterian church in Scotland, and this position he still holds. He is a D.D. of Edinburgh University. In '98 he was elected Moderator of the Free Church General Assembly. Works: "Commentary on the Shorter Catechism," "The Four Temperaments," "Bunyan Characters" (3 vols.), "Samuel Rutherford's Correspondence," etc.

**Wilberforce, Archdeacon Albert Basil Orme**, is the youngest son of the late Bishop Wilberforce of Oxford and afterwards of Winchester, and was ed. at Eton and Exeter Coll., Oxford, where he graduated B.A. in '65, M.A. in '66, D.D. in '94. He was curate of Cuddesdon '66-7, chaplain to the Bishop of Oxford '66-70, curate of St. Jude, Southsea, '61-71, and rector of St. Mary's, Southampton, '71-94. In '94 he was made a Canon of Westminster, which Canonry carries with it the incumbency of St. John's, Westminster. The Speaker appointed him as his chaplain in Jan. '96, and in 1900 he was appointed to the Archdeaconry of Westminster. He is famous for his eloquence in the pulpit and as a temperance advocate. Address: 20, Dean's Yard, Westminster Abbey.

**Wilson, Admiral Sir Arthur K., K.C.B., K.C.V.O., V.C.**; was b. March 4th, 1842. He attained captain's rank '80, was promoted Rear-Admiral '95, Vice-Admiral 1901, and Admiral 1905. Served in the Crimea '54, China '65, Egypt '82, Soudan '84; was A.D.C. to Queen Victoria '92-95, Comptroller of the Navy '97-1901, C.B. '97, K.C.B. 1902, K.C.V.O. 1903. He is Commander-in-Chief of the Channel Fleet.

**Wilson, Sir Guy Fleetwood, K.C.B., Director of Army Finance**, and Assistant Under-Secretary of State for War, was b. Oct. 21st, '51, and educated by private tutors abroad. He entered the Paymaster-General's Office, '70; was transferred to the War Office, '83; and appointed Secretary to the Special Committee on Army Reorganisation, '87. He was private secretary to Marquess of Hartington, Mr. W. H. Smith, Mr. Herbert Gladstone, Mr. Stanhope, and Sir H. Campbell-Bannerman during the period '86-93, and was then appointed Director-General of the Royal Army Clothing Department, and Assistant Under-Secretary of State in '98; is a member of the Pensions Commutation Board. He was given his present appointment in March 1904.

### WIRELESS TELEGRAPHY.

The Wireless Telegraph Act, 1904, rendered it illegal for any person to instal or work wireless telegraph apparatus in the United Kingdom, or on board British ships in territorial waters, except with the licence of the Postmaster-General, and so placed wireless telegraphy under Government control for strategic purposes. The Act expired on July 31st, 1906, but was renewed until Dec. 1909.

With a view to testing the capabilities of wireless telegraphy for ordinary telegraphic purposes, the Post Office, after inviting tenders

from all the principal Wireless Telegraph companies, in 1906 placed contracts with the Marconi and British De Forest Companies for installations between Tobermory and Loch Boisdale (Hebrides), and between Hunstanton and Skegness respectively.

An International Conference was opened at Berlin (Oct. 3rd, 1906), the countries represented being Great Britain, Germany, the United States of America, Argentina, Austria-Hungary, Belgium, Brazil, Bulgaria, Chile, Denmark, Spain, France, Greece, Italy, Japan, Mexico, Monaco, Norway, the Netherlands, Persia, Portugal, Roumania, Russia, Sweden, Turkey, and Uruguay. A Convention was signed by the representatives of all the above Powers (Nov. 3rd), settling the arrangements to be applied to all stations open to general wireless telegraphic service between the coast and vessels at sea (both in the coastal stations and those on shipboard) which are established or worked by the Powers on their coasts or on board vessels flying their flag. The Powers bound themselves also, in the event of their authorising private enterprises to open or carry on similar stations, to impose the observance of these arrangements on such enterprises. "Coastal stations and stations on board ship are bound to interchange telegrams without distinction of the system of wireless telegraphy adopted by them." Each Government undertook to publish the names of the coastal stations and stations on shipboard which are available for general traffic, but reserved the right to prescribe or to admit, apart from the general service installations, the installation and exploitation of other technical plant with the object of establishing special wireless communication, without publishing the details of such plant. Wireless telegraphy stations are bound to give absolute priority to messages of distress from ships at sea and to replies to such messages. Provisions were included as to fixing the rates chargeable for telegrams exchanged between ships at sea and the coast.

Experiments carried out in Nov. 1906 between Landi Kotal and Peshawar, demonstrated that the interposition of higher mountains does not interfere with free communication between two places in a mountainous country.

### **The Marconi System.**

In 1896 Mr. Marconi, under good Italian credentials, was able to accept the invitation of the British Telegraph Department to make experiments with his system. Early work was done on Salisbury Plain, across the Bristol Channel, and between Alum Bay and Bournemouth (a distance of 16 miles). At the close of '98 experiments were set on foot between the South Foreland light-house and the East Goodwin lightship, 12 miles away, and communication was established. On March 28th, '99, the first message was exchanged between France and England. This was followed by successful demonstrations made during the '99 Naval Manœuvres. The Admiralty definitely adopted the system during 1900, and all British and Italian battle-ships and a very large number of cruisers are now fitted with it, or with modifications of it. In 1903 an agreement was entered into between the Admiralty and the Marconi Co. for the use of their stations and improvements for a period of 11 years. The Marconi apparatus is working commercially on board about 90 of the

largest passenger steamers afloat. There are numerous land stations in Great Britain and Europe equipped with the system. Lloyds have exclusively adopted the Marconi system for use at their stations at home and abroad till 1915. In June 1905 the Board of Trade and Trinity House arranged for the equipment of lighthouses with Marconi installations. Marconi's Wireless Telegraph Co., Ltd., has offices at 18, Finch Lane, London, E.C.

On Dec. 12th, 1901, Mr. Marconi succeeded in deciphering wireless messages sent from the Poldhu Station, Cornwall, to him at St. John's, Newfoundland. The *Carlo Alberto* in Oct. 1902 conveyed Mr. Marconi from England to Nova Scotia, and daily communication was kept up with the Poldhu Station all the way across to a station at Glace Bay. Transatlantic messages are now sent and received from the stations at Poldhu, Cornwall, and at Cape Cod, Massachusetts, to ships at any point on the Atlantic, and new stations are being equipped for a service between England and America.

In June 1904 a daily news bulletin was issued every morning to the passengers on board the Cunard liner *Campania*, and since then all the Cunard mail steamers have been supplied with a similar *Daily Bulletin*, on the Marconi system.

The Messina Railway Co. have adopted the system for intercommunication between their stations. A public wireless telegraph service is also in operation across the Adriatic Sea between Bari in Italy and Antivari in Montenegro. During 1905 the Marconi system has been greatly extended, and stations have been erected in almost every known quarter of the globe.

Since Jan. 1st, 1905, telegraph offices in the United Kingdom have received and delivered the Marconi Co.'s telegrams to and from ships at sea. The charge is 6½d. a word, with a minimum of 6s. 6d. for each telegram. In 1905-6 there were 558 outward and 11,094 inward telegrams.

### **The De Forest System.**

The principal system in America is that of the De Forest Wireless Telegraph Co. The inventor, Dr. de Forest, is a graduate of Yale, and claims that he can synthesise his circuits. The receiver in this system is a telephonic apparatus, and from 20 to 30 words a minute can be transmitted and recorded. The main advantage claimed for it is that its usefulness is not impaired by the presence of other systems unless the transmitting stations are practically in juxtaposition.

The De Forest Wireless Telegraph Co. transmitted a regular daily news service from the St. Louis Exhibition in 1904 to various newspapers, and messages were sent from the long-distance tower to Chicago, 300 miles away. The speed attained was from 25 to 35 words a minute. The capacity of the De Forest system for operating simultaneously several different transmitters was clearly shown, and the ability of the operator to tune his receivers at will to various transmitters with different wave-lengths.

The Company has five long-distance naval stations, and powerful land stations at New York, Boston, New Orleans, St. Louis, Chicago, etc.; and it is claimed that these stations are able to operate from 300 to 1200 miles overland. A British De Forest Co. has been formed, and has stations at Oxford, Cambridge, Shoebury-ness, etc.

**Other Systems.**

Another American system is the Fessenden System of the National Electric Signalling Co., Washington, which has a station on this side the Atlantic at Machrihanish, on the west coast of Kintyre.

The Lodge-Muirhead Wireless and General Telegraphy Syndicate claim that the British Army has found its system the most suitable to its requirements, and it is used between the Andaman Islands and the mainland of India and Burma, as well as at Aldershot, Hythe, and other places in this country.

In Germany Prof. Slaby, of Charlottenburg, with Count D'Arco, Prof. Braun, and the chief German electrical houses, Siemens and Halske, and the Allgemeine Elektrizitäts Gesellschaft, have produced a system, and all interests have been amalgamated into one concern, "Gesellschaft für drahtlose Telegraphie." The American, German, Russian, and nearly all other navies but those of Great Britain, Italy, and France, have been supplied by them, and they have many ship-signalling stations and shore stations fixed. All the principal Continental War Departments have also been supplied with their military equipment.

In France the system used is a modification of Marconi's. Ducretet, Mors, Popp and Branly (the inventor of the coherer) have been very active in developing it.

**Witte, Count Sergie Juliewitsh**, the Russian statesman, is of German origin, and was b. July 29th, 1849, at Tiflis, ed. at Odessa in mathematics and physics, entered the railway administration, and first gained distinction by his clever organisation of the transport of troops in the war of '77-8; was called to St. Petersburg for employment there in '79, and appointed in '86 director of Russian south-west railways. In '88 he became head of the Railway department in the Ministry of Finance, chairman of Commission on Tariffs; in '92 Minister of Means of Communications, and in '93 Minister of Finance. In Jan. 1903 he received the expression of the Czar's gratitude in a Rescript, which said: "You have awakened the best forces of national labour to a sense of self-reliance, ensured the independence and the stability of the monetary circulation, increased the resources of the State, and thereby enabled it to balance its Budgets, gradually increasing year by year, without a deficit." In August 1903 he was removed from the Ministry of Finance and made President of the Committee of Ministers. He was one of the Russian plenipotentiaries in the negotiations for peace with Japan in 1905, and was afterwards made a Count and appointed President of the new Ministry, although in May 1906 he was superseded. (See RUSSIA.) He is author of a book on "The Principles of Railway Rates," '83, and on "Friedrich Liss, the Economist," '88.

**Wolff-Metternich zur Gracht, Count Paul Anton Marie Hubert**, German Ambassador to the Court of St. James. B. at Bonn, Dec. 5th, 1853. Came into notice as Prussian representative in Hamburg, from which place he frequently travelled to London on affairs of State. He was afterwards attached to the Embassy in London, and when Prince Paul Hatzfeldt, the Ambassador died in 1901, the Emperor selected Count Wolff-Metternich out of a number of names proposed, to succeed him. He speaks perfect English. Address: 9, Carlton House Terrace, S.W.

**WOMEN, HIGHER EDUCATION OF.**

The Higher Education of Women has made great advances since the Report of the Royal Commission on Secondary Schools was issued in 1868. The National Union for Improving the Education of Women, formed under the presidency of the Princess Louise, in consequence of that report, founded in '72 the Girls' Public Day School Company (since Jan. 1906 called "The Girls' Public Day School Trust"), which, with the Church Day Schools Company, has raised the standard of girls' education throughout the land, and prepared the way for the Higher—that is, University and College—Education of Women. These two Companies have now 54 schools and some 10,000 pupils, entirely taught and officered by women, many of whom have had a college training. Some of these schools, e.g. the G.P.T.S. Co.'s School at Clapham, are recognised by the Board of Education as training colleges for teachers for secondary schools. The Church Schools Company is understood to be contemplating its formation into a "trust," in order to secure a share in the Government grants.

**Training Colleges.**

The National Union founded, in '77, the Teachers' Training and Registration Society, out of which has grown the **Maria Grey Training College**, Salusbury Road, Brondesbury, now recognised by Government for the training of secondary teachers (Principal, Miss Alice Woods). The Winkworth Hall of Residence for students in this College was opened in Sept. '99 (Warden, Miss Mabel Case); fees from 36 to 48 guineas per session. The Principal has a few bursaries to give to students who cannot afford the full fees. Students are not admitted under 19 years of age, and must already hold some recognised degree or certificate of knowledge. "Gilchrist" travelling scholarships for women teachers are offered at the college from time to time.

The **Cambridge Training College for Women** was incorporated Jan. '93 (Principal, Miss H. Powell). This college is one of the institutions formally recognised by the Order in Council, Jan. 21st, 1902. Fee for the year's course of thirty weeks, £75.

The **St. George's Training College**, 5, Melville Street, Edinburgh (Principal, Miss M. R. Walker), was opened in '86. It offers "George Heriot" bursaries of £30 per annum for competition in September of each year among graduates entering on a course of study at the college. No student is admitted to the college in preparation for any teachers' examination unless she holds some recognised qualifying certificate. Fees, 21 guineas per annum. The St. George's High School for Girls is in connection with the college.

The **London County Council Day Training College**, attached to the University of London, was inaugurated Oct. 7th, 1902, to provide for duly qualified persons of either sex engaged in or intending to enter the teaching profession, or who are making a special study of the theory, history, and practice of education (Principal, Prof. Adams; Normal Mistress, Miss Margaret Punnett, B.A.). A hundred scholarships of £25 a year for men and £20 a year for women are awarded by the Technical Board of the London County Council. Application should be made to the **Executive Officer**, Education Office, Victoria Embankment, W.C. A permanent college

building is being erected; meanwhile the chief part of the instruction of King's Scholars is carried on at the Finsbury Pupil Teachers' Centre, Offord Road, Barnsbury, N., while lectures to post-graduates are given at the "College of Preceptors," Bloomsbury Square, W.C.

**The Goldsmiths' College**, New Cross, S.E. (University of London); Warden, W. Loring, Esq., M.A. Opened Sept. 1905; is a Day Training College, recognised by the Board of Education, with accommodation for 500 students. The course extends over two years. The final examination takes the place of the Certificate Examination of the Board of Education. Certain county councils have engaged places in the College for their candidates, and pay an annual contribution to its funds. Hostels for men and women students will shortly be provided by the Kent and Surrey County Councils. Fees £30 to £40 annually.

A training college for teachers in secondary schools for girls was opened in 1902 by the Church Education Corporation at Cherwell Hall, Oxford (Principal, Miss Catharine Dodd, M.A.). There is accommodation for about 20 students. Fees for teaching, board and residence, £65 per annum. There is a scheme of scholarships and bursaries and a loan fund. Apply to the Principal at the Hall.

**The St. Paul's Girls' School**, Brook Green, Hammersmith, W., on the foundation of the Worshipful Company of Mercers, was opened in Jan. 1904 (Principal, Miss Gray). Tuition fees, payable in advance, £7 per term.

**St. Leonard's School**, St. Andrews; **Roedean School**, Brighton; and **Wycombe Abbey**, Bucks, are large residential establishments founded to give to girls similar advantages to those open to boys in our great public schools.

**Cheltenham Ladies College**, established 1854, incorporated 1880, prepares for the London B.A. or B.Sc. Examination. Girls under 18 reside in one of the 13 boarding-houses approved by the Council. Those over that age are in St. Hilda's, Cheltenham. Fees from £54 to 93 guineas. There is a foreign department and a department for the training of teachers.

### Colleges at Cambridge.

Oxford and Cambridge now offer many facilities to women desiring advanced education. At **Cambridge** the triposes, or honour examinations for the B.A. degree in mathematics, classics, natural science, moral science, history, mediæval and modern languages, law, mechanical science, Semitic languages, Indian languages and theology, have, since '81, been open to such women as have passed a specified preliminary examination.

**Girton College** (Mistress, Miss Constance Jones) was founded at Hitchin in '69, removed to Cambridge in connection with the Association for Women's Lectures in Cambridge, and incorporated in '72. It now numbers about 150 students, with seven resident women lecturers, a vice-mistress, a junior bursar, and a librarian. Entrance and scholarship examinations are held in London in the months of March and June. Fee £1. The income from the Pfeiffer Bequest of £5000 is devoted to scholarships. Students can attend University lectures in Cambridge, in addition to those provided by the college. The college fees (inclusive of both university and college charges) are £105 per

annum. The College has recently been enlarged, and a chapel added.

The South, now called "Old" Hall, **Newnham College**, Cambridge (Principal, Mrs. Sidgwick), was opened in '75, and incorporated in '80. The North, now called "Sidgwick" Hall, followed in '80, Clough Hall in '88, and the Pfeiffer building in '93; 158 students and 12 resident tutors form the collegiate body. An entrance examination is held annually in March at Cambridge in mathematics and languages. Scholarships and exhibitions are awarded yearly to students for the various tripos examinations. No student, unless reading for a tripos examination, with a reasonable prospect of obtaining honours, is allowed to reside at the college for more than two years without special permission. Fees, inclusive of board, lodging, and teaching, are from £30 to £35 per term. Women are admitted by the Council as out-students of the college if they either (a) reside with their parents or guardians in Cambridge, or (b) are not generally resident in Cambridge, but are *bonâ-fide* students, pursuing definite study, over thirty years of age, unable to afford the cost of residence in one of the halls, or in other exceptional circumstances, and accustomed to support themselves. Out-students' fees are about £12 per term. Application for admission as out-students should be made to the Principal, Newnham College, Cambridge.

### Colleges at Oxford.

In **Oxford** the principal honour examinations of the University (in classics, natural science, history, mathematics, jurisprudence, theology, Oriental studies, the degree of B.C.L., the examinations for the degrees of Bachelor and Doctor of Music, and the School of Modern Languages, and the School of English), are open to women. The second public examination (pass degree) of the University is open to women, as well as Pass Moderations. Certificates are awarded as the result of the examinations, and in the case of honours the names are entered in the *University Gazette*; but the B.A. degree is not conferred upon women. The University, in '97, established in Oxford a professional examination for teachers, and arranged a course of training in Theory and Practice of Teaching. To these women are admitted on precisely the same terms as men (apply to Miss A. J. Cooper, 22, St. John Street). The "Philip Walker" Studentship in Pathology, of the annual value of £200, tenable for three years, is not confined to members of the university, and is open without limitation of age or sex. Women students of Oxford and Cambridge, who have taken certain specified examinations, have now (1906) a special privilege in regard to degrees in Trinity College, University of Dublin.

**Somerville College**, Oxford (Principal, Miss Penrose, M.A.), founded in '79, incorporated in '81, the name changed from "Hall" to "College" in '94, has 83 students, 5 resident tutors, and a librarian. There is no entrance examination, but all students are expected to pass "Responsions" before entering the college, unless they have passed one of the examinations accepted as equivalent. In all cases two languages and Mathematics are required. Fees, inclusive of board, lodging and teaching, vary from £86 to £92 per annum, according to the rooms selected. The college is undenominational in principle. The Council confers certificates showing all the examinations passed by

the student, recording the term of residence, and stating that the student has qualified for the degree. A new library and additional students' and tutors' rooms were opened by the Right Hon. John Morley, M.P., in June, 1904. Scholarships and exhibitions are competed for annually in April. All scholars are expected to work for the Honour examinations of the University of Oxford. A Fellowship of £100 per annum, open to women who have resided 12 terms in Oxford and taken an Honours Examination, was subscribed for in 1903 by friends of the college, and is in the gift of the Council.

**Lady Margaret Hall, Oxford** (Principal, Miss Wordsworth), was also founded in '79. It is conducted on the principles of the Church of England, with provision for the liberty of members of other religious bodies, and numbers about 54 students and 3 resident tutors. Candidates for entrance must have passed "Responsions" or an equivalent examination. Scholarships are offered each March. An extension of the Hall is in contemplation. Inclusive charges about £98 per annum.

**St. Hugh's Hall, Oxford** (Principal, Miss Moberley), founded in '86, has room for 34 students. The fees for board, lodging, and tuition are from £70 to £90 a year. The conditions of entrance are the same as for Lady Margaret Hall. The Hall is intended for members of the Church of England. Scholarships are competed for annually in March.

**"St. Hilda's"** (Principal, Mrs. Burrows) is a Hall of Residence founded in '93 by the late Miss D. Beale, LL.D., Principal of Cheltenham Ladies' College, and enlarged in '95, and incorporated '98, for old Cheltonians and others who may desire a year or more of study before entering on professional work. Twenty-five students are now in residence. The charges are similar to those at Somerville College.

Lecture arrangements for women in Oxford are under the management of a joint association for educational purposes, consisting of representatives of the women's college or halls of residence, and of the home students, with the tutors in the principal subjects, and others interested in education. A member of the Hebdomadal Board sits as a member of this association (Secretary, Miss A. M. A. H. Rogers, 39, Museum Road, Oxford). Unattached students are allowed, under certain conditions, to reside in Oxford under the censorship of Mrs. A. H. Johnson, South Parks Road, Oxford. A system of teaching by correspondence (apply to Mrs. A. H. Johnson) was set on foot in '83.

### **Colleges in and near London.**

**The University of London** (see UNIVERSITIES) confers its degrees equally upon men and women. Women students are received at the **Royal Holloway College, Egham**, opened in '87. The object of the college is to provide the instruction necessary for the London degrees in science and arts, the preliminary M.B., the examinations of the University of Oxford and of the Royal University of Ireland. Instruction in music, drawing, and painting is provided. The entrance examination, held in July, includes English, foreign languages, and arithmetic. Scholarships are competed for in July. All scholars must read for Honours. Other students are under no such restriction. There are

about 160 students, 10 resident women lecturers, and 12 non-resident professors and teachers. Terms, inclusive of board, lodging, and instruction, are £90 per annum. No student may enter for less than one year, or reside for more than four years, without special leave. Non-resident students must in general reside with their parents or guardians. Fee £10 a term. They are required to pass an entrance examination. The college is a recognised "school" of the London University.

**Bedford College, London**, incorporated '49 (Principal, Miss Tuke, M.A.), offers scholarships and prepares resident and non-resident students for the London degrees in arts and science. By the University of London Act, Bedford College became a "school" of the University. The final courses in Chemistry and Physiology are recognised as qualifying for the first M.B. Lectures are given in all branches of general and higher education. Fees for board and residence from £58 to £68 per annum. Tuition fees for the London examinations from £27 to £48 a session. Students are not received into residence under seventeen, and, if necessary, have their acquirements tested by preliminary examination. An art school (Prof. George Thomson) is attached to the College, as well as a Teachers' Training Department (Head, Miss Mary Morton, M.A.) Special facilities are now given to foreign students. It is proposed to acquire a new site and buildings, and, if possible, an endowment fund for the College, which now has about 265 resident and non-resident students. Meanwhile an extra house (No. 7, York Place) has been opened by the college.

**The Women's Department of King's College, Kensington Square, W.** (Vice-Principal and Secretary, Miss L. M. Faithfull, M.A., Fellow of King's Coll.), provides lectures and classes as preparation for the London and Oxford examinations. The Art School, under Mr. Byam Shaw, R.I., and Mr. Vicat Cole, R.B.A., was entirely reorganised during the year 1904, and the studios improved. A special course of Biblical study (arising out of the Vacation Courses held in Oxford 1903 and Cambridge 1904) is arranged for during the session. Students in Divinity are prepared for the "Diploma in Theology" instituted by the Archbishop of Canterbury. A residence for 25 students is under the charge of Miss E. Faithfull, King's Hall, 32, De Vere Gardens. A Physics Laboratory for students of the Intermediate B.Sc. Examination is now fitted up. Advanced students for the final B.Sc. do their work at the College Laboratories in the Strand. King's College, by the Act of '98, is a "school" of the University of London in all its faculties, and matriculated students of the Women's Department rank as "internal" students of the University.

**Westfield College, Hampstead**, founded in '82 (Mistress, Miss Maynard), receives about 60 students; but they are not compelled to take the entire course, or to enter for any University examination. Candidates are required to pass an entrance examination in Scripture, English, arithmetic and geography, with two extra subjects (languages and mathematics), unless they have passed some equivalent. Fees, £105 per annum. Scholarships are competed for each year in June. Since July 1902 Westfield College has been admitted as a "school" of the University of London in

the Faculty of Arts. A new wing has recently (Oct. 1905) been added to the College buildings. Students of University College, London, of the London School of Medicine for Women, or of the Slade School of Art, can reside, under collegiate rules, at College Hall, Byng Place, Gordon Square. (Principal, Mrs. Viriamu Jones.) Two Pfeiffer Scholarships are given in connection with residence at College Hall. There is accommodation for about 40 students. The lectures and laboratories of University College, London, are open to women. Apply to the Lay Superintendent, Miss Morison. A register of boarding-houses is kept at the College for the convenience of students, but such residences are not under College control.

The London School of Economics (University of London), Passmore Edwards Hall, Clare Market, W.C., provides teaching, and prepares men and women for examination in all subjects connected with commerce, industry and kindred subjects. Fees £10 per session. Apply to the Director, H. J. Mackinder, Esq., M.A. A students' library and common room are provided.

The London School of Social Economics, for men and women, is established at 63, Denison House, Vauxhall Bridge Road, S.W. (Hon. Sec., Mrs. G. F. Hill). Examinations are held and certificates given. Fees, £12 12s. per session, or £5 per term.

### *Provincial University Facilities.*

Victoria University, Manchester, follows the example of London in conferring its degrees upon women. Miss Hilda Oakeley, M.A., is Warden of the Ashburne House Hall of Residence and Tutor in the University. Fees for board and residence 12 to 20 guineas per term of 11 weeks. An additional house was opened Oct. 1906. Three bursaries are offered. The Victoria Church Hostel for women students in the Training Department was opened Oct. 1904. Warden, Miss E. L. Broadbent, M.A.

The University of Liverpool's charter provides that all courses shall be open to women. The University Hall, Fairfield, Liverpool (Warden, Miss M. C. Staveley) is the official residence of the women students. Fees for board and residence from £35 per annum. This hall is recognised as a hostel for day training college students. The University of Leeds (charter 1904) grants degrees in Arts, Science, Medicine, Law, and Commerce. All classes and laboratories are open to men and women alike. Fees for complete course of instruction about £16 to £25 per annum. Apply to the Registrar, W. F. Husband, Esq., LL.B. There is no Hall of residence for women students, but the University issues a list of lodgings which have satisfied its inspection. The University of Birmingham grants degrees to women, and opened (Oct. 1904) a temporary hostel for women students at 215, Hagley Road, Edgbaston (Principal, Miss S. M. Fry). It is hoped that a larger and special building will shortly be erected for women students. The University Colleges of Bristol and Nottingham also provide for women. No halls of residence as yet. The University of Durham, since '95, by special Supplementary Charter, grants degrees to women, except only in Divinity. A women's hall of residence was opened in Oct. '99 and enlarged 1902 (Warden, Miss Elizabeth Robinson, The Women's Hostel, Palace Green). Scholarships

for women students are offered in June of each year. Apply to the Censor of Women Students, Mrs. Ellershaw, B.A., 46, North Bailey, Durham. The Durham College of Science at Newcastle-on-Tyne (Secretary, H. F. Stockdale), represents the faculties of Science, Medicine, and Engineering in the University of Durham, and is open to students of either sex. A University Hostel for women is open at Eslington Tower, Jesmond, Newcastle-on-Tyne (Mistress, Miss Perry). Fees for board and residence from 40 guineas per session. The University College of Sheffield was in 1905 raised to the status of an independent university. Handsome new buildings were opened in July last. The charter provides for the establishment of a teaching university with powers to grant degrees, without distinction of sex, in the faculties of Arts, Science, Technology, and Medicine. There is at present no separate hostel for the women of the University; they live in rooms under the supervision of the Lady Tutor, Miss M. J. Sorby. A residence is provided for 82 women students of the Day Training College for Primary Teachers (Superintendent, Mrs. L. D. Henry, LL.A.), and such students may, under certain conditions, read for a degree in the University.

### *Ireland and Scotland.*

In Ireland the Royal University of Ireland, which is an examining body only, opened its degrees to women in '78. Women students are received at Alexandra College, Dublin. Exhibitions and scholarships are awarded. Apply to the Warden at the College.

During the year 1904 a great change took place in University Education in Ireland by the opening of Trinity College, Dublin University (founded A.D. 1591) with its degrees, teaching, and prizes to women. The question had been before the Senate for 20 years. Women students or graduates of other universities are entitled to every privilege granted to men of the same standing. A special wing has been built for women in the Medical School, and special rooms are set apart for their use in the College. No hostel has as yet been opened. A Women's Club is being formed. The women students are under the supervision of the Lady Registrar (Miss Lucy Gwynne), and are subject to College discipline and statutes.

In Scotland the classes of the University of St. Andrews, both professorial and tutorial, in Arts, Divinity, Science, and Medicine, are open to women students, and the University confers all degrees upon them on the same terms as upon men. The diploma of LL.A. is also granted to them. University Hall (Warden, Miss Frances H. Melville, M.A. Edin.), opened Sept. '96, accommodates 24 students. Fees for board and residence about £60 per annum. Scholarships, value from £40 to £15, are competed for in October. There is no entrance examination to the Hall, and students may come into residence to prepare for the Preliminary Examinations of the University. Mr. Andrew Carnegie, Rector of the University, in Oct. 1902, gave £1500 for a Union for the women students. The authorities purchased on behalf of these students a house—79, North Street—previously known as St. Kentigern's Hostel. The house is close to the United College. The Faculties in Arts, Science, and Medicine of the University of Aberdeen are open

to women on the same terms as to men. No hostel is provided for the women students.

At **Edinburgh University** women are admitted to the Arts classes with the men, and on the same terms as regards academic privilege. Masson Hall, 31, George Square, Edinburgh, opened in '97, is intended for the accommodation of women students of the University (Warden, Miss F. H. Simson, M.A.). The Muir Hall of Residence, 12, George Square, Edinburgh (Lady Superintendent, Miss Robertson), is a residence for women students of medicine in the University.

**Queen Margaret College, Glasgow** (Hon. Secretary, Miss J. A. Galloway), by incorporation in '93 is now the women's department of the University of Glasgow as a non-resident college for women governed by the University Court and Senate. Women are there prepared for all degrees in arts and medicine of Glasgow.

**Queen Margaret Hall** (Lady Superintendent, Miss C. M. Birrell), with an average of 33 students, provides a residence for students attending Queen Margaret College. Clinical work is done at the Royal Infirmary and other local hospitals. Terms for board and residence from £32 to £40 per annum. In the Scotch Universities both men and women students alike benefit by the provisions of the "Carnegie Trust" (1901). See UNIVERSITIES.

### Wales.

In **South Wales** the classes of University College, Cardiff, in arts, science, and medicine are open to women students, and the degrees of B.A., B.Sc., M.A., D.Sc. of the University of Wales are conferred upon them. Students can take the first two or three years of a medical course and proceed to the Universities of London, Edinburgh, Glasgow, etc. Dispensary classes can be attended at Cardiff Infirmary. There are Secondary, Elementary, and Kindergarten Training Departments. Entrance scholarships of the value of £42 and under are competed for annually. In connection with the College is the **Aberdare Hall of Residence** for women students (Principal, Miss Kate Hurlbatt), enlarged in 1905 and accommodating 60 students. Terms for board and residence £32 to £42 10s. per annum. College fees in Arts £10, in Science 13 guineas per annum. By a regulation of the Council of University College both men and women students now wear academic dress.

The **University College of North Wales** (Bangor) gives the same advantages to women as to men in preparation for the London and Welsh degrees and for the medical preliminaries of Edinburgh and Glasgow. A new University Hall for Women Students (Warden, Miss Hilda Lane), was opened in '97. Open entrance scholarships (from £30 to £10 in value) are offered to men and women alike.

**University College, Aberystwyth**, prepares for the requirements of the London and Welsh examinations for B.A., M.A., B.Sc., for degrees in medicine, and the entrance examinations of the older universities. Entrance scholarships, open to women, are competed for annually. The Women's Hostel (Alexandra Hall (Principal, Miss H. M. Stephen) has rooms for 200 students.

### Medical Training.

For the special study of medicine, women are eligible for the medical degrees of the

University of London (South Kensington, S.W.), the Royal University of Ireland (Earlsfort Terrace, Dublin), the conjoint examination of the Royal College of Physicians and the Royal College of Surgeons in Ireland (Dawson Street, Dublin), the Colleges of Physicians and Surgeons, Edinburgh, the Faculty of Physicians and Surgeons, Glasgow (conjoint), the Society of Apothecaries, London, and the University of Durham. It is easier, and takes a shorter time, to pass the colleges than the Universities, but by the regulations five years is the required period for which a student must be registered as such. Students are not admitted under the age of eighteen, and, unless matriculation has been taken, a preliminary examination in English, Latin, and one other language, elementary mathematics, and arithmetic, has to be passed before registration. The necessary hospital work in the case of London can be done at the New Hospital for Women, 144, Euston Road, or at the Royal Free Hospital. Every medical student must apply for registration at the office of the General Medical Council, 299, Oxford Street, W., within 15 days after the commencement of professional study. The whole course of medical study for the Universities of London and Ireland, the Society of Apothecaries, and the conjoint colleges can be completed at the London School of Medicine for Women (Secretary, Miss Douie, M.B., 8, Hunter Street, Brunswick Square, W.C.). The greater part of the course for Durham and Glasgow can also be taken at this school. Students desiring to spend one year only at the Newcastle College of Medicine (University of Durham) are advised to take their fourth or fifth year here. The Universities of Calcutta, Madras, and the Punjab also accept the certificates of the school as qualifying for their examinations. Certain courses in Biology, Physics, Chemistry, etc., are open to ladies preparing for examinations in science. Ladies desiring to study medicine with a view to practice may, by permission of the Executive Council, attend certain classes upon payment of the fees, without passing the examination in arts. Art students are admitted to the classes of anatomy and practical anatomy. Graduates of foreign universities can occasionally be admitted to attend the hospital practice without holding a post, when the accommodation will permit. In Scotland and Ireland women students are admitted to the local hospitals. At the Royal Infirmary of Edinburgh arrangements are made for the clinical education of women, giving accommodation according to the demands of the Triple Qualification Board, £300 having been raised and presented to the Infirmary in recognition of the "fact that women students have been admitted to qualifying instruction in its wards." Valuable scholarships are annually competed for at the London School in September, and resident and other appointments at the Royal Free Hospital are open to students who have obtained their diplomas. Particulars may be found in the *Lancet* newspaper from time to time. In addition to College Hall (see above) there are eight sets of students chambers at the school, 8, Hunter Street, W.C. Apply to the Secretary, from whom also a list of lodging-houses in the neighbourhood can be obtained. Boarding-houses for medical students (women) at 3, Endsleigh Gardens, W.C. (Miss Goodchild) (fees, 20 guineas per term of 12

weeks), at 5, Endsleigh Street, W.C. (Mrs. Clarke Kerr), and at 23 and 32, Mecklenburgh Square, W.C. (Mrs. Wright) (fees, 15 to 18 guineas per term, with special arrangements for the vacation).

**Women's Horticultural College.** A scheme of training for colonial life is in successful operation here. The college is situated at Swanley, in Kent. **Hon. Treasurer,** Mrs. John Hopkinson, Holmwood, Wimbledon Common, S.W.

### WOMEN'S SUFFRAGE.

Subject to certain restrictions, adult men enjoy, in return for the performance of civic duties, the right to vote. That women who perform the same duties shall have the same right to vote is the claim of the **Women's Suffrage Party**. The lack of voting power makes it impossible for women to insist on the removal of existing grievances, or to prevent the growth of fresh injustices. A very practical reason for desiring women's franchise is the fact that **women's industrial conditions** cannot be remedied without the aid of the vote. Many thousands of women labour for a penny an hour; the average weekly wage of women is only 7s.; many other annoyances and oppressions in the shape of fines, non-payment for overtime, and insanitary working conditions, are put upon working women. This is well known, but the public are slow to realise that the true remedy for these evils is to arm women workers with political power wherewith they may work out their own industrial salvation.

In the early days of the **Women's Suffrage** movement opponents adjured the women to look to their homes and to leave politics to men; but now that the hand of the legislator is reaching nearer and nearer to the home, what was by many regarded as an argument against women's franchise is now seen to be an argument in its favour. The question of **housing, feeding of schoolchildren, and education, affect vitally the woman, the child, and the home.** There are, indeed, no political questions of which this is not true, and people are realising now that politics are the concern, not of one class but of all classes, not of one sex but of both sexes.

Formerly, women property owners were not debarred from exercising the political rights which the holding of property conferred, but the barrier which excludes women as such from political power grew ever higher, until in 1830 the House of Commons definitely, and for the first time, set up a franchise applying only to men. The first attempt made in Parliament to restore to women their ancient political rights in a new and extended form was that of **John Stuart Mill** in 1867. His amendment to the **Reform Bill** was defeated by 106 votes to 73. In 1870 a **Women's Suffrage Bill** drafted by Dr. Pankhurst and introduced by Mr. Jacob Bright passed second reading by a majority of 33 votes. Strong Government pressure resulted in the defeat of the Bill at a later stage. Following on this reverse came an active campaign in Scotland, the West of England, South Wales, and other parts of the country. **Florence Nightingale, Harriet Martineau, Mary Carpenter, and 2000 other women of influence** in 1870, memorialised Mr. Gladstone demanding the Suffrage. In 1873 two memorials in support of women's

suffrage, bearing between them 18,000 signatures, were addressed to Mr. Gladstone and to Mr. Disraeli. Mr. Disraeli expressed his sympathy with the **Women's Suffrage** cause, and the hope that the reform would soon be granted. In 1875 a number of Members of Parliament, of whom Lord Randolph Churchill was one, formed a committee to oppose the enfranchisement of women. From 1870 to 1884 almost every year saw the introduction of **Women's Suffrage bills**. In the latter year the **Reform Bill** was introduced, and a vigorous attempt was made to secure the inclusion therein of a **Woman's Suffrage** amendment. In support of the women's claims, public meetings were held. Municipal corporations petitioned in favour of **Woman's Suffrage**, and almost every leading newspaper supported the proposed amendment to the **Reform Bill**. Mr. Gladstone, however, opposed it, threatening that if it were carried he would abandon the whole Bill. In response to this Government pressure Members of Parliament broke their pledges and the amendment was defeated.

The agitation has continued from that day to this. Governments, both Liberal and Tory, have refused to deal with the question, and the rank and file of Members of Parliament have done nothing to force the question upon the attention of their leaders. The members of the **Women's Social and Political Union**, a society formed in 1903, realising that the quiet and demure agitation of the past fifty years has failed, while not abandoning any of the old means of agitation by way of public meetings and the like, have, in addition to these means, taken action which has availed to bring the woman's cause into great prominence. On May 19th, 1906, the **Prime Minister** received a **Deputation** representing half a million organised women, which laid before him the case for the immediate enfranchisement of women. His reply was that he was himself in hearty sympathy with the movement, but was unable to give anything in the nature of a pledge as to the time and method of achieving their object, which would involve other people who did not share entirely the same convictions and sentiments. **Mr. Asquith**, being thought a strong opponent of the movement, was approached by a deputation of women. He escaped the deputation on the first occasion; and on a second visit to his residence being made, four women were arrested by the police. Immediately afterwards a campaign was begun in East Fife, and as a result Mr. Asquith, on his next visit to his constituency, consented to receive a deputation of women. His declaration of hostility to **Women's Suffrage** moved the Liberal women in East Fife to determine to run a candidate in opposition to him at the next election. Ministers' meetings were attended, in order that they might be asked whether the Government intended to grant women's suffrage, but so far an answer to this question has been refused. Disturbances frequently arose in consequence. The **Women's Social and Political Union** initiated the policy of **intervening at by-elections** for the purpose of securing the defeat of candidates who are followers of a Government which is hostile to **Women's Franchise**. **Demonstrations of protest** against the disfranchisement of women were made in the House of Commons itself, on April 25th, 1906, when the **Ladies' Gallery** was cleared, and on Oct. 23rd, the latter occasion leading

to the imprisonment of ten women, since all declined to find sureties for six months' good behaviour, and in default were imprisoned for two months. They were, however, released on Nov. 24th. Since the new agitation began there have been in all twenty-one imprisonments of women. In the autumn of 1906 a Women's Suffrage Bill was introduced by Mr. Keir Hardie, and elicited from the Prime Minister a statement that the impression that the Government could give no hope of dealing with this question was erroneous. Mr. Morley informed a deputation which waited on him on Oct. 30th that he was heartily in sympathy with the claims of the working women for enfranchisement.

The National Union of Women's Suffrage Societies comprises most of the Women's Suffrage societies in Great Britain which work on a non-party basis, and for Women's Suffrage only. Secretaries: Miss Edith Palliser and Miss F. Sterling, 25, Victoria Street, Westminster. The Executive Committee of the National Union meets at the office of the Central Society for Women's Suffrage, 25, Victoria Street, Westminster, of which Miss Edith Palliser is secretary.

Women's Social and Political Union. Its object is to secure for women the Parliamentary vote, as it is, or may be, granted to men; to use the power thus obtained to establish equality of rights and opportunities between the sexes, and to promote the social and industrial well-being of the community. There are a number of provincial branches, and a Central Committee in London. The organisers are Miss Christabel Pankhurst, LL.B., Miss Teresa Billington, Miss Annie Kenney, Miss Mary E. Gawthorpe, Mrs. M. Baldock, Miss Helen Fraser, and Mrs. Knight. Hon. Treasurer, Mrs. Pethick Lawrence, 87, Clement's Inn, W.C. Hon. Sec., Mrs. Edith H. Martyn, B.Sc., 4, Clement's Inn, W.C.

The following societies also have Women's Suffrage for one of their principal objects: Lancashire and Cheshire Women Textile Workers Representation Committee, Sec., Miss E. G. Roper, 5, John Dalton Street, Manchester. Women's Co-Operative Guild, Sec., Miss M. Llewelyn Davies, Kirkby Lonsdale.

In New Zealand, South Australia, New South Wales, Queensland, Tasmania, and Western

Australia full suffrage has been conceded to women. Full suffrage has been granted to the women of the Commonwealth of Australia for the Federal Parliament, and to the women of Finland, which is the first European country to enfranchise women.

Women Journalists, Society of, 1, Clifford's Inn, Fleet Street, E.C. Hon. Sec., Mrs. H. T. Bulstrode.

Wood, Field-Marshal Sir (Henry) Evelyn V.C., G.C.B., G.C.M.G., was b. at Cressing in 1838, and entered the Navy in '52. Served in the Crimea, and was severely wounded at the assault on the Redan. In '55 he joined the Army as cornet 13th Light Dragoons, served in India in 17th Lancers, and, while commanding the 1st Regt. of Beaton's Irregular Horse, won the Victoria Cross, '58. Defeated the Zulus at Kambula, and was made K.C.B. Served in the Transvaal war as major-general, and was one of H.M.'s Commissioners for settling the Transvaal limits ('81). Created G.C.M.G. Commanded the 2nd Brigade, 2nd division, in the Egyptian expedition, receiving the thanks of Parliament in '82. Raised the Egyptian Army in '83, and served in Nile expedition. From '86 to '93 he commanded the Aldershot district, from '93 till '97 he was Quartermaster-General, and from Oct. '97 till Oct. 1901 Adjutant-General. Commanded 2nd Army Corps 1901-4. Promoted to the rank of field-marshal April 1903. Author of "Cavalry in the Waterloo Campaign," "Cavalry Achievements," and "From Midshipman to Field-Marshal." Clubs, Army and Navy, United Service. Address, Millhurst Harlow, Essex.

Wrnz, Francis Xavier, General of the Society of Jesus. Born at Rottweil (Wurtemberg), on Dec. 2nd, 1842, he entered the Society on Dec. 5th, '57. After studying canon law in England, he was called to a professorship at the faculty of the Gregorian University, Rome. For two years previous to his election as General (Sept. 1906) Father Wrnz was Rector of this university. He is the second German in the roll of generals of the order. His election was much commented upon in France as a token of German influence at the Vatican. (Father Wrnz's name is pronounced "Vernez.") The General of the Jesuits is popularly known as the "Black Pope."

## Y

Young Men's Christian Association, The, has 7773 affiliated societies scattered throughout the world, with a total membership of 721,477; and in the United Kingdom 1854 associations and centres of work, with 127,774 members. The headquarters of the Y.M.C.A. are at "George Williams House," 13, Russell Square, W.C. Secretary of the National Council, Mr. W. H. Mills. The London Central Association has its headquarters at Exeter

Hall, Strand, W.C. Secretary, Mr. J. H. Putterill.

Young Women's Christian Association, The, has more than 300,000 members in all parts of the world. The British membership is 99,104, including nearly 15,000 in London. Head Offices, 25 and 26, George Street, Hanover Square, W. The World's Y.W.C.A., organised for the development and extension of Y.W.C.A. in all lands, also has its office at 26, George St.

- ¶ The present is an age of strenuous rush, whether it be in the Realm of Commerce or that of Society.
- ¶ It has long since been admitted that without some mechanical device the great mass of correspondence and other matter could not be successfully dealt with in the Realm of Commerce.
- ¶ This is increasingly felt in the Realm of Society.
- ¶ That such "mechanical device" should be absolutely reliable, easy to use, and produce perfect results.
- ¶ That the only "mechanical device" that combines these essentials is the

**FACTS WORTH NOTING.**

The fact that the Society has a reserve of

**OVER SIX MILLIONS AND A QUARTER**

in invested funds should be of itself sufficient to satisfy the mind of the most critical, but there are other points also which are most important.

A Life Office makes its profit from three sources:—

1. When its mortality experience is less than that provided for.
2. When its expenses are less than the sum allowed for this purpose in the calculation of its premiums.
3. When the rate of interest earned is in excess of that contemplated.

The last Report shows a profit on these three items.

1. The claims by death in 1905 were only 73½%, and the amount paid was £284,945, against £361,980 expected.
2. The expenses have fallen from 15.05% to 13.99%, whilst the sum allowed for this purpose is nearly 21%.
3. The rate of interest earned on the funds was increased to £3 14s. 4d.%, whilst that assumed on its valuation is 3%.

If the subsequent years show, as may be fairly anticipated, the same favourable results, those who now take out Policies will reap the reward of the careful action of the Directors in the past.

*Copies of Annual Report, Prospectus, and all information will be forwarded upon application to—***H. G. HOBSON, Actuary and Secretary.**

**Assistant Secretary.**—ARTHUR E. C. WHITE.

**Secretary.**—WILLIAM JOHN VINE.

THE CAPITAL, amounting to FIVE MILLIONS, was fully subscribed before the Society commenced business in 1845, and the shares are held by a body of Shareholders, comprising some of the highest and most influential members of the Legal Profession. The success which has attended the operations of the Society is founded on its strong financial position, the eligible character of the risks constituting the bulk of its business, and the promptitude and liberality with which its engagements are met.

# EMPLOYERS' LIABILITY ASSURANCE CORPORATION, LIMITED.

Actuary—W. R. HOPKINS, F.I.A.

Secretary—G. W. MANNERING.

## PROGRESS OF THE COMPANY

During the Past 20 Years, to December 31st, 1905.

YEARS.	NEW BUSINESS.		NET PREMIUM INCOME.	INVESTED FUNDS.
	Sums Assured.	New Premiums.		
1885	£582,675	£21,853	£117,076	£422,539
1895	767,570	29,697	194,051	1,059,799
1905	749,912	32,974	302,508	2,117,199

It will thus be seen that in ten years the Net Premium Income shows an increase of over £100,000, whilst the Funds during the same period have been increased by more than £1,000,000.

**SPECIAL FEATURES.**—Low Rates of Premiums—Liberal Conditions—Immediate Payment of Claims—Policies Nonforfeitable, World-wide.

**DISTRIBUTION OF PROFITS.**—New policyholders participate in the large proportion of Ninety per cent. of the entire Profits of the Company.

**MODERATE RATES. LIBERAL CONDITIONS. UNDOUBTED SECURITY.**

The Society offers the BENEFITS of MUTUAL LIFE ASSURANCE without personal liability on highly favourable terms to

## THE CLERGY AND THEIR RELATIVES.

### ALL PROFITS BELONG TO THE MEMBERS.

Accumulated Fund, £4,292,691. Annual Income, £438,200.

Bonuses Distributed, £4,256,464.

#### LOW PREMIUMS. LARGE BONUSES.

Notwithstanding the LOWNESS of the Premiums charged, the BONUSES are on an EXCEPTIONALLY HIGH SCALE.

#### NEW AND SPECIAL POLICIES.

Application is invited for the PROSPECTUS, and Leaflets explaining two new Policies, with valuable Options.

1.—WHOLE-LIFE CONVERTIBLE ASSURANCES.—VERY LOW PREMIUM—ABOUT ONE-HALF THE USUAL RATE—during first ten years.

2.—PENSION POLICIES.—Premiums returnable with compound interest in case of death or surrender before pension age. Option to commute for Cash.

#### SPECIMEN of RATES for £1,000, with PROFITS.

Age next Birthday.	£1,000 Payable at Death.	£1,000 payable at Age 60 or earlier Death.
25	£20 1 8	£27 3 4
30	23 3 4	32 10 10
35	26 10 0	40 1 8
40	31 1 8	51 5 0

NOTE.—Under the Reduced Premium System (explained in Prospectus) four-fifths only of these premiums need be paid, the other one-fifth remaining a charge to be repaid out of Bonus.

No Agents employed and No Commission paid for the introduction of business, whereby £10,000 a year is saved to the Members.

Assurances can be effected by direct communication with the Office, 2 & 3, THE SANCTUARY, WESTMINSTER, S.W.

INCORPORATED BY ACT OF PARLIAMENT IN 1895.

SECRETARY.—A. E. MANN.

SUPERINTENDENT OF BRANCHES.—H. R. S. MASSEY.

The present Subscribed Capital of the Bank is £14,000,000. in 140,000 Shares of £100 each, held by upwards of 10,100 Shareholders. The sum of £20 has been paid on each Share, thus making the paid-up Capital £2,800,000. The Rest or Surplus Fund is £1,400,000.

Current Accounts are opened with, and the usual Banking facilities granted to, persons properly introduced. The Bank takes the Agency of Private Country Banks, Joint Stock Banks, and other Public Companies in England or the Colonies; attends to the purchase and sale of British and Foreign Stocks; collects Dividends on Government Funds, Railway Stock, Foreign and other Securities, payable in England or abroad; acts as Agents for the receipt of Military and other Pay and Allowances; and generally transacts every description of Banking business.

Sums of £10 and upwards may be deposited, subject to seven days' notice of withdrawal, or repayable at call. Interest is allowed thereon, according to the class of Deposit, but subject to alteration by public advertisement in the *Times* newspaper. A receipt is given for each deposit, which is not transferable, and must be surrendered on repayment of the amount, according to the conditions printed thereon.

Circular Notes of £10, £25, and £50 are issued for the use of Travellers, payable in the principal towns of Europe, Asia, Africa, America, and Australasia. They are issued free of expense, and are payable by the Agents abroad, at the exchange of the day, without any deduction whatever for commission.

Letters of Credit are also granted on the Chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches.

The Officers of the Bank are bound not to disclose the transactions of any of its Customers.

LONDON, October, 1906.

A. E. MANN, Secretary.

# BIRKBECK BANK

ESTABLISHED 1851.

SOUTHAMPTON BUILDINGS, HIGH HOLBORN, LONDON, W.C.

## CURRENT ACCOUNTS.

**Two per cent. Interest** is allowed on Current or Drawing Accounts with cheque book.

These Accounts may be opened by Private Individuals, or by Trading Firms, Limited Companies, or Societies.

## DEPOSIT ACCOUNTS.

**Two-and-a-Half per cent. Interest** is allowed on Deposits repayable on demand.

These Accounts are opened in the Names of Adults or Children, or in the joint names of two or more persons. Accounts are also opened with Clubs, Provident and Friendly Societies, or with Charitable Institutions and other Associations.

## DEPOSIT RECEIPTS.

Deposit Receipts, subject to seven days' notice of withdrawal, are issued at the Rate of Interest allowed by the leading London Bankers; alterations in the rate are announced by advertisement only.

## STOCKS AND SHARES.

Stocks and Shares are purchased and sold for Customers of the Bank. Quotations of prices of any Stocks can be obtained without delay, the Bank being in communication with their Stock Brokers by private telephone.

## LOANS AND ADVANCES.

Temporary Advances are made to Customers on Stock Exchange Securities, and upon Freehold and Leasehold Title Deeds.

## MORTGAGES.

Loans by way of Mortgage are granted upon Freehold and Leasehold Properties for long or short periods. Mortgages may be redeemed at any time without notice, and the principal may be reduced by voluntary or fixed Instalments according to arrangement.

## FOREIGN DRAFTS.

Foreign Drafts and Advices, Letters of Credit, and Circular Notes are issued for all parts of the World.

## CUSTODY OF SECURITIES.

The Bank undertakes for Customers, free of charge, the safe custody of Bonds, Share Certificates, Title Deeds, etc., as well as the collection of Bills of Exchange, Dividends, and Coupons. The Bank also acts as Agent for receiving the Pay and Pensions of Officers of the Army and Navy, at home and abroad.

# East London Church Fund.

**Patron:**

THE LORD BISHOP OF LONDON.

**Presidents:**

THE BISHOP OF ISLINGTON.

THE BISHOP OF STEPNEY.

## OBJECT!

This Fund exists for the sole purpose of bringing **more Christian Workers** into the East End. It already helps to maintain **410 Assistant Curates and other Workers**. The annual grants list amounts now to £20,826.

## WANTED!

**NEW ANNUAL SUBSCRIPTIONS**, as at present annual subscriptions amount to £5,000 only, while the annual expenditure is nearly £21,000.

**Bankers:** BANK OF ENGLAND.

**Office:**

**70, HAMILTON HOUSE, BISHOPSGATE STREET WITHOUT, E.C.**

# East London Fund for the Jews.

(The Church of England Fund for Work amongst the Jews in East and North London.)

**Patron:** THE LORD BISHOP OF LONDON.

**Presidents:** THE BISHOP OF ISLINGTON and THE BISHOP OF STEPNEY.

**Chairman:** THE BISHOP OF STEPNEY.

**OBJECT.**—Evangelization of the Jews in E. and N. London, in which districts there are three times as many Jews as in Jerusalem.

**METHOD.**—Grants to incumbents for the supply of properly-qualified clerical or lay agents to work amongst their Jewish parishioners. Grants are made to 15 parishes in support of 26 workers.

**NEEDS.**—Income for 1905 was £2,400. An additional £1,000 per annum is urgently needed for (1) Grants to East End parishes; (2) Extra help in support of the Training Scheme for workers, started by the Fund in 1906. Under this Scheme, workers are given a practical knowledge of the Yiddish and Hebrew languages, Jewish religion, and methods of work.

*Cheques and Postal Orders payable to the Secretary, crossed "London and County Bank."*

**Organising Secretary:** The Rev. H. HEATHCOTE.

**Office:**

**71, Hamilton House, Bishopsgate Street Without, London, E.C.**

# BAPTIST MISSIONARY SOCIETY,

19, FURNIVAL STREET, LONDON, E.C.

THIS SOCIETY WAS FOUNDED IN 1792.

ITS FIRST MISSIONARY WAS

WILLIAM CAREY, "The Father and Founder of Modern Missions."

THE FIELDS OF LABOUR ARE—

India, Ceylon, China, Africa, West Indies, Palestine, Italy, and France.

Number of European Missionaries	...	...	...	...	152
Number of Missionaries' Wives and Lady Helpers	...	...	...	...	124
Number of Native Missionaries, Evangelists, etc.	...	...	...	...	560
Number of Church Members (exclusive of West Indies*)	...	...	...	...	17,269
Number of Day Scholars (	"	"	)	...	21,207
Number of Sabbath Scholars (	"	"	)	...	12,322

\* Now independent of the Society.

Owing to extension of work, **£10,000** are needed to bring Income up to Expenditure. Contributions will be very thankfully received by **JOHN BROWN MYERS, Home Secretary**, at above address.

Applications for the Literature of the Society should be addressed to the Publication Department.

## London Missionary Society.

*Established in 1795 on a Non-sectarian Evangelical Basis.*

16, NEW BRIDGE STREET, LONDON, E.C.

### SECOND CENTURY OF WORK.

The Society has sent out such men as John Williams, Robert Moffat, David Livingstone, Robert Morrison, James Gilmour, James Chalmers, and John Mackenzie. It has now:—

277	MISSIONARIES (38 of them Medical).

The Ven. the Archdeacon of London.

Mr. R. F. Horton, M.A., D.D.

W. H. Brown, Esq.

J. Passmore Edwards, Esq.

George Hanbury, Esq.

## These Homes were the first to abandon the discredited Barrack System, to secure Family Life for the Boys.

THE COTTAGE HOMES AT FARNINGHAM are for 330 Boys, who are Homeless and Destitute. They are placed in families of 30 each, with a Foster Father and Mother to take care of them. They are fed, clothed, and educated, and receive careful moral and religious training.

Suitable boys are prepared for Confirmation. Thirty-two were presented at last Visitation.

They are taught to be industrious by being employed in Tailoring, Shoemaking, Carpentering, Printing, Breadmaking, Painting, Plumbing, Gasfitting, Blacksmithing, Engine-room Work, Gardening, Farming, etc., etc. Apprenticeships are found for them. They are looked after as "Old Boys," and a house is always kept ready for them to return to during holidays, when out of work, or convalescent after sickness.

Boys are either admitted on payment by benevolent persons of 7s. a week, or can be elected free or on part payment by votes of the subscribers.

THE HOMES FOR ORPHANS at Swanley are designed for 175 Boys, whose mothers need to go out to earn their living. They do what they can towards the support of their own boys, and friends who have known them in better days help them. Every boy admitted to the Orphanage is paid for at the rate of £21 per annum. The living is upon the same lines as at Farningham, but the education is more extended. Many benevolent people are glad in this way to support an Orphan Boy, or to help a necessitous mother who cannot pay the whole of the fees.

The Committee most earnestly appeal for help to enable them to make self-supporting boys.

**Treasurer**—EDMUND S. HANBURY, Esq., Poles, Ware, Herts.

**Secretary**—Mr. WM. ROBSON, 100, Temple Chambers, Temple Avenue, E.C.

**Bankers** { BARCLAY & Co. (Gosling's Branch), 19, Fleet Street; and  
THE UNION OF LONDON & SMITHS, Lombard Street.

# THE ROYAL BLIND PENSION SOCIETY.

**Patron: HIS MAJESTY THE KING.**

**Vice-Patrons:** { H.R.H. THE PRINCE OF WALES, K.G.  
H.R.H. THE DUKE OF CONNAUGHT, K.G.

**President: HIS GRACE THE DUKE OF GRAFTON, K.G.**

**Honorary Secretaries: Messrs. GEORGE POCOCK and PERCY R. POCOCK.**

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from 10s. to 25s. per month.

Elections take place in May and November in each year.

In addition to those elected by the votes of Subscribers, not less than two are added at every election by rotation. Others are nominated from time to time to receive the "Queen Victoria," "Thomas Pocock," and "James Templeton Wood" Memorial Pensions.

To be eligible, applicants must be totally blind, above 21 years of age, of good character, and in receipt of an income not exceeding £20 if single, and £30 if married.

The receipt of parish relief is not a disqualification.

Applications must be made on the printed form provided by the Society.

Subscribers of 10s. 6d. annually, or Donors of Five Guineas, are entitled to One Vote at every election, and the multiples thereof in proportion.

The payment of a Legacy to the Society confers upon each Executor the privilege of One Life Vote for every £25 bequeathed.

The yearly report, containing the rules, accounts, and all information, will be forwarded on application.

Contributions will be gratefully received by the Treasurer, or by the BANK OF ENGLAND, or by Messrs. BARCLAY & CO.

JOHN C. BUMSTED, Esq., *Treasurer and Chairman of Committee.*

W. ELLIOTT TERRY, *Secretary.*

237, SOUTHWARK BRIDGE ROAD, LONDON, S.E.

## SONS OF THE CLERGY CORPORATION

(Founded A.D. 1655.) (Incorporated by Royal Charter, A.D. 1678.)

For the Relief of Necessitous Clergymen, their Widows, aged Single Daughters, and Children of every Diocese in England and Wales.

**President—The ARCHBISHOP OF CANTERBURY. Vice-President—Earl EGERTON OF TATTON.**

**Treasurers—**

SIR WILLIAM TOMLINSON, BART.; REV. CANON C. F. NORMAN, M.A.;

SIR W. VAUGHAN MORGAN, BART., ALDERMAN.

The Governors now assist annually about 300 Clergymen by Grants, and over 400 Clergy Children by Grants towards Education, Apprenticeship, and outfit (about one-fifth of whom are Orphans), and over 1,080 Clergy Widows and aged Single Daughters (712 of whom are Pensioners).

**By far the oldest, largest, and most  
comprehensive of Clergy Charities.**

Donors of Thirty Guineas and upwards are elected Governors of the Corporation.

**More Annual Subscriptions and Donations are needed.**

LEGACIES also form a most important feature in the annual receipts of this ancient Society.

The 253rd Festival will be celebrated in St. Paul's Cathedral, on Monday, the 29th April, 1907, Tickets are issued to Subscribers and Donors.

**SIR PAGET BOWMAN, Bart., Regr.,**

**CORPORATION HOUSE, BLOOMSBURY PLACE, LONDON, W.C.**

## ROYAL NATIONAL MISSION TO DEEP SEA FISHERMEN

maintains **3** Hospital Steamers and **5** Bethel Ships, which are engaged in constant work afloat in the fishing fleets, also Shore Institutes and Homes at all the chief fishing centres.

Has no endowments, but is entirely dependent on voluntary contributions.

**Help earnestly appealed for.**

Treasurer—Sir WILLIAM GODSELL.

Secretary—FRANCIS H. WOOD, 181, Queen Victoria Street, E.C.

# THE SCHOOL FOR THE INDIGENT BLIND,

**LEATHERHEAD, SURREY** (*Late of St. George's Circus, S.E.*)  
 Founded at Southwark, 1799. Incorporated 1826. Rebuilt at Leatherhead, 1902.  
*Patrons: Their Most Gracious Majesties the KING and QUEEN ALEXANDRA.*

## OBJECT OF THE CHARITY:

**"To Render the Blind Self-Reliant."**

(COPYRIGHT.)

Over **8,500** Blind assisted during the last Century. Contributions are earnestly pleaded for.

The Rev. ST. CLARE HILL, M.A., Principal and Secretary.

Chief Offices—HIGHLANDS ROAD, LEATHERHEAD, SURREY.

Telephone No. 4, P.O. Leatherhead.

Telegraphic Address: "Lux, Leatherhead."

# THE POOR CLERGY RELIEF CORPORATION

Established 1856.

Incorporated by Royal Charter 1867.

*President*—THE BISHOP OF LONDON.

THE ONLY SOCIETY of the kind which gives Immediate Assistance to the Clergy, their Widows and Orphan Daughters, **IN ALL PARTS OF THE EMPIRE.**

At each **Fortnightly Meeting** of the Committee some **Hundreds of Pounds** are distributed (besides valuable gifts of Clothing), and a large fund is required to meet the ever-increasing appeals for help.

The Society has aided over **25,000** cases of Clerical Distress.

## DONATIONS AND ANNUAL SUBSCRIPTIONS,

and Gifts of clothing of every description, will be most gratefully received by MANDEVILLE B. PHILLIPS, *Secretary*, 38, TAVISTOCK PLACE, TAVISTOCK SQUARE, LONDON, W.C.

# CURATES' AUGMENTATION FUND.

This Society makes Grants of £50 a year to Curates who have been more than 15 years in Holy Orders, and are still in full active work. Of the 8,000 Curates upwards of 1,400 have been ordained more than 15 years, and this number is annually increasing.

It is the only Society in England that directly increases the stipends of Curates of long standing. The "Queen Victoria Clergy Fund" does not assist the unbeneficed clergy. Curates of 25 years' standing get from 30 to 40 per cent. less stipend than those newly ordained.

The Church is multiplying Curates **three times** as rapidly as she is multiplying benefices.

Upwards of £9,500 was voted last year in grants. Of those receiving Grants, 53 have been upwards of 30 years, and 20 upwards of 40 years in Holy Orders; the average is 29 years.

Upwards of 60 new applications last year. All strongly recommended. Council only able to deal with a small proportion of them.

## CHURCH COLLECTIONS, SUBSCRIPTIONS AND DONATIONS THANKFULLY RECEIVED.

Cheques, P.O.O., and P. Orders crossed "COUTTS & Co.," should be sent to A. G. B. ATKINSON, *Secretary*.

Office: 2, DEAN'S YARD, WESTMINSTER, S.W.

# BRITISH ORPHAN ASYLUM, SLOUGH.

**Patron**—His Majesty the King.

**Patroness**—Her Majesty Queen Alexandra.

Instituted 1827. For the Maintenance and Education of Fatherless Children from all parts of the British Empire, of all denominations, whose parents were once in prosperous circumstances. Boys and Girls are admitted by Election, Presentation, and in some cases by purchase, between the ages of 7 and 12, and are retained until 15.

The Elections take place in January and July. Forms of Application and all particulars may be obtained from the Secretary.

The Institution is unendowed, and the Committee earnestly appeal for *New Annual Subscriptions and Donations*, which are much needed. Annual Subscriptions:—For One Vote, 10s. 6d.; for Two Votes, £1 1s. Life Subscription:—For One Vote, £5 5s.; for Two Votes, £10 10s. Life Presentation, £350.

**Bankers:** MESSRS. WILLIAMS, DEACONS BANK, Limited, 20, Birchin Lane, E.C.

## Christian Literature Society for India.

*President:* THE RIGHT HON. LORD REAY, LL.D., D.Litt., G.C.S.I.  
*Chairman of Committee:* HENRY MORRIS, Esq., I.C.S. (Retd.).

**Christian  
Literature  
Society  
for  
India.**

This Work is Christ's. Will you help it?

is acknowledged to be a most important branch of Missionary work, and often goes where the Missionary cannot go.

is doing for other Missions what they could not do for themselves without much extra expenditure.

Britain's, greatest Dependency. 300 millions, Hindus and Muhammadans are committed to our care. "Give ye them to eat." "Feed My sheep."

Many people in England do not realise what moral and spiritual injury is being done by the spread of Agnostic, Theosophical and Anti-Christian literature in India and Ceylon. The enemy is sowing tares broadcast. THE CHRISTIAN LITERATURE SOCIETY is ever active, spreading Christian Truth in thirteen of the languages of India in order to counteract this evil. "The present moment is the moment for forming the character of India for good or evil."

An effort is being made to increase the funds of the Society by £1,000 annually. So urgent are the claims on the Society that, unless the subscriptions are largely increased, its work in India and Ceylon must be curtailed.

In humble reliance on God, the Committee commend the claims of this Society to the prayers and generous sympathy of British Christians.

Subscriptions and Donations will be most gratefully received and acknowledged by the Secretaries,

### *A few Facts concerning the Hospital.*

1. His Majesty the King is Patron.
2. Her late Majesty, Queen Victoria, was Patron for upwards of fifty years.
3. It was the first of its kind established in Europe.
4. It has uninterruptedly for ninety-two years carried on its work in the midst of densely populated districts of the Metropolis.
5. Many thousands of useful lives have been prolonged which, without its aid, must have succumbed to the Pulmonary Diseases so prevalent in England.
6. Patients are received from all parts of the Country.
7. Last year 640 In-Patients were treated, and the attendances of Out-Patients numbered 25,922. Medical advice, medicine, etc., are gratuitously provided for all.
8. The strictest economy is practised in all matters connected with the Hospital.

A. T. MAYS, *Secretary.*

# ST. JOHN'S HOSPITAL FOR DISEASES OF THE SKIN.

Founded 1863. Incorporated 1904.

Out-patient Department and Offices: LEICESTER SQUARE, W.C.

In-patient Department: UXBRIDGE ROAD, W.

PRESIDENT: THE EARL OF CHESTERFIELD.

VICE-PRESIDENT: THE LORD STANLEY.

**THIS HOSPITAL IS ABSOLUTELY FREE TO THE POOR.**

Patients are seen every afternoon at Leicester Square from 2 to 4, and every evening (except Saturday) from 6 to 8. The Out-patient Department has been entirely rebuilt, and contains a special Department for X Ray, Finsen, and other Electrical treatment.

# THE NATIONAL BENEVOLENT INSTITUTION,

FOUNDED BY THE LATE PETER HERVÉ.

Established 1812.

Incorporated by Royal Charter.

Under the immediate Protection and Patronage of His Most Excellent Majesty the King.

Treasurer—E. JACKSON BARRON, Esq.

This Institution was founded for the purpose of granting Annuities to distressed members of the Upper and Middle Classes of Society, who have attained the age of 60 years and upwards.

The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and Subscribers.

The sum disbursed in Pensions now amounts to upwards of £14,300 per Annum.

The total number of Aged Persons who have been supported by the Institution is 3,028, the gross sum distributed to them up to the present exceeding £619,900.

Subscriptions, from 5s. and upwards, will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily. (Saturdays 10 to 2.)

Office—65, Southampton Row, Bloomsbury, W.C.

HENRY C. LATREILLE, Secretary.

# ST. THOMAS'S HOSPITAL, THAMES EMBANKMENT, S.E.

*Serves a very large POOR POPULATION on the South of the Thames.*

There are 561 Beds for the ABSOLUTELY POOR.

There are 42 Beds in St. Thomas's Home for cases who can pay a moderate amount.

IN-PATIENTS—6,873 cases were treated in 1905.

566 cases were treated in St. Thomas's Home in 1905.

OUT-PATIENTS—78,118 were treated in 1905.

The Hospital Expenditure on Maintenance and Special Repairs amounted in 1905 to.. £57,269

The Income from Endowments, Paying Patients, &c., amounted to .. .. £50,284

Capital Expenditure on New Buildings and Structural Improvements .. .. £64,288

It is thus seen that a considerable amount in 1905 was required from VOLUNTARY CONTRIBUTIONS to maintain the Hospital in its efficiency.

Contributions to be sent to the Treasurer, J. G. WAINWRIGHT, Esq., at the Hospital; or to G. Q. ROBERTS, Secretary.

*Applications for admission to St. Thomas's Home for Paying Patients are to be sent to the Steward.*

247

# THE ROYAL HOSPITAL FOR INCURABLES, WEST HILL, PUTNEY HEATH.

INSTITUTED 1854.

Office :—4, ST. PAUL'S CHURCHYARD, E.C.

Patron:—HIS MAJESTY KING EDWARD VII.

President:—The Most Hon. THE MARQUESS OF NORTHAMPTON.

Treasurer:—HERBERT JOHN ALLCROFT, Esq., F.R.G.S.

The Board earnestly APPEAL for SUBSCRIPTIONS and DONATIONS to maintain and extend the operations of this Institution.

The work of the Royal Hospital for Incurables is twofold: it affords a Home for the most necessitous, and grants a Pension of £20 a year in cases where a Home already exists.—This Charity is National in its character: persons are received as Inmates and Pensioners from all parts of the United Kingdom.

Present number of Beneficiaries:—Inmates, nearly 250; Pensioners, over 700.

Admission is by Election of the Subscribers.

An Annual Subscriber has One Vote at each Election for Half-a-Guinea, and an additional Vote for every additional Half-Guinea.

A Life Subscriber has One Vote for Life at every Election for Five Guineas, and an additional Vote for Life for every additional Five Guineas.

A Donation entitles to Votes at the next ensuing Election, according to the amount in the ratio of four for each guinea.

The Elections are held Half-Yearly, in the months of May and November.

The Hospital may be visited any week-day between the hours of 12 and 6, Sundays, 2 to 4 p.m., by the Governors and Friends of the Institution.

Bankers:—Messrs. GLYN, MILLS, CURRIE & CO., 67, Lombard Street, E.C.

CHARLES CUTTING, Secretary.

*Contributions are earnestly solicited.*

BANKERS—MESSRS. BARCLAY & Co., LTD., 54, Lombard Street.

RICHARD C. TRESIDDER, Secretary.

# BEDFORD GRAMMAR SCHOOL.

This School was founded in the reign of King Edward VI., and endowed by Sir WILLIAM HARPER in 1566. The New Buildings, opened in 1891, are about a mile from the railway stations, and surrounded by the Playing Field of 25 acres.

The School is provided with large Chemical and Physical Laboratories.

There are excellent Workshops for Engineering Students.

There is a separate Building, with separate Playground on the School Premises, for boys in the Preparatory Department.

There are a Miniature Range, an Engineer Cadet Corps, Fives Courts, and a Rowing Club on the River Ouse, as well as the School Games on the field.

The School is divided for purposes of instruction into—

*A Classical Side*, with preparation for the Universities and Professional Examinations;

*A Civil and Military Side*, preparing for Army Entrance, Indian, and other Examinations;

*An Engineering Side*; and a *Preparatory Department* for Junior Boys.

The Fees for Day Boys are from Ten to Sixteen Guineas; for Boarders from £80 to £90 inclusive per annum.

There are Exhibitions tenable in the School, for which the Examination is held in March; and two Leaving Exhibitions of £70 and £60 are awarded annually.

***For further information apply to the Head Master.***

## GREAT CASTERTON RECTORY, STAMFORD. RUTLAND.

---

### THE REV. J. SCOTT RAMSAY, M.A.

in Honours, prepares a limited number of pupils for Army, University and Civil Service Examinations. Careful and individual attention is given to each pupil, in consequence of which many prominent successes have been gained.

Great Casterton, which is in the Cottesmore country, is one of the last Stone villages on the Great North Road, two miles beyond Stamford, and ninety-two from London. The Rectory, which is near the Church, is a large house just off the main road, though quite secluded from it. It has a southerly aspect, with some fifteen acres of grass land about it, and an excellent trout stream running through the grounds, and the neighbourhood is a healthy one. Every attention is given to delicate boys.

Recreation : Cricket, Football, Golf, Lawn Tennis, Fishing, Billiards, Badmington, etc. Riding, if desired.

Telegraph Office : Great Casterton (one word).

Tuition Fee : £250 per annum, or 80 guineas the term.

Further particulars on application to Mr. RAMSAY, Great Casterton Rectory, Stamford, Rutland.

References are kindly permitted to Major D. D. Arderne, R.A., Warborne, Lymington, Hants; Lady Brooke, Summerton, Castleknock, Ireland; Major Boyce Combe, Great Holt, Frensham, Surrey; The Earl of Devon, Kenton, Exeter; The Marquis of Exeter, Burghley House, Stamford; John Hargreaves, Esq., Templecombe House, Dorset; R. Donaldson Hudson, Esq., Cheswardine, Market Drayton, Salop; The Earl of Kingston, Kilronan Castle, Carrick-on-Shannon, Ireland; Brigadier-General A. J. Murray, C.B., D.S.O., Crowthorne, Farnborough, Hants; Arthur Clavell Salter, Esq., K.C., M.P., 26, Montagu Square, London, W.; H. L. Acland Troyte, Esq., Huntsham Court, Bampton, Devon; and Sir Augustus Webster, Bart., Battle Abbey, Sussex.

# SCHOOLS AND COLLEGES: BOYS.

## BUDLEIGH SALTERTON, DEVONSHIRE.

**PARK HOUSE PREPARATORY SCHOOL.** Mr. E. D. Martineau and Miss Martineau receive a limited number of pupils between 6 and 15 years of age for preparation for the Public Schools or for the Royal Navy.
